

DIV. INS.
U.S. NATL. MUS.**UNITED STATES DEPARTMENT OF AGRICULTURE****AGRICULTURAL RESEARCH ADMINISTRATION****BUREAU OF ENTOMOLOGY AND PLANT QUARANTINE****SERVICE AND REGULATORY ANNOUNCEMENTS****LIST OF INTERCEPTED PLANT PESTS, 1948¹**

(List of Pests Recorded During the Period July 1, 1947 to June 30, 1948, Inclusive, as Intercepted in, on, or with Plants and Plant Products Entering United States Territory)

INTRODUCTION

This report, covering the thirty-fifth year for which interception lists have been issued, summarizes the records of insect pests and plant pathogens found in, on, or with plants and plant products (1) imported, (2) offered for but refused entry, (3) held as ships' stores, etc., and hence not offered for entry through customs, (4) offered for entry for immediate export or for immediate transportation and exportation in bond, and (5) in domestic shipments between Hawaii and Puerto Rico and the mainland.

In some cases collections made late in the year are included in the report for the following year, since determinations cannot be obtained immediately for all of them. Occasionally determinations are delayed for longer periods. The data for this list are obtained from routine reports by personnel of this Bureau, supplemented by information supplied by State and Customs officials. The States of California and Florida maintain staffs of specialists who determine a large proportion of the material collected at their ports. Specialists of the Bureau of Plant Industry, Soils, and Agricultural Engineering determine many of the difficult or unusual pathogens collected at the ports.

All scientific names are reviewed by appropriate specialists in the Department to assure conformance to the international rules of nomenclature.

While every reasonable effort is made to give the correct origin for all collections listed, the alleged origin of host plant materials cannot be verified in all cases, and where there is reason to doubt the accuracy of the information, the questionable items are either omitted or the origin is listed as unknown.

During the period under consideration importations of plant propagative material have continued to arrive from various parts of the world in volumes exceeding those of prewar years. Many of these perishable plant importations arrived by air transportation and with them came living pests in considerable numbers. Formerly, many of these same pests perished on long sea voyages. This increased threat to the nation's plant life has necessitated increased vigilance on the part of all persons concerned. Fortunately, the personnel of both the commercial air lines and the military services continue to render excellent aid in the enforcement of plant quarantine regulations intended to reduce the air movement of potentially dangerous plant materials to a minimum.

INTERCEPTIONS FROM AIR-BORNE MATERIAL

Air-borne plant material arrives in mail, baggage, express, stores, and freight, and interceptions of plant pests from such material have been frequent. During the year 3,324 interceptions were made of insects arriving by air with agricultural material or as stowaways. There were 172 interceptions of plant diseases. Approximately half the plant disease organisms were not determinable to species, but, from the evidence, appeared to represent little or no risk to this country. A few of the disease organisms specifically determined but not known to be in the

¹ Compiled by W. H. Wheeler, pathologist, Judith Hunt, scientific aid, and E. P. Reagan, entomologist, Division of Foreign Plant Quarantines.

United States are, however, reported to be parasites of their hosts in foreign countries. These totals for plant disease interceptions, while not large, serve to illustrate the disease-carrying possibilities of plant materials brought to this country by air transportation. Some of the most important insects intercepted during the year were taken from host fruits and plants arriving by plane. In fact, planes are becoming the most frequent source of interception of certain notoriously destructive pests, particularly fruit flies.

Among the more important insects found in air-borne material were: The citrus blackfly (*Aleurocanthus woglumi*) on breadfruit in baggage from Jamaica, on *Bryophyllum* sp. in baggage from Bermuda, and on lime leaf in baggage from Cuba; the whitefly *Aleurothrixus myrtacei* on gardenia in baggage from Cuba; *Aleurotrachelus trachoides* on leaf of bay-rum tree in baggage from the Bahamas; *Anastrepha fraterculus* in orange in baggage from Brazil, and *A. fraterculus* (?) in guava in baggage from Colombia; the Mexican fruit fly (*A. ludens*) in mango and orange in baggage from Guatemala and Mexico, and in orange in quarters from Mexico; the West Indian fruit fly (*A. mombinpraeoptans*) in guava in baggage from Aruba and Puerto Rico, in *Ilex glabra* (gallberry) in baggage from Jamaica, in Malay-apple in baggage from the Dominican Republic, in mango in baggage from the Dominican Republic, Guatemala, Jamaica, Mexico, Nicaragua, Panama, Puerto Rico, Salvador, and Trinidad, in mango in cargo from Jamaica, in rose-apple in baggage from Jamaica, and in yellow mombin in baggage from Cuba, Nicaragua, Puerto Rico, and Salvador; *A. serpentina* in mamey in baggage from Salvador, in sapodilla in baggage from Mexico, Nicaragua, and Venezuela, and *A. serpentina* (?) in sapodilla in baggage from Costa Rica and in mamey in baggage from Salvador; *A. striata* in guava in baggage from Costa Rica and Mexico; *A. suspensa* in guava in baggage from Puerto Rico, pupae and empty pupae cases of *A. suspensa* in soil in baggage from the Dominican Republic, and *A. suspensa* (?) in guava in baggage from Cuba; the Mediterranean fruit fly (*Ceratitis capitata*) in fig in baggage from Italy, Palestine, and Portugal, in grape in stores from Portugal, in mango in baggage from Italy and Portugal, in orange in cargo from Algeria, in peach in baggage from Italy, in peach in stores from Portugal, in peach in cargo from the Union of South Africa, in persimmon in baggage from Italy, in plum in stores from Portugal, in ponderosa lemon in baggage from Spain, in pricklypear in baggage from Italy, in quince in baggage from France, Greece, and Italy, in tangerine in baggage from Palestine and Portugal, in tangerine in quarters from Portugal, and in tangerine in stores from Italy, Portugal, and Spain, and *C. capitata* (?) in apple in baggage, origin unknown, in avocado in stores from Australia, in grape in cargo from the Union of South Africa, and in pear in stores from Portugal; *C. rosa* in peach in cargo from the Union of South Africa; *Cylas formicarius* var. in sweetpotato in cargo from Siam; the olive fruit fly (*Dacus oleae*) in olive in baggage from the Azores, Greece, Italy, Portugal, and Spain; the rhododendron whitefly (*Dialeurodes chittendeni*) on leaf of rhododendron in express from England; the West Indian sweetpotato weevil (*Euscepes postfasciatus*) in sweetpotato in baggage from Puerto Rico; the Argentine ant (*Iridomyrmex humilis*) on chrysanthemum in baggage and on plum in stores from Portugal, and in soil around unidentified bulbs and plants in baggage from the Azores; *Kaloterms marginipennis* in suitcase in baggage from Guatemala; East Indian bean pod borer (*Maruca testulalis*) in pigeonpea and string bean in baggage from Puerto Rico and in string bean in cargo from New Zealand; *Monomorium destructor* on *Cattleya* sp. in baggage from Jamaica; the pink bollworm (*Pectinophora gossypiella*) in gin motes in cargo from Brazil, in cottonseed in mail from Hawaii and in baggage from Venezuela; *Rhagoletis cerasi* in cherry in baggage from Czechoslovakia, France, Italy, and Switzerland, and in stores from Portugal.

The more important plant disease organisms found on air-borne material, not believed to be established in the United States, were *Ascochyta citri* on orange in baggage from Italy and the Azores, *A. decipiens* on snapdragon in baggage from England, *Cercospora angraeci* on odontoglossum orchid in express from France, *Coleosporium dahliae* on dahlia in baggage from Mexico, *Coniothyrium diplodiella* on rose in express from France, *Cytospora lirella* on bamboo in cargo from Mexico, *Elsinoe phaseoli* on lima bean in baggage and cargo from Puerto Rico, *Gloeosporium olivarium* on olive in baggage from Italy, *Phyllosticta cymbidii* on cymbidium orchid in baggage from Japan; *P. odontoglossi* on stanhoepia orchids in baggage and cargo from Panama and Costa Rica, *Stagonospora ilicis* on English holly in baggage from England, *Uredo behnickiana* on laelia orchid in cargo from Mexico, and *U. scabies* on vanilla orchid in baggage from Nicaragua.

NOTES ON INSECTS INTERCEPTED

FRUIT FLIES

Anastrepha fraterculus was intercepted in grapefruit from Brazil and in orange from Argentina and Brazil, and *A. fraterculus* (?) in guava from Colombia and in orange from Brazil and Colombia. The Mexican fruit fly (*A. ludens*) was taken in apple, avocado, grapefruit, mango, orange, peach, pear, quince, sapote, sweet lime, undetermined seed, white sapote, and on an open deck near garbage from Mexico, in grapefruit from British Honduras, and in mango and orange from Guatemala. *A. ludens* (?) was found in mango and in orange from Mexico. The West Indian fruit fly (*A. mombinpraeoptans*) was intercepted in guava from Aruba, Cuba, and Puerto Rico, in gallberry (*Ilex glabra*) and rose-apple from Jamaica, in Malay-apple from the Dominican Republic, in mango from the Bahamas, Cuba, the Dominican Republic, Guatemala, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, Puerto Rico, Salvador, and Trinidad, in *Spondias* sp. from Nicaragua, and in yellow mombin from Cuba, Nicaragua, Puerto Rico, and Salvador, and *A. mombinpraeoptans* (?) in guava from Puerto Rico, in mango from the Canal Zone, Honduras, Mexico, Puerto Rico, and Salvador, and in yellow mombin from Salvador. *A. serpentina* was taken in mamey from Mexico and Salvador, in sapote from Salvador, and in sapodilla from Guatemala, Honduras, Mexico, Nicaragua, and Venezuela, and *A. serpentina* (?) in mamey from Salvador, and in sapodilla from Costa Rica and Venezuela. *A. striata* was found in guava from Costa Rica, Honduras, and Mexico. *A. suspensa* was taken in guava from Cuba and Puerto Rico, and in soil from the Dominican Republic. The Mediterranean fruit fly (*Ceratitis capitata*) was intercepted in apple from Argentina and Italy, in apricot from Algeria (?), in fig from the Azores, Bermuda, Italy, Palestine, and Portugal, in grape from Argentina, Portugal, and the Union of South Africa, in grapefruit from Australia, Brazil, Egypt, and Italy, in loquat from Bermuda and Italy, in mango from Egypt and Hawaii, in orange from Algeria, Argentina, Australia, Brazil, Egypt, Gold Coast, Italy, Palestine, Portugal, Spain, and Syria, in peach from Italy, Morocco, Portugal, and the Union of South Africa, in plum from Portugal, in persimmon and prickly-pear from Italy, in ponderosa lemon from Spain, in pummelo and sweet bell red pepper from Hawaii, in quince from France, Greece, Italy, and Spain, and in tangerine from Algeria, Italy, Palestine, Portugal, and Spain, and *C. capitata* (?) in avocado from Australia and Hawaii, in grape from Argentina and the Union of South Africa, in orange from France, India, Italy (?), and Spain, in pear and plum from Portugal, and in sweet lime from the Azores, in tangerine from the Azores, Italy, and Portugal, and in tomato from Hawaii. *Ceratitis rosa* was found in peach from the Union of South Africa. The melon fly (*Dacus cucurbitae*) was found in cucumber, squash, string bean, sweet bell red pepper, and tomato from Hawaii. The oriental fruit fly (*Dacus dorsalis*) was intercepted in avocado, banana, guava, longan, mango, and papaya from Hawaii, and in mango from the Philippines; and *D. dorsalis* (?) in banana, immature green coconut, and mango from Hawaii. The olive fruit fly (*Dacus oleae*) was taken in olive from the Azores, Greece, Italy, and Portugal. The celery fly (*Euleia heraclei*) was found in celery from England and Ireland, in celeriac from Denmark, and in parsley from France. *Rhagoletis alternata* was intercepted in hips of *Rosa canina* from Sweden. *R. cerasi* was taken in cherry from Czechoslovakia, France, Italy, Portugal, and Switzerland. The apple maggot (*R. pomonella*) was intercepted in apple from Mexico, and *R. pomonella* (?) in apple and thornapple from Mexico. *R. striatella* (?) was taken in husk tomato from Mexico.

INSECTS OTHER THAN FRUIT FLIES

An eriophyid mite, *Aceria tulipae*, was taken on garlic from Mexico. The citrus blackfly (*Aleurocanthus woglumi*) was intercepted on breadfruit leaf from Jamaica, on leaf of *Bryophyllum* sp. from Bermuda, on leaves of *Citrus* sp., orange, and sour lime from Mexico, and leaf of sour lime from Cuba. *Aleurothrixus myrtacei* (Aleyrodidae) was found on gardenia in baggage from Cuba. A curculionid, *Brachyrhinus porcatus*, was taken on turnip from Norway, and *B. sulcatus* (black vine weevil) was intercepted in dahlia tuber from Canada. Two curculionids, *Brachycerus albidentatus* and *B. algirus*, were taken in garlic from Italy. *Bruchidius incarnatus* (Bruchidae), a serious pest, was taken in vetch from Italy. A chrysomelid, *Cassida nebulosa*, recorded as a pest of beets, lambsquarters, and related plants, was taken with moss and forest litter around rhododendron shrubs from the Netherlands. The Asiatic rice borer (*Chilo simplex*) was intercepted in rice straw from China and in service mail arriving at San Francisco,

Calif. *Coptotermes formosanus* (a very injurious termite) was taken with water-nuts from China. The banana root borer (*Cosmopolites sordidus*) was found in banana root from Guatemala. *Cylas formicarius* was intercepted in sweet-potato from the Philippines and the Straits Settlements; and *C. puncticollis* in sweetpotato from Mozambique and Sierra Leone. *Epicaerus cognatus* (Curculionidae) was found in potato and in *Solanum* sp. (wild) from Mexico. The oriental fruit moth (*Grapholitha molesta*) was taken in apple from Japan, in apricot from Italy, and in peach from unknown origin. *Monomorium destructor*, an important economic ant, probably capable of becoming established in the warmer sections of the United States, was intercepted on *Cattleya* sp. plant from Jamaica. The pink bollworm (*Pectinophora gossypiella*) was intercepted in cottonseed from Brazil, British West Indies, Hawaii, Italy, Mexico, St. Kitts, and Venezuela, in cotton boll from Hawaii and Italy, in gin notes from Brazil, in seed cotton from Egypt, and in okra from Cyprus, Dominican Republic, and Puerto Rico. A chrysomelid, *Phyllotreta undulata*, a European species not known to be established in the United States, was found on shrubs from the Netherlands. *Premnotrypes vorax* (Curculionidae) was taken in potato from Ecuador.

SNAILS

Salvaged military equipment was on four occasions found to be contaminated with living giant African snails (*Achatina fulica*). Two of the interceptions were made at San Francisco, Calif., on material from Guam and the Marianas, and two at San Pedro, Calif., on material from the Marianas.

Other interceptions of snails, not known to occur on the mainland of the United States and injurious to agriculture, included *Bradybaena similaris*, which was found at Philadelphia, Pa., among string beans from Bermuda, and *Lemellaxis* sp. which was taken at San Diego, Calif., in soil around a potted plant from Algeria.

Correction.—On page 22 of the List of Intercepted Plant Pests for 1947 is found the name *Gnaphalocrocis medinalis* (Guen.), which should have been spelled *Cnaphalocrocis medinalis* and thus would correctly appear on page 15.

NOTES ON DISEASES INTERCEPTED

With reduction in maritime traffic between this country and India and Ceylon, following the end of the recent world conflict, interceptions of citrus canker (*Xanthomonas citri*) have fallen off. In spite of this, India, for the third year, contributed the largest number of interceptions of the disease. The Philippines followed in second place. A disease interception of considerable significance to a well-known material of commerce was a rust, *Uredo scabies*, of the vanilla orchid brought in by an air traveler from Nicaragua. The vanilla cuttings, collected in the wilds of that country, were intended for direct movement from the United States port of entry to Puerto Rico where they were expected to contribute to the vanilla industry of that island. The interception of the rust represents the first record of its occurrence north of South America. A second disease representing a threat to the citrus groves of this country, the sweet orange scab (*Elsinoe australis*), was taken five times on lemon from Argentina, Brazil, and Paraguay, seven times on sweet orange from Argentina and Brazil, and once on an unidentified citrus fruit from Brazil. A second rust of interest, *Coleosporium senecionis*, was intercepted from Argentina on the composite plant *Senecio deferens*. Pines are the alternate hosts of this pathogen and in some parts of the world suffer serious injury from its attack.

Other diseases worthy of note were a stem fungus, *Ascochyta decipiens*, of snapdragon from England; a leaf-infecting fungus, *A. fraxini*, of ash from Italy; the banana leaf spot (*Cercospora musae*) from various countries where it is known; a rust fungus, *Coleosporium dahliae*, of dahlia from Mexico; the black scale fungus (*Colletotrichum lilii*) of various species of lily bulbs from Australia, China, India, and Japan; a virulent wound parasite, *Cryptospora longispora*, of pine from New Zealand; the lima bean scab fungus (*Elsinoe phaseoli*) from Puerto Rico; the spot anthracnose fungus (*Elsinoe piri*) on pear from the Union of Soviet Socialist Republics; a fruit-rotting fungus, *Helminthosporium carposaprum*, of pepper and tomatoes from Mexico; a leaf-rotting fungus, *Heteropatella vattellinensis*, of carnation from Canada; a brown rot fungus, *Monilinia fructigena*, of apple from Sweden; a leaf blight fungus, *Mycosphaerella hondai*, of rice from China and Japan; citrus black spot (*Phoma citricarpa*) from Australia, China, India, Spain, and the Union of South Africa, on various citrus fruits including lemon, grapefruit, mandarin orange, and sweet orange; a stem canker fungus, *Phomopsis magnoliae*, on magnolia from the Netherlands; a leaf fungus, *Phyllachora balansae*, on *Cedrela* sp.

from Panama; a leaf fungus, *Phyllachora cynodontis*, of Bermuda grass from India; a branch knot-forming fungus, *Plowrightia virgultorum*, on European white birch from Sweden; a rust fungus, *Puccinia longicornis*, on bamboo from China; a twig fungus, *Sclerotinia kernerii*, on silver fir from Germany; a leaf spot fungus, *Septoria arethusa*, on lemon from Argentina; a leaf blotch fungus, *Septoria cercosporioides*, on chrysanthemum from Mexico; a leaf blotch fungus, *Septoria posekensis*, on cymbidium and cypripedium orchids from India; the Australian citrus scab fungus (*Sphaceloma fawcettii scabiosa*) on lemon from Australia; a smut fungus, *Sphacelotheca trachypogonis*, of crinkleawn grass from Brazil; a rust fungus, *Sphenospora kevorkianii*, on stanhoepia orchid from Ecuador; a rust fungus, *Thecopsora areolata*, on the European birdcherry from Finland; a rust fungus, *Uredo ignava*, on bamboo from China, and an unknown source; a rust fungus, *Uromyces bacumerlianus*, on sweet clover from Egypt; and a smut fungus, *Ustilago kenjiana*, on sorghum from Arabia.

Nematodes of interest for the year were *Aphelenchoides bicaudatus* in dasheen tubers from Cyprus; *A. parietinus* in lily bulb from England; *A. ritzemabosi* in garlic from Mexico; *A. subterruis* in narcissus bulb from the Netherlands; *Ditylenchus dipsaci* in garlic from Mexico, colchicum from the Netherlands, narcissus from England, and Star-of-Bethlehem from the Netherlands; *D. iridis* in colchicum, crocus, iris, and tigridia from the Netherlands, and in iris from England; and *Pratylenchus scribneri* in potato tubers from Mexico.

Of the 1,157 species of pathogens or other organisms listed in the table, 60 were new to the interception files. Interceptions of the other 1,097 pathogens showed 117 new countries of origin and 102 new hosts.

COMMON PESTS INTERCEPTED

Beginning with the year covered by this report the keeping of records on the various insects and plant diseases reported under this heading has been discontinued. Those insects and diseases were, in nearly all instances, widely distributed in the regions in this country favorable to their existence, and in many cases the interception records compiled through the years showed the same pests to be of almost universal occurrence in countries from which certain plants and plant products come to this country. The discontinuance of the records on these common pests considerably reduces the total number of pests reported in the list, but it is believed this compilation will be of even more use in its present form.

INCOMPLETELY DETERMINED PESTS

Frequently inspectors find insects or pathogens affecting plant material in such a stage or condition that complete and accurate determination is impracticable or impossible. Some of these insects and pathogens are without doubt new to science, and may be destructive pests. The notes below are given to show the general nature of such incompletely determined interceptions.

INSECTS

Among the incompletely determined insects intercepted were the following fruit flies: *Anastrepha* sp., probably *fraterculus*, at New York, N. Y., in grapefruit in stores from Brazil, at Baltimore, Md., in orange in quarters and stores from Brazil, at Mobile, Ala., in baggage from Brazil, at New York in stores from Brazil, at Miami, Fla., in coffee berries in baggage from Colombia, and at the National Airport, Arlington, Va., in guava in baggage from Peru; *Anastrepha* sp., probably *mombinpraeoptans*, at New York in guava in baggage from Puerto Rico, at New Orleans, La., in mango in baggage from Guatemala, at Galveston, Tex., in mango in quarters from Guatemala, at Brownsville, Tex., in mango in express from Salvador, and at El Paso, Tex., in mango in baggage from Salvador; *Anastrepha* sp., probably *serpentina*, at New Orleans, La., in sapodilla in baggage from Venezuela; *Anastrepha* sp., possibly *striata*, at Laredo, Tex., in guava in baggage from Mexico; *Anastrepha* sp., probably *suspensa*, at Miami, Fla., in guava in baggage from Puerto Rico, and at New York in paper wrapping of guavas, cashew, and gooseberries in stores from the Dominican Republic; *Anastrepha* sp. at New Orleans, La., in sapodilla in baggage from Costa Rica and in almond and orange in quarters from Guatemala, at New York in sapodilla in baggage from Puerto Rico, in grapefruit and orange in stores and in peach and guava in baggage from Brazil, in mango in baggage from Dutch Guiana and Guatemala, in *Spondias* sp. in baggage from Trinidad, in guava in baggage and mail from Puerto Rico and in guava in baggage from Venezuela, at San Antonio,

Tex., in mango in baggage from Guatemala, at Charleston, S. C., in guava in baggage from Dutch Guiana, at Brownsville, Tex., mango and quince in baggage from Mexico, at Miami, Fla., in genip and quince in baggage from Peru and in mango in baggage from Colombia and Jamaica, at the National Airport, Arlington, Va., in orange in baggage from Brazil, at San Juan, P. R., in orange in baggage from Brazil, at Seattle, Wash., in mango in stores from Peru, at Boston, Mass., in orange in stores from Brazil, at El Paso, Tex., in mango and guava in baggage from Mexico and in guava in baggage from Salvador, at Baltimore, Md., in orange in stores and in plum in quarters from Brazil and in grapefruit in stores from Trinidad, at Mobile, Ala., in orange in baggage from Brazil, at Galveston, Tex., in orange in stores and quarters from Brazil, at Philadelphia, Pa., in pummelo in stores from Brazil and in grapefruit in stores from Argentina; probably *Anastrepha* sp. at Norfolk, Va., in orange in stores from Argentina, and a pupa of *Anastrepha* sp. in a bag of fruit from British Honduras; *Ceratitidis* sp. at New York in orange in stores, and in grape in cargo from the Union of South Africa; *Ceratitidis* sp. (?) at New York in apple in stores from the Union of South Africa; *Dacus* sp. at New York in cucumber in stores from the Union of South Africa; *Dacus* sp. (?) at Honolulu, T. H., in fruit of *Ficus* sp. in baggage from the Philippines and in mango in baggage from India; *Rhagoletis* sp. at Hidalgo, Tex., in black walnut in baggage, at El Paso, Tex., in *Lycium berlandieri* and *Lycium* sp. in baggage from Mexico; *Rhagoletis* sp. (?) at Washington, D. C., in fruit of *Solanum* sp. in mail from Mexico. Eight interceptions which could not be identified beyond family (Tephritidae) were taken at Boston, Mass., in coconut in baggage from Liberia, at El Paso, Tex., in *Lycium* sp. in baggage from Mexico, at San Pedro, Calif., in coffee berry in baggage from Hawaii, and at New York in orange in stores from Brazil and in grape in cargo from Argentina.

The following miscellaneous insects of special interest were intercepted: *Aleurocanthus* sp. (Aleyrodidae), apparently undescribed, on bamboo leaf in stores from India or China; Aleurodicinae (Aleyrodidae), new genus and new species, near *Aleurodicus*, at Laredo, Tex., on *Laelia majalis* and *Laelia* sp. from Mexico; *Aleuroplatus* sp., near *variegatus* Q. & B., (Aleyrodidae) at San Francisco, Calif., on *Philodendron* sp. in air express from Guatemala; *Aleurotrachelus* sp. (Aleyrodidae), apparently undescribed, at Miami, Fla., on *Anthurium* sp. leaf in cargo from Colombia; *Aximogastra* (new) sp. (Eurytomidae) at Laredo, Tex., on orchid and philodendron in cargo from Mexico; probably an undescribed coccid, *Conchaspis* sp., at Hoboken, N. J., on *Xylobium* sp. (orchid) in mail from the Canal Zone; two curculionids, *Conotrachelus* sp., near *carinifer* Csy., and *Conotrachelus* sp., near *naso* Lec., at Brownsville, Tex., on *Laelia* sp. in cargo from Mexico; *Hololepia* sp. (Histeridae), not native to the United States, at Brownsville, Tex., on *Laelia majalis* in cargo from Mexico; *Leptispa* sp., probably *godwini* Baly (Chrysomelidae), probably capable of becoming a pest in this country if it could establish itself on a suitable host, at New York on bamboo in stores from India or China; *Meibomeus* sp. (Bruchidae), probably new species, at Washington, D. C., in *Desmodium* sp. in mail from Argentina; *Parallelodiplosis* sp. (Itonididae) at Brownsville, Tex., on orchid plant in cargo from Salvador; probably an undescribed species of *Stephanoderes* sp. (Scolytidae) at Nogales, Ariz., in *Acacia cochliacantha* in baggage from Mexico; an interesting and rare mite, *Zercon* sp., at Hoboken, N. J., on magnolia branch in cargo from the Netherlands.

There were 3,559 interceptions distributed among 852 genera, which could be identified to genus only. A total of 111 could be determined to family only.

A total of 3,670 incompletely determined insects were intercepted during the year.

DISEASES

Among the incompletely determined plant disease organisms collected from incoming material during the year were *Cercospora* sp. on euonymus from Japan; *Cercospora* sp. on avocado from Mexico; *Curvularia* sp. on onion from Mexico; *Cytospora* sp. on camellia from Australia; *Cylindrosporium* sp. on rose from the Netherlands; *Gnomonia* sp. on willow from England; *Graphiola* sp. on palm from the Fiji Islands; *Helminthosporium* sp. on rice from China, and Japan; *Helminthosporium* sp. on rye from India; "Leprosis" on sweet orange from Mexico; *Pestalotia* sp. on sorghum from Liberia; *Ozonium* sp. on licorice stem from Turkey; *Phoma* sp. on sweet orange from Brazil; *Phoma* sp. on apple from Greece; *Phyllachora* sp. on grass from China; *Phyllosticta* sp. on lily bulb from Australia; *Phyllosticta* sp. on narcissus from Ireland; *Phyllosticta* sp. on avocado from Mexico; *Septoria* sp. on anthurium from Belgium; *Sphaeropsis* sp. on lemon from Italy, and *Sphenospora* sp. on *Odontoglossum cervantes* (orchid) from Mexico.

Nematode interceptions of interest were *Aphelenchoides* sp. in lily bulbs from Mexico and the Netherlands; *Aphelenchoides* sp. in potato tuber from Mexico; *Aphelenchoides* sp. in roots of unidentified vine growing on war equipment returned from Okinawa; *Aphelenchus* sp. in garlic and onion from Mexico; *Meta-aphelenchus* sp. in potato tuber from Mexico; *Pratylenchus* sp. and *Tylenchus* sp. in dasheen tuber from Cyprus; *Tylenchus* sp. in soil with orchid from British Guiana; and *Tylenchus* sp. in potato from France.

A total of 285 incompletely determined pathogens were recorded during the year.

Geographic summary of interceptions listed in main table and interception totals

Country	Insect	Disease	Country	Insect	Disease
	Number	Number		Number	Number
Africa:			Union of Soviet Socialist Republics	0	3

Orchid	do	1	2	2	Tex.

Hosts and insects

ACACIA:

Mimosestes sallaei (Coleoptera)
Xyleborus testaceus (Coleoptera)

ACER:

Parlatoria theae (Homoptera)
Periphyllus horridus (?) (Homoptera)

ACHIMENES:

Hofmannophila pseudospretella (Lepidoptera)

ACHRAS:

Asterolecanium pustulans (Homoptera)
Anastrepha serpentina (Diptera)
Coccus viridis (Homoptera)
Vinsonia stellifera (Homoptera)
Zamagiria deia (Lepidoptera)

AERIDES:

Callispa duodecimmaculata (Coleoptera)

AGERATUM:

Trialeurodes vaporariorum (Homoptera)

ALLIUM SATIVUM:

Aceria tulipae (Acarina)
Brachycerus albidentatus (Coleoptera)
Brachycerus alpinus (Coleoptera)

ALYXIA:

Ceroptastes rubens (Homoptera)
Lepidosaphes uniloba (Homoptera)

ANANAS:

Alpheias conspirata (Lepidoptera)
Ereunetes flavistrata (Lepidoptera)
Lyctus caribeanus (Coleoptera)
Metamasius sericeus carbonarius (Coleoptera)
Olibrus submaculatus (Coleoptera)
Phyllophaga alquizarra (Coleoptera)
Platoceticus symmicta (Lepidoptera)
Platynota rostrana (Lepidoptera)
Pseudococcus palmarum (Homoptera)
Ribua innazia (Lepidoptera)
Samnites contractus (Hemiptera)
"Targionia" bromilinae (Homoptera)

ANEMONE:

Nemopogon granella (Lepidoptera)

ANNONA:

Aspidiotus destructor (Homoptera)
Stenomoma anonella (Lepidoptera)
Talponia batist (Lepidoptera)

ANTHURIUM:

Pinnaspis buxi (Homoptera)
Protopulvinaria longivalvata (Homoptera)

ANTIDESMA:

Vinsonia stellifera (Homoptera)

ANTIRRHINUM:

Frankliniella insularis (Thysanoptera)

APIUM:

Barathra brassicae (Lepidoptera)
Euleia heraclei (Diptera)
Lixus mucronatus (Coleoptera)
Psila rosae (Diptera)

ARACEAE:

Chrysomphalus nigropunctatus (Homoptera)

ARECA:

Setomorpha rutella (Lepidoptera)

ARTOCARPUS:

Aleurocanthus woglumi (Thysanoptera)

ASPASIA:

Vinsonia stellifera (Homoptera)

BAMBOO:

Amphicerus cornutus (Coleoptera)
Asterolecanium bambusae (Homoptera)
Dinoderus brevis (Coleoptera)
Dinoderus pilifrons (Coleoptera)
Eucalandra setulosa (Coleoptera)
Xylbiops parilis (Coleoptera)

BETA VULGARIS:

Cassida vittata (Coleoptera)
Mecinus pyrastrer (Coleoptera)

BETA VULGARIS CICLA:

Conotrachelus seniculus (Coleoptera)
Creontiades femoralis (Hemiptera)

BORASSUS:

Halimococcus borassi (Homoptera)

BRASSA VOLA:

Furcaspis biformis (Homoptera)
Pseudischnaspis alienus (Homoptera)

BRASSICA OLERACEA BOTRYTIS:

Egergestis forficatis (Lepidoptera)
Nysius raphanus (Hemiptera)

Phyllotreta cruciferae (Coleoptera)

BRASSICA OLERACEA CAPITATA:

Elaphria chalcidion (Lepidoptera)
Egergestis forficatis (Lepidoptera)

Nysius minutus (Hemiptera)

Nysius stimulans (Hemiptera)

Phyllotreta cruciferae (Coleoptera)

Pteris brassicae (Lepidoptera)

BRASSICA RAPA:

Brachyrhinus porcaus (Coleoptera)
Hellula phidilealis (Lepidoptera)
Loxostege similis (Lepidoptera)
Lygus elisus (Hemiptera)

Hosts and insects—Continued

BRASSICA RAPA—Continued

Nysius minutus (Hemiptera)*Nysius raphanus* (Hemiptera)*Psila rosae* (Diptera)

BRASSICA SP. (mustard)

Barathra brassicae (Lepidoptera)*Cyrtopeltis varians* (Hemiptera)*Ebergestis rimosalis* (Lepidoptera)*Loxostege stimalis* (Lepidoptera)*Nabis alternatus* (Hemiptera)*Nysius minutus* (Hemiptera)*Nysius raphanus* (Hemiptera)

BROMELIA:

Crophilus scabrosus (Hemiptera)

BROUGHTONIA:

Vinsonia stellifera (Homoptera)

BRYOPHYLLUM:

Aleurocanthus woglumi (Homoptera)

CACTUS:

Lepidosaphes philococcus (Homoptera)*Mimorista flavidissimalis* (Lepidoptera)*Moneilema ebenus* var. (Coleoptera)*Nysius calliger* (Hemiptera)*Ogdocoeca biannularis* (Coleoptera)*Sitonaotus luteiceps* (Hemiptera)

CAESALPINIA:

Mimosestes dominicana (Coleoptera)

CAJANUS:

Acanthoscelides armitagei (Coleoptera)*Ancylostoma stercora* (Lepidoptera)*Callosobruchus chinensis* (Coleoptera)*Callosobruchus maculatus* (Coleoptera)*Diaprepes abbreviatus* (Coleoptera)*Elasmopalpus lignosellus* (Lepidoptera)*Fundella pellucens* (Lepidoptera)*Maruca testulalis* (Lepidoptera)*Platynota rostrana* (?) (Lepidoptera)*Sphenarches caffer* (Lepidoptera)*Thyanta perditor* (Hemiptera)

CALADIUM:

Corcyra cephalonica (Lepidoptera)

CALLUNA:

Chaetarthria seminulum (Coleoptera)

CALOCARPUM:

Anastrepha serpentina (Diptera)

CAMELLIA:

Aspidiotus degeneratus (Homoptera)*Ceroplastes ceriferus* (Homoptera)*Ceroplastes japonicus* (Homoptera)*Parlatoria camelliae* (Homoptera)

CANAVALLA:

Haplothrips gowdeyi (Thysanoptera)*Lampides boeticus* (Lepidoptera)*Maruca testulalis* (Lepidoptera)*Taeniothrips hawaiiensis* (Thysanoptera)

CANNABIS:

Coptorhynchus iliganus (Coleoptera)

CAPSICUM:

Ceratitis capitata (Diptera)*Cyrtocapsus caliginus* (Hemiptera)*Dacus cucurbitae* (Diptera)*Estigmene acrea* (Lepidoptera)*Exptochiomera albomaculata* (Hemiptera)*Gnorimoschema gudmannella* (Lepidoptera)*Ligyrocotis abdominalis* (Hemiptera)*Ligyrocotis nitidicollis* (Hemiptera)*Liriomyza pusilla* (Diptera)*Platynota rostrana* (Lepidoptera)*Platynota stultana* (Lepidoptera)*Prodenia eridania* (Lepidoptera)*Pyrausta nubilalis* (Lepidoptera)

CARICA:

Aonidiella inornata (Homoptera)*Dacus dorsalis* (Diptera)

CASIMIROA:

Anastrepha ludens (Diptera)

CASSIA:

Caryedon fuscus (Coleoptera)*Pseudodiaspis yuccae* (Homoptera)

CASTANEA:

Curculio elephas (Coleoptera)*Laspeyresia splendana* (Lepidoptera)*Phymatodes lividus* (Coleoptera)

CATASETUM:

Stephanoderes lecontei (Coleoptera)

CATTLEYA:

Amyssonotum rastratum flexum (Hemiptera)*Asterolecanium epidendri* (Homoptera)*Autoserica castanea* (Coleoptera)*Chrysomphalus tenax* (Homoptera)*Clerada apicornis* (Hemiptera)*Coccus pseudohesperidum* (Homoptera)*Conchaspis angraci* (Homoptera)*Cryphula apicatus* (Hemiptera)*Eurytoma orchidearum* (Hymenoptera)*Furcaspis biformis* (Homoptera)*Heraeus cincticornis* (Hemiptera)*Lecanodiaspis dendrobii* (Homoptera)*Lygaeus guatemalanus* (Hemiptera)*Lygaeus vitticulus* (Hemiptera)*Mecolaemus carvalhoi* (Hemiptera)*Microtheca ochroloma* (Coleoptera)*Monomorium destructor* (Hymenoptera)*Mormidea v-luteum* (Hemiptera)*Protopulcinaria longivalvata* (Homoptera)*Pseudischaspis alienus* (Homoptera)*Tenthecoris bicolor* (Hemiptera)*Tenthecoris columbiensis* (Hemiptera)*Tenthecoris confusus* (Hemiptera)*Tenthecoris exitiosus* (Hemiptera)*Tenthecoris venezuelensis* (Hemiptera)

CEREUS:

Cactobrosis longipennella (Lepidoptera)

CHRYSAETHRUM:

Amorbia emigratella (Lepidoptera)*Anuraphis helichrysi* (Homoptera)*Aphis medicaginis* (Homoptera)*Disomyia leptolineata texana* (Coleoptera)*Exptochiomera oblonga* (Hemiptera)*Franklinothrips vespiformis* (Thysanoptera)*Geocoris flavilineus* (Hemiptera)*Iridomyrmex humilis* (Hymenoptera)*Ligyrocotis aurivilliana* (Hemiptera)*Lygus oblineatus* (Hemiptera)*Nysius raphanus* (Hemiptera)*Synchlora aerata* (Lepidoptera)*Zabrotes subfasciatus* (Coleoptera)

CICER:

Callosobruchus chinensis (Coleoptera)*Callosobruchus maculatus* (Coleoptera)*Corcyra cephalonica* (Lepidoptera)

CICHORIUM:

Napomyza lateralis (Diptera)*Phylomyza atricornis* (Diptera)*Thrips angusticeps* (Thysanoptera)

CITRUS AURANTIFOLIA:

Aleurocanthus woglumi (Homoptera)*Anastrepha ludens* (Diptera)*Ceratitidis capitata* (?) (Diptera)*Chrysomphalus scutiformis* (Homoptera)*Coccus viridis* (Homoptera)*Dysdercus mimulus* (Hemiptera)*Leucaspis cockerelli* (Homoptera)*Parlatoria cinerea* (Homoptera)*Parlatoria zizyphus* (Homoptera)*Pseudonidia trilobitiformis* (Homoptera)

CITRUS GRANDIS:

Ceratitidis capitata (Diptera)*Leucaspis cockerelli* (Homoptera)*Morganella longispina* (Homoptera)*Parlatoria cinerea* (Homoptera)*Parlatoria citri* (Homoptera)*Parlatoria zizyphus* (Homoptera)

CITRUS LIMON:

Leucaspis cockerelli (Homoptera)*Pseudonidia trilobitiformis* (Homoptera)

CITRUS LIMON PONDEROSA:

Ceratitidis capitata (Diptera)

CITRUS PARADISE:

Anastrepha fraterculus (Diptera)*Anastrepha ludens* (Diptera)*Aonidiella citrina* (Homoptera)*Ceratitidis capitata* (Diptera)*Chrysomphalus personatus* (Homoptera)*Leucaspis cockerelli* (Homoptera)*Parlatoria cinerea* (Homoptera)*Parlatoria zizyphus* (Homoptera)*Unaspis citri* (Homoptera)

CITRUS RETICULATA:

Ceratitidis capitata (Diptera)*Parlatoria zizyphus* (Homoptera)*Unaspis yamonnensis* (Homoptera)

Hosts and insects—Continued

CITRUS SINENSIS:

- Aleurocanthus woglumi* (Homoptera)
- Aleurotrachelus citri* (Homoptera)
- Anastrepha fraterculus* (Diptera)
- Anastrepha ludens* (Diptera)
- Aspidiotus excrucians* (Homoptera)
- Aspidiotus palmarum* (Homoptera)
- Ceratitidis capitata* (Diptera)
- Chrysomphalus personatus* (Homoptera)
- Leucaspis cockerelli* (Homoptera)
- Paraleyrodes singularis* (?) (Homoptera)
- Parlatoria cinerea* (Homoptera)
- Parlatoria zizyphi* (Homoptera)
- Tetraleyrodes mori* (Homoptera)
- Unaspis citri* (Homoptera)

CITRUS SP.:

- Aleurocanthus woglumi* (Homoptera)
- Aleurothrixus floccosus* (Homoptera)
- Aleurotuberculatus auriculae* (Homoptera)
- Ceroplastes japonicus* (Homoptera)
- Ceroplastes rubens* (Homoptera)
- Coccus viridis* (Homoptera)
- Dialeurodes citrifolii* (Homoptera)
- Paraleyrodes naramiae* (Homoptera)
- Tetraleyrodes mori* (Homoptera)
- Unaspis citri* (Homoptera)
- Vinsonia stellifera* (Homoptera)

COCOS:

- Aonidiella inornata* (Homoptera)
- Aspidiotus coryphae* (Homoptera)
- Aspidiotus destructor* (Homoptera)
- Aspidiotus spinosus* (Homoptera)
- Chrysomphalus albopictus* (Homoptera)
- Chrysomphalus personatus* (Homoptera)
- Dacus dorsalis* (?) (Diptera)
- Furcaspis oceanicus* (Homoptera)
- Phenacaspis sandwicensis* (?) (Homoptera)
- Pseudococcus palmarum* (Homoptera)

CODIAEUM:

- Asterolecanium pustulans* (Homoptera)
- Coccus copparidis* (Homoptera)
- Lepidosaphes tokionis* (Homoptera)
- Parlatoria crotonis* (Homoptera)

COFFEA:

- Coccus viridis* (Homoptera)

CORIANDRUM:

- Cardioscarta miniaticeps* (Homoptera)
- Systole geniculata* (Hymenoptera)

CORYPHANTHA:

- Gerstaeckeria bifasciata* (Coleoptera)

CRATAEGUS:

- Acalypta musci* (Hemiptera)
- Apion flavipes* (Coleoptera)
- Grapholitha packardii* (Lepidoptera)
- Gymnaetron becabunae nigrum* (Coleoptera)
- Hypera pedestris* (Coleoptera)
- Hypera rumicis* (Coleoptera)
- Lema cyanella* (Coleoptera)
- Lema melanopa* (Coleoptera)
- Phyllotreta atra* (Coleoptera)
- Phyllotreta undulata* (Coleoptera)
- Phytobius quadrilobulatus* (Coleoptera)
- Rhagoletis pomonella* (?) (Diptera)
- Rhinoncus bruchoides* (Coleoptera)
- Rhynchonellus fagi* (Coleoptera)
- Rufidosoma fallax* (Coleoptera)

CROCUS:

- Rhopalosiphoninus tulipaella* (Homoptera)

CRYPTOMERIA:

- Aspidiotus cryptomeriae* (Homoptera)

CUCUMIS:

- Dacus cucurbitae* (Diptera)
- Diaphania nitidalis* (Lepidoptera)

CUCURBITA:

- Dacus cucurbitae* (Diptera)
- Diaphania hyalinata* (Lepidoptera)
- Diaphania nitidalis* (Lepidoptera)

CUPRESSUS:

- "*Poliaspis*" *pini* (Homoptera)

CYDONIA:

- Anastrepha ludens* (Diptera)
- Aspidiotus diffinis* (Homoptera)
- Ceratitidis capitata* (Diptera)

CYMBIDIUM:

- Eutornicus congener* (Coleoptera)
- Furcaspis biformis* (Homoptera)
- Lepidosaphes tuberculata* (Homoptera)
- Lethaeus aeruginosus* (Hemiptera)

CYMBIDIUM—Continued

- Pseudonidia curculiginis* (Homoptera)

CYNARA:

- Apion carduorum* (Coleoptera)
- Psila rosae* (Diptera)

CYPRIPEDIUM:

- Coccus capparidis* (Homoptera)

CYTISUS:

- Sparticus villosus* (Coleoptera)

DAHIA:

- Brachyrhinus sulcatus* (Coleoptera)
- Prodenia ornithogalli* (Lepidoptera)
- Tetraleyrodes mori* (Homoptera)

DAISY:

- Chlorochroa ligata* (Hemiptera)

DALBERGIA:

- Nasutitermes corniger* (Isoptera)

DAUCUS:

- Phalonia zephyrana* (Lepidoptera)

DENDROBIUM:

- Ferrisiana virgata* (Homoptera)

DIANTHUS:

- Anuraphis helichrysi* (Homoptera)
- Forficula auricularia* (Dermaptera)
- Haplothrips cotti* (Thysanoptera)
- Sericophanes ocellatus* (Hemiptera)
- Strophosoma melanogramma* (Coleoptera)
- Thrips fuscipectus* (Thysanoptera)

DIOSCOREA:

- Palaeopus costicollis* (Coleoptera)
- "*Targionia*" *hartii* (Homoptera)

DIOSPYROS:

- Ceratitidis capitata* (Diptera)

DRYOPTERIS:

- Acalypta nycalis* (Hemiptera)

ECHEVERIA:

- Chrysobothris mali* (Coleoptera)
- Eumysia stigmella* (Lepidoptera)

ECHINOCEREUS:

- Ferrisiana virgata* (Homoptera)

ELEOCHARIS:

- Coptotermes formosanus* (Isoptera)

EPIDENDRUM:

- Asterolecanium epidendri* (Homoptera)
- Chrysomphalus nigropunctatus* (Homoptera)
- Chrysomphalus umboniferus* (Homoptera)
- Cleogonus armatus* (Coleoptera)
- Conchaspis angraci* (Homoptera)
- Crophius scabrosus* (Hemiptera)
- Forficula auricularia* (Dermaptera)
- Furcaspis biformis* (Homoptera)
- Pseudoschnaspis alienus* (Homoptera)
- Tenthetoris distinguendus* (Hemiptera)
- Vinsonia stellifera* (Homoptera)
- Zygogramma piceicollis* (Coleoptera)

ERICA:

- Taeniothrips ericae* (Thysanoptera)

ERIOBOTRYA:

- Ceratitidis capitata* (Diptera)

ERYTHRINA:

- Corcyra cephalonica* (Lepidoptera)
- Specularius impressithorax* (Coleoptera)

EUGENIA:

- Anastrepha mombinpraeoptans* (Diptera)

EUONYMUS:

- Unaspis euonymi* (Homoptera)

EUPHORBIA:

- Liriomyza pusilla* (Diptera)

- Ferrisiana virgata* (Homoptera)

EUPHORIA:

- Dacus dorsalis* (Diptera)

FICUS:

- Ceratitidis capitata* (Diptera)
- Ceroplastes ruscii* (Homoptera)
- Lepidosaphes ficus* (Homoptera)

FRAXINUS:

- Eurytoma crassineura* (Hymenoptera)
- Leperisinus fraxini* (Coleoptera)

GARDENIA:

- Aleurocanthus woglumi* (Homoptera)
- Aleuroparadoxus gardeniae* (Homoptera)
- Aleurothrixus myrtacei* (Homoptera)
- Ceroplastes rubens* (Homoptera)
- Coccus viridis* (Homoptera)
- Eucalymnatus tessellatus* (Homoptera)
- Ferrisiana virgata* (Homoptera)
- Protopulvinaria longivalvata* (Homoptera)

Hosts and insects—Continued

GARDENIA—Continued

- Protopulvinaria pyriformis* (Homoptera)
Taeniothrips hawaiiensis (Thysanoptera)

GENISTA:

- Haplothrips gowdeyi* (Thysanoptera)

GLADIOLUS:

- Chirothrips manicatus* (Thysanoptera)
Nemopogon granella (Lepidoptera)
Polydortomyia curripes (Diptera)
Taeniothrips simplex (Thysanoptera)

GONGORA:

- Vinsonia stellifera* (Homoptera)

GOSSYPIUM:

- Corcyra cephalonica* (Lepidoptera)
Pectinophora gossypiella (Lepidoptera)
Sinozylon anale (Coleoptera)
Stenogrinum quadrinotatum (Coleoptera)

GRAMINEAE:

- Antonina graminis* (Homoptera)
"Targionia" sacchari (Homoptera)

GYNERIUM:

- "Targionia" sacchari* (Homoptera)

HEDYSARUM:

- Bruchidius gilvus* (Coleoptera)

HELICHRYSUM:

- Ferrisiana virgata* (Homoptera)

HERITIERA:

- Cyamobolus palawanicus* (Coleoptera)

HIBISCUS:

- Callosobruchus maculatus* (Coleoptera)
Ferrisiana virgata (Homoptera)
Pealius hibisci (Homoptera)
Pectinophora gossypiella (Lepidoptera)
Phenacoccus gossypii (Homoptera)
Pseudanodina clavifera (Homoptera)
Tetraleurodes mori (Homoptera)

HYACINTHUS:

- Forficula auricularia* (Dermaptera)

ILEX:

- Anastrepha mombinpraepotans* (Diptera)

IPOMOEA:

- Cylas formicarius* (Coleoptera)
Cylas formicarius subspecies (?) (Coleoptera)
Cylas formicarius var. (Coleoptera)
Cylas formicarius elegantulus (Coleoptera)
Cylas puncticollis (Coleoptera)
Euscepes postfasciatus (Coleoptera)
Megacerus contaminatus (Coleoptera)
Phenacoccus gossypii (Homoptera)

IRESINE:

- Ceroplastes cirripediformis* (Homoptera)

IRIS:

- Endrosis lactella* (Lepidoptera)

JASMINUM:

- Aonidiella citrina* (Homoptera)

JUNIPERUS:

- Lepidosaphes pallida* (Homoptera)
Raphidopalpa femoralis (Coleoptera)

KERRIA:

- Allantus cinctus* (Hymenoptera)

KHAYA:

- Cordylomera spinicornis* (Coleoptera)
Fulvius oxycarenoides (Hemiptera)

LABURNUM:

- Sparteus villosus* (Coleoptera)

LAELIA:

- Acroleucus vicinalis* (Hemiptera)
Asterolecanium epidendri (Homoptera)
Calligrapha diversa (Coleoptera)
Chrysomphalus nigropunctatus (Homoptera)
Coccus pseudohesperidum (Homoptera)
Crophius costatus (Hemiptera)
Crophius scabrosus (Hemiptera)
Diorymerellus laetmargo (Coleoptera)
Dysdercus minutus (Hemiptera)
Epilachna varipestis (Coleoptera)
Eurytoma orchidearum (Hymenoptera)
Epitochiomeria albomaculata (Hemiptera)
Heteraeus guttatus (Hemiptera)
Ligyrocoris abdominalis (Hemiptera)
Ozophora consanguineus (Hemiptera)
Phelypera distigma (Coleoptera)
Pseudischinaspis alienus (Homoptera)
Reticulitermes flavipes (Isoptera)
Tempyra biguttula (Hemiptera)
Tenthecoris angustimarginatus (Hemiptera)
Tenthecoris bicolor (Hemiptera)

LAELIA—Continued

- Tenthecoris confusus* (Hemiptera)
Zygogramma picetollis (Coleoptera)

LARIX:

- Ceroplastes japonicus* (Homoptera)

LATHYRUS:

- Bruchus tristictulus* (Coleoptera)
Callosobruchus chinensis (Coleoptera)
Nysius minutus (Hemiptera)
Pantomorus godmani (Coleoptera)

LAURACEAE:

- Aleuroglanululus emmae* (Homoptera)

LAURUS:

- Pantomorus godmani* (Coleoptera)
Protopulvinaria pyriformis (Homoptera)
Vinsonia stellifera (Homoptera)

LAVANDULA:

- Acalypta platychila* (Hemiptera)
Hofmannophila pseudospretella (Lepidoptera)

LENS:

- Bruchus ervi* (Coleoptera)
Bruchus lentis (Coleoptera)
Bruchus signaticornis (Coleoptera)
Bruchus ulicis (Coleoptera)

LILIUM:

- Liothrips naneckei* (Thysanoptera)
Ferrisiana virgata (Homoptera)
Setomorpha rutella (Lepidoptera)
Teranonus spatulatus (Homoptera)

LIMONIUM:

- Lygus oblineatus* (Hemiptera)

LIVISTONA:

- Aspidiotus destructor* (Homoptera)

LYCASTE:

- Eucacophagus aurocinctus* (Coleoptera)
Plagiodera atritarsis (Coleoptera)

LYCOPERSICON:

- Anelaphus truncatus* (Coleoptera)
Arvelius albopunctatus (Hemiptera)
Ceratitis capitata (?) (Diptera)
Cyrtopeltis varians (Hemiptera)
Dacus cucurbitae (Diptera)
Dysdercus minutus (Hemiptera)
Epitochiomeria albomaculata (Hemiptera)
Japetus sphaeroides (Hemiptera)
Ligyrocoris abdominalis (Hemiptera)
Ligyrocoris aurivilliana (Hemiptera)
Lineodes integra (Lepidoptera)
Neoleucinodes elegantalis (Lepidoptera)
Physonota attenuata (Coleoptera)
Platynota rostrana (Lepidoptera)
Platynota stultana (Lepidoptera)
Zabrotes subfasciatus (Coleoptera)

MALUS:

- Anastrepha ludens* (Diptera)
Carposina sasakii (Lepidoptera)
Ceratitis capitata (Diptera)
Grapholitha molesta (Lepidoptera)
Lecanium coryli (Homoptera)
Myeloides ceratoniae (Lepidoptera)
Parlatoria oleae (Homoptera)
Rhagoletis pomonella (Diptera)
Sitona lineata (Coleoptera)
Typhlocyba froggatti (Homoptera)

MAMMEA:

- Anastrepha serpentina* (Diptera)
Aspidiotus spinosus (Homoptera)

MAMMILLARIA:

- Gerstaeckeria mutilaria* (Coleoptera)
Ferrisiana virgata (Homoptera)
Sizeonotus luteiceps (Hemiptera)

MANGIFERA:

- Anastrepha ludens* (Diptera)
Anastrepha mombinpraepotans (Diptera)
Aulacaspis cinnamomi (Homoptera)
Ceratitis capitata (Diptera)
Cryptorhynchus mangiferae (Coleoptera)
Dacus dorsalis (Diptera)
Phenacaspis sandwicensis (?) (Homoptera)

MEROSTACHYS:

- Eucalandra setulosa* (Coleoptera)
Renocis mexicanus (Coleoptera)

MILTONIA:

- Ferrisiana virgata* (Homoptera)
Tenthecoris balloui (Hemiptera)

MONSTERA:

- Chrysomphalus tenax* (Homoptera)

*Hosts and insects—Continued***MORUS:**

- Asterolecanium pustulans* (Homoptera)
- Dryotribus mimeticus* (Coleoptera)
- Leptostylus incrassatus* (Coleoptera)
- Oosternum costatum* (Coleoptera)

MUSA:

- Aspidiotus destructor* (Homoptera)
- Aspidiotus palmeae* (Homoptera)
- Aspidiotus spinosus* (Homoptera)
- Calligrapha multipustulata* (Coleoptera)
- Chrysomphalus albopictus* (Homoptera)
- Chrysomphalus scutiformis* (Homoptera)
- Chrysomphalus umboniferus* (Homoptera)
- Cosmopolites sordidus* (Coleoptera)
- Cyrtanota tristigma* (Coleoptera)
- Dacus dorsalis* (Diptera)
- Ferrisia virgata* (Homoptera)
- Lygus elisus* (Hemiptera)
- Metcometopus jansoni* (Coleoptera)
- Metamasius sericeus* (Coleoptera)
- Metamasius sericeus* var. (Coleoptera)
- Metrona tuberculata* (Coleoptera)
- Nasutitermes corniger* (Isoptera)
- Phenacoccus gossypii* (Homoptera)
- Physonota mexicana* (Coleoptera)
- Platoceticus symmetrica* (Lepidoptera)
- Platycaenus humilis* (Hemiptera)
- Sibine stimulea* (Lepidoptera)

MUSCARI:

- Exosoma lusitanica* (Coleoptera)

NARCISSUS:

- Endrosis lactella* (Lepidoptera)
- Silona lineata* (Coleoptera)

NEPETA:

- Phylomyza obscurella nigrifella* (Diptera)

NERIUM:

- Chaetoptilius vestitus* (Coleoptera)
- Morganella longispina* (Homoptera)
- Sinozyon serdentatum* (Coleoptera)

OCTOMERIA:

- Coccus pseudohesperidum* (Homoptera)

ODONTOGLOSSUM:

- Diorymerellus laevimargo* (Coleoptera)
- Pseudoparlatoria ostreata* (Homoptera)
- Tenthecoris vestitus* (Hemiptera)

OLEA:

- Dacus oleae* (Diptera)
- Eurytoma oleae* (Hymenoptera)

ONCIDIUM:

- Conchaspis angraeci* (Homoptera)
- Furcaspis biformis* (Homoptera)
- Pseudischnaspis alienus* (Homoptera)
- Pseudococcus virgata* (Homoptera)
- Pseudoparlatoria ostreata* (Homoptera)
- Vinsonia stellifera* (Homoptera)

OPUNTIA:

- Ceratitis capitata* (Diptera)
- Pseudoparlatoria ostreata* (Homoptera)

ORCHID:

- Acroleucus vicinalis* (Hemiptera)

Hosts and diseases

ABIES:

Sclerotinia kernerii (Ascomycetes)

ACACIA:

Ravenelia siliquae (Promycetes)

ACER:

Nectria cinnabarina (Ascomycetes)

AERIDES:

Diplodia paraphysaria (Deuteromycetes)

ALLIUM PORRUM:

Stemphylium botryosum (Deuteromycetes)

ALLIUM SATIVUM:

Aphelenchoides ritzema-bosi (Nematoda)

Ditylenchus dipsaci (Nematoda)

Sclerotium cepivorum (Deuteromycetes)

ALNUS:

Phomopsis alnea (Deuteromycetes)

ALYXIA:

Uromyces alyziae (Promycetes)

AMARYLLIS:

Vermicularia dematium (Deuteromycetes)

ANTHURIUM:

Pestalotia anthurii (Deuteromycetes)

Phyllachora englerii (Ascomycetes)

ANTIRRHINUM:

Ascochyta decipiens (Deuteromycetes)

BAMBOO:

Papularia sphaerosperma (Deuteromycetes)

Physalospora peribambusina (Ascomycetes)

Puccinia longicornis (Promycetes)

Puccinia melanocephala (Promycetes)

BAMBUSA:

Cytospora lirella (Deuteromycetes)

Diplodia bambusae (Deuteromycetes)

Uredo ignava (Promycetes)

BANKSIA:

Pestalotia banksiana (?) (Deuteromycetes)

BEGONIA:

Papulaspora magnifica (?) (Deuteromycetes)

Thielaviopsis basicola (Deuteromycetes)

BETULA:

Flourenthia virgultorum (Ascomycetes)

BRASSICA RAPA:

Plasmodiophora brassicae (Myxomycetes)

Stachybotrys sub simplex (Deuteromycetes)

BUXUS:

Phyllosticta limbalis (Deuteromycetes)

Verticillium buxi (Deuteromycetes)

CACTUS:

Diaporthe dubia (?) (Ascomycetes)

Perisporium wrightii (Ascomycetes)

CAJANUS:

Diplodia theobromae (Deuteromycetes)

Uromyces dolicholii (Promycetes)

CAMELLIA:

Pestalotia guepini (Deuteromycetes)

Phyllosticta camelliae (Ascomycetes)

CAPSICUM:

Epicoecum nigrum (Deuteromycetes)

Gloeosporium piperatum (Deuteromycetes)

Helminthosporium carposaprum (Deuteromycetes)

Hormodendron cladosporioides (Deuteromycetes)

Myrothecium rosidum (Deuteromycetes)

Stemphylium ilicis (Deuteromycetes)

CASTANEA:

Cytospora ceratophora (Deuteromycetes)

Fusicoccum cinctum (Deuteromycetes)

Marsonina ochroleuca (Deuteromycetes)

Phyllosticta maculiformis (Deuteromycetes)

CATTLEA:

Dendryphium toruloides var. *taurinese* (Deuteromycetes)

Diplodia paraphysaria (Deuteromycetes)

Macrophoma cattleyicola (Deuteromycetes)

Pestalotia conspicua (Deuteromycetes)

Uredo guacae (Promycetes)

CEDRELA:

Phyllachora balansae (Ascomycetes)

CHRYSANTHEMUM:

Septoria cercosporoides (Deuteromycetes)

CICHORIUM:

Ascochyta cichorii (Deuteromycetes)

Sclerotinia minor (Ascomycetes)

CINNAMOMUM:

Gloeosporium cinnamomi (Deuteromycetes)

CITRUS AURANTIFOLIA:

Xanthomonas citri (Schizomycetes)

CITRUS LIMON:

Elsinoe australis (Ascomycetes)

Phoma citricarpa (Deuteromycetes)

Septoria arethusa (Deuteromycetes)

Sphaeloma fauettii var. *scabiosa* (Deuteromycetes)

CITRUS PARADISI:

Phoma citricarpa (Deuteromycetes)

Xanthomonas citri (Schizomycetes)

CITRUS RETICULATA:

Phoma citricarpa (Deuteromycetes)

CITRUS SINENSIS:

Alternaria citri (Deuteromycetes)

Ascochyta citri (Deuteromycetes)

Elsinoe australis (Ascomycetes)

Phoma citricarpa (Deuteromycetes)

CITRUS SP.:

Ascochyta citri (Deuteromycetes)

Elsinoe australis (Ascomycetes)

Phoma citricarpa (Deuteromycetes)

COLCHICUM:

Ditylenchus dipsaci (Nematoda)

Ditylenchus iridis (Nematoda)

Urocystis colchici (Promycetes)

COLOCASIA:

Aphelenchoides bicaudatus (Nematoda)

Gliomastix convoluta (Deuteromycetes)

Stilbum incarnatum (Deuteromycetes)

CORNUS:

Phomopsis corni (Deuteromycetes)

CROCUS:

Ditylenchus iridis (Nematoda)

Fusarium bulbigenum (Deuteromycetes)

Pseudomonas marginata (Schizomycetes)

CUCUMIS:

Stemphylium botryosum (Deuteromycetes)

CUCURBITA:

Phytophthora citrophthora (Phycomycetes)

CYDONIA:

Gloeosporium fructigenum (Deuteromycetes)

Venturia pyrina (Ascomycetes)

CYMBIDIUM:

Melanospora zamiae (Ascomycetes)

Pestalotia conspicua (Deuteromycetes)

Phyllosticta cymbidii (Deuteromycetes)

Phyllosticta laeliae (Deuteromycetes)

Physalospora orchidearum (Ascomycetes)

Septoria posekensis (Deuteromycetes)

CYNODON:

Phyllachora cynodontis (Ascomycetes)

CYPRIPEDIUM:

Physalospora orchidearum (Ascomycetes)

Septoria posekensis (Deuteromycetes)

DAHLIA:

Coleosporium dahliae (Promycetes)

DASYLIRION:

Coniothyrium hysterioides (Deuteromycetes)

DAUCUS:

Macrophoma phaseoli (Deuteromycetes)

Verticillidochium tubercularioides (Deuteromycetes)

DENDROBIUM:

Diplodia paraphysaria (Deuteromycetes)

DEUTZIA:

Nectria cinnabarina (Ascomycetes)

DIANTHUS:

Heteropatella vattelinensis (Deuteromycetes)

Septoria dianthi (?) (Deuteromycetes)

Stemphylium botryosum (Deuteromycetes)

ELEOCHARIS:

Gliomastix convoluta (Deuteromycetes)

Stilbum incarnatum (Deuteromycetes)

EPIDENDRUM:

Diplodia paraphysaria (Deuteromycetes)

Uredo epidendri (Promycetes)

ERIOBOTRYA:

Fusicladium eriobotryae (Deuteromycetes)

EUCALYPTUS:

Aulographum eucalypti (Ascomycetes)

FAGUS:

Asterosporium hoffmanni (Deuteromycetes)

Fusicoccum galericulatum (Deuteromycetes)

FICUS:

Phomopsis cinerascens (Deuteromycetes)

Physopella fici (Promycetes)

FRAXINUS:

Ascochyta frazzini (Deuteromycetes)

Pleospora herbarum (Ascomycetes)

Hosts and diseases—Continued

GALANTHUS:

Botrytis galanthina (Deuteromycetes)

GARDENIA:

Omphalia flavida (Deuteromycetes)

Triposporium stelligerum (Deuteromycetes)

GAULTHERA:

Ceuthospora lunata (Deuteromycetes)

GENISTA:

Coniothyrium genistae (Deuteromycetes)

GLADIOLUS:

Botrytis gladiolorum (Deuteromycetes)

Fusarium oxysporum var. *gladioli* (Deuteromycetes)

Pseudomonas marginata (Schizomycetes)

GOSSYPIUM:

Cercospora gossypina (Deuteromycetes)

Puccinia stakmanii (Promycetes)

HELLEBORUS:

Coniothyrium hellebori (Deuteromycetes)

HIBISCUS:

Colletotrichum hibisci (?) (Deuteromycetes)

HUMULUS:

Pestalotia peizizioides (Deuteromycetes)

HYACINTHUS:

Stemphylium ilicis (Deuteromycetes)

Xanthomonas hyacinthi (Schizomycetes)

HYDRANGEA:

Sclerotopsis concava (Deuteromycetes)

ILEX:

Stagonospora ilicis (Deuteromycetes)

Trochilia ilicis (Ascomycetes)

IPOMOEA:

Fusarium oxysporum (Deuteromycetes)

Macrophoma phaseoli (Deuteromycetes)

IRIS:

Ditylenchus iridis (Nematoda)

Leptosphaeria heterospora (Ascomycetes)

JUGLANS:

Marsonia juglandis (Deuteromycetes)

JUNIPERUS:

Lophodermium juniperinum (Ascomycetes)

Pithya cupressina (Ascomycetes)

LAELIA:

Physalospora campispora (Ascomycetes)

Uredo behnickiana (Promycetes)

LILIUM:

Aphelenchoides parietinus (Nematoda)

Botrytis elliptica (Deuteromycetes)

Colletotrichum lilii (Deuteromycetes)

Sclerotium delphinii (Deuteromycetes)

LYCOPERSICON:

Helminthosporium carposaprum (Deuteromycetes)

Hormodendron cladosporioides (Deuteromycetes)

Myrothecium roridum (Deuteromycetes)

Stemphylium botrysosum (Deuteromycetes)

"Tomato pox"

Vermicularia dematium (Deuteromycetes)

MAGNOLIA:

Nectria cinnabarina (Ascomycetes)

Phomopsis magnoliae (Deuteromycetes)

Phomopsis magnoliicola (Deuteromycetes)

MAHONIA:

Cumminsia sanguinea (Promycetes)

MALUS:

Cytospora ambiens (Deuteromycetes)

Elsinoe piri (Ascomycetes)

Leptothyrium pomi (Deuteromycetes)

Monilinia fructigena (Ascomycetes)

UNITED STATES DEPARTMENT OF AGRICULTURE**AGRICULTURAL RESEARCH ADMINISTRATION
BUREAU OF ENTOMOLOGY AND PLANT QUARANTINE
SERVICE AND REGULATORY ANNOUNCEMENTS**

LIST OF INTERCEPTED PLANT PESTS, 1949¹

(List of Pests Recorded During the Period July 1, 1948, to June 30, 1949, Inclusive, as Intercepted in, on, or with Plants and Plant Products Entering United States Territory.)

INTRODUCTION

This report, covering the thirty-sixth year for which interception lists have been issued, summarizes the records of insect pests, plant pathogens, and certain other organisms found in, on, or with plants and plant products (1) imported, (2) offered for but refused entry, (3) held as ships' stores, etc., and hence not offered for entry through customs, (4) offered for entry for immediate export or for immediate transportation and exportation in bond, and (5) in domestic shipments between Hawaii and Puerto Rico and the mainland.

In some cases collections made late in the year are included in the report for the following year, since determination cannot be obtained immediately for all of them. Occasionally determinations are delayed for longer periods. The data for this list are obtained from routine reports by personnel of this Bureau, supplemented by information supplied by State and Customs officials. The States of California and Florida maintain staffs of specialists who identify a large proportion of the material collected at their ports. Specialists of the Bureau of Plant Industry, Soils, and Agricultural Engineering determine many of the difficult or unusual pathogens collected at the ports.

All scientific names are reviewed by appropriate specialists in the Department to assure conformance to the international rules of nomenclature.

While every reasonable effort is made to give the correct origin for all collections listed, the alleged origin of host plant materials cannot be verified in all cases, and where there is reason to doubt the accuracy of the information, the questionable items are either omitted or the origin is listed as unknown.

The year covered by this list has seen a lessening of importations of certain types of plant materials, but an increase in others. Air transportation of many perishable plant shipments served to bring plants and their pests to us with a promptness that assured the survival of both. Continual vigilance is necessary to combat such threats to the nation's plant life, and those responsible for the movement of aircraft have continued to assist in carrying out plant quarantine regulations intended to reduce to a minimum the movement of potentially dangerous plant materials.

¹Compiled by W. H. Wheeler, pathologist, Judith Hunt, plant quarantine aid, and P. X. Peltier, entomologist, Division of Foreign Plant Quarantines.

INTERCEPTIONS FROM AIR-BORNE MATERIAL

Air-borne plant material arrives in mail, baggage, express, stores, and freight, and interceptions of plant pests on such importations have been frequent. During the year 4,312 interceptions were made of insects arriving by air with agricultural material or as stowaways. There were 342 interceptions of plant diseases. Approximately one-third of the plant-disease organisms were not determinable to species but, from the evidence, appeared to represent little or no risk to this country. A few of the disease organisms specifically identified but not known to be in the United States are, however, reported to be parasites of their hosts in foreign countries. Some of the most important insects intercepted during the year were from host fruits and plants arriving by plane—a pattern to be expected in the coming years.

Among the more important insects found in air-borne material were: The whitefly *Aleurothrixus myrtacei* (?) on myrtle in cargo from Brazil; *Anastrepha fraterculus* in mango in baggage from the Dominican Republic, Mexico, and Salvador, and *A. fraterculus* (?) in cherimoya in baggage from Chile and in orange in baggage from Peru; the Mexican fruit fly (*A. ludens*) in *Annona* sp. in baggage from Guatemala, in grapefruit in baggage from Mexico, in mamey in baggage from Guatemala, in mango in baggage from Guatemala and Mexico, in orange in baggage from Costa Rica and Mexico and express from Guatemala, and in pomegranate in baggage from Mexico; the West Indian fruit fly (*A. mombinpraeoptans*) in mango in baggage from Bermuda, the Dominican Republic, Jamaica, Panama, Puerto Rico, and Salvador, in mango in mail from Puerto Rico, and in mango in quarters from Mexico, in guava in baggage from Puerto Rico and Salvador and in guava in mail from Puerto Rico, in yellow mombin in baggage from Puerto Rico, Salvador, and Trinidad, in yellow mombin in quarters from Mexico, in *Spondias* sp. in baggage from Salvador, and in yellow mombin in mail from Puerto Rico; *A. serpentina* in orange in stores from Trinidad, in sapodilla in baggage from Guatemala and Venezuela, in sapote in baggage from Guatemala and Panama, and *A. serpentina* (?) in sapodilla in baggage from the Netherlands West Indies; *A. suspensa* in guava in baggage from Puerto Rico; *Caryedon fuscus* in *Cassia javanica* in baggage from Hawaii; the Mediterranean fruit fly (*Ceratitis capitata*) in apricot in baggage from the Cape Verde Islands, in apricot in stores from France, in fig in baggage from the Azores and Italy, in guava in baggage from Palestine, in mango in baggage from Brazil, in medlar in baggage from Italy, in orange in baggage from the Azores, Italy, Portugal, and Spain, in orange in stores from the Azores, Portugal, and Spain, in peach in baggage from France, Italy, Lebanon, Portugal, and Spain, and in peach in stores from France, Portugal (?), and Spain, in pear in baggage from Spain and in pear in stores from Portugal, in persimmon in baggage from Italy, in tangerine in baggage from Portugal and in tangerine in stores from Portugal and Spain, and *C. capitata* (?) in apricot in baggage from Syria, in guava in baggage from the Madeira Islands, and in orange in baggage from the Union of South Africa; *Coccotrypes dactyliperda* in date pits used as food for monkeys in stores from India; *Cylas formicarius* var. in sweetpotato in cargo from Siam and in sweetpotato in stores from India; adults of the oriental fruit fly (*Dacus dorsalis*) were intercepted 31 times in preflight inspection of airplanes leaving Hawaii for the mainland; preflight interceptions of immature stages of *D. dorsalis* included one in coffee berry, one in ginger flowers made into a lei, and one in papaya in baggage from Hawaii; *D. ochrosiae* (?) in seed of *Ochrosia* sp. in baggage from Guam; the olive fruit fly (*D. oleae*) in olive in baggage from Italy and Lebanon; *Epicaerus cognatus* in wild potato in mail from Mexico; the citrus whitefly (*Dialeurodes citri*) on leaf of gardenia in freight from China; the oriental fruit moth (*Grapholitha molesta*) in peach in stores from France; *Kaloterms bequaerti* in *Juniperus* sp. and pine crates in cargo from Bermuda; the East Indian bean pod borer (*Maruca testulalis*) in flower lei made of *Canavalia* sp. in baggage from Hawaii, in lima bean in baggage from Puerto Rico, in pigeonpea and string bean in baggage and mail from Puerto Rico; the pink bollworm (*Pectinophora gossypiella*) in cottonseed in baggage from India and the Virgin Islands, and in cottonseed in cargo from Brazil and Pakistan, in cotton samples (grabbots) in cargo from Brazil, in okra in baggage from Puerto Rico and in okra in mail from the American Virgin Islands; *Polychrosis botrana* in grape in baggage from Italy and in grape in stores from France; *Rhagoletis alternata* in rose hips in baggage from Sweden; *R. cerasi* in cherry in baggage from Germany and Italy, in cherry in stores from Italy and in cherry in quarters from France, and *R. cerasi* (?) in cherry in stores from France and in cherry in quarters from Portugal; *Sesamia cretica* in broomcorn in cargo from France.

The more important plant disease organisms found on air-borne material, not believed to be established in the United States, were *Alternaria gypsophilae* on gypsophila in baggage from Brazil, *Elsinoe australis* on sweet orange in stores from Brazil, *E. phaseoli* on lima bean in cargo from Puerto Rico, *E. piri* on apple in baggage from Poland, *Heterodera goettingiana* with soil about roots of strawberry plants in mail

from Denmark, *H. punctata* with soil about orchid roots in express from England, *H. rostochiensis* with soil about roots of miscellaneous plants in baggage from Germany, *Monilinia fructigena* on apple in stores from the Netherlands, *Phoma citricarpa* on sweet orange in stores from Australia and Canton Island, on mandarin orange in baggage and quarters from China, and on unidentified citrus fruit in baggage from China; *Phyllosticta saccardoi* on rhododendron in air express from England, *Septoria posekensis* on orchids in cargo from Brazil and Mexico, *Uredo anthuri* on anthurium in express from Guatemala, *U. autumnalis* on chrysanthemum in express from Japan, and *Xanthomonas citri* on sweet orange in baggage from China, and on grapefruit lemon, and sour lime in stores from India.

NOTES ON INSECTS INTERCEPTED

FRUIT FLIES

Anastrepha fraterculus was intercepted in grapefruit and orange from Brazil and in mango from the Dominican Republic, Mexico, Salvador, and Trinidad, and *A. fraterculus* (?) in cherimoya from Chile, in orange from Brazil and Peru, and in grape from Argentina. The Mexican fruit fly (*A. ludens*) was taken in *Annona* sp., orange, mamey, and mango from Guatemala, in apple, avocado, grapefruit, mango, orange, peach, pear, pomegranate, quince, sapote, sour orange, sweet lime, and tangerine from Mexico, in orange from Costa Rica, and in mango from Honduras. The West Indian fruit fly (*A. mombinpraeoptans*) was intercepted in mango from Bermuda, Costa Rica, the Dominican Republic, Guatemala, Haiti, Honduras, Jamaica, Mexico, Panama, Puerto Rico, and Salvador, in guava from Cuba, Puerto Rico, and Salvador, in yellow mombin from Guatemala, Mexico, Puerto Rico, Salvador, and Trinidad, in *Spondias* sp. from Guatemala, Puerto Rico, and Salvador, and *A. mombinpraeoptans* (?) in mango from Panama and Trinidad. *A. serpentina* was found in sapodilla from Guatemala and Venezuela, in sapote from Guatemala, in mamey and star-apple from Mexico, in grapefruit and orange from Trinidad, and in sapote from Panama, and *A. serpentina* (?) in sapodilla from the Netherlands West Indies. *A. suspensa* was intercepted in guava from Cuba and Puerto Rico and in orange from Puerto Rico. The Mediterranean fruit fly (*Ceratitis capitata*) was taken in apple from the Azores, Italy, and Spain, in apricot from the Cape Verde Islands and France, in coffee from Brazil and Hawaii, in fig and loquat from the Azores and Italy, in grape from Argentina, the Madeira Islands, and Portugal, in grapefruit from Cyprus, Egypt, Hawaii, Italy, Morocco, the Union of South Africa, and Uruguay, in guava from Palestine, in mango from Brazil, in medlar, persimmon, pomegranate, pricklypear, and quince from Italy, in orange from Algeria, Azores, Brazil, Cyprus, Egypt, Italy, Portugal, Spain, and the Union of South Africa, in papaya and tomato from Hawaii, in peach from Algeria, France, Italy, Lebanon, Morocco, Portugal, and Spain, in pear from Italy, Portugal, and Spain, in plum from Greece, in purple granadilla from the Azores, Italy, Lebanon, and Portugal, and with contraband containing oranges and *Citrus* sp. from Lebanon, and *C. capitata* (?) in apricot from Syria, in grape from Argentina, in grapefruit from Cyprus (?) and Morocco, in guava from the Madeira Islands, in lemon from Italy, in orange from Brazil and the Union of South Africa, in peach from Italy and Morocco, in pear from France, and in plum from Portugal. The melon fly (*Dacus cucurbitae*) was taken in cucumber from Hawaii and the Straits Settlements and in squash and tomato from Hawaii, and *D. cucurbitae* (?) in cucumber, squash, string bean, and tomato from Hawaii. The oriental fruit fly (*D. dorsalis*) was found in an airplane, avocado, banana, small green coconut, coffee, *Garcinia rubra*, ginger, guava, Japanese persimmon, lychee, papaya, soda-apple nightshade, tropical almond, and vi-apple from Hawaii and in mango from Hawaii and India, and *D. dorsalis* (?) in small green coconut, fig, and tomato from Hawaii and in *Ochrosia* sp. from Guam. The olive fruit fly (*D. oleae*) was intercepted in olive from the Azores, Italy, Lebanon, and Portugal. The celery fly (*Euleia heraclei*) was taken in celery from England. *Rhagoletis alternata* was found in rose hips from Sweden and *R. alternata* (?) in rose hips from Austria and Sweden. *R. cerasi* was intercepted in cherry from France, Germany, Italy, and Portugal and *R. cerasi* (?) in cherry from France, Italy, Portugal, and Spain. *R. juglandis* (?) was taken in walnut from Mexico. The apple maggot (*R. pomonella*) was found in apple and red haw from Mexico. *R. striatella* was intercepted in husk tomato from Mexico.

INSECTS OTHER THAN FRUIT FLIES

A bruchid, *Acanthoscelides griseolus*, a potential pest of sesbania, was taken in *Sesbania macrocarpa* and *Sesbania* sp. from Mexico. The ground-nut stem girdler (*Aleidodes dentipes*) was found in sweetpotatoes used as food for monkeys coming from West Africa. *Aeolothrips brevicornis* (Aeolothripidae) was intercepted on *Erica* sp. from the Union of South Africa. The citrus blackfly (*Aleurocanthus woglumi*) was

taken on leaves of *Citrus* sp., orange, and sour lime from Mexico. A curculionid, *Baris coeruleus*, was found in radish from France. *Bruchidius incarnatus* (Bruchidae), a considerable pest in Egypt, was found in broadbeans from Egypt and Lebanon. A bruchid, *Bruchus tristiculus*, not yet found breeding in this country, was intercepted in vetch from Italy. The Asiatic rice borer (*Chilo simplex*) was found in rice from China and Japan, and *C. simplex* (?) was found in *Leersia* sp. from Japan. A pentatomid, *Coptosoma cribraria*, a pest of beans in the Orient, was intercepted on the stem of a camellia from China. The banana root borer (*Cosmopolites sordidus*) was taken in banana root from Honduras. *Cylas femoralis* (Curculionidae) was taken in sweetpotato from West Africa; *C. formicarius* in sweetpotato from India; *C. formicarius* var. in sweetpotato from the Fiji Islands, Hawaii, India, Iraq, and Siam; and *C. puncticollis* in sweetpotato from Mozambique, Sierra Leone, and West Africa. The Tahitian coconut weevil (*Diocalandra taiensis*) was found in coconut from Hawaii. *Epicaerus cognatus* (Curculionidae) was taken in potato and *Solanum* sp. (wild potato) from Mexico. A chrysomelid, *Gastrophysa viridula*, believed not yet established in America, was found in soil with potatoes from England. *Gymnandrosoma aurantianum* (Olethreutidae) was found in orange from Brazil. *Leucocera sexpunctatus* (Chrysomelidae) was taken on orchid leaf from Cuba; little is known of this Antillian genus. The pink bollworm (*Pectinophora gossypiella*) was taken in cottonseed from Brazil, Egypt, Hawaii, India, Italy, Jamaica, Mexico, Pakistan, and the Philippines, in seed cotton from Haiti and Mexico, in cotton boll from the Virgin Islands, cotton (grabbots) from Brazil, and in okra from the American Virgin Islands, Brazil, and Puerto Rico. *Pheidole megacephala* (Formicidae), an important economic species, was found on eggplant and pineapple from Cuba. An olethreutid, *Polychrosis botrana*, was taken in grapes from France and Italy. Two curculionids, *Prennotrypes fractirostris* and *P. solani*, were found in potatoes from Peru. *Sesamia cretica* (Phalaenidae) was intercepted in the stem of broomcorn from France. A curculionid, *Sitona humeralis*, not known to be established in North America, was intercepted with garlic, grapes, lily bulbs, and rose stock from Italy. The coffee berry borer (*Stephanoderes hampei*) was taken in coffee berries from Brazil in transit to Canada.

SNAILS

The giant African snail (*Achatina fulica*) was found on salvaged military equipment which was being returned from Guam, the Philippines, Saipan, and Tinian Island. Living snail eggs were taken from an empty coconut husk attached to the military equipment, while 12 interceptions of living snails and one of dead snails were made on military equipment. One interception was made at New York, N. Y., on material from Saipan, 6 at San Francisco, Calif., from Guam, Saipan, and Tinian Island, and 6 at San Pedro, Calif., from the Philippines and Saipan.

Among other interceptions of snails, not known to occur on the mainland of the United States and injurious to agriculture, was a species of *Lamellaxis* which was taken at Nogales, Ariz., in soil with plants from Mexico, and at San Juan, Puerto Rico in soil arriving by airplane from the Dominican Republic.

NOTES ON DISEASES INTERCEPTED

Changing conditions for the year under consideration placed China in first place as the country contributing the largest number of interceptions (11) of citrus canker (*Xanthomonas citri*), and India, which held that position for three years, dropped to second place with 9. Japan followed in third place with 4 interceptions. Fruits infected were grapefruit, lemon, Mandarin orange, pummelo, sour lime, and sweet orange. A second disease of concern to citrus production in this country, the sweet orange scab (*Elsinoe australis*), was taken 22 times on lemon from Argentina and Brazil, 22 times on sweet orange from Argentina, Brazil, and Uruguay, twice on sour lime from Brazil, and once on tangerine from Argentina. "Cancrosis B", still another serious disease of citrus in South America, was found on six different occasions on lemons from Argentina. *Coleosporium senecionis*, a rust fungus of possible importance, was intercepted on two large importations of Scotch pine seedlings and one of Swiss mountain pine seedlings. The three importations were from Denmark and were intended for reforestation work in this country. This rust has been reported to do considerable damage to pines in some parts of the world, but is not believed to be established in North America. With this report comes the first records of the interception of the golden nematode (*Heterodera rostochiensis*), a serious pest of potatoes and tomatoes in Europe, known in this country only from Long Island, New York, where efforts are being made to prevent its spread. Analysis during the year of various lots of prohibited foreign soils yielded 11 interceptions of this dangerous pest. *Neovossia indica*, a smut fungus of potential importance to the wheat production of this country, arrived by mail on two occasions from India where it causes as much as 20 percent damage in the hot lowlands. This disease is commonly known as "Karnal bunt".

Other diseases worthy of note were a leaf fungus, *Ascochyta haworthiae*, of haworthias from the Union of South Africa; camellia yellow-spot virus of that host from France; the banana leaf spot (*Cercospora musae*) from various countries where it is known; a rust fungus, *Coleosporium domingense*, on plumeria from Venezuela; a fungus, *Curvularia lunata*, on pepper from Cuba, and on onion from Mexico and Sweden; a fungus, *Cytospora ceratophora*, on nuts of chestnut from Italy; a stem fungus, *Cytospora dahliae*, on dahlia from France; a twig parasite, *Cytospora punica*, on pomegranate from Mexico; the lima bean scab fungus (*Elsinoe phaseoli*) from Cuba; a rust fungus, *Gymnosporangium haraceanum*, on juniper from Japan; a stem fungus, *Heterosporium ornithogali*, on ornithogalum from the Union of South Africa; a banana leaf fungus, *Leptosphaeria musarum*, from Colombia and Guatemala; a banana fungus, *Macrophoma musae*, on that host from India, Pakistan, and the Philippines; a brown rot fungus, *Monilinia fructigena*, on peach fruit from Portugal; a leaf and stem fungus, *Phaeosphaeria oryzae*, on rice from China and Japan; citrus black spot (*Phoma citricarpa*) from Australia, China, Formosa, Japan, and the Union of South Africa; a twig fungus, *Phomopsis magnoliae*, on magnolia from the Netherlands; a twig and stem fungus, *Phomopsis sorbicola*, on European mountain-ash from the Netherlands; a leaf fungus, *Phyllachora engleri*, on anthurium from Guatemala; a camellia leaf spot fungus, *Phyllosticta camelliae* from England; a rust fungus, *Prospodium appendiculatum*, on the Florida yellow-trumpet from Mexico; a rust fungus, *Puccinia cichorii*, on chicory from Belgium; a leaf and glume fungus, *Pyrenochaeta oryzae*, on rice from India; a twig fungus, *Sclerotinia kernerii*, on fir from Greece; a bulb-rotting fungus, *Sclerotium delphinii*, on Morocco iris from France; a leaf-spot fungus, *Septoria bambusella*, on bamboo from China; a leaf-spot fungus, *Septoria castanicola*, on chestnut from Italy; a leaf-spot fungus, *Septoria cyclaminis*, on cyclamen from Italy and Switzerland; a leaf blotch fungus, *Septoria posekensis*, on various orchids from Brazil, India, and Mexico; a stem fungus, *Stagonospora graminella*, on wheat from India; a rust fungus, *Thecopsora areolata*, on cherry leaves from Finland; a leaf rust, *Uromyces coronatus*, of wildrice and rice from Japan; a smut fungus, *Ustilago esculenta*, of Asiatic wildrice from Japan; and the hyacinth yellows disease (*Xanthomonas hyacinthi*) in hyacinth bulbs from the Netherlands.

Nematodes of interest for the year were *Aphelenchus aderholdi* in lily-of-the-valley pips from Denmark and Germany; *A. avenae* in aster from Germany; *Ditylenchus* sp., apparently *destructor*, in peanut seed from Uruguay; *D. dipsaci* in garlic from Mexico; *Ditylenchus* sp. in colchicum, iris, and narcissus from the Netherlands; *Heterodera goettingiana* in soil with camellias from the Azores and strawberry roots from Denmark; *H. punctata* with soil about orchid roots from England, and *Tylenchus putrefaciens* in garlic from Mexico.

Of the 1,132 species of pathogens or other organisms listed in the table, 77 were new to the interception files. Interceptions of the other 1,055 pathogens showed 128 new countries of origin and 109 new hosts.

INCOMPLETELY DETERMINED PESTS

Frequently inspectors find insects or pathogens affecting plant material in such a stage or condition that complete and accurate determination is impracticable or impossible. Some of these insects and pathogens are without doubt new to science, and may be destructive pests. The notes below are given to show the general nature of such incompletely determined interceptions.

INSECTS

Among the incompletely determined insects were the following fruit flies: *Anastrepha* sp., probably *fraterculus*, at New York, N. Y., in fig in baggage and in grapefruit in stores from Argentina, and at Eagle Pass, Tex., in mango in baggage from Mexico; *Anastrepha* sp., probably *ludens*, at Laredo, Tex., in orange in baggage from Mexico; *Anastrepha* sp., probably *mombinpraeoptans*, at El Paso, Tex., Hidalgo, Tex., and Laredo, Tex., in mango in baggage from Mexico, at El Paso, Tex., in mango in baggage from Salvador, at New Orleans, La., in mango in baggage and in mango in ship's garbage from Guatemala, at New York, N. Y., in mango in baggage from Puerto Rico and Venezuela and in quarters from Puerto Rico, and at Port Arthur, Tex., in mango in stores from Panama, at Laredo, Tex., in guava in baggage from Mexico, at New York, N. Y., in yellow mombin in baggage from Venezuela; *Anastrepha* sp., probably *serpentina*, at Laredo, Tex., in sapote in baggage from Mexico, at New Orleans, La., in apple in quarters, origin unknown, at San Pedro, Calif., in cherimoya in cargo from Ecuador; *Anastrepha* sp., probably *striata* Schiner, at New York, N. Y., in guava in baggage from Trinidad; *Anastrepha* sp., probably *suspensa*, at Miami, Fla., in guava in baggage from Puerto Rico; *Anastrepha* sp. at the National Airport, Arlington, Va., in cherimoya in baggage from Peru, at Baltimore, Md., in grapefruit in stores from Trinidad, in guava in baggage from Puerto Rico, and in orange in stores

from Brazil, at Boston, Mass., in guava in baggage from Puerto Rico, at Brownsville, Tex., in mango and orange in baggage from Mexico, at El Paso, Tex., in jobo plum, mamey, and mango in baggage from Mexico, at Galveston, Tex., in orange in stores from Brazil, at Hidalgo, Tex., in mango in baggage from Mexico, at Hoboken, N. J., in *Couma macrocarpa* in express from Brazil, at Jacksonville, Fla., in orange in baggage from Cuba, at Laredo, Tex., in orange and peach in baggage from Mexico, at Miami, Fla., in guava in baggage from Puerto Rico, in hog plum in baggage from Guatemala and Puerto Rico, in mango in baggage from Colombia, Haiti, and Puerto Rico, at New Orleans, La., in mango in baggage from Guatemala, at Newport News, Va., in grapefruit in stores from British Honduras, at New York, N. Y., in guava in baggage, mail, and quarters from Puerto Rico, in mango in stores from Ecuador and Honduras, in mango in baggage and cargo from the Dominican Republic, in *Passiflora* sp. in baggage from Trinidad, and in sapodilla in stores from Peru, at Port Arthur, Tex., in grapefruit in stores from Argentina, at San Juan, P. R., with a bag of oranges in stores from South America, in rose-apple in baggage from British Guiana, and in sapodilla in baggage from the Dominican Republic, at San Ysidro, Calif., in mango in baggage, probable origin La Paz, Baja Calif., and at Tampa, Fla., in mango in pilot's lunch box on an airplane from Panama; probably *Ceratitis* sp. at New York, N. Y., in grapefruit in stores from the Union of South Africa; *Dacus* sp. at Boston, Mass., in melon in stores from southwest Arabia; probably *Dacus* sp. (not *cucurbitae*) at Baltimore, Md., in squash in stores from the Union of South Africa; probably *Dacus* sp. at Galveston, Tex., in vegetable marrow in stores from French West Africa; *Rhagoletis* sp., probably *completa* Cress., at Hidalgo, Tex., and Laredo, Tex., in black walnut in baggage from Mexico; *Rhagoletis* sp. at El Paso, Tex., in *Lycium berlandieri* in baggage from Mexico, at Laredo, Tex., in red haw and walnut in baggage from Mexico. Two species of *Anastrepha* (adults) were found in the light socket in the hold of a ship carrying banana cargo. Fifteen interceptions which could not be identified beyond family (Tephritidae) were taken at Anchorage, Alaska in an airplane from the Orient, at Boston, Mass., in tangerine in stores from India, at the National Airport, Arlington, Va., in *Eugenia* sp. in garbage (evidently discarded by a passenger) from Siam, at El Paso, Tex., in squash in cargo from Mexico, at New Orleans, La., in grape in cargo from Argentina, at New York, N. Y., in *Eugenia* sp. in baggage from Puerto Rico, in grape in cargo from Argentina, in squash in stores from the Union of South Africa, and in a paper bag with peppers (none in peppers) from Liberia, at Philadelphia, Pa., in orange in stores from Brazil, at San Juan, P. R., on banana in stores from Brazil.

The following miscellaneous insects of special interest were intercepted: *Abutilonius* sp., near *idoneus* Bridwell (Bruchidae) at New York, N. Y., in *Abutilon* sp. seed in cargo from Mexico; *Acanthoscelides* sp., probably *ceratioborus* (Philippi) at St. Paul, Minn., in carob bean in mail from Peru; *Aleurotrachelus* sp. (Aleyrodidae), apparently undescribed, at El Paso, Tex., on *Litsea glaucescens* in mail from Mexico, at San Francisco, Calif., on *Odontoglossum schlieperianum* in air freight from Costa Rica, and on Palmaceae in air express from Guatemala; Aleyrodidae (undescribed genus and species), near *Aleurodicus*, at Brownsville, Tex., on *Laelia majalis* in cargo from Mexico; *Altica* sp., near *rufa* (Ill.) (Chrysomelidae), apparently undescribed, at Brownsville, Tex., with tomatoes in cargo from Mexico; *Anomalococcus* sp. (Coccidae), an undescribed species, at San Francisco, Calif., on orchid in cargo from Siam; *Anthonomus* sp., probably *varipes* Duval, (Curculionidae) at New York, N. Y., in eggplant in cargo from Cuba; *Asterolecanium* sp. (Coccidae), undescribed, at San Diego, Calif., on bamboo stalk in cargo from the Canal Zone; *Bemisia* sp. (Aleyrodidae) on plants on tractor returning from Saipan; *Caryobruchus* (new) sp. (Bruchidae) at Laredo, Tex., in palm seed in baggage from Mexico; a scolytid, *Chramesus* sp., evidently undescribed, at Brownsville, Tex., in wood in cargo from Mexico; a curculionid, *Polydrusus* sp., or *Barypeithes* sp. at Hoboken, N. J., in soil around astilbe roots in cargo from the Netherlands; *Diabrotica* sp., near *curvilinea* Jac., (Chrysomelidae) at Brownsville, Tex., in cabin of airplane from the Canal Zone; *Embolemus* sp., (Embolemidae), rare insects, at Nogales, Ariz., in cabin of airplane carrying tomato cargo from Mexico; *Epicaerus* sp., near *elegantulus* Champ., (Curculionidae) at Brownsville, Tex., on gardenia in quarters of an airplane from Mexico; a lygaeid, *Euptochiomeria* sp., probably undescribed, at Laredo, Tex., on an orchid plant in cargo from Mexico; *Glaucothrips* sp. (Thripidae) at Hoboken, N. J., on *Erica* sp. and *Protea* sp. in air express from the Union of South Africa and at New York, N. Y., on *Erica* sp. in cargo from the Union of South Africa; *Gnorimoschema* sp., doubtfully *borsaniella* Koeh., (Gelechiidae) at New York, N. Y., in pepper in stores from Brazil; an olethreutid, *Gymnandrosoma* sp. at Miami, Fla., in guava in baggage from Puerto Rico and at New York, N. Y., in grapefruit in stores from Uruguay; *Heterobostrychus* sp., near *pileatus* Lesne, (Bostrichidae) at New York, N. Y., in wood in cargo from India; Lampyridae, genus unknown and unlike any form in this country, at Brownsville, Tex., with *Miltonia endresii* in cargo from Costa Rica; *Leptodictya* (new) sp. (Tingidae)

at Nogales, Ariz., with orchids and succulent plants in baggage from Mexico; a chrysolid, *Phyllobrotica* sp. or near, at Blaine, Wash., in lily bulb in cargo from Japan; *Pissodes* sp., probably *notatus* F., (Curculionidae) at New Orleans, La., in packing strips around peat moss in cargo from the Netherlands; *Pityokteines* sp., probably *curvidens* (Germ.), (Scolytidae) at Galveston, Tex., in strips around peat moss in cargo from Germany; *Platylecanium* sp. (Coccidae), undescribed species, at San Francisco, Calif., on *Vanda caerulea* in air freight from Siam; doubtfully *Prays citri* Mill. (Hypomeutidae) at Detroit, Mich., in orange blossom in baggage from Sicily; *Prays* sp. at Seattle, Wash., in *Citrus* sp. in stores from the Philippines, at Baltimore, Md., in *Citrus sinensis* junos in stores from the Philippines and at Galveston, Tex., in grapefruit in stores from Egypt; *Tarsonemus* sp., a mite, at New York, N. Y., on nectarine in cargo from Chile and at Seattle, Wash., on rhododendron leaf in cargo from England; an aleyrodid, *Tetraleurodes* sp., near *acaciae* (Q.), undescribed, at San Ysidro, Calif., on twig of *Dalea spinosa* in baggage from Mexico; *Tetralica* sp. (Aleyrodidae), apparently undescribed, at Brownsville, Tex., on gardenia in baggage and cargo from Mexico and at Nogales, Ariz., on white sapote foliage in baggage from Mexico; *Xylopertha* sp., probably *crinitarsis* Imh., (Bostrichidae) at Baltimore, Md., in mahogany in cargo from Gold Coast, Africa.

There were 4,798 interceptions distributed among 893 genera, which could be identified to genus only. A total of 115 could be determined to family or subfamily only.

A total of 4,913 incompletely determined insects were intercepted during the year.

DISEASES

Among the incompletely determined plant disease organisms collected from incoming material during the year were *Cercospora* sp. on cordia from Mexico; *Cercospora* sp. on cocoa from Peru; *Cercospora* sp. on avocado from Mexico; *Cercospora* sp. on pea pod from Mexico; *Cytospora* sp. of rhododendron from England; *Cytospora* sp. on yew seed from Japan; *Helminthosporium* sp. on rice from China and Japan; "Leprosis" on sweet orange from Liberia and Mexico; *Monilia* sp. on rice from China; *Phoma* sp. on sweet lime from Italy and on lemon from Argentina, Italy, Turkey, and Uruguay; *Phyllosticta* sp. on spinach from Turkey; *Phyllosticta* sp. on sweet orange leaf from Brazil and on unidentified citrus leaf from Italy; *Phyllosticta* sp. on daphne from England; *Rhabdospora* sp. on rhododendron from England; *Ramularia* sp. on gladiolus corm from the Netherlands; *Septoria* sp. on anthurium from Belgium; *Sporocybe* sp. on rhododendron from England; *Tilletia* sp. on wheat from India; and *Uredo* sp. on leek leaves from England and France.

Nematode interceptions worthy of note were *Aphelenchoides* sp. in peanut seed from Uruguay and in a tomato fruit from Mexico; *Aphelenchus* sp. in onion and garlic from Mexico; *Ditylenchus* sp. from Germany in New England aster roots, from Denmark with lily-of-the-valley pips, and from the Netherlands in colchicum corms, iris bulbs, and tigridia bulbs; *Heterodera* sp. in soil with undetermined plant from France; and *Pratylenchus* sp. with lily-of-the-valley pips from Denmark.

A total of 571 incompletely determined pathogens were recorded during the year.

Geographic summary of interceptions listed in main table and interception totals

Country	Insect	Disease	Country	Insect	Disease
	Number	Number		Number	Number
Africa:			Asia (continued):		
Algeria.....	9	1	Cyprus.....	4	1
Cape of Good Hope.....	1	0	Formosa.....	2	1

Eurytoma onobrychidis (Hymenoptera)

OPUNTIA:

Ceratitis capitata (Diptera)
Leucocera quinquepunctata (Coleoptera)

ORCHID:

Acroleucus vicinalis (Hemiptera)
Adelocera longicornis (Coleoptera)
Agonosoma trilineata (Hemiptera)
Aleuroglandulus emmae (Homoptera)
Amphicerus cornutus (Coleoptera)
Anthonomus albolineatus (Coleoptera)
Anthonomus incanus (Coleoptera)
Asterolecanium epidendri (Homoptera)
Attelabus corvinus (Coleoptera)
Calligrapha argus (Coleoptera)
Camirus conicus (Hemiptera)
Chrysomphalus umboniferus (Homoptera)
Cligenes delineata (Hemiptera)
Coelosternus conspurcus (Coleoptera)
Conchaspis angraeci (Homoptera)
Crophius scabrosus (Hemiptera)
Cryphula apicatus (Hemiptera)
Deloyala guttata (Coleoptera)
Diorymerellus laevimargo (Coleoptera)
Eurytoma orchidearum (Hymenoptera)
Eutornus congener (Coleoptera)
Erptochiomera oblonga (Hemiptera)
Erptochiomera tumens (Hemiptera)
Ferrisiana virgata (Homoptera)
Fulvius anthocorides (Hemiptera)
Furcaspis biformis (Homoptera)
Lepidosaphes tuberculata (Homoptera)
Leucocera serripunctata (Coleoptera)
Lygaeus circumlinitus (Hemiptera)
Lygaeus circumplicatus (Hemiptera)
Lygaeus vittiscutis (Hemiptera)
Madarus distigma (Coleoptera)
Mecolaemus carvalhoi (Hemiptera)
Monomorium destructor (Hymenoptera)
Mordellistena cattlejana (Coleoptera)
Mordellistena rufonotata (Coleoptera)
Nasutitermes nigriceps (Isoptera)
Nysius basalis (Hemiptera)
Oedionychis lateralis (Coleoptera)
Oedionychis transversalis (Coleoptera)
Oosternum costatum (Coleoptera)
Orchidophilus peregrinator (Coleoptera)
Parlatoria pseudaspidiotus (Homoptera)

ORCHID—Continued

Phatnoma annulipes (Hemiptera)
Physonota humilis (Coleoptera)
Plagioderes thymaloides (Coleoptera)
Tenthecoris angustimarginatus (Hemiptera)
Tenthecoris bicolor (Hemiptera)
Tenthecoris confusus (Hemiptera)
Tenthecoris distinctus (Hemiptera)
Tenthecoris distinguendus (Hemiptera)
Tenthecoris venezuelensis (Hemiptera)
Trochuda raspa (Lepidoptera)
Valtissus diversus (Hemiptera)
Vinsonia stellifera (Homoptera)
Zale sabena (Lepidoptera)

ORNITHOGALUM:

Haplothrips nigricornis (Thysanoptera)
Taeniothrips simplex (Thysanoptera)
Trionymus lounsburyi (Homoptera)

ORYZA:

Chilo simplex (Lepidoptera)

PAEONIA:

Athous niger (Coleoptera)

PALM:

Aleuroplatus coccoculus (Homoptera)
Aspidiotus destructor (Homoptera)
Parlatoria pitiospori (Homoptera)

PASSIFLORA:

Ceratitis capitata (Diptera)
Iridomyrmex humilis (Hymenoptera)

PASTINACA:

Psila rosae (Diptera)

PENNISETUM:

Targionia sacchari (Homoptera)

PENTZIA:

Trupanea pentziana (Diptera)

PERISTERIA:

Conchaspis angraeci (Homoptera)
Ferrisiana virgata (Homoptera)

PERSEA:

Anastrepha ludens (Diptera)
Caulophilus latinasus (Coleoptera)
Chrysomphalus albopictus (Homoptera)
Chrysomphalus personatus (Homoptera)
Conotrachelus aguacatae (Coleoptera)
Conotrachelus perseae (Coleoptera)
Cryptorhynchus mangiferae (Coleoptera)
Dacus dorsalis (Diptera)
Stenoma catenifer (Lepidoptera)
Thamnomphthorus schwarzii (Coleoptera)

PETROSELINUM:

Systole penicillata (Hymenoptera)

PHALAENOPSIS:

Ferrisiana virgata (Homoptera)
Iridomyrmex humilis (Hymenoptera)

PHASEOLUS:

Callosobruchus analis (Coleoptera)
Callosobruchus chinensis (Coleoptera)
Callosobruchus maculatus (Coleoptera)
Dacus cucurbitae (?) (Diptera)
Epinotia opposita (Lepidoptera)
Fundella pelluscens (Lepidoptera)
Hercothris phaseoli (Thysanoptera)
Maruca testulalis (Lepidoptera)
Zabrotes subfasciatus (Coleoptera)

PHILODENDRON:

Aspidiotus diffinis (Homoptera)
Aspidiotus palmae (Homoptera)
Chrysomphalus albopictus (Homoptera)
Chrysomphalus tenax (Homoptera)
Lepidosaphes carinata (Homoptera)
Pinnaspis buzi (Homoptera)
Pseudicnaspis alienus (Homoptera)

PHLOX:

Agallia quadripunctata (Homoptera)
Thrips flavus (Thysanoptera)

PHOENIX:

Coccotrypes dactyliperda (Coleoptera)
Myelos ceratoniae (Lepidoptera)

PHYSALIS:

Gnorimoschema lavernella (Lepidoptera)
Rhagoletis striatella (Diptera)

PHYTELEPHAS:

Coccotrypes dactyliperda (Coleoptera)

PICEA:

Callidium violaceum (Coleoptera)
Hyturgops palliatus (Coleoptera)
Ips typographus (Coleoptera)
Pityogenes chalcographus (Coleoptera)

PICEA—Continued

Pogonocherus fasciculatus (Coleoptera)

PIMPINELLA:

Pantomorus godmani (Coleoptera)

PINUS:

Acanthocinus aedilis (Coleoptera)
Blastophagus piniperda (Coleoptera)
Callidium violaceum (Coleoptera)
Hylurgops palliatus (Coleoptera)
Ips sexdentatus (Coleoptera)
Ips typographus (Coleoptera)
Kalotermes bequaerti (Isoptera)
Lema melanopa (Coleoptera)
Leucaspis candida (Homoptera)
Pityogenes bidentatus (Coleoptera)
Pityogenes chalcographus (Coleoptera)
"Poliaspis" pini (Homoptera)
Pseudococcus pini (Homoptera)
Ptochoryctes tsugensis (?) (Lepidoptera)

PISTACIA:

Lepidosaphes pistaciae (Homoptera)

PISUM:

Bruchus emarginatus (Coleoptera)
Callosobruchus chinensis (Coleoptera)
Callosobruchus maculatus (Coleoptera)
Laspeyresia nigricana (Lepidoptera)
Neodryocoetes guianae (Coleoptera)

PITTOSPORUM:

Pulvinaria psidii (Homoptera)

PLUMERIA:

Aspidiotus herculeanus (Homoptera)
Asterolecanium pustulans (Homoptera)
Haplothrips gowdeyi (Thysanoptera)
Pseudaonidia clavigera (Homoptera)

POINCIANA:

Stephanoderes lecontei (Coleoptera)

POLIANTHES:

Frankliniella bratleyi (Thysanoptera)

POPULUS:

Dryophthorus corticalis (Coleoptera)

POTULACA:

Celerio lineata (Lepidoptera)
Dicrepidius corvinus (Coleoptera)
Loxostege bifidialis (Lepidoptera)
Loxostege similalis (Lepidoptera)

PRIMULA:

Phragmatobia fuliginosa (Lepidoptera)

PROSOPIS:

Algarobius ceratioborus (Coleoptera)
Algarobius prosopis (Coleoptera)
Rhipibruchus leiboldi (Coleoptera)
Rhipibruchus picturatus (Coleoptera)

PROTEA:

Ananca hottentota (Coleoptera)
Antestia variegata (Hemiptera)
Antestia variegata lineaticollis (Hemiptera)
Homothrips distinctus (Thysanoptera)
Iridomyrmex humilis (Hymenoptera)

PRUNUS ARMENIACA:

Ceratitidis capitata (Diptera)
Nilotaspis halli (Homoptera)
Parlatoria oleae (Homoptera)

PRUNUS DOMESTICA:

Ceratitidis capitata (Diptera)
Chionaspis asiatica (Homoptera)
Epilaspis pircicola (Homoptera)
Iridomyrmex humilis (Hymenoptera)
Megalometis chiliensis (Coleoptera)
Nilotaspis halli (Homoptera)
Parlatoria oleae (Homoptera)

PRUNUS PADUS:

Anthonomus rectirostris (Coleoptera)

PRUNUS PERSICA:

Anastrepha ludens (Diptera)
Ceratitidis capitata (Diptera)
Grapholitha molesta (Lepidoptera)
Nilotaspis halli (Homoptera)
Parlatoria oleae (Homoptera)

PRUNUS PERSICA NECTARINA:

Iridomyrmex humilis (Hymenoptera)
Megalometis chiliensis (Coleoptera)
Nystius simulans (Hemiptera)

PRUNUS MUME (?):

Parlatoria theae (Homoptera)

PRUNUS SP. (cherry):

Leucaspis archangeliskayae (Homoptera)
Mineola indigenella (Lepidoptera)
Rhagoletis cerasi (Diptera)

PSIDIUM:

Anastrepha mombinpraeoptans (Diptera)
Anastrepha suspensa (Diptera)
Ceratitidis capitata (Diptera)
Coccus viridis (Homoptera)
Dacus dorsalis (Diptera)
Tetraneura mori (Homoptera)

PUERARIA:

Callosobruchus ademptus (Coleoptera)

PUNICA:

Anastrepha ludens (Diptera)
Ceratitidis capitata (Diptera)
Chionaspis asiatica (Homoptera)
Cryptoblabes gnidiella (Lepidoptera)
Forficula auricularia (Dermaptera)

PYRUS:

Anastrepha ludens (Diptera)
Ceratitidis capitata (Diptera)
Epilaspis pircicola (Homoptera)
Grapholitha molesta (Lepidoptera)
Lepidosaphes conchiformis (Homoptera)
Leucaspis archangeliskayae (Homoptera)
Monomorium destructor (Hymenoptera)
Parlatoria oleae (Homoptera)
Phyllotreta cruciferae (Coleoptera)

QUERCUS:

Andricus glandium (Hymenoptera)
Callirhytis sonoreae (Hymenoptera)
Conotrachelus integer (Coleoptera)
Curlculio q-griseae (Coleoptera)
Parlatoria oleae (Homoptera)
Scolytus intricatus (Coleoptera)

RAPHANUS:

Baris coerulescens (Coleoptera)
Cyrtopeltis varians (Hemiptera)
Lixus ascanii (Coleoptera)

RENANTHERA:

Vinsonia stellifera (Homoptera)

RHODODENDRON:

Ceroplastes japonicus (Homoptera)
Dalopius marginatus (Coleoptera)
Dialeurodes chittendeni (Homoptera)
Gracilaria azaleella (Lepidoptera)
Pachybrachius turidus (Hemiptera)
Sitona lineata (Coleoptera)
Stephanitis pyrioides (Hemiptera)
Vesiculaphis caricis (Homoptera)

RIBES:

Brachyrhinus sulcatus (Coleoptera)

RORIPPA:

Evergestis rimosalis (Lepidoptera)

ROSA:

Chaetocnema concinna (Coleoptera)
Cryptoccephalus krugii (Coleoptera)
Frankliniella insularis (Thysanoptera)
Lema opulenta (Coleoptera)
Parlatoria theae (Homoptera)
Rhagoletis alternata (Diptera)
Sitona humeralis (Coleoptera)
Taeniothrips atratus (Thysanoptera)
Thrips flavus (Thysanoptera)
Trialetodes vaporariorum (Homoptera)

ROSMARINUS:

Chrysomela americana (Coleoptera)

RUDEBECKIA:

Thrips flavus (Thysanoptera)
Thrips fuscipennis (Thysanoptera)

SABAL:

Coccotrypes dactyliperda (Coleoptera)

SACCHARUM:

Diatraea saccharalis (Lepidoptera)
Rhabdoscelus obscurus (Coleoptera)
Stephanoderes lecontei (Coleoptera)
"Targionia" sacchari (Homoptera)
Tomasaspis postica (Homoptera)

SALIX:

Aglossa cuprealis (Lepidoptera)
Lepidosaphes kuwacola (Homoptera)
Lepidosaphes yanagicola (Homoptera)
Pityophthorus sambuci (Coleoptera)

SAMBUCUS:

Micrapate labialis (Coleoptera)

SAPOTE:

Anastrepha ludens (Diptera)
Anastrepha serpentina (Diptera)

SCHEFFLERA:

Dactylotrypes wyttienboogaarti (Coleoptera)

- SECHIUUM:
Diaphania nitidalis (Lepidoptera)

Newsteadia floccosa (Homoptera)
Platythrips tunicatus (Thysanoptera)
Strophosoma melanogramma (Coleoptera)
Trapezonotus arenarius (Hemiptera)

Countries of origin and insects

AFGHANISTAN:

Chionaspis asiatica
Leucaspis archangeliskya
Parlatoria oleae

ALGERIA:

Ceratitidis capitata
Lepidosaphes ficus
Parlatoria zizyphus
Psila rosae
Sinoryzlon sexdentatum

AMERICAN SAMOA:

Rhabdoscelus obscurus

AMERICAN VIRGIN ISLANDS:

Cylas formicarius elegantulus
Euscepes postfasciatus
Pectinophora gossypiella
"Targionia" *hartii*

ARGENTINA:

Algarobius ceratioborus
Anastrepha fraterculus (?)
Ceratitidis capitata
Diaphania nitidalis
Diatraea saccharalis
Grapholitha molesta
Lygus fraudulentus
Phelomerus germaini
Pseudaonidia trilobitiformis
Rhipibruchus leiboldi
Rhipibruchus picturatus

Unaspis citri
Zabrotes subfasciatus

AUSTRALIA:

Aonidiella citrina
Aracercus vieillardii
Doratifera oleyi
Lepidosaphes tuberculata
Parlatoria zizyphus
Pinnaspis buxi
Xylosandrus morigerus

AUSTRIA:

Anthonomus rectirostris
Rhagoletis alternata (?)
Sparteus villosus

AZORES:

Aglossa cuprealis
Brachyrhinus sulcatus
Ceratitis capitata
Dacus oleae
Iridomyrmex humilis
Pantomorus godmani

BAHAMAS:

Ancylostoma stercorea
Artipus floridanus
Asterolecanium pustulans
Coccus viridis
Ferrisia virgata
Lepidosaphes tokionis
Monomorium destructor

BARBADOS:

Callosobruchus maculatus
"Targionia" hartii

BATAVIA:

Parlatoria pseudaspidiotus

BELGIUM:

Anuraphis tulipae
Bruchus luteicornis
Ctenicera aeneus
Dalopius marginatus
Lepidosaphes tuberculata
Phytomyza atricornis
Pityogenes chalcographus
Psila rosae

BERMUDA:

Anastrepha mombinpraeoptans
Anuraphis tulipae
Diaprepes famelicus
Kaloterms bequaerti
Prodenia eridania
Protopulvinaria pyriformis
Pulvinaria psidii

BINTAN ISLAND:

Ferrisia virgata

BRAZIL:

Acanthoscelides armitagei
Aleurothrixus myrtacei (?)
Anastrepha fraterculus
Asterolecanium epidendri
Ceratitis capitata
Chrysomphalus personatus
Coccotrypes pygmaeus
Diabrotica speciosa
Diaphania nitidalis
Dinoderus bifoveolatus
Dysides obscurus
Epinotia opposita
Eurytoma orchidearum
Euscepes postfasciatus
Furcaspis biformis
Gymnandrosoma aurantianum
Maruca testualis
Mecolaeus carvalhoi
Mordellistena cattlejana
Morganella longispina
Neoleucinodes elegantalis
Pachyzancla periusalis
Parlatoria cinerea
Pectinophora gossypiella
Pseudoaonidia trilobitiformis
Stenoma catenifer
Stephanoderes hampei
Tenthecoris bicolor
Unaspis citri

BRITISH COLUMBIA:

Dialeurodes chittendeni
Thrips trehernei

BRITISH GUIANA:

Asterolecanium bambusae
Callosobruchus chinensis
Furcaspis biformis
Neodryocetes guianae

BRITISH HONDURAS:

Myelois notatalis

BRITISH WEST INDIES:

Callosobruchus chinensis
Lepidosaphes tokionis
Parlatoria cinerea
Stenoma catenifer
Stephanoderes busck
Targionia hartii

CANADA:

Agallia quadripunctata
Agalliptis novella
Gastrodes pacificus
Lygus elisus
Lygus oblineatus
Pyrausta nubilalis

CANAL ZONE:

Acanthoscelides armitagei
Agonosoma trilineata
Aspidiotus destructor
Asterolecanium epidendri
Callosobruchus maculatus
Chrysomphalus umboniferus
Conchaspis angraei
Ferrisia virgata
Furcaspis biformis
Mimosestes dominicanus
Neocattarus vegetus
Physorhinus distigma cephalicus
Protopulvinaria longivalvata
Protopulvinaria pyriformis
Pseudoaonidia trilobitiformis
Pseudischnaspis acephala
Tenthecoris distinctus
Vinsonia stellifera

CAPE OF GOOD HOPE:

Taeniothrips simplex

CAPE VERDE ISLANDS:

Ceratitis capitata

CEYLON:

Heterobostrychus aequalis
Sinocylon conigerum
Xylothrips flavipes

CHILE:

Algarobius ceratioborus
Anastrepha fraterculus (?)
Dinoderus bifoveolatus
Epidiaspis piricola
Iridomyrmex humilis
Leptoglossus chilensis
Megalometis chiliensis
Nysius simulans
Polycaon chiliensis

CHINA:

Aspidiotus degeneratus
Callosobruchus chinensis
Chilo simplex
Coccus viridis
Coptosoma cribraria
Dialeurodes citri
Dialeurodes kirkaldyi
Lepidosaphes tuberculata
Liothrips vaneeckei
Parlatoria camelliae
Parlatoria zizyphi
Taeniothrips gracilis
"Targionia" hartii

Eurytoma orchidearum
Euscepes postfasciatus
Furcaspis biformis
Mimosestes dominicanus
Monomorium destructor
Mordellistena cattlejana
Stenoma catenifer
Tenthecoris exilisus
Termes hispaniolae

COSTA RICA:

Anastrepha ludens
Anastrepha mombinpraeoptans
Aspidiotus destructor
Aspidiotus palmae
Asterolecanium epidendri
Calligrapha elegantula
Chrysomphalus albopictus
Chrysomphalus nigropunctatus
Chrysomphalus personatus
Chrysomphalus scutiformis
Chrysomphalus umboniferus
Conotrachelus perseae
Draeculacephala clypeata
Ferrisia virgata
Furcaspis biformis

COSTA RICA—Continued

Lygaeus viltiscutis
Metamasius sericeus
Nasutitermes corniger
Ozophora consanguineus
Parlatoria cinerea
Physorhynchus distigma
Pinnaspis buzi
Platycaenus humilis
Platypus rugulosus
Pseudoschnaspis alienus
Pseudoparlatoria ostreata
Sibine stimulea
Tenthecoris distinguendus
Xyleborus affinis

CUBA:

Aleurotrachelus trachoides
Anastrepha mombinpraeoptans
Anastrepha suspensa
Aspidiotus destructor
Coccus viridis
Conchaspis angraci
Crociosema plebeiana
Cylas formicarius elegantulus
Diaphania hyalinata
Diaphania nitidalis
Hellula phidilealis
Hercotirrips phaseoli
Heteroderes laurentii
Leucocera sexpunctatus
Maruca testulalis
Pheidole megacephala
Platynota rostrana
Protopulvinaria pyramiformis
Psila rosae
Pulvinaria psidii
Ribua innoxia
Taeniothrips simplex
"Targionia" bromiliae
Zabrotes subfasciatus

CYPRUS:

Ceratitis capitata

CZECHOSLOVAKIA:

Aspidiotus abietis
Hylurgops palliatus
Ips typographus

DENMARK:

Chaetocnema hortensis
Gelechia ericetella
Lema melanopa
Psila rosae
Thrips flavus
Thrips fuscipennis

DOMINICAN REPUBLIC:

Anastrepha fraterculus
Anastrepha mombinpraeoptans
Ancylostoma stercorea
Cryptoccephalus krugii
Cylas formicarius elegantulus
Diaphania nitidalis
Frankliniella insularis
Maruca testulalis

ECUADOR:

Metamasius sericeus
Premnotrypes vorax
Stenomoma calenifer

EGYPT:

Bruchidius incarnatus
Callosobruchus maculatus
Ceratitis capitata
Cryptoblabes gnidiella
Haplothrips cottei
Lixus junci
Pectinophora gossypiella

ENGLAND:

Anuraphis helichrysi
Anuraphis tulipae
Athous haemorrhoidalis
Barynotus moerens
Dalopius marginatus
Euleia heraclei
Evergestis forficatus
Forficula auricularia
Gastrophysa viridula
Laspeyresia splendana
Leperisinus frazzini
Lepidosaphes tuberculata
Megasternum boletophagum

ENGLAND—Continued

Newsteadia floccosa
Phragmalobia fuliginosa
Platythrips tunicatus
Polia oleracea
Psila rosae
Pteleobius vittatus
Scolopostethus affinis
Scolytus intricatus
Thrips flavus
Thrips nigropilosus
Trialeurodes vaporariorum
Zabrotes subfasciatus

EUROPE:

Haplothrips cottei

FIJI ISLANDS:

Cylas formicarius var.
Euscapes postfasciatus

FINLAND:

Callidium violaceum
Pityogenes chalcographus

FORMOSA:

Parlatoria cinerea
Parlatoria zizyphus

FRANCE:

Acalypta parva
Acalypta parvula
Acrolepis assectella
Anuraphis tulipae
Aoromius quinquepunctatus
Apion carduorum
Apion pomonae
Athous subfuscus
Athous vittatus
Baris ocerulescens
Bibio johannis
Brachyrhinus meridionalis
Bruchus affinis
Bruchus guttalis
Bruchus luteicornis
Bruchus rufipes
Catoplatys fabricii
Ceratitis capitata
Dactyloctenium aegyptium
Deraeocoris lutescens
Epidiaspis piriola
Ernaporus tibiae
Grapholitha molesta
Iridomyrmex humilis
Laspeyresia splendana
Lixus ascanii
Mamestra brassicae
Myzus ascalonicus
Newsteadia floccosa
Phyllotreta cruciferae
Polychrosia botrana
Psila rosae
Pulvinaria innumerabilis
Pyrausta nubilalis
Rhagoletis cerasi
Sesamia cretica
Tetraleurodes hederarum
Thrips angusticeps
Trapezonotus arenarius

GERMANY:

Blastophagus piniperda
Callidium violaceum
Cassida nebulosa
Chaetocnema concinna
Hylurgops palliatus
Hypera nigristris
Ips typographus
Laspeyresia splendana
Leucospis candida
Pityogenes bidentatus
Pityogenes chalcographus
Rhagoletis cerasi
Strophosoma melanogramma
Thrips flavus
Trapezonotus arenarius

GREECE:

Aspidiotus spinosus
Callosobruchus maculatus
Ceratitis capitata
Cryptoblabes gnidiella
Haplothrips cottei
Parlatoria oleae

GUAM:

Achatina fulica
Dacus ochrosiae (?)
Ferrisia virgata
"Lepidosaphes" *esakii*
Lepidosaphes tubulorum (?)
Targionia sacchari

GUATEMALA:

Acanthoscelides armitagei
Anastrepha ludens
Anastrepha mombinpraeoptans
Anastrepha serpentina
Aspidiotus destructor
Chrysomphalus albopictus
Chrysomphalus tenax
Cligenes delineata
Coccus pseudohesperidum
Conotrachelus perseae
Euxesta stigmatias
Ferrisia virgata
Furcaspis biformis
Ligyrocoris abdominalis
Lygaeus vittiscutis
Megapenthes cinnamomus
Pachycoris torridus
Pseudischnaspis alienus
Stenoma catenifer
Stephanoderes lecontei
Taeniothrips simplex
Tenthoris vestitus
Zabrotes subfasciatus

HAITI:

Anastrepha mombinpraeoptans
Frankliniella insularis
Leucocera quinquepunctata
Monomorium destructor
Pectinophora gossypiella

HAWAII:

Adoretus sinicus
Algarobius prosopis
Amorbia emigratella
Aonidiella inornata
Araecerus vicillardi
Aspidiotus herculeanus
Aspidiotus spinosus
Asterolecanium pustulans
Athesapeuta cyperi
Callosobruchus chinensis
Callosobruchus phaseoli
Caryedon fuscus
Ceratitis capitata
Ceroplastes rubens
Clerada apicornis
Coccus vitidis
Cryptorhynchus mangiferae
Cryptotermes brevis
Cylas formicarius var.
Dacus cucurbitae
Dacus dorsalis
Dialeurodes kirkaldyi
Diocalandra taitensis
Ereunetis flavistriata
Eucalymnatus tessellatus
Euscapes postfasciatus
Eutreta zanthochaeta
Ferrisia virgata
Furcaspis biformis
Graptostethus servus
Haplothrips gowdeyi
Lampides boeticus
Lepidosaphes tokionis
Leucaspis cockerelli
Maruca testulalis
Nysius dallasi
Orchidophilus peregrinator
Oxydema longulum
Pantomorus godmani
Parlatoria crotonis
Parlatoria fluggeneae
Parlatoria pseudaspidotus
Pealtus hibisci
Pectinophora gossypiella
Phenacaspis sandwicensis
Pinnaspis buzi
Poecilips persicae
Pseudoaemidia clavigera
Pseudoaemidia tessarata
Pseudococcus palmarum

HAWAII—Continued

Sinozylon conigerum
Taeniothrips hawaiiensis
"Targionia" *bromiliae*
Thrips hawaiiensis

HONDURAS:

Anastrepha ludens
Anastrepha mombinpraeoptans
Aspidiotus destructor
Brentus anchorago
Conotrachelus perseae
Cosmopolites sordidus
Cryptotermes brevis
Lygaeus vittiscutis
Metamasius sericeus
Mordellistena catleyana
Nasutitermes corniger
Prodenia eridania
Pseudischnaspis alienus
Stenoma catenifer
Tenthoris confusus
Zabrotes subfasciatus

HUNGARY:

Ips typographus
Pityogenes chalcographus
Pyrausta nubilalis

INDIA:

Amphicerus cornutus
Bruchus affinis
Bruchus emarginatus
Callosobruchus analis
Callosobruchus chinensis
Callosobruchus maculatus
Callosobruchus phaseoli
Caryedon fuscus
Coccotrypes dectyliperda
Coccus capparidis
Cryptorhynchus mangiferae
Cylas formicarius
Cylas formicarius var.
Dacus dorsalis
Dinoderus brevis
Eutornus congener
Heterobostrychus aequalis
Lepidosaphes tuberculata
Monomorium destructor
Parlatoria pseudaspidotus
Pectinophora gossypiella
Pinnaspis buzi
Sinozylon anale
Sinozylon conigerum
Systole geniculata
Taeniothrips gracilis
Zabrotes subfasciatus

IRAQ:

Cylas formicarius var.
Myelois ceratoniae

IRELAND:

Barypeithes araneiformis
Drymus sylvaticus
Forficula auricularia
Hydrothassa marginella
Mamestra brassicae
Mecinus pyrastrer
Psila rosae
Saldula saltatoria

ISRAEL:

Nilotaspis halli

ITALY:

Acanthoscelides spinipes
Acrolepis assectella
Aphanus saturnius
Apion carduorum
Brachycerus albidentatus
Brachycerus alpinus
Bruchus ervi
Bruchus lentis
Bruchus luteicornis
Bruchus signaticornis
Bruchus tristis
Bruchus tristis
Callosobruchus chinensis
Callosobruchus maculatus
Ceratitis capitata
Ceroplastes rusci
Chrysomela americana
Cryptoblabes gmdrella

ITALY—Continued

Dacus oleae
Dryophthorus corticalis
Epidiaspis piriicola
Eurydema ornatum
Evergestis forficatus
Forficula auricularia
Grapholitha molesta
Hemimene juliana
Iridomyrmex humilis
Laspeyresia splendana
Lepidosaphes ficus
Myelois ceratoniae
Orycaenus lavaterae
Parlatoria oleae
Parlatoria zizyphus
Pectinophora gossypiella
Phalonia zephyrana
Polychrosia botrana
Psila rosae
Pyrausta nubilalis
Rhagoletis cerasi
Sesamia cretica
Sitona humeralis
Sparticus villosus
Targionia vitis
Trialeurodes lauri

JAMAICA:

Anastrepha mombinpraeoptans
Aspidiotus destructor
Asterolecanium epidendri
Callosobruchus chinensis
Callosobruchus maculatus
Callosobruchus phaseoli
Genopaschia protomis
Leucaspis cockerelli
Pachyzancla periualis
Pectinophora gossypiella
"Targionia" sacchari
Vinsonia stellifera

JAPAN:

Aleurotrachelus camelliae
Anomala rufocuprea viridiaenea
Aspidiotus pseudomeyeri
Callosobruchus ademptus
Callosobruchus chinensis
Ceroplastes ceriferus
Ceroplastes japonicus
Ceroplastes rubens
Chilo simplex
Cryptoparlatoria leucaspis
Gracilaria azaleella
Lepidosaphes conchiformis
Lepidosaphes kuwacola
Lepidosaphes pallida
Lepidosaphes yanagicola
Mineola indigenella
Myllocerus hilleri
Paracardiorhynchus pauper
Parlatoria camelliae
Parlatoria chinensis
Parlatoria pseudaspidiotus
Parlatoria theae
Parlatoria zizyphus
"Poliaspis" pini
Pseudococcus pini
Ptochoryctis tsugensis (?)
Stephanitis pyroides
Unaspis yamamotoi
Vesiculaphis caricis

KENYA:

Specularius impressithorax

KOREA:

Pseudococcus pini

LEBANON:

Bruchidius incarnatus
Bruchus dentipes
Bruchus ervi
Ceratitidis capitata
Cryptoblabes gnidiella
Dacus oleae
Monomorium destructor
Prays oleellus (?)

MADEIRA ISLANDS:

Bruchus guttalis
Ceratitidis capitata
Cryptoblabes gnidiella
Forficula auricularia

MADEIRA ISLANDS—Continued

Iridomyrmex humilis

MEXICO:

Acanthoscelides griseolus
Acanthoscelides obrepus
Acroleucus vicinialis
Acrosticta mexicana
Adelocera longicornis
Aleurocanthus woglumi
Aleuroglandulus emmae
Aleuroparadozus gardeniae
Aleuroplatus coccolus
Algarobius prosopis
Alpheias conspirata
Amorbia emigratella
Amphicerus cornutus
Anastrepha fraterculus
Anastrepha ludens
Anastrepha mombinpraeoptans
Anastrepha serpentina
Anthonomus albolineatus
Anthonomus incanus
Aonidiella citrina
Aphanus umbrosus
Argyrotaenia franciscana (?)
Arvelius albopunctatus
Aspidiotus destructor
Aspidiotus diffinis
Aspidiotus palmarum
Aspidiotus spinosus
Asterolecanium bambusae
Asterolecanium epidendri
Attelabus corvinus
Calligrapha argus
Callirhytis sonoreae
Callosobruchus maculatus
Camirus conicus
Caulophilus latinasus
Celerio lineata
Chalcodermus dentiferus
Chelymophora biannularis
Chrysomphalus albopictus
Chrysomphalus nigropunctatus
Chrysomphalus personatus
Chrysomphalus scutiformis
Chrysomphalus umbriferus
Coclosternus conspuratus
Conchaspis angraeci
Conotrachelus aguacatae
Conotrachelus integer
Conotrachelus perseae
Crophilus scabrosus
Cryphula apicatus
Curculio g-griseae
Cylas formicarius elegantulus
Cyrtopeltis varians
Deloia guttata
Dendrobiella sericans
Dialeurodes citri
Diaphania hyalinata
Diaphania nitidalis
Diatraea saccharalis
Dicrepidius corvinus
Diorymerellus laevimargo
Dysdercus mimulus
Epicaerus cognatus
Epilachna varietatis
Epinotia opposita
Eucalandra setulosa
Eucalymnatus tessellatus
Eumysia stigmella
Euxesta annonae
Evergestis rimosalis
Exptochiomeria oblonga
Exptochiomeria tumens
Ferrisiana virgata
Fulvius anthocorides
Gerstaeckeria mutillaria
Glyphonox praecox
Glyphonox quadricollis
Gnorimoschema gudmannella
Gnorimoschema lavernella
Grapholitha molesta
Grapholitha packardii
Gynaikothrips ficorum
Horistonotus dilaticornis
Horistonotus rufiventris
Hypolithus pectoralis

Laspeyresia splendana

List of pests (diseases) collected and reported from July 1, 1948, to June 30, 1949, inclusive
[An asterisk indicates State inspection]

Disease and host	Country of origin	Number of interceptions in—			Collected in—
		Con- sump- tion	Non- entry	Prop- aga- tion	
<i>Acroboles ciliatus</i> von Linstow:					
<i>Aster novae-angliae</i>	Germany.....			1	New York.
(New England aster)					
Soil around azalea plants.....	Netherlands.....			1	Alabama.
<i>Alternaria citri</i> Ell. & Pierce:					
<i>Citrus sinensis</i> (orange).....	Argentina, Cyprus, Union of South Africa.		3		New York, Pennsyl- vania.
<i>Alternaria dianthi</i> F. L. Stevens & J. G. Hall:					
<i>Dianthus</i> sp. (carnation).....	Australia, Brazil.	1		2	California*, New York.
<i>Alternaria gypsophilae</i> Neerg.:					
<i>Gypsophila paniculata</i> (babysbreath)	Brazil.....	1			New York.
<i>Alternaria porri</i> (Ell.) Cif.:					
<i>Allium cepa</i> (onion).....	Mexico.....	3			Texas.
<i>Lycopersicon esculentum</i> (tomato).....	do.....	1			Do.
<i>Anguina tritici</i> (Steinbuch) Filip.:					
<i>Triticum aestivum</i> (wheat).....	Afghanistan, Iran, Iraq, Turkey.			9	District of Columbia.
<i>Aphanomyces raphani</i> Kendr.:					
<i>Raphanus sativus</i> (radish).....	Mexico.....	6			Texas.
<i>Aphelenchus aderholdi</i> Schwartz:					
<i>Convallaria majalis</i>	Denmark, Germany.	1		2	New York.
(lily-of-the-valley)					
<i>Aphelenchus avenae</i> Bastian:					
<i>Aster novae-angliae</i>	Germany.....			1	Do.
(New England aster):					
<i>Ascochyta haworthiae</i> Trinch.:					
<i>Haworthia</i> sp.....	Union of South Africa.			2	California.*
<i>Ascochyta lycopersici</i> Brun.:					
<i>Physalis ixocarpa</i> (tomatillo).....	Mexico.....	3			Texas.
<i>Physalis</i> sp. (husk tomato).....	do.....	1			Do.
<i>Ascochyta pisi</i> Lib.:					
<i>Pisum sativum</i> (pea).....	England.....	3	3		New York, Texas.

UNITED STATES DEPARTMENT OF AGRICULTURE

AGRICULTURAL RESEARCH ADMINISTRATION

BUREAU OF ENTOMOLOGY AND PLANT QUARANTINE

SERVICE AND REGULATORY ANNOUNCEMENTS

LIST OF INTERCEPTED PLANT PESTS, 1950¹

(List of Pests Recorded During the Period July 1, 1949, to June 30, 1950, Inclusive, as Intercepted in, on, or with Plants and Plant Products Entering United States Territory)

INTRODUCTION

This report, covering the thirty-seventh year for which interception lists have been issued, summarizes the records of insect pests, plant pathogens, and certain other organisms found in, on, or with plants and plant products (1) imported, (2) offered for but refused entry, (3) held as ships' stores, etc., and hence not offered for entry through customs, (4) offered for entry for immediate export or for immediate transportation and exportation in bond, and (5) in domestic shipments between Hawaii and Puerto Rico and the mainland.

In some cases collections made late in the year are included in the report for the following year, since determination cannot be obtained immediately for all of them. Occasionally determinations are delayed for longer periods. The data for this list are obtained from routine reports by personnel of this Bureau, supplemented by information supplied by State and Customs officials. The States of California and Florida maintain staffs of specialists who identify a large proportion of the material collected at their ports. Specialists of the Bureau of Plant Industry, Soils, and Agricultural Engineering determine many of the difficult or unusual pathogens collected at the ports.

All scientific names are reviewed by appropriate specialists in the Department to assure conformance to the international rules of nomenclature.

Although every reasonable effort is made to give the correct origin for all collections listed, the alleged origin of host plant materials cannot be verified in all cases, and where there is reason to doubt the accuracy of the information, the questionable items are either omitted or the origin is listed as unknown.

During the year importations of plant materials continued to arrive in considerable numbers by both surface and air transportation, with the latter means of plant movement continuing to grow in importance. Air passengers' baggage has proved to be an especially frequent avenue of arrival for such serious pests as fruit flies and the golden nematode, which are now able to reach our shores only a few hours after leaving other lands hundreds or even thousands of miles away.

INTERCEPTIONS FROM AIR-BORNE MATERIAL

Plant pests have been intercepted frequently on air-borne plant material in mail, baggage, express, stores, and freight. During the year 3,702 interceptions were made of insects on imported plant parts or as stowaways, and 390 interceptions of plant diseases. Approximately one-fourth of the pathogens were not determinable as to species, but from the evidence, appeared to exhibit little or no risk to the country. A few of the specifically identified parasites are unknown in the United States.

Among the more important insects found in air-borne material were: The citrus blackfly (*Aleurocanthus woglumi*) on *Citrus* sp. leaves in baggage from the Bahamas and Nicaragua; the whitefly, *Aleurothrixus myrtacei*, on gardenia leaf in baggage from Mexico; the Mexican fruit fly (*Anastrepha ludens*) in mango in baggage from

¹ Compiled by W. H. Wheeler, pathologist, Judith Hunt, plant quarantine aid, and P. X. Peltier, entomologist, Division of Plant Quarantines.

Guatemala, in mango in stores from Mexico, in orange in baggage and quarters from Mexico, in orange in baggage and stores from Guatemala, and in sweet lime in baggage from Mexico; the West Indian fruit fly (*A. mombinpraeoptans*) in mango in baggage from Cuba, Dominican Republic, Guatemala, Jamaica, Mexico, Nicaragua, and Salvador, in mango in baggage and mail from Puerto Rico, in a bag containing *Spondias* spp. and guavas in baggage from Brazil, and in yellow mombin in baggage from Guatemala, Nicaragua, Salvador, and Venezuela; *A. mombinpraeoptans* (?) in mango in baggage from the Canal Zone and in a bag which had contained guavas and yellow mombins from Trinidad; *A. serpentina* in sapote in baggage from Salvador; *A. striata* (?) in guava in baggage from Trinidad; *A. suspensa* in bitter almond in baggage from Puerto Rico, in guava in baggage from Cuba, and in guava in baggage and mail from Puerto Rico; an olethreutid, *Argyroplote leucotreta*, in orange in baggage from the Union of South Africa; a carposonid, *Carposina sasakii*, in apple in baggage from Korea; the Mediterranean fruit fly (*Ceratitis capitata*) in *Annona* sp., cherimoya, and loquat in baggage from the Madeira Islands, in apple in baggage from Portugal, in coffee berries in express from Brazil, in fig in baggage from the Azores and Italy, in grapefruit in stores from Cyprus, in guava in baggage from Israel and Portugal, in kumquat in baggage from France, in orange in baggage from the Azores, Italy, and Spain, in orange in stores from the Azores and Portugal, in peach in baggage from the Azores, Portugal, and Syria, in peach in stores from France and Portugal, in pear in baggage from Austria (?), the Azores, Italy, and Portugal, in pear in stores from the Azores, Portugal, and Turkey, in persimmon in baggage from Italy, in quince in baggage from Italy and Portugal, in plum in baggage from the Azores, in pricklypear in baggage from Italy, in strawberry guava in baggage from Portugal, in tangerine in baggage from the Azores, Italy, Malta, Portugal, and Syria, in tangerine in cargo from Spain, and in tangerine in stores from Portugal and Syria (?); *C. capitata* (?) in apricot in baggage from France and Italy, in fig in baggage from France and Lebanon, in mango in baggage from Egypt, in nectarine in baggage from Italy, in orange in stores from French West Africa and Portugal, in peach in baggage from Italy, in pear in baggage from Syria, and in pricklypear in baggage from Spain; the banana root borer (*Cosmopolites sordidus*) in banana root in baggage from Salvador; *Cylas formicarius* in sweetpotato in stores from India; *C. formicarius* var. in sweetpotato in cargo from the Philippines and in sweetpotato in stores from India; four adults of the oriental fruit fly (*Dacus dorsalis*) were intercepted in preflight inspection of airplanes leaving Hawaii for the mainland; immature stages of *D. dorsalis* (?) were intercepted twice in coffee berries in baggage in preflight inspection of airplanes leaving Hawaii for the mainland and once in an avocado in stores from the Philippines; the olive fruit fly (*D. oleae*) in olive in baggage from Italy, Lebanon, Portugal, Saudi Arabia, Spain, and Syria and in olive in cargo from Italy; the rhododendron whitefly (*Dialeurodes chittendeni*) on rhododendron in express from the Netherlands; the Tahitian coconut weevil (*Diocalandra taitensis*) in coconut in baggage, cargo, and mail in preflight inspection of airplanes leaving Hawaii for the mainland; the East Indian bean pod borer (*Maruca testulalis*) in string bean in cargo from British Guiana, in string bean in mail leaving Hawaii for the mainland, in pigeonpea and green herb in mail from Puerto Rico, in leis of *Canavalia* sp. in baggage in preflight inspection of airplanes leaving Hawaii for the mainland, in pigeonpea and string bean in baggage in preflight inspection of airplanes leaving Puerto Rico for the mainland; the tephritid *Myiopardalis pardalina* in snake melon in baggage from Lebanon; the pink bollworm (*Pectinophora gossypiella*) in cottonseed in baggage from Antigua, in cottonseed in cargo from Siam, in cotton boll in baggage from the Virgin Islands, in cottonseed, okra, and seed cotton in baggage in preflight inspection of airplanes leaving Puerto Rico for the mainland; the leaf roller *Polychrosis botrana* in green grapes in baggage from Lebanon; *Rhagoletis alternata* in rose hips in quarters from unknown origin; *R. cerasi* in cherry in baggage from France, Italy, Spain, and Switzerland and in cherry in stores from France, Italy, and Switzerland; *R. cerasi* (?) in cherry in baggage from Greece and in cherry in stores from Sweden; *Serica brunnea* in soil with unidentified plants in baggage from the Netherlands; *S. brunnea* (?) in soil with plants of *Delphinium* sp. in baggage from Sweden; the coffee berry borer (*Stephanoderes hampei*) in coffee beans in baggage from Brazil, in coffee beans in cargo from the Netherlands East Indies, and in coffee beans in quarters from South America.

The more important plant disease organisms found on air-borne material, and not as yet believed to be established in the United States were: *Ascochyta citri* (?) on orange in stores from the Fiji Islands; *Cercospora lythracearum* on pomegranate

in baggage from Puerto Rico; *C. pini-densiflorae* on pine in cargo from China; *Chrysomya rhododendri* on *Rhododendron ferrugineum* in baggage from Austria, Germany, and Switzerland; *Elsinoe australis* on lemon in baggage from Brazil and on orange in stores from Argentina and Brazil; *E. phaseoli* on lima bean in mail from Puerto Rico; *Maraschia hyalospora* on *Acacia confusa* in cargo from China; *Melampsoridium betulinum* on birch in baggage from Finland; *Phyllosticta nigromaculans* on orchid in baggage from the Philippines; *Septoria examinans* on *Ilex pumila* in express from Switzerland; *S. posekensis* on *Miltonia* sp. (orchid) in cargo from Colombia; *Sphaceloma fawcettii* var. *scabiosa* on lemon in quarters from Australia and on lemon in baggage from New Zealand; *Thecopsora areolata* on *Prunus* sp. in baggage from Finland; *Uromyces scillarum* on *Muscari* sp. in baggage from England; and *Xanthomonas citri* on sour lime in baggage, quarters, and stores from India.

Intercepted plant disease organisms found on air-borne material, that are generally of limited distribution in the United States, were *Camellia* yellow spot virus on *Camellia japonica* in express from Italy; *Cercospora neriella* on oleander in cargo from Bermuda; *Curvularia lunata* on gladiolus in cargo from Mexico and on gladiolus in express from French Guinea; *Cycloconium oleaginum* on olive in baggage from Italy; *Helminthosporium oryzae* on rice in baggage from Greece; *Heterodera punctata* in soil in baggage from Germany, in soil with chrysanthemum plants in mail, and in soil with orchid roots in express from England; *H. rostochiensis* in soil on heather plants in baggage from Scotland, in soil on shamrock plants in baggage from Ireland, and in soil with a maidenhair fern plant in baggage from England; *Pseudomonas savastanoi* on an olive twig in baggage from Italy; *Puccinia arenariae* on sweet-william in baggage from the Netherlands; *P. chrysanthemi* on chrysanthemum in cargo from Japan; *Septoria chrysanthemi* on chrysanthemum in express from Japan and the Netherlands, and in cargo from Japan and Mexico; *S. citri* on orange in stores from Australia; and *S. perseae* on avocado in baggage from Guatemala.

NOTES ON INSECTS INTERCEPTED

FRUIT FLIES

The following fruit flies were intercepted: *Anastrepha grandis* in squash in stores from Brazil; the Mexican fruit fly (*A. ludens*) in avocado in baggage from Mexico, in grapefruit in baggage, cargo (in transit for export), and in stores from Mexico, in mamey in baggage from Mexico, in mango in baggage from Guatemala and in mango in baggage, quarters, and stores from Mexico, in orange in baggage and stores from Guatemala and Mexico, and in orange in cargo (in transit for export) and in quarters from Mexico, in peach, pear, sapote, sour orange, and sweet lime in baggage from Mexico, and in the refrigerator of a trailer from Mexico; *A. ludens* (?) in apple, avocado, mango, orange, and pomegranate in baggage from Mexico; the West Indian fruit fly (*A. mombinpraeoptans*) in mango in baggage from Cuba, Dominican Republic, Guatemala, Honduras, Jamaica, Mexico, Nicaragua, Panama, Puerto Rico, and Salvador, in mango in cargo from Mexico and Puerto Rico, in mango in mail from Jamaica and Puerto Rico, in mango in quarters from Cuba, Dominican Republic, Guatemala, Haiti, Honduras, Mexico, Panama, and Puerto Rico, in mango in stores from Costa Rica, Mexico, and Panama, in purple mombin in baggage from Mexico, in yellow mombin in baggage from Guatemala, Mexico, Nicaragua, Salvador, and Venezuela, in yellow mombin in mail from Puerto Rico, and in a bag containing *Spondias* spp. and guavas in baggage from Brazil; *A. mombinpraeoptans* (?) in a bag which had contained guavas and yellow mombins in baggage from Trinidad, in mango in baggage from the Canal Zone, Dominican Republic, Mexico, Nicaragua, and Puerto Rico, in mango in mail from the Virgin Islands, and in mango in quarters from Panama; *A. serpentina* in sapote in baggage from Salvador and in tangerine in stores from Peru; *A. serpentina* (?) in mamey in baggage from Mexico; *A. striata* in guava in baggage from the Dominican Republic and Mexico; *A. striata* (?) in guava in baggage from Ecuador and Trinidad; *A. suspensa* in bitter almond in baggage from Puerto Rico, in guava in baggage from Cuba and Puerto Rico, in guava in mail from Puerto Rico; *A. suspensa* (?) in guava in baggage and mail from Puerto Rico; *Ceratitidis anonae* in avocado in stores from Gold Coast, Africa; the Mediterranean fruit fly (*C. capitata*) in *Annona* sp. in baggage from the Madeira Islands, in apple in baggage from France, Italy, and Portugal, in cherimoya in baggage from the Madeira Islands, in coffee berries in express from Brazil and coffee

berries in mail from Hawaii, in fig in baggage from the Azores and Italy, in grapefruit in stores from the Canary Islands, Cyprus, Egypt, Israel, and Spain, in guava in baggage from Israel and Portugal, in strawberry guava in baggage from Portugal, in kumquat in baggage from France, in lemon in baggage from Italy, in loquat in baggage and mail from the Madeira Islands, in orange in baggage from the Azores, France (?), Italy, and Spain, in orange in cargo and quarters from Italy, in orange in stores from Algeria, the Azores, Egypt, Italy, and Portugal, in peach in baggage from the Azores, Portugal, and Syria, in peach in stores from France and Portugal, in pear in baggage from Austria (?), the Azores, France, Italy, and Portugal, in pear in stores from the Azores, France, Portugal, and Turkey, in persimmon in baggage from Italy, in plum in baggage from the Azores, in pricklypear in baggage from Italy, in quince in baggage from Italy and Portugal, in tangerine in baggage from the Azores, Italy, Malta, Portugal, Spain, and Syria; *C. capitata* (?) in apple in baggage from France, in apricot in baggage from France and Italy, in cactus fruit in baggage from Italy, in coffee berries in baggage from Hawaii, in fig in baggage from France, Italy, and Lebanon, in grapefruit in stores from Cyprus, in mango in baggage from Egypt, in nectarine in baggage from Italy, in orange in stores from French West Africa, Italy, and Portugal, in peach in baggage from Italy, in pear in baggage from Syria, in pear in stores from France, and in pricklypear in baggage from Italy and Spain; the melon fly (*Dacus cucurbitae*) in cucumber in cargo and stores from Hawaii, in sweetbell red pepper and tomato in stores from Hawaii; *D. cucurbitae* (?) in cucumber in stores from Hawaii and in melon in stores from India; the Oriental fruit fly (*D. dorsalis*) in banana in baggage, quarters, and stores from Hawaii, in mango in baggage from Hawaii, in mango in mail from Guam, in *Ochrosia elliptica* in baggage from Hawaii, in pepper, sweetbell red pepper, and tomato in stores from Hawaii, and four adults in preflight inspection of airplanes leaving Hawaii for the mainland; *D. dorsalis* (?) in avocado in stores from the Philippines, in banana in baggage from Hawaii, and in coffee berries in baggage from Hawaii; the olive fruit fly (*D. oleae*) in olive in baggage from Greece, Italy, Lebanon, Portugal, Saudi Arabia, Spain, and Syria, in olive in cargo from Italy, and in olive in mail from Italy and Tripoli; *D. oleae* (?) in olive in baggage and stores from Italy; *Mycipardalis pardalina* in snake melon in baggage from Lebanon; *Rhagoletis alternata* in rose hip in quarters from unknown origin; *R. alternata* (?) in rose hip in cargo from the Netherlands; *R. cerasi* in cherry in baggage from France, Italy, Spain, and Switzerland, in cherry in cargo from Germany, in cherry in mail from Switzerland, and in cherry in stores from France, Germany, Italy, and Switzerland; *R. cerasi* (?) in cherry in baggage from Greece and in cherry in stores from Sweden; *R. pomonella* in apple in baggage and quarters from Mexico; *R. striatella* in husk tomato in baggage from Mexico; the papaya fruit fly (*Toxotrypana curvicauda*) in papaya in baggage from Mexico.

INSECTS OTHER THAN FRUIT FLIES

The following miscellaneous insects of special interest were intercepted: The citrus blackfly (*Aleurocanthus woglumi*) on leaves of *Citrus aurantifolia* in baggage and cargo from Mexico, on leaf of *C. aurantifolia* in stores from Costa Rica, on leaves of *Citrus* sp. in baggage from the Bahamas, Mexico, and Nicaragua, on orange leaf in baggage from Mexico, on sour orange leaf in baggage from Colombia, on tangerine leaf in baggage from Mexico, and on an unknown plant in baggage from Mexico; *Aleurothrixus myrtacei* (Aleyrodidae) on gardenia leaf in baggage from Mexico; a bostrichid, *Bostrychophiles cornutus*, in a wooden crate for veneer in cargo from the Gold Coast; a bruchid, *Bruchidius incarnatus*, a potential pest not established in the United States, in broadbean in baggage from Egypt and Lebanon, in broadbean and lentils in mail from Egypt, and in *Vicia* sp. seed in cargo from Egypt; the Asiatic rice borer (*Chilo simplex*) in rice straw in mail from China, Germany, and Japan, in rice straw in baggage from China, and in rice straw in cargo from China and Japan; *C. simplex* (?) in rice straw in mail from Egypt; "*Chionaspis*" *funtumiae* (Coccidae) on *Alafia* sp. plant in mail from Nigeria; a scolytid, *Coccotrypes pygmaeus*, in *Euterpe badiocarpa* (palm) in baggage from Brazil, in palm seed in cargo from Mexico, and in *Ptychosperma elegans* (solitaire palm) in baggage from Argentina; *Coptotermes formosanus*, a very destructive subterranean termite, in *Aglaonema simplex* in cargo from China and in wooden packing cases in cargo from Hawaii; *C. niger*, another earth-living termite, in a wooden packing case in cargo from Hawaii; the banana root borer (*Cosmopolites sordidus*) in banana roots in baggage from Salvador;

Crepidodera asphaltina (?) (Chrysomelidae) with tomatoes in cargo from Mexico; *Crioceris lili* (Chrysomelidae) in Madonna lily bulb in cargo from France; a curculionid, *Diaprepes abbreviatus* var., with an unidentified plant in mail from Puerto Rico; the Tahitian coconut weevil (*Diocalandra taitensis*) in coconut in baggage, cargo, and mail from Hawaii; a curculionid, *Epicraerus cognatus*, in potato in stores from Mexico; *Gymnandrosoma aurantianum* (Olethreutidae) in orange in quarters from Trinidad and in orange in stores from Brazil; a chrysomelid, *Lema bilineata*, recorded as a pest of tobacco in Argentina and Africa where it has established itself, in an airplane originating in Rio de Janeiro, Brazil; *Leucinodes orbonalis* (?) (Pyraustidae) in eggplant in stores from India; *Palaeopus costicollis* (Curculionidae) in ginger root in mail from Jamaica; the pink bollworm (*Pectinophora gossypiella*) in cotton boll in baggage from Hawaii, Venezuela, and the Virgin Islands, in cotton boll in express from the Gold Coast, in cottonseed in baggage from Antigua, Hawaii, and Mexico, in cottonseed in baggage in preflight inspection of an airplane leaving Puerto Rico for the mainland, in cottonseed in cargo from Egypt, India, Lebanon, Mexico, and Siam, in cottonseed in mail from Hawaii, India, Japan, and Syria, in cottonseed in quarters from Mexico, in seed cotton in baggage from Mexico, in seed cotton in baggage in preflight inspection of an airplane leaving Puerto Rico for the mainland, in seed cotton in cargo from Mexico, in seed cotton in mail from Hawaii and the Philippines, in seed cotton in quarters from Mexico, in okra in baggage in preflight inspection of an airplane leaving Puerto Rico for the mainland, in okra in mail from India, and in okra in stores from Brazil and the Dominican Republic; *Pheidole megacephala* (Formicidae), and important economic species, on gladiolus in baggage from Argentina, on hibiscus and oleander in baggage from Bermuda, on lily bud in cargo from Bermuda, on pineapple in cargo from Cuba, on yam in mail from St. Kitts, and in soil with potted plants in quarters from Honduras; *Prays endocarpa* (Hyponomeutidae) in pummelo in stores from the Philippines; *Sesamia cretica* (Phalaenidae) in corn in baggage from Italy; the coffee berry borer (*Stephanoderes hampei*) in coffee beans in baggage and mail from Brazil, in coffee beans in cargo from Angola and the Netherlands East Indies, and in coffee beans in quarters from South America; the bulb scale mite (*Tarsonemus laticeps*) in narcissus bulbs in mail from England and the Netherlands.

SNAILS

Salvaged military equipment continues to be contaminated with the giant African snail (*Achatina fulica*). Nine shiploads were involved during the year. Two of the contaminated cargoes arrived at New Orleans, La., from Guam and Saipan, five at San Pedro, Calif., from Guam and Saipan, and one at Baltimore, Md., from Saipan. In addition to these, one specimen was taken at Honolulu, Hawaii on a *Dendrobium* orchid leaf from Palau Island.

Other interceptions of snails, not known to occur on the mainland of the United States and injurious to agriculture, were *Bradybaena similaris* on plants of the African daisy and on cuttings of geranium at New York, N. Y., from Bermuda, on cut flowers of carnations and snapdragons at the National Airport, Arlington, Va., from Bermuda, and with *Phaseolus vulgaris* at Philadelphia, Pa., from Bermuda. *Lamellaxis* sp. was taken at San Diego, Calif., in soil around an unknown plant from Algeria and also at Honolulu, Hawaii, in potting material for a *Cypripedium* orchid from India.

NOTES ON DISEASES INTERCEPTED

For the fourth year of the last five, India has contributed the greatest number of interceptions (17) of citrus canker (*Xanthomonas citri*), all on sour limes. China, in second place, contributed 10 canker importations on sweet oranges and 1 on Mandarin orange. From Japan came 8 importations of citrus canker on various citrus species including grapefruit, lemon, Mandarin orange, and pummelo. A second disease of importance to the citrus industry, the sweet orange fruit scab (*Elsinoe australis*) was found 42 times each on lemons and oranges from Argentina and Brazil, twice on Mandarin orange from Brazil, once each on grapefruit and lime from Brazil, and 9 times on *Citrus* spp. from Argentina and Brazil. Canker "B", a disease similar to citrus canker, was intercepted 4 times on lemons from Argentina.

The fungus, *Aphanomyces raphani*, was intercepted on radishes in baggage and cargo from Mexico. From the same country came *Cercospora oryzae* intercepted

on rice carried in baggage. A rust of considerable importance, *Chrysomyxa rhododendri*, was brought into this country on 7 different occasions. Three interceptions were made in mail and baggage from Austria, while two each were made in baggage from Switzerland and Germany. This disease is considered a possible threat, not only to certain rhododendrons, but also to the alternate hosts which are members of the genus *Picea*. Another rust of possible importance, *Gymnosporangium haraeum*, was intercepted on flowering quince in baggage from Japan. The alternate hosts of this rust are species of the genus *Juniperus*. Also of potential importance as a coniferous disease was *Cercospora pini-densiflorae* arriving with a cargo of *Pinus massoniana* from China.

Other organisms of importance were a leaf spot, *Cercospora handelii*, on rhododendron from Belgium and the Netherlands; a fruit- and leaf-spotting fungus, *C. lythracearum*, on pomegranate from Mexico and Puerto Rico; a smut, *Entyloma oryzae*, on rice straw from Mexico; *Helminthosporium oryzae*, causing brown spot of rice, from Cuba, Greece, and Mexico; a rust, *Marasmiella hyalospora*, on *Acacia confusa* from China; a rust, *Melampsoridium betulinum*, on birch from Finland; *Mystrosporium adustum*, known as the ink spot fungus, on netted iris bulbs from the Netherlands; the citrus black spot (*Phoma citricarpa*) on various species of *Citrus* from American Samoa, Australia, China, and Japan, on Mandarin orange from Australia, China, and Japan, and on sweet orange from Australia, Argentina, Brazil, China, Japan, the Philippines, Straits Settlements, Tasmania, and the Union of South Africa; a smut, *Urocystis colchici*, on *Colchicum* sp. from the Netherlands; a smut, *C. gladiolicola*, on gladiolus from the Netherlands; and a rust, *Uromyces holwayi*, on Columbia lily from British Columbia. Certain sclerotial forms of fungi were intercepted including *Sclerotinia bulborum* on fritillary from the Netherlands, *S. minor* on endive from Belgium, and *Sclerotium cepivorum* on garlic from Italy.

Nematodes are becoming increasingly important as plant pests. This is the second year that the golden nematode (*Heterodera rostochiensis*) has been intercepted. The year's total of 82 interceptions came from soil with vegetables in ships' stores and in soil with plant material imported for propagation. The countries from which this very serious potato and tomato pest of Europe arrived were Argentina, Denmark, England, France, Germany, Ireland, the Netherlands, Northern Ireland, Poland, Scotland, Sweden, and Wales. Other nematodes of possible concern reported during the year were: *Aphelenchoides ribes* (?) in soil with lavender plant from England; *A. subtenuis* in orchid iris from the Netherlands and in paper-white narcissus from Italy; *Ditylenchus dipsaci* in summer-hyacinth (*Galtonia candicans*) from the Netherlands; *Heterodera avenae* in soil with fig cuttings from Italy; *Meloidogyne arenaria* in begonia tuber from Belgium; *Tylenchus allii* in garlic from Mexico and Spain; and *T. filiformis* in soil with *Artemisia* sp., *Dianthus* sp., and *Sedum* sp. from Italy.

INCOMPLETELY DETERMINED PESTS

Frequently inspectors find insects or pathogens affecting plant material in such a stage or condition that complete and accurate determination is impracticable or impossible. Some of these insects and pathogens are without doubt new to science, and may be destructive pests. The notes below are given to show the general nature of such incompletely determined interceptions.

INSECTS

Among the incompletely determined insects intercepted were the following fruit flies: *Anastrepha* sp., probably *ludens*, at Laredo, Tex., and San Antonio, Tex., in mango in baggage from Mexico, at Brownsville, Tex., in avocado in baggage from Mexico, and at Laredo, Tex., in pear in baggage from Mexico; *Anastrepha* sp., probably *mombinpraetians*, at Mobile, Ala., in mango in stores from Haiti and in mango in quarters from Trinidad, at Houston, Tex., in mango in baggage from the Canal Zone, and at New York, N. Y., in mango in baggage from Puerto Rico; *Anastrepha* sp. at Miami, Fla., in *Annona* sp. in baggage from Peru, at Laredo, Tex., in apricot in baggage from Mexico, at Miami, Fla., in cherimoya in baggage from Colombia, at Galveston, Tex., in grapefruit in stores from British Honduras, at New York, N. Y., in grapefruit in stores from Brazil, at Miami, Fla., in guava in baggage from Cuba, at New York, N. Y., in guava in baggage from the British West Indies, at El Paso, Tex., in mamey in baggage from Mexico, at Calexico, Calif., in mango in express from Mexico, at Miami,

Fla., in mango in baggage from Colombia, Dominican Republic, and Nicaragua, at Brownsville, Tex., in mango in baggage from Mexico, at San Pedro, Calif., in mango in baggage from Salvador, at Laredo, Tex., in mango in baggage from Mexico, at New York, N. Y., in mango in quarters from Panama and in mango in baggage from Trinidad, at San Juan, P. R., in mango in baggage from the Dominican Republic, at New York, N. Y., in *Spondias* sp. in mail from Puerto Rico, at Hidalgo, Tex., in orange in baggage from Mexico, at Laredo, Tex., in orange in baggage from Mexico, at New York, N. Y., in orange in stores from Brazil, at Laredo, Tex., in pear and quince in baggage from Mexico, at New York, N. Y., in sapodilla and yellow mombin in baggage from Venezuela, at Miami, Fla., in souari nut in baggage from Colombia; two pupae of *Anastrepha* sp. at Laredo, Tex., on the floor of a refrigerator car from Mexico; probably *Anastrepha* sp. at Hidalgo, Tex., in quince in baggage from Mexico; *Dacus* sp., probably *dorsalis*, at Seattle, Wash., in tomatoes in stores from Hawaii; *Dacus* sp. at Boston, Mass., in squash in stores from the Union of South Africa, and at Honolulu, Hawaii in mango in stores from the Philippines; probably *Dacus* sp., not *cucurbitae*, at New York, N. Y., in melon in stores of an airplane arriving from Iraq, Syria, Turkey, Italy, Germany, Belgium, England, and Ireland; probably *Dacus* sp. at Boston, Mass., in pumpkin in stores from the Union of South Africa; *Rhagoletis* sp., probably *cerasi*, at Chicago, Ill., in cherry in baggage from Egypt; *Rhagoletis* sp. at Galveston, Tex., in apple in stores from Mexico and at Laredo, Tex., in apple in baggage from Mexico, at New York, N. Y., in quince in baggage from Italy, at Laredo, Tex., in *Crataegus* sp. in baggage from Mexico; probably a species of *Rhagoletis* at Boston, Mass., in peach in stores from Portugal. Seventy-four interceptions which could not be identified beyond family (Tephritidae) were taken at Baltimore, Md., in grapefruit and orange in stores from Brazil, at Boston, Mass., in cherimoya in baggage from Israel, in apple and guava in baggage from Portugal, in orange and tangerine in stores from Portugal, in orange and plum in baggage from the Azores, in apple in stores from France, in banana in stores from India, in Japanese persimmon in baggage from Italy, and in tangerine in quarters from Lebanon, at Galveston, Tex., in apple in stores from Mexico and Portugal, at Honolulu, Hawaii, in coconut and in natal plum carissa in mail from Hawaii, in apple in stores from Australia, in grapefruit in stores from New Zealand (?), and in peach in stores on an airplane from Fiji and Australia, at Laredo, Tex., in apple, orange, pear, quince, and walnut in baggage from Mexico, at the National Airport, Arlington, Va., in orange in stores from unknown origin, at New Orleans, La., in orange in stores from Brazil, at Newport News, Va., in orange in stores from Brazil, at New York, N. Y., in avocado in baggage from the Gold Coast, in apple in stores from the Azores, in fig in baggage from Argentina, in grape in baggage from Lebanon, in grapefruit and orange in stores from Brazil, in medlar in cargo from Italy, in orange in baggage from Spain, in pear in baggage from Italy, in pear in stores from France and Portugal, in pear in stores from unknown origin (fruit was loaded at Gander, Canada), and in persimmon in baggage from Italy, at Norfolk, Va., in grapefruit in stores from Egypt, at Philadelphia, Pa., in grapefruit in stores from Cyprus, in orange in quarters from Israel, in pepper in stores from the Gold Coast, at San Diego, Calif., in avocado in stores from Hawaii, at San Francisco, Calif., in avocado, banana, coffee berries, mango, and papaya in baggage from Hawaii, in avocado and mango in stores from Hawaii, and in mango in stores from Tahiti, at San Juan, P. R., in guava in baggage in preflight inspection of an airplane leaving Puerto Rico for the mainland, at San Pedro, Calif., in lychee fruit in baggage from Hawaii, in mango in baggage from Salvador, and in tomato in stores from the Philippines; tephritid (?) at Boston, Mass., in the flowers of *Leucospermum nutans* in baggage from the Union of South Africa, at Honolulu, Hawaii in *Citrus aurantifolia* in baggage in preflight inspection of an airplane leaving Hawaii for the mainland, and at New York, N. Y., in fig in baggage from Italy.

The following miscellaneous insects of special interest were intercepted: An aleyrodid, *Aleurodicus*, new genus and new species, at Brownsville, Tex., on *Cattleya citrina* in cargo from Mexico; *Aleurothrixus* sp. (Aleyrodidae), apparently undescribed, at Laredo, Tex., on orange leaf in baggage from Mexico; *Anchonus* sp. (Curculionidae) at Brownsville, Tex., on an orchid plant in cargo from Mexico; a scarabaeid, *Ancylonycha* sp., at Seattle, Wash., in soil around a quince plant in baggage from Japan; *Aspidiotus* sp. (Coccidae), not placed as a described species, at Miami, Fla., on seed of *Dalbergia* sp. in cargo from Netherlands Guiana; a scarabaeid, *Autoserica* sp., in soil around a quince plant in baggage from Japan; *Blastodacna* sp. (Blastodacnidae) on an apple in stores from the Netherlands;

Bruchidius sp., probably *incarnatus* (Boh.) (Bruchidae), a serious pest of cultivated legumes, at New Orleans, La., in vetch seed in cargo from Syria; *Callosobruchus* sp. (Bruchidae) at Washington, D. C., in pigeonpea in mail from India; a curculionid, *Cleonus* sp., at Baltimore, Md., in beet in stores from Portugal and at El Paso, Tex., in turnip in cargo from Mexico; *Conotrachelus* sp. (Curculionidae) at Galveston, Tex., and New York, N. Y., in beet in stores from Peru; an elaterid, *Dalopius* sp., probably *marginatus* L., at Hoboken, N. J., with heather roots in mail from England, with a plant of *Rhododendron indicum* in cargo from Belgium, and at New York, N. Y., in soil with unidentified plants in baggage from Sweden; *Diaspis* sp. (Coccidae), apparently undescribed, at Brownsville, Tex., on avocado in baggage and stores from Mexico; *Eosilla* sp., probably *jacobsoni* Rib., (Psoquilidae), a very destructive species, at San Diego, Calif., under nut cap of coconut in mail from American Samoa; a gelechiid, probably *Gnorimoschema*, an unknown species, but not *operculella* (Zell.) or *plaesiosema* (Turner), which are usually associated with potatoes, at Seattle, Wash., in potato in stores from Peru; *Graphognathus* sp. (Curculionidae) at New York, N. Y., in potato in stores from Argentina; a scolytid, *Ips* sp., probably *typographus* (L.), at Houston, Tex., in pine strips around bales of peat moss in cargo from Germany; *Listroderes* sp. (Curculionidae), not like any species now established in the United States, with plums in cargo from Chile; a curculionid, *Lixus* sp., at Boston, Mass., in beet in stores from Egypt; *Lyonetia* sp., probably *prunifoliella* (Hbn.) (Lyonetiidae) at Boston, Mass., in apple leaf in baggage from Lebanon; a phalaenid, *Naranga* sp., probably *brunnea* Hampson, at Honolulu, Hawaii, in rice straw in mail from Japan; *Nassophasis* sp. (Curculionidae) at Hoboken, N. J., in the pseudobulb of the orchid *Coelogyne ocellata* in mail from India; a scolytid, *Orthotomicus* sp., probably *laricis* (F.), at New Orleans, La., in pine strips around bales of cork in cargo from Portugal; a pentatomid, new genus, new species near *Piezodorus*, at Laredo, Tex., on Bromeliad plant in baggage from Mexico; a curculionid, *Phyllobius* sp., at Seattle, Wash., in soil around a dwarf juniper tree in baggage from Japan; *Phyllodecta* sp., probably *vulgatissima* (L.) (Chrysomelidae), said to attack poplars and willows, at New York, N. Y., with *Tritonia* sp., bulbs in cargo from the Netherlands; *Pilophorus* sp., probably *clavatus* (L.) (Miridae) at New York, N. Y., on an apple in baggage from Italy; *Priophorus* sp., probably *padi* (L.) (Tenthredinidae) at Hoboken, N. J., on *Tilia cordata* in cargo from the Netherlands; a phalaenid, *Prodenia* sp., probably *litura* (F.), at Boston, Mass., on cabbage in stores from Egypt; *Rhynchites* sp. (Curculionidae) at Boston, Mass., in cherries from Portugal and at New York, N. Y., in cherries in stores from France; a bruchid, *Zabrotes* sp., new and probably undescribed, at Portland, Oreg., in seed of *Cassia grandis* in mail from Brazil.

There were 3,908 interceptions distributed among 778 genera, which could be identified to genus only. A total of 219 could be determined to family or subfamily only.

A total of 4,127 incompletely determined insects were intercepted during the year.

DISEASES

Among incompletely determined plant disease fungi collected at the ports of entry during the year were the following suspected pathogens: An Actinomyceete causing stem galls of rhododendron from England; *Ascochyta* sp. on *Cordona anomala* leaf from China; *Cercospora* sp. on cactus from Mexico; *Cercospora* sp. on fern from Guam; *Cercospora* sp. on palm leaf from Mexico; *Coleosporium* sp. on Scotch pine from Germany; *Elsinoe* sp. on rhododendron from the Netherlands; leprosis on sweet orange from Brazil and on *Citrus* sp., probably *sinensis*, from Mexico; *Mycosphaerella* sp. on *Metasequoia glyptostroboides* needles from China; *Phomopsis* sp. on mint from India; *Phyllosticta* sp. on *Metasequoia glyptostroboides* needles from China; *Pseudomonas* sp. on endive from Belgium; *Sclerotium* sp. on *Crocus zonatus*, *Galanthus nivalis plenus*, *Leucojum* sp., *Muscari* sp., and *Narcissus* sp. from the Netherlands, on garlic from the Madeira Islands, on *Galanthus* sp. from Switzerland and Turkey, and on *Narcissus* sp. from France and Italy; *Septoria* sp. on *Anthurium* sp. from Belgium and on lemon from Italy; *Uredo* sp. on leek from England; *Verticillium* sp. on betel palm from Guam, on begonia tuber from the Netherlands, and on pumpkin from Brazil.

Nematode interceptions worthy of mention were: *Aphelenchoides* sp. (undescribed) in corms of colchicum "Lilac Wonder" from the Netherlands; a very interesting new genus and species of the family Aphelenchidae found with sour lime from Mexico; *Helicotylenchus* sp. in soil with the following: Greenhouse plants from England, herbaceous perennials from Germany, English ivy, primula, *Prunus* sp., rose, and Virginia creeper from England; carnation and boxwood from France, carnation cuttings from Italy; *Pratylenchus* sp. (undescribed) in soil with *Begonia* sp., *Artemisia* sp., *Dianthus* sp., *Sedum* sp. from Italy; and *Tylencholaimus* sp. in gladiolus corms from France.

A total of 684 incompletely determined pathogens were recorded during the year.

Hosts and insects

ABIES:

- Aspidiotus cryptomeriae* (Homoptera)
Chrysomphalus nigropunctatus (Homoptera)
Lepidosaphes japonica (Homoptera)
Megastigmus suspectus (Hymenoptera)

ACACIA:

- Acanthoscelides spinipes* (Coleoptera)
Bruchidius aurivillii (Coleoptera)
Caryedon fuscus (Coleoptera)
Chrysomphalus odontoglossi (Homoptera)
Mimosestes sallaei (Coleoptera)
Niphona picticornis (Coleoptera)
Psylla uncata (Homoptera)

ACER:

- Parlatoria theae* (Homoptera)

AERIDES:

- Parlatoria pseudaspidotus* (Homoptera)

AGAVE:

- Ligyrocoris aurivilliana* (Hemiptera)

AGLAONEMA:

- Coptotermes formosanus* (Isoptera)

ALAFIA:

- "*Chionaspis*" *juntumiae* (Homoptera)

ALBIZZIA:

- Caryedon fuscus* (Coleoptera)

ALLIUM ASCALONICUM:

- Myzus ascalonicus* (Homoptera)

ALLIUM CEPA:

- Pyrrhocoris apterus* (Hemiptera)

ALLIUM PORRUM:

- Acrolepia assectella* (Lepidoptera)

ALLIUM SATIVUM:

- Aglossa cuprealis* (Lepidoptera)

ALLIUM SATIVUM—Continued

- Brachycerus albidentatus* (Coleoptera)
Brachycerus algerus (Coleoptera)
Dyspessa ulula (Lepidoptera)
Lamptetia equestris (Diptera)
Penichora fasciata (Coleoptera)

ALOE:

- "*Chionaspis*" *exalbida* (Homoptera)

ALPINIA:

- Coccus viridis* (Homoptera)

ALYXIA:

- Pinnaspis uniloba* (Homoptera)
Taeniothrips hawaiiensis (Thysanoptera)

AMARYLLIS:

- Trionymus peregrinus* (Homoptera)

ANANAS:

- Alpheias conspirata* (Lepidoptera)
Erptophiomera albomaculata (Hemiptera)
Genopaschia protomis (?) (Lepidoptera)
Pheidole megacephala (Hymenoptera)
Platynota rostrana (Lepidoptera)
Platypus rugulosus (Coleoptera)
Ribua innoxia (Lepidoptera)
Sisamnes contractus (Hemiptera)
"*Targionia*" *bromiliae* (Homoptera)

ANEMONE:

- Haplothrips gowdeyi* (Thysanoptera)
Thrips angusticeps (Thysanoptera)

ANNONA:

- Aspidiotus destructor* (Homoptera)
Ceratitis capitata (Diptera)
Stenomoma anonella (Lepidoptera)
Talponia batesi (Lepidoptera)

Hosts and insects—Continued

ANTHURIUM:

Ceroplastes rubens (Homoptera)
Nysius coenosulus (Hemiptera)

ANTIRRHINUM:

Anuraphis helichrysi (Homoptera)
Dicyphus errans (Hemiptera)
Frankliniella insularis (Thysanoptera)
Haplothrips gowdeyi (Thysanoptera)
Iridomyrmex humilis (Hymenoptera)

APHELANDRA:

Aleurotrachelus trachoides (Homoptera)

APIUM:

Rhopalosiphoninus tulipaellus (Homoptera)

ARACEAE:

Phenacaspis sandwicensis (Homoptera)

ARACHIS:

Caryedon fuscus (Coleoptera)

ARECA:

Aspidiotus spinosus (Homoptera)

ARECASTRUM:

Pinnaspis buxi (Homoptera)

ARMERIA:

Haplothrips gowdeyi (Thysanoptera)

ASTER:

Haplothrips gowdeyi (Thysanoptera)
Iridomyrmex humilis (Hymenoptera)

ASTROCARYUM:

Aspidiotus spinosus (Homoptera)

AVENA:

Diabrotica speciosa (Coleoptera)
Limothrips cerealium (Thysanoptera)

BAMBOO:

Acanthoscelides armitagei (Coleoptera)
Asterolecanium bambusae (Homoptera)
Chionaspis elongata (Homoptera)
Cryptotermes brevis (Isoptera)
Dinoderus brevis (Coleoptera)
Myelobia smerintha (Lepidoptera)

BAMBUSA:

Odonaspis greeni (Homoptera)

BAUHINIA:

Tetraleurodes acaciae (Homoptera)

BEGONIA:

Iridomyrmex humilis (Hymenoptera)

BELLIS:

Thrips flavus (Thysanoptera)

BETA:

Rhopalosiphoninus tulipaellus (Homoptera)

BRASSAVOLA:

Chrysomphalus tenax (Homoptera)
Ferrisia virgata (Homoptera)
Furcaspis biformis (Homoptera)

BRASSICA OLERACEA BOTRYTIS:

Mamestra brassicae (Lepidoptera)
Pieris brassicae (Lepidoptera)
Trioxa urticae (Homoptera)

BRASSICA OLERACEA CAPITATA:

Evergestis forficatis (Lepidoptera)
Hypera fasciculata (Coleoptera)
Iridomyrmex humilis (Hymenoptera)
Mamestra brassicae (Lepidoptera)
Phyllotreta atra (Coleoptera)
Phyllotreta cruciferae (Coleoptera)
Pieris brassicae (Lepidoptera)
Psylliodes chrysocephala (Coleoptera)

BRASSICA RAPA:

Adrastus limbatus (Coleoptera)
Lampetia equestris (Diptera)
Psylliodes chrysocephala (Coleoptera)

BROMELIA:

Ligyrocrosis abdominalis (Hemiptera)
Plagioidera semivittata (Coleoptera)

BROMELIAD:

Asterolecanium epidendri (Homoptera)
Calligrapha argus (Coleoptera)
Ogdocoecia biannularis (Coleoptera)
Pinnaspis buxi (Homoptera)

BROUGHTONIA:

Vinsonia stellifera (Homoptera)

BROWNEA:

Dercynus micronyx (Coleoptera)

BRYOPHYLLUM:

Heterogaster urticae (Hemiptera)
Pulvinaria psidii (Homoptera)

BURSERA:

Aspidiotus herculeanus (Homoptera)

CACTUS:

Ceratitis capitata (?) (Diptera)
Chelysoma variabilis (Hemiptera)
Lepidosaphes philococcus (Homoptera)
Ligyrocrosis nitidicollis (Hemiptera)
Plagioidera thymaloidea (Coleoptera)
Sizeonotus luteiceps (Hemiptera)

CAESALPINIA:

Mimoseses dominicanus (Coleoptera)
Stephanoderes buscki (Coleoptera)

CAJANUS:

Acanthoscelides armitagei (Coleoptera)
Ancylostoma stercora (Lepidoptera)
Brachyacma palpigera (Lepidoptera)
Fundella pellucens (Lepidoptera)
Maruca testulalis (Lepidoptera)
Sphenarches caffer (Lepidoptera)
Stephanoderes depressus (Coleoptera)

CALLISTEPHUS:

Anuraphis helichrysi (Homoptera)

CALLUNA:

Acalypta parvula (Hemiptera)
Brachyrhinus ovatus (Coleoptera)
Drymus brunneus (Hemiptera)
Gelechia ericetella (Lepidoptera)
Lochmaea suturalis (Coleoptera)
Micrelus ericae (Coleoptera)
Orthezia cataphracta (Homoptera)
Taeniothrips atratus (Thysanoptera)
Taeniothrips ericae (Thysanoptera)
Ulopa reticulata (Homoptera)

CAMELLIA:

Ceroplastes rubens (Homoptera)
Lepidosaphes chinensis (Homoptera)
Palitoria camelliae (Homoptera)
Pseudoparlatoria ostreata (Homoptera)

CAMPSIS:

Pulvinaria psidii (Homoptera)

CANAVALLIA:

Haplothrips gowdeyi (Thysanoptera)
Lampides boeticus (Lepidoptera)
Maruca testulalis (Lepidoptera)
Taeniothrips hawaiiensis (Thysanoptera)

CAPSICUM:

Aleurotrachelus trachoides (Homoptera)
Dacus cucurbitae (Diptera)
Dacus dorsalis (Diptera)
Gnorimoschema gudmannella (Lepidoptera)
Ligyrocrosis aurivilliana (Hemiptera)
Neoleucinodes elegantalis (Lepidoptera)
Platynota rostrana (Lepidoptera)
Pulvinaria urticae (Homoptera)

CARALLUMA:

Asterolecanium steniae (Homoptera)

CARICA:

Aspidiotus spinosus (Homoptera)
Icerya littoralis (Homoptera)
Pseudoparlatoria ostreata (Homoptera)
Toxotrypana curvicauda (Diptera)

CASSIA:

Caryedon fuscus (Coleoptera)
Phelomerus aberrans (Coleoptera)
Tetraleurodes acaciae (Homoptera)
Xystrocera globosa (Coleoptera)

CASTANEA:

Hemimele juliana (Lepidoptera)
Laspeyresia splendana (Lepidoptera)

CASUARINA:

Orthezia praelonga (Homoptera)

CATASETUM:

Furcaspis biformis (Homoptera)
Pseudanidia tessellata (Homoptera)

CATTLEA:

Amorbia emigratella (Lepidoptera)
Asterolecanium epidendri (Homoptera)
Chrysomphalus tenax (Homoptera)
Chrysomphalus umboniferus (Homoptera)
Coccus pseudohesperidium (Homoptera)
Conchaspis angraci (Homoptera)
Eurytoma orchidearum (Hymenoptera)
Furcaspis biformis (Homoptera)
Iridomyrmex iniquus (Hymenoptera)
Lincus rufospilatus (Hemiptera)
Parallodiplosis cattleyae (Diptera)
Protopulvinaria longivalvata (Homoptera)

Hosts and insects—Continued

CATTLEYA—Continued

CITRUS AURANTIUM:

- Aleurocanthus woglumi* (Homoptera)
- Aleurothrix floccosa* (Homoptera)
- Anastrepha ludens* (Diptera)
- Paraleyrodes citricolus* (Homoptera)

CITRUS GRANDIS:

- Prays endocarpa* (Lepidoptera)

CITRUS LIMON:

- Aonidiella citrina* (Homoptera)
- Ceratitis capitata* (Diptera)
- Cryptoblabes gnidiella* (Lepidoptera)
- Parlatoria cinerea* (Homoptera)
- Parlatoria zizyphus* (Homoptera)
- Pseudonidia trilobitiformis* (Homoptera)
- Unaspis yanonensis* (Homoptera)

CITRUS MEDICA:

- Rhinacloa subpallicornis* (Hemiptera)

CITRUS PARADISI:

- Anastrepha ludens* (Diptera)
- Aspidiotus palmae* (Homoptera)
- Ceratitis capitata* (Diptera)
- Coccus viridis* (Homoptera)
- Leucaspis cockerelli* (Homoptera)
- Morganella longispina* (Homoptera)
- Parlatoria cinerea* (Homoptera)
- Parlatoria zizyphus* (Homoptera)
- Unaspis citri* (Homoptera)
- Unaspis yanonensis* (Homoptera)

CITRUS RETICULATA:

- Aleurocanthus woglumi* (Homoptera)
- Anastrepha serpentina* (Diptera)
- Ceratitis capitata* (Diptera)
- Dialeurodes citri* (Homoptera)
- Parlatoria zizyphus* (Homoptera)
- Unaspis yanonensis* (Homoptera)

CITRUS SINENSIS:

- Aleurocanthus woglumi* (Homoptera)
- Anastrepha ludens* (Diptera)
- Anastrepha mombinpraepians* (Diptera)
- Argyroploce leucotreta* (Lepidoptera)
- Ceratitis capitata* (Diptera)
- Cryptoblabes gnidiella* (Lepidoptera)
- Dialeurodes citrifolii* (Homoptera)
- Gymnandrosoma aurantium* (Lepidoptera)
- Leucaspis cockerelli* (Homoptera)
- Morganella longispina* (Homoptera)
- Parlatoria cinerea* (Homoptera)
- Parlatoria zizyphus* (Homoptera)
- Trialeurodes vitrinellus* (Homoptera)

CITRUS SINENSIS—Continued

- Unaspis citri* (Homoptera)
- Unaspis yanonensis* (Homoptera)

CITRUS SP.:

- Aleurocanthus woglumi* (Homoptera)
- Chrysomphalus pinnulifera* (Homoptera)
- Chrysomphalus scutiformis* (Homoptera)
- Coccus viridis* (Homoptera)
- Dialeurodes citri* (Homoptera)
- Dialeurodes citrifolii* (Homoptera)
- Frankliniella insularis* (Thysanoptera)
- Parlatoria zizyphus* (Homoptera)
- Trialeurodes vitrinellus* (Homoptera)
- Unaspis yanonensis* (Homoptera)

COCOLOBIA:

- Frankliniella insularis* (Thysanoptera)

COCOS:

- Aonidiella inornata* (Homoptera)
- Aspidiotus coryphae* (Homoptera)
- Aspidiotus destructor* (Homoptera)
- Aspidiotus excisus* (Homoptera)
- Aspidiotus pangonensis* (Homoptera)
- Aspidiotus spinosus* (Homoptera)
- Chrysomphalus personatus* (Homoptera)
- Chrysomphalus tingi* (Homoptera)
- Diocalandra taiensis* (Coleoptera)
- Ereunetis flavistriata* (Lepidoptera)
- Eucalymnatus tessellatus* (Homoptera)
- Furcaspis oceanica* (Homoptera)
- "Lepidosaphes" esakii* (Homoptera)
- Phenacaspis sandwicensis* (Homoptera)
- Pinnaspis buzi* (Homoptera)
- Pseudococcus palmarum* (Homoptera)
- Syricta oceanica* (Diptera)

CODIAEUM:

- Ferrisia virgata* (Homoptera)
- Lepidosaphes tokionis* (Homoptera)
- Lichtensia lutea* (Homoptera)
- Orthezia praelonga* (Homoptera)
- Parlatoria crotonis* (Homoptera)

COFFEA:

- Ceratitis capitata* (Diptera)
- Dacus dorsalis* (?) (Diptera)
- Stephanoderes hampei* (Coleoptera)

CONVALLARIA:

- Hebrus pusillus* (Hemiptera)

COPAIFERA:

- Platypus rugulosus* (Coleoptera)

CORNUS:

- Allantus cinctus* (Hymenoptera)

CORYLUS:

- Capitophorus avellanae* (?) (Homoptera)

CORYPHANTHA:

- Gerstaeckeria mutilaria* (Coleoptera)

COTONEASTER:

- Stephanitis pyri* (Hemiptera)

CRATAEGUS:

- Acronicta tridens* (Lepidoptera)

CRYPTOMERIA:

- Dinoderus bifoveolatus* (Coleoptera)
- Rhiobia praeceps* (Hemiptera)

CUCUMIS:

- Dacus cucurbitae* (Diptera)
- Erptochiomeria albomaculata* (Hemiptera)
- Liogrocis aurivilliana* (Hemiptera)
- Myiopardalis pardalina* (Diptera)

CUCURBITA:

- Anastrepha grandis* (Diptera)
- Erptochiomeria albomaculata* (Hemiptera)
- Erptochiomeria oblonga* (Hemiptera)

CYBISTAX:

- Platypus rugulosus* (Coleoptera)

CYNOCHESES:

- Vinsonia stellifera* (Homoptera)

CYDONIA:

- Ceratitis capitata* (Diptera)
- Parlatoria oleae* (Homoptera)
- Stephanitis pyri* (Hemiptera)

CYMBIDIUM:

- Dinoderus brevis* (Coleoptera)
- Lepidosaphes tuberculata* (Homoptera)

CYNARA:

- Anuraphis cynariella* (Homoptera)
- Apion carduorum* (Coleoptera)
- Apion carduorum* var. (Coleoptera)

Hosts and insects—Continued

CYNARA—Continued

Epicometis hirta (Coleoptera)
Gortyna flavago (Lepidoptera)
Posima undecimmaculata (Coleoptera)

CYTISUS:

Bruchidius lividimonus var. (Coleoptera)
Sparteus villosus (Coleoptera)
Iridomyrmex humilis (Hymenoptera)
Taeniothrips atratus (Thysanoptera)
Taeniothrips hawaiiensis (Thysanoptera)
Thrips angusticeps (Thysanoptera)

DAHLIA:

Haplothrips gowdeyi (Thysanoptera)
Iridomyrmex humilis (Hymenoptera)

DAISY:

Anuraphis helichrysi (Homoptera)

DALBERGIA:

Platypus rugulosus (Coleoptera)

DAUCUS:

Phalonia zephyrana (Lepidoptera)

DELPHINIUM:

Serica brunnea (?) (Coleoptera)

DENDROBIUM:

Achatina fulica (Mollusca)
Ferrisia virgata (Homoptera)
Parlatoria pseudaspidotus (Homoptera)
Pinnaspis buxi (Homoptera)

DESMODIUM:

Bruchidius gilvus (Coleoptera)

DIANTHUS:

Anuraphis helichrysi (Homoptera)
Brachyrhinus ocaus (Coleoptera)
Bradybaena similis (Mollusca)
Dizygomyza flavifrons (Diptera)
Euzesta notata (Diptera)
Haplothrips cottei (Thysanoptera)

DIOSCOREA:

Palaeopus costicollis (Coleoptera)
Pheidole megacephala (Hymenoptera)
Stephanoderes buscki (Coleoptera)
 "Targionia" hartii (Homoptera)

DIOSPYROS:

Aspidiotus spinosus (Homoptera)
Callidium rufipenne (Coleoptera)
Ceratitis capitata (Diptera)
Iridomyrmex humilis (Hymenoptera)
Lepidosaphes conchiformis (Homoptera)
Parlatoria oleae (Homoptera)

DOLICHOS:

Callosobruchus phaseoli (Coleoptera)

ECHEVERIA:

Eumysia stigmella (Lepidoptera)

ENTEROLOBIUM:

Dinoderus bifoveolatus (Coleoptera)

EPIDENDRUM:

Asterolecanium epidendri (Homoptera)
Eurytoma orchidearum (Hymenoptera)
Furcaspis bifurmis (Homoptera)
Pseudischnaspis alienus (Homoptera)
Tenthecoris distinguendus (Hemiptera)

ERICA:

Antestia variegata lineaticollis (Hemiptera)

ERIOBOTRYA:

Ceratitis capitata (Diptera)
Iridomyrmex humilis (Hymenoptera)

EUGENIA:

Dialeurodes platycus (?) (Homoptera)

EUONYMUS:

Ceroplastes rubens (Homoptera)
Parlatoria theae (Homoptera)
Unaspis euonymi (Homoptera)

EUTERPE:

Coccotrypes pygmaeus (Coleoptera)

FIGUS:

Aspidiotus zonatus (Homoptera)
Ceratitis capitata (Diptera)
Ceroplastes rusci (Homoptera)
Homotoma ficus (Homoptera)
Hypoborus ficus (Coleoptera)
Iridomyrmex humilis (Hymenoptera)
Lepidosaphes ficus (Homoptera)
Parlatoria oleae (Homoptera)

FOENICULUM:

Pieris brassicae (Lepidoptera)

FORTUNELLA:

Ceratitis capitata (Diptera)

FRAGARIA:

Mamestra brassicae (Lepidoptera)

FRAXINUS:

Hylesinus fraxini (Coleoptera)
Leperisinus fraxini (Coleoptera)

GARDENIA:

Aleuroparadoxus gardeniae (Homoptera)
Aleurothrixus myrtacei (Homoptera)
Aspidiotus degeneratus (Homoptera)
Coccus viridis (Homoptera)
Dialeurodes citri (Homoptera)
Dialeurodes kirkaldyi (Homoptera)
Eucalymnatus tessellatus (Homoptera)
Frankliniella insularis (Thysanoptera)
Paraleurodes citricolus (Homoptera)
Platynota rostrana (Lepidoptera)
Protopulvinaria longivalvata (Homoptera)
Protopulvinaria pyrifomis (Homoptera)
Pulvinaria psidii (Homoptera)

GERBERA:

Anuraphis helichrysi (Homoptera)
Iridomyrmex humilis (Hymenoptera)

GLADIOLUS:

Chalcolepidius approximatus (Coleoptera)
Frankliniella insularis (Thysanoptera)
Iridomyrmex humilis (Hymenoptera)
Myzus ascalonicus (Homoptera)
Pheidole megacephala (Hymenoptera)
Rhinocloeus subpallicornis (Hemiptera)
Rhopalosiphoninus tulipae (Homoptera)
Taeniothrips atratus (Thysanoptera)
Tamymecus confusus (Coleoptera)

GOMPHRENA:

Coccus viridis (Homoptera)
Pachyzancla bipunctalis (Lepidoptera)

GOSSYPIUM:

Alpheias conspirata (Lepidoptera)
Ferrisia virgata (Homoptera)
Lygaeus teapensis (Hemiptera)
Orycares hyalinipennis (Hemiptera)
Orycares laetus (Hemiptera)
Pectinophora gossypiella (Lepidoptera)

GRAPTOPHYLLUM:

Ferrisia virgata (Homoptera)

GUAJACUM:

Astyochus setiger (Coleoptera)
Neoclytus caecus (Coleoptera)

HEDYSARUM:

Bruchidius gilvus (Coleoptera)

HELICONIA:

Oxydema longulum (Coleoptera)
Pseudococcus probevipes (Homoptera)

HELIOTROPIMUM:

Asterolecanium pustulans (Homoptera)

HIBISCUS:

Crociosema plebeiana (Lepidoptera)
Frankliniella insularis (Thysanoptera)
Pheidole megacephala (Hymenoptera)
Platysaissetia castilliae (Homoptera)
Taeniothrips hawaiiensis (Thysanoptera)

HOWEA:

Pinnaspis buxi (Homoptera)

HYPERBAENA:

Chrysomphalus personatus (Homoptera)

ILEX:

Aleuroplatus ilicis (Homoptera)
Phenacaspis aucubae (Homoptera)

IPOMOEA:

Araecerus vieillardii (Coleoptera)
Cylas formicarius (Coleoptera)
Cylas formicarius elegantulus (Coleoptera)
Cylas formicarius var. (Coleoptera)
Euscepes postfasciatus (Coleoptera)
Ips interstitialis (Coleoptera)
Taeniothrips atratus (Thysanoptera)

IRIS:

Frankliniella insularis (Thysanoptera)

IXORA:

Coccus viridis (Homoptera)

JASMINUM:

Asterolecanium pustulans (Homoptera)
Heterolermes convezinotatus (Isoptera)
Taeniothrips hawaiiensis (Thysanoptera)

Hosts and insects—Continued

JUNIPERUS:

- Dinoderus brevis* (Coleoptera)
- Lepidosaphes newsteadi* (Homoptera)
- Lepidosaphes pallida* (Homoptera)

KARWINSKIA:

- Aleuoparadoxus ilicicola* (Homoptera)
- Ferrisiana virgata* (Homoptera)
- Stephanoderes lecontei* (Coleoptera)
- Tetraleurodes acaciae* (Homoptera)

KERRIA:

- Allantus cinetus* (Hymenoptera)

KERSTINGIELLA:

- Caryedon fuscus* (Coleoptera)

KHAYA:

- Heterobostrychus aequalis* (Coleoptera)

LABURNUM:

- Chaetocnema hortensis* (Coleoptera)
- Sparticus villosus* (Coleoptera)

LAELIA:

- Asterolecanium epidendri* (Homoptera)
- Chrysomphalus nigropunctatus* (Homoptera)
- Chrysomphalus umboniferus* (Homoptera)
- Pseudoschnaspis alienus* (Homoptera)

LANTANA:

- Epinotia lantana* (?) (Lepidoptera)
- Phinacloa subpallicornis* (Hemiptera)

LATHYRUS:

- Aglossa cuprealis* (Lepidoptera)
- Bruchus tristiculus* (Coleoptera)
- Bruchus tristis* (Coleoptera)
- Iridomyrmex humilis* (Hymenoptera)
- Taeniothrips atratus* (Thysanoptera)
- Thrips angusticeps* (Thysanoptera)

LAURUS:

- Aspidiotus britannicus* (Homoptera)
- Aspidiotus palmarum* (Homoptera)
- Cacoecia prunivora* (Lepidoptera)
- Ceroplastes denudatus* (Homoptera)
- Chrysomphalus personatus* (Homoptera)
- Tetraleurodes lauri* (Homoptera)

LENS:

- Bruchidius incarnatus* (Coleoptera)
- Bruchus ervi* (Coleoptera)
- Bruchus lentis* (Coleoptera)
- Bruchus signaticornis* (Coleoptera)
- Bruchus ulicis* (Coleoptera)

LEUCADENDRON:

- Iridomyrmex humilis* (Hymenoptera)

LEUCOJUM:

- Lampetia equestris* (Diptera)

LIGUSTRUM:

- Coccus viridis* (Homoptera)

LILIUM:

- Crioceris lilii* (Coleoptera)
- Frankliniella insularis* (Thysanoptera)
- Fulbicus brevicornis* (Hemiptera)
- Iridomyrmex humilis* (Hymenoptera)
- Myzus ascalonicus* (?) (Homoptera)
- Orthozia cataphracta* (Homoptera)
- Orthochaetes setiger* (Coleoptera)
- Pheidole megacephala* (Hymenoptera)
- Podagrica malvae* (Coleoptera)

LINUM:

- Attageus gloriosae* (Coleoptera)

LITCHI:

- Pachybrachius nietneri* (Hemiptera)

LONAS:

- Bradybaena similis* (Mollusca)

LONICERA:

- Aspidiotus excisus* (Homoptera)
- Ferrisiana virgata* (Homoptera)

LUPINUS:

- Bruchus tristis* (Coleoptera)

LYCIUM:

- Ceroplastes rubens* (Homoptera)

LYCOPERSICON:

- Prochymena aculeata* (Hemiptera)
- Cossonus canaliculatus* (Coleoptera)
- Crepidodera asphaltina* (?) (Coleoptera)
- Dacus cucurbitae* (Diptera)
- Dacus dorsalis* (Diptera)
- Disonychia antennata* (Coleoptera)
- Dysdercus mimulus* (Hemiptera)
- Emesopsis nubilus* (Hemiptera)
- Exochiomeria oblonga* (Hemiptera)
- Gnorimoschema gudmannella* (Lepidoptera)

LYCOPERSICON—Continued

- Ligyrocoris aurivilliana* (Hemiptera)
- Lineodes integra* (Lepidoptera)
- Neoleucinodes elegantalis* (Lepidoptera)
- Platynota rostrana* (Lepidoptera)
- Valtissus diversus* (Hemiptera)

MACADAMIA:

- Cryptophlebia illepidia* (Lepidoptera)

MALUS:

- Anastrepha ludens* (?) (Diptera)
- Argyresthia conjugella* (Lepidoptera)
- Carposina sasakii* (Lepidoptera)
- Ceratitus capitata* (Diptera)
- Epidiaspis piricola* (Homoptera)
- Lepidosaphes conchiformis* (Homoptera)
- Parlatoria oleae* (Homoptera)
- Phagoletis pomonella* (Diptera)
- Sesamia venteria* (Lepidoptera)

MAMMEA:

- Anastrepha ludens* (Diptera)
- Anastrepha serpentina* (?) (Diptera)
- Ligyrocoris nitidicollis* (Hemiptera)

MAMMILLARIA:

- Sizeonotus luteiceps* (Hemiptera)

MANGIFERA:

- Anastrepha ludens* (Diptera)
- Anastrepha mombinpraeoptans* (Diptera)
- Aulacaspis tubercularis* (Homoptera)
- Ceratitus capitata* (?) (Diptera)
- Cryptorhynchus mangiferae* (Coleoptera)
- Dacus dorsalis* (Diptera)
- Leucaspis indica* (Homoptera)
- Parlatoria morrisoni* (Homoptera)
- Pseudosnoidia trilobitiformis* (Homoptera)

MANIHOT:

- Ferrisiana virgata* (Homoptera)

MATHIOLA:

- Iridomyrmex humilis* (Hymenoptera)
- Sparticus villosus* (Coleoptera)

MEDICAGO:

- Acrosternum armiger* (Hemiptera)
- Agalliana ensigera* (Homoptera)
- Anthomyza cursor* (Diptera)

MENTHA:

- Phenacoccus madeirensis* (Homoptera)

MERTENSIA:

- Anuraphis helichrysi* (Homoptera)

MESPIUS:

- Laspeyresia splendana* (Lepidoptera)

MIMOSA:

- Iridomyrmex humilis* (Hymenoptera)
- Thrips angusticeps* (Thysanoptera)

MONSTERA:

- Pinnaspis buxi* (Homoptera)

MORAEA:

- Chrysomphalus pinnulifera* (Homoptera)

MORINDA:

- Dialeurodes kirkaldyi* (Homoptera)

MURRAYA:

- Dialeurodes kirkaldyi* (Homoptera)
- Stephanoderes buscki* (Coleoptera)

MUSA:

- Cosmopolites sordidus* (Coleoptera)
- Dacus dorsalis* (Diptera)
- Heterotermes tenuis* (Isoptera)
- Metamasius sericeus* (Coleoptera)
- Metamasius sericeus* var. (Coleoptera)

MUSCARI:

- Ezozoma lusitanica* (Coleoptera)
- Lampetia equestris* (Diptera)

MYOSOTIS:

- Anuraphis helichrysi* (Homoptera)

NARCISSUS:

- Euemerus strigatus* (Diptera)
- Lampetia equestris* (Diptera)
- Tarsonemus laticeps* (Arachnida)

NERIUM:

- Diaprepes familiaris* var. (Coleoptera)
- Frankliniella difficilis* (Thysanoptera)
- Frankliniella insularis* (Thysanoptera)
- Haplothrips gowdeyi* (Thysanoptera)
- Morganella longispina* (Homoptera)
- Parlatoria morrisoni* (Homoptera)
- Pheidole megacephala* (Hymenoptera)
- Phenacaspis sandwicensis* (Homoptera)

Hosts and insects—Continued

OCHROSIA:

Dacus dorsalis (Diptera)

ODONTOGLOSSUM:

Amorbia emigratella (?) (Lepidoptera)

Pseudischaspis alienus (Homoptera)

OLEA:

Aleurolobus olivinus (Homoptera)

Dacus oleae (Diptera)

Leucaspis riccae (Homoptera)

Parlatoria oleae (Homoptera)

Phloeotribus scarabaeoides (Coleoptera)

Pollinia pollini (Homoptera)

Prays oleellus (Lepidoptera)

ONCIDIUM:

Asterolecanium epidendri (Homoptera)

Chrysomphalus umboniferus (Homoptera)

Coccus pseudohesperidum (Homoptera)

Conchaspis angraeci (Homoptera)

Cryphula apicatus (Hemiptera)

Furcaspis biformis (Homoptera)

Iridomyrmex iniquus (Hymenoptera)

Pseudoparlatoria ostreata (Homoptera)

Pseudoparlatoria serratulae (Homoptera)

Tenthecoris venezuelensis (Hemiptera)

ONOBRYCHIS:

Eurytoma onobrychidis (Hymenoptera)

OPUNTIA:

Ceratitis capitata (Diptera)

Lepidosaphes philococcus (Homoptera)

Sesamia vutera (Lepidoptera)

ORCHID:

Acroleucus vicinalis (Hemiptera)

Aleuroglanulus emmae (Homoptera)

Antilocoris punctatus (Hemiptera)

Aspidiotus destructor (Homoptera)

Asterolecanium epidendri (Homoptera)

Automeris randa (Lepidoptera)

Calligrapha diversa (Coleoptera)

Capaneus tetricus (Hemiptera)

Ceutorhynchus assimilis (Coleoptera)

Chrysomphalus nigropunctatus (Homoptera)

Chrysomphalus odontoglossi (Homoptera)

Chrysomphalus tenax (Homoptera)

Chrysomphalus umboniferus (Homoptera)

Conchaspis angraeci (Homoptera)

Copaza lavendera (Lepidoptera)

Corimelaena elegans (Hemiptera)

Crophius scabrosus (Hemiptera)

Cryphula apicatus (Hemiptera)

Ctenochira cumulata (Coleoptera)

Diorymerella laenimargo (Coleoptera)

Eurytoma orchidearum (Hymenoptera)

Erptochiomera albomaculata (Hemiptera)

Erptochiomera oblonga (Hemiptera)

Furcaspis biformis (Homoptera)

Iridomyrmex humilis (Hymenoptera)

Iridomyrmex leucomelas (Hymenoptera)

Kleidocerys godmani (Hemiptera)

Lepidosaphes tuberculata (Homoptera)

Ligyrocoris abdominalis (Hemiptera)

Ligyrocoris aurivilliana (Hemiptera)

Ligyrocoris nitidicollis (Hemiptera)

Lygaeus circumplicatus (Hemiptera)

Lygaeus vitticollis (Hemiptera)

Macropygium reticulare (Hemiptera)

Mordellistena cattlejana (Coleoptera)

Nasutitermes nigriceps (Isoptera)

Nephotettix apicalis (Homoptera)

Ogdoecosta biannularis (Coleoptera)

Ozophora consanguineus (Hemiptera)

Parallelodiplosis cattleyae (Diptera)

Parlatoria pseudaspidiotus (Homoptera)

Phatnoma annulipes concisa (Hemiptera)

Physonota disjuncta (Coleoptera)

Physorhinus distigma (Coleoptera)

Plagiodera semivittata (Coleoptera)

Plagiodera thymaloidea (Coleoptera)

Pseudaoonidia tesserrata (Homoptera)

Pseudischaspis alienus (Homoptera)

Pseudoparlatoria ostreata (Homoptera)

Pseudoparlatoria serratulae (Homoptera)

Puto mexicanus (Homoptera)

Tenthecoris angustimarginatus (Hemiptera)

Tenthecoris bicolor (Hemiptera)

Tenthecoris confusus (Hemiptera)

ORCHID—Continued

Tenthecoris distinguendus (Hemiptera)

Vinsonia stellifera (Homoptera)

ORNITHOGALUM:

Haplothrips bagnalli (Thysanoptera)

Paromius gracilis (Hemiptera)

ORYZA:

Chilo simplex (Lepidoptera)

Gelasma illitirata (Lepidoptera)

PALM:

Coccotrypes pygmaeus (Coleoptera)

Elytroteinus subtruncatus (Coleoptera)

Iridomyrmex humilis (Hymenoptera)

PANDANUS:

Pseudococcus pandani (Homoptera)

PAPAVER:

Anuraphis helichrysi (Homoptera)

PASPALUM:

"*Targionia*" *sacchari* (Homoptera)

PASSIFLORA:

Frankliniella insularis (Thysanoptera)

PELARGONIUM:

Bradybaena similis (Mollusca)

PERISTERIA:

Iridomyrmex iniquus (Hymenoptera)

PERSEA:

Anastrepha ludens (Diptera)

Aspidiotus destructor (Homoptera)

Aspidiotus diffinis (Homoptera)

Ceratitis anonae (Diptera)

Chrysomphalus personatus (Homoptera)

Conotrachelus aguacatae (Coleoptera)

Conotrachelus perseae (Coleoptera)

Dacus dorsalis (?) (Diptera)

Erptochiomera albomaculata (Hemiptera)

Lygaeus consanguinitus (Hemiptera)

Platypus rugulosus (Coleoptera)

Stenoma catenifer (Lepidoptera)

PHALAENOPSIS:

Monomorium destructor (Hymenoptera)

PHASEOLUS:

Bradybaena similis (Mollusca)

Callosobruchus pulcher (Coleoptera)

Epinotia opposita (Lepidoptera)

Everes comynas (Lepidoptera)

Fundella pellucens (Lepidoptera)

Maruca testulalis (Lepidoptera)

PHILODENDRON:

Aspidiotus diffinis (Homoptera)

Chrysomphalus scutiformis (Homoptera)

Chrysomphalus sphaeroides (Homoptera)

Chrysomphalus tenax (Homoptera)

Dione moneta poeyii (Lepidoptera)

Ferrissiana virgata (Homoptera)

Neoleucon horribilis (Hemiptera)

Pinnaspis buxi (Homoptera)

Protopulvinaria pyrriformis (Homoptera)

PHOEBE:

Helitropus parvulus (Coleoptera)

PHORADENDRON:

Diaspis miranda (Homoptera)

PHOTINIA:

Dialeurodes citri (Homoptera)

PHYSALIS:

Rhagoletis striatella (Diptera)

PICEA:

Callidium violaceum (Coleoptera)

Drymus brunneus (Hemiptera)

Ernobius abietus (Coleoptera)

Gastroles pacificus (Hemiptera)

Laspeyresia strobilella (Lepidoptera)

Pityogenes chalcographus (Coleoptera)

Pogonocherus fasciculatus (Coleoptera)

Teopropium fuscum (Coleoptera)

PINUS:

Callidium violaceum (Coleoptera)

Hyurgops palliatus (Coleoptera)

Ips combrae (Coleoptera)

Ips typographus (Coleoptera)

Lepidosaphes newsteadi (Homoptera)

Leucaspis loewi (Homoptera)

Leucaspis signoretti (Homoptera)

Laspeyresia splendana
Lepidosaphes chinensis
Lepidosaphes conchiformis
Lepidosaphes japonica
Lepidosaphes newsteadi
Lepidosaphes pallida
Oryctonia jucunda
Parlatoria camelliae
Parlatoria theae
Pectinophora gossypiella
Phenacaspis auctubae
Phenacoccus azaleae
 "Poliaspis" pini
Pseudococcus pini
Reticulitermes speratus
Rhiobia praeceps
Unaspis euonymi
Unaspis yanonensis
Vesiculaphis caracis

KOREA:

Callosobruchus ademptus
Carposina sasakii
Gelasma illiturala
Lepidosaphes conchiformis

KWAJALEIN:

Furcaspis oceanica
Pseudococcus pandani

LEBANON:

Bruchidius incarnatus
Bruchus dentipes
Ceratitidis capitata (?)
Chrysomphalus inopinatus
Dacus oleae
Myiopardalis pardalina
Parlatoria oleae
Pectinophora gossypiella
Polychrosis botrana

MADEIRA ISLANDS:

Anuraphis helichrysi
Ceratitidis capitata
Cryptoblabes gnidiella
Iridomyrmex humilis
Laspeyresia splendana
Lepidosaphes tuberculata
Phenacoccus madeirensis

MALAYSIA:

Cylas formicarius var.

MALTA:

Ceratitidis capitata

MARTINIQUE:

Chrysomphalus personatus

MEXICO:

Acroleucus vicinalis
Aleurocanthus woglumi
Aleuroglanululus emmae
Aleuroparadoxus gardeniae
Aleuroparadoxus ilicicola
Aleuropiatus ilicis
Aleurothrixus floccosus
Aleurothrixus myrtacei
Alpheias conspirata
Amorbia emigratella
Anastrepha ludens
Anastrepha mombinpraeoptans
Anastrepha serpentina (?)

MEXICO—Continued

Anastrepha striata
Antilocoris punctatus
Aspidiotus destructor
Aspidiotus diffinis
Aspidiotus spinosus
Asterolecanium bambusae
Asterolecanium pustulans
Attagenus gloriosae
Automeris randa
Brochymena aculeata
Calligrapha argus
Calligrapha diversa
Capaneus tetricus
Chalcopiedius approximatus
Chelysoma variabilis
Chrysomphalus nigropunctatus
Chrysomphalus personatus
Chrysomphalus scutiformis
Chrysomphalus sphaeroides
Chrysomphalus tenax
Chrysomphalus umboniferus
Coccotrypes pygmaeus
Conchaspis angraei
Conotrachelus aguacatae
Conotrachelus perseae
Copaza lavendera
Corimelaena elegans
Cossonus canaliculatus
Crepidodera asphaltina (?)
Crophius scabrosus
Ctenochira cumulata
Cylas formicarius elegantulus
Dialeurodes citri
Dialeurodes citrifolii
Diaspis miranda
Diatraea magnificatella
Diorymerellus lacrimargo
Disonycha antennata
Dysdercus mimulus
Emesopsis nubilis
Epicaerus cognatus
Epinotia opposita
Eucalymnatus tessellatus
Eumysia stigmella
Eberes comyntas
Ebergestis rimosalis
Erptochiomeria albomaculata
Erptochiomeria oblonga
Ferrisiana virgata
Furcaspis biformis
Gerstaeckeria mutillaria
Gnorimoschema gudmannella
Grapholitha packardii
Icerya littoralis
Ips interstitialis
Iridomyrmex humilis
Jadera sanguinolenta
Kleidocerys godmani
Lepidosaphes philococcus
Lepidosaphes tokionis
Lichtenstia lutea
Ligyrocorys abdominalis
Ligyrocorys aurivilliana
Ligyrocorys nitidicollis
Lineodes integra
Loxostege helvialis
Loxostege similalis
Lygaeus circumspicatus
Lygaeus consanguinitus
Lygaeus teapensis
Lygaeus vittiscutis
Macropygium reticulare
Mimosestes dominicanus
Mitrapssylla albolineata
Moodna bisinuella
Mordellistena cattlejana
Myelobia smerintha
Myzaphis bucktoni (?)
Neoleucinodes elegantalis
Neoleucin horribilis
Ogdocoesta biannularis
Ozophora consanguineus
Pachyzancla bipunctalis
Pantomorus godmani

Hosts and diseases

- ABIES:**
Sclerotinia kernerii (Ascomycetes)
ACACIA:
Maravalia hyalospora (Deuteromycetes)
ACER:
Tubercularia vulgaris (Deuteromycetes)
ACHRAS:
Diplodia theobromae (Deuteromycetes)
Pestalotia scirtofaciens (Deuteromycetes)
AGAVE:
Colletotrichum agaves (Deuteromycetes)
ALLIUM ASCALONICUM:
Papulaspora dodgeii (Deuteromycetes)
ALLIUM CEPA:
Alternaria porri (Deuteromycetes)
Curvularia lunata (Deuteromycetes)
Diplodia theobromae (Deuteromycetes)
Fusarium oxysporum f. cepae (Deuteromycetes)
Papularpora parasitica (Deuteromycetes)
Stemphylium botryosum (Deuteromycetes)
ALLIUM PORRUM:
Septoria alliorum (Deuteromycetes)
ALLIUM SATIVUM:
Macrophomina phaseolina (Deuteromycetes)
Memmoniella echinata (Deuteromycetes)
Sclerotium cepivorum (Deuteromycetes)
Tylenchus allii (Nematoda)
Tylenchus putrefaciens (Nematoda)
ALYXIA:
Uromyces alyxiae (Promycetes)
ANANAS:
Curvularia lunata (Deuteromycetes)
Diplodia theobromae (Deuteromycetes)
Trichoderma viride (Deuteromycetes)
ANDROMEDA:
Diplodina rostrupii (Deuteromycetes)
ANTIRRHINUM:
Puccinia antirrhini (Promycetes)
ARACHIS:
Macrophomina phaseolina (Deuteromycetes)
ARECA:
Diplodia theobromae (Deuteromycetes)
Gloeosporium catechu (Deuteromycetes)
ARISTIDA:
Ustilago aristidae-cyananthae (Promycetes)
ARMERIA:
Cercospora insulana (Deuteromycetes)
ASPIDISTRA:
Colletotrichum omnivorum (Deuteromycetes)
AVENA:
Cercospora avenae (Promycetes)
BAMBOO:
Coniosporium shiraianum (Deuteromycetes)
BEGONIA:
Meloidogyne arenaria (Nematoda)
Thielaviopsis basicola (Deuteromycetes)
BETULA:
Melampsorium betulinum (Promycetes)
BOSWELLIA:
Schizophyllum radiatum (Basidiomycetes)
BRASSICA OLERACEA CAPITATA:
Mycosphaerella brassicola (Ascomycetes)
BROMUS:
Ustilago bullata (Promycete)
BUXUS:
Volutella buxi (Deuteromycetes)
CAJANUS:
Colletotrichum cajani (Deuteromycetes)
CAMELLIA:
Camellia yellow-spot virus
Pestalotia quepini (Deuteromycetes)
CAPPARIS:
Cercospora capparis (Deuteromycetes)
CAPSIUM:
Gloeosporium piperatum (Deuteromycetes)
CARICA:
Hormodendrum cladosporioides (Deuteromycetes)
CASTANEA:
Diplodia castaneae (Deuteromycetes)
CATTLEY:
Memmoniella echinata (Deuteromycetes)
Phyllosticta laeliae (Deuteromycetes)
CHAENOMELES:
Gymnosporangium haraeanaum (Promycetes)
CHRYSANTHEMUM:
Heterosporium variabile (Deuteromycetes)
- CHRYSANTHEMUM—Continued**
Puccinia chrysanthemi (Promycetes)
Septoria chrysanthemi (Deuteromycetes)
Septoria leucanthemi (Deuteromycetes)
CICHORIUM:
Puccinia hieracii (Promycetes)
Sclerotinia minor (Ascomycetes)
CITRULLUS:
Fusarium oxysporum f. niveum (Deuteromycetes)
CITRUS AURANTIFOLIA:
Elsinoe australis (Ascomycetes)
Phoma citricarpa (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
CITRUS GRANDIS:
Memmoniella echinata (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
CITRUS LIMON:
Alternaria citri (Deuteromycetes)
Ascochyta citri (?) (Deuteromycetes)
Cancrosis "B"
Diplodia theobromae (Deuteromycetes)
Elsinoe australis (Ascomycetes)
Ervinia citrimaculans (Schizomycetes)
Phoma citricarpa (Deuteromycetes)
Pseudomonas syringae (Schizomycetes)
Septoria citri (Deuteromycetes)
Sphaeloma fawcettii (?) (Deuteromycetes)
Sphaeloma fawcettii var. *scabiosa* (Deuteromycetes)
Stemphylium botryosum (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
CITRUS PARADISI:
Elsinoe australis (Ascomycetes)
Stemphylium botryosum (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
CITRUS RETICULATA:
Elsinoe australis (Ascomycetes)
Phoma citricarpa (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
CITRUS RETICULATA VAR.:
Phoma citricarpa (Deuteromycetes)
CITRUS SINENSIS:
Alternaria citri (Deuteromycetes)
Ascochyta citri (?) (Deuteromycetes)
Elsinoe australis (Ascomycetes)
Phoma citricarpa (Deuteromycetes)
Septoria citri (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
CITRUS SP. (orange):
Elsinoe australis (Ascomycetes)
Phoma citricarpa (Deuteromycetes)
Septoria citri (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
CITRUS SP.:
Meliola citricola (Ascomycetes)
Phoma citricarpa (Deuteromycetes)
COCOS:
Cryptospora longispora (?) (Ascomycetes)
Diplodia epicocos (Deuteromycetes)
Pestalotia palmarum (Deuteromycetes)
ODIAEUM:
Cercospora codiae (Deuteromycetes)
Laetitia miniscula (Ascomycetes)
COFFEA:
Cercospora coffeicola (Deuteromycetes)
COLCHICUM:
Plectus parietinus (Nematoda)
Urocystis colchici (Promycetes)
COLOCASIA:
Chlamydomyces palmarum (Deuteromycetes)
CORNUS:
Phomopsis corni (Deuteromycetes)
CROCUS:
Fusarium oxysporum (Deuteromycetes)
CRYPTOMERIA:
Pestalotia funerea (Deuteromycetes)
CUCURBITA:
Marmor cucumeris (Virus)
Mycosphaerella citrullina (Ascomycetes)
CYCLAMEN:
Septoria cyclaminis (Deuteromycetes)
CYDONIA:
Fabraea maculata (Ascomycetes)
Hormodendrum cladosporioides (Deuteromycetes)
Monilinia fructigena (Deuteromycetes)
Sphaeropsis cydoniae (Deuteromycetes)

Hosts and diseases—Continued

- CYMBIDIUM:**
Colletotrichum cinctum (Deuteromycetes)

Colletotrichum cinctum (Deuteromycetes)
Diplodia theobromae (Deuteromycetes)
- ORNITHOGALUM:**
Heterosporium ornithogali (Deuteromycetes)
Puccinia ornithogali-thyrsoides (Promycetes)
- ORYZA:**
Cercospora oryzae (Deuteromycetes)
Chaetomium elatum (Ascomycetes)
Diplodiella oryzae (Deuteromycetes)
Entyloma oryzae (Promycetes)
Helminthosporium oryzae (Deuteromycetes)
Leptosphaeria sativii (Ascomycetes)
Nigrospora sphaerica (Deuteromycetes)
Phyllosticta glumarum (Deuteromycetes)
- OXALIS:**
Stemphylium ilicis (Deuteromycetes)

Hosts and diseases—Continued

PACHYRHIZUS:

Stilbum incarnatum (Deuteromycetes)

PAEONIA:

Monochaetia paeoniae (Deuteromycetes)

PERSEA:

Sphaceloma perseae (Deuteromycetes)

PHASEOLUS LUNATUS MACROCARPUS:

Elsinoe phaseoli (Ascomycetes)

Isariopsis griseola (Deuteromycetes)

PHLOX:

Pyrenochaeta phlogis (Deuteromycetes)

PHRAGMITES:

Puccinia phragmites (Promycetes)

PHYSALIS:

Cercospora physalicola (Deuteromycetes)

PICEA:

Phragmotrichum chailletii (Promycetes)

PINUS:

Cercospora pini-densiflorae (Deuteromycetes)

Lophodermium pinastri (Ascomycetes)

Pestalotia peregrina (Deuteromycetes)

PISUM:

Ascochyta pisi (Deuteromycetes)

Colletotrichum pisi (Deuteromycetes)

PROSOPIA:

Gloeosporium leguminum (Deuteromycetes)

Ravenelia arizonica (Promycetes)

Tryblidella prosopidis (Ascomycetes)

PRUNUS ARMENIACA:

Coryneum beijerinckii (Deuteromycetes)

PRUNUS CERASUS:

Monilinia laxa (Ascomycetes)

PRUNUS PERSICA:

Coryneum beijerinckii (Deuteromycetes)

Monilinia fructicola (Ascomycetes)

Monilinia fructigena (Ascomycetes)

Monilinia laxa (Ascomycetes)

Transschelia pruni-spinosae (Promycetes)

PRUNUS SP.:

Thecospora areolata (Promycetes)

PSIDIUM:

Pestalotia psidii (Deuteromycetes)

PUERARIA:

Gliomastix convoluta (Deuteromycetes)

Melanospora zamiae (Ascomycetes)

PUNICA:

Cercospora lythracearum (Deuteromycetes)

Cytospora punica (Deuteromycetes)

Sphaceloma punicae (Deuteromycetes)

PYRACANTHA:

Fusicladium pyracanthae (Deuteromycetes)

RAPHANUS:

Aphanomyces raphani (Phycomycetes)

RHODODENDRON:

Cercospora handeltii (Deuteromycetes)

Chrysomyxa rhododendri (Promycetes)

Erobasidium vaccinii (Basidiomycetes)

Mycosphaerella rhododendri (Ascomycetes)

Pestalotia macrotricha (Deuteromycetes)

Pestalotia rhododendri (Deuteromycetes)

Septoria azaleae (Deuteromycetes)

RIBES:

Cronartium ribicola (Promycetes)

Trullula olivascens (Deuteromycetes)

RICINUS:

Cercospora ricinella (Deuteromycetes)

ROSA:

Coryneum microstictum (Deuteromycetes)

Phragmidium disciflorum (Promycetes)

RUSCUS:

Leptosphaeria ruscii (Ascomycetes)

Phyllosticta ruscicola (Deuteromycetes)

SACCHARUM:

Colletotrichum falcatum (Deuteromycetes)

Gnomonia iliaui (Deuteromycetes)

Leptosphaeria sacchari (Ascomycetes)

SALIX:

Botryosphaeria ribis (Ascomycetes)

Physalospora obtusa (Ascomycetes)

SANSEVIERIA:

Gloeosporium sansevieriae (Deuteromycetes)

SASA:

Puccinia longicornis (Promycetes)

SCILLA:

Gliomastix convoluta (Deuteromycetes)

Papulaspora parasitica (Deuteromycetes)

SCIRPUS:

Puccinia oblecta (Promycetes)

SECALE:

Puccinia rubigo-nera f. secalis (Promycetes)

SECHUIM:

Mycosphaerella citrullina (Ascomycetes)

SINNINGIA:

Thielaviopsis basicola (Deuteromycetes)

SOBRALIA:

Uredo guacae (Promycetes)

SOIL:

Aphelenchoides ribes (Nematoda)

Aphelenchus agricola (Nematoda)

Aphelenchus avenae (Nematoda)

Ditylenchus intermedius (Nematoda)

Heterodera avenae (Nematoda)

Heterodera goettingiana (Nematoda)

Heterodera punctata (Nematoda)

Heterodera rostochiensis (Nematoda)

Heterodera schachtii (Nematoda)

Plectus parietinus (Nematoda)

Tylenchus filiformis (Nematoda)

SOLANUM MELONGENA:

Stemphylium botryosum (Deuteromycetes)

SOLANUM TUBEROSUM:

Fusarium oxysporum f. tuberosi (Deuteromycetes)

Gliomastix convoluta (Deuteromycetes)

SORBUS:

Venturia inaequalis var. *cinerascens* (Ascomycetes)

SORGHUM:

Cercospora sorghi (Deuteromycetes)

Colletotrichum falcatum (Deuteromycetes)

Colletotrichum graminicolum (Deuteromycetes)

Helminthosporium turcicum (Deuteromycetes)

Phyllosticta sorghina (Deuteromycetes)

Sphacelotheca holci (Promycetes)

SPINACIA:

Peronospora effusa (Phycomycetes)

STACHYTARPHETA:

Puccinia urbaniana (Promycetes)

TAXUS:

Pestalotia funerea (Deuteromycetes)

THELOCACTUS:

Mycosphaerella opuntiae (Ascomycetes)

THEOBROMA:

Diplodia theobromae (Deuteromycetes)

TRAPA:

Memmoniella echinata (Deuteromycetes)

Papulaspora parasitica (Deuteromycetes)

Stilbum incarnatum (Deuteromycetes)

TRITICUM:

Leptosphaeria tritici (Ascomycetes)

Puccinia graminis var. *tritici* (Promycetes)

Urocystis tritici (Promycetes)

Ustilago tritici (Promycetes)

TULIPA:

Papulaspora parasitica (Deuteromycetes)

TYPHA:

Leptosphaeria typharum (Ascomycetes)

VANDA:

Phyllosticta nigro-maculans (Deuteromycetes)

Trametes flavida (Basidiomycetes)

VANILLA:

Myrothecium verrucaria (Deuteromycetes)

VICIA:

Ascochyta pisi (Deuteromycetes)

Uromyces fabae (Promycetes)

VIOLA:

Cercospora violae (Deuteromycetes)

VITIS:

Coryneum microstictum (Deuteromycetes)

Hendersonia sarmentorum (Deuteromycetes)

Phoma viticola (Deuteromycetes)

Physalospora obtusa (Ascomycetes)

ZEA:

Puccinia sorghi (Promycetes)

ZINGIBER:

Gliomastix convoluta (Deuteromycetes)

Melanospora zamiae (Ascomycetes)

Memmoniella echinata (Deuteromycetes)

ZIZANIA:

Ustilago esculenta (Promycetes)

ZYGOPELALUM:

Uredo oncidii (Promycetes)

Hosts unknown

UNITED STATES DEPARTMENT OF AGRICULTURE

AGRICULTURAL RESEARCH ADMINISTRATION

BUREAU OF ENTOMOLOGY AND PLANT QUARANTINE

SERVICE AND REGULATORY ANNOUNCEMENTS

LIST OF INTERCEPTED PLANT PESTS, 1951

(List of Pests Recorded During the Period July 1, 1950 to June 30, 1951, Inclusive, as Intercepted in, on, or with Plants and Plant Products Entering United States Territory.)

Compiled by
JUDITH HUNT
Plant Quarantine Aid

INTRODUCTION

This report, covering the thirty-eighth year for which interception lists have been issued, summarizes the records of insect pests, plant pathogens, and certain other organisms found in, on, or with plants and plant products (1) imported, (2) offered for but refused entry, (3) held as ships' stores, etc. and hence not offered for entry through customs, (4) offered for entry for immediate transportation and exportation in bond, and (5) in domestic shipments between Hawaii and Puerto Rico and the mainland.

Because of the large number of collections involved, an effort has been made to restrict this list to those insects and plant diseases of known or potential plant quarantine importance. Intercepted plant pests that are known to be widely distributed throughout the United States are not included in the tabulation.

In some cases collections made late in the year are included in the report for the following year, since determinations cannot be obtained immediately for all of them. Occasionally determinations are delayed for longer periods. The data for this list are obtained from routine reports by personnel of this Bureau, supplemented by information supplied by State and Customs officials. The States of California and Florida maintain staffs of specialists who identify a large proportion of the material collected at their ports. Specialists of the Bureau of Plant Industry, Soils, and Agricultural Engineering determine many of the difficult or unusual pathogens collected at the ports.

All scientific names are reviewed by appropriate specialists in the Department to assure conformance to the international rules of nomenclature.

While every reasonable effort is made to give the correct origin for all collections listed, the alleged origin of host plant materials cannot be verified in all cases, and where there is reason to doubt the accuracy of the information, the questionable items are either omitted or the origin is listed as unknown.

During the year of this report importers have continued a lively interest in obtaining various seeds, plants, bulbs, fruits, and plant products from many parts of the world. With such importations, which more and more frequently arrive by air, come an increasing number of living plant pathogens and insect pests. Fruit flies and the golden nematode continue to be among the primary pests for which inspectors are constantly alerted.

INTERCEPTIONS FROM AIR-BORNE MATERIAL

Plant pests have been intercepted frequently on air-borne plant material in baggage, express, freight, mail, and stores. During the year 3,269 interceptions were made of insects on imported plant parts or as stowaways, and 534 interceptions of plant diseases. A little more than one-third of the pathogens were not determinable as to species, but, from the evidence, appeared to exhibit little or no risk to the country. A few of the specifically identified parasites are unknown in the United

States but are known to cause important crop losses in the countries where they occur. Some of the more injurious insects intercepted during the year arrived in, on, or with fruits and plant material coming in by plane.

Among the more important insects found in air-borne material were: *Adoxophyes orana* on cut flowers of lilac in cargo from the Netherlands (although this species is a rather general feeder this is the first record on lilac for the National Museum collection); the citrus blackfly (*Aleurocanthus woglumi*) on an orange leaf in baggage from Mexico; the woolly whitefly (*Aleurothrixus floccosus*) on *Citrus* sp. leaf in baggage from the Bahamas and on *lignumvitae* in baggage from Jamaica; the Mexican fruit fly (*Anastrepha ludens*) in guava in baggage from Nicaragua, in mango in baggage from Mexico, in orange in baggage and stores from Mexico; the West Indian fruit fly (*A. mombinpraeoptans*) in mango in baggage from Cuba, Dominican Republic, Haiti, Jamaica, Mexico, Panama, Puerto Rico, and Salvador, in mango in cargo from Panama and Salvador, in mango in mail from Puerto Rico, in mango in quarters from Mexico, in *Spondias* sp. in baggage from Salvador, and in yellow mombin in baggage from Guatemala, Mexico, Nicaragua, Panama, and Salvador, in yellow mombin in stores from Guatemala; *A. serpentina* in sapodilla in baggage from Nicaragua, in sapote in baggage from Mexico, in star-apple in baggage from Panama and in star-apple in express from Salvador; *A. striata* in guava in baggage from Salvador and Trinidad; *A. suspensa* in guava in baggage from the Dominican Republic, Jamaica, and Puerto Rico, in guava in mail from Puerto Rico; *Brachyrhinus rugosostriatus* in soil on roots of *Saxifraga* sp. in cargo from Switzerland; *Bruchus luteicornis* in vetch seed in baggage from Germany; the Mediterranean fruit fly (*Ceratitis capitata*) in *Annona* sp. in baggage from Portugal, in apple in baggage from the Azores and Portugal, in apricot in baggage from Lebanon, in apricot in stores from Portugal, in avocado in baggage from Portugal, in fig in quarters from Italy, in fig in baggage from Greece, Italy, and Lebanon, in lemon in baggage from the Azores, in Mandarin orange in cargo from Spain, in Mandarin orange in stores from the Azores and Spain, in nectarine in baggage from Italy, in *Opuntia* sp. in baggage from Italy, in orange in baggage from the Azores, Cyprus, Greece, Israel, Portugal, and Spain, in orange in cargo from Italy, in orange in stores from the Azores, Israel, Lebanon, and Spain, in peach in baggage from France, Italy, and Spain, in peach in stores from the Azores, Italy, and Portugal, in pear in baggage from Italy, in pear in stores from Portugal, in pomegranate in baggage from Greece, in prickly pear in baggage from Italy, in quince in baggage from Italy; *C. capitata* (?) in plum in baggage from Italy; the mango weevil (*Cryptorhynchus mangiferae*) in mango in baggage from India; the olive fruit fly (*D. oleae*) in olive in baggage from Italy, Lebanon, and Syria; the citrus whitefly (*Dialeurodes citri*) on gardenia leaf in baggage from Mexico; *Ereunetis flavistriata* in coconut in baggage from Hawaii; the Oriental fruit moth (*Grapholitha molesta*) in peach and pear in baggage from Japan; a bean pod borer, *Maruca testualis*, in pigeonpea in baggage and mail from Puerto Rico, in string bean in mail from Puerto Rico; in string bean in baggage in preflight inspection of an airplane leaving Puerto Rico for the mainland; the pink bollworm (*Pectinophora gossypiella*) in cotton bolls in baggage from the Bahamas and Italy, in cottonseed in baggage from Puerto Rico, in cottonseed in cargo from Brazil, in okra in baggage from Puerto Rico and Trinidad; the leaf roller (*Polychrosis botrana*) in grapes in baggage from Greece and Italy; the European corn borer (*Pyrausta nubilalis*) in pepper in baggage from Italy; *Rhagoletis cerasi* in cherry in baggage from Austria, England, France, Germany, Italy, Portugal, and Spain, in cherry in quarters from France, in cherry in stores from France, Portugal, and Sweden.

Some important plant pathogens found on air-borne material and believed to be new to or not as yet established in the United States were: *Catacauma sabal* on palm leaf in baggage from Mexico; *Cercospora insulana* on *Limonium* sp. in cargo from Mexico; *Chrysomya rhododendri* on rhododendron in cargo from England and Switzerland; *Colletotrichum cajani* on pigeonpea in baggage from Puerto Rico; *Elsinoe australis* on lemon and sweet orange in baggage from Brazil, on sweet orange in stores from Argentina, and on sweet orange in baggage from an unknown origin; *E. phaseoli* on lima bean in baggage from Puerto Rico; *Gymnosporangium juniperi* and *G. juniperinum* on European mountain ash in baggage from Sweden; "Leprosis" on orange in baggage from Bolivia; *Mycosphaerella advena* on *Chamaedorea* sp. (palm) in cargo from Mexico; *M. palmarum* on palm in cargo from Mexico; *Phlyctaena ramuncularum* on tree peony in cargo from Japan; *Phoma hortensiae* on hydrangea in baggage from the Azores; *Phyllosticta passiflorae* on passion fruit in baggage from Australia; *Puccinia buxi* on box in baggage from Yugoslavia; *P. urbaniana* on

Stachytarpheta spp. in baggage from Puerto Rico; *Septoria posekensis* on *Odontoglossum citrosimum* (orchid) in cargo from Mexico and on *Cypripedium callosum* (orchid) in cargo from Siam; *Stachylidium theobromae* on banana in stores from Portugal; *Uredo jucunda* on philodendron in cargo from Costa Rica; virus (undetermined) on *Crossandra* sp. in mail from the Canal Zone; *Xanthomonas citri* on sour lime in stores from India; *Xanthomonas* sp. (Cancrosis "B") on lemon in stores from Argentina.

Intercepted plant disease organisms found on air-borne material that are generally of limited distribution in the United States were: *Coniothyrium hellebori* on Christmas-rose in cargo from the Netherlands and Switzerland; *Entyloma dahliae* on dahlia in baggage from Denmark; *Phakopsora desmum* on cotton in baggage from Puerto Rico; two species of nematodes, *Heterodera punctata* in soil with various plants intended for propagation from England, Germany, Sweden, and Switzerland, and the golden nematode (*H. rostochiensis*) in soil with strawberry, gooseberry, carnation, lavender, chrysanthemum plants from England, in soil with raspberry and currant plants from Sweden, in soil with rhododendron, heather, and shamrock plants from Scotland, in soil with gloxinia plants from Norway and Luxembourg, in soil with kale and shamrock plants from Ireland, in soil with narcissus bulbs and dahlia roots from Ireland, in soil with *Myrtus* sp. plant from Germany, in soil with clematis plants from Switzerland, and in soil with strawberry plants from Denmark. All of this material was intended for propagation.

NOTES ON INSECTS INTERCEPTED

FRUIT FLIES

The following fruit flies were intercepted: *Anastrepha fraterculus* in orange in quarters from Argentina and in peach in baggage from Mexico; the Mexican fruit fly (*A. ludens*) in avocado in baggage from Mexico, in grapefruit in stores from Guatemala, in grapefruit in baggage from Mexico, in guava in baggage from Nicaragua, in mango in baggage, quarters, and stores from Mexico, in orange in baggage from Guatemala, Mexico, and Salvador, in orange in stores from Costa Rica and Mexico, in orange in quarters from Mexico, in peach in baggage from Mexico, in pear in baggage from Mexico, in pomegranate in baggage from Mexico, in quince in baggage from Mexico, in sapote in baggage from Mexico, and in sweet lime in baggage from Mexico; the West Indian fruit fly (*A. mombinpraeoptans*) in mango in baggage from Cuba, Dominican Republic, Haiti, Jamaica, Mexico, Panama, Puerto Rico, and Salvador, in mango in cargo from Panama and Salvador, in mango in mail from Puerto Rico, in mango in quarters from Guatemala, Honduras, Mexico, and Trinidad, in mango in stores from the Canal Zone, Cuba, Dominican Republic, and Haiti, in *Spondias* sp. in baggage from Salvador and in *Spondias* sp. in mail from Puerto Rico, in yellow mombin in baggage from Guatemala, Nicaragua, Panama, and Salvador, in yellow mombin in baggage and stores from Guatemala; *A. mombinpraeoptans* (?) in guava in quarters from Honduras; *A. serpentina* in mamey and sapote in baggage from Mexico, in sapodilla in baggage from Nicaragua, and in sapodilla in quarters from Guatemala, in star-apple in baggage from Panama and in star-apple in express from Salvador; *A. serpentina* (?) in orange in stores from Peru; *A. striata* in guava in baggage from Salvador and Trinidad; *A. suspensa* in guava in baggage from the Dominican Republic, Jamaica, and Puerto Rico, in guava in mail from Puerto Rico; the Mediterranean fruit fly (*Ceratitis capitata*) in *Annona* sp. in baggage from Portugal, in apple in baggage from the Azores, Italy, and Portugal, in apricot in baggage from Greece and Lebanon and in apricot in stores from Portugal, in avocado in baggage from Portugal, in coffee berry in baggage from Hawaii, in fig in baggage from Greece, Italy, and Lebanon, in fig in quarters from Italy, in grapefruit in stores from Cyprus, Egypt, Gibraltar (?), Israel, Palestine, and Spain, in guava in baggage from Israel, in lemon in baggage from the Azores and Italy, in Mandarin orange in baggage from Israel and Italy, in Mandarin orange in cargo from Spain, in Mandarin orange in stores from Algeria, the Azores, Portugal, and Spain, in nectarine in baggage from Italy, in orange in baggage from the Azores, Cyprus, Greece, Israel, Italy, Malta, Palestine, Portugal, and Spain, in orange in cargo from Italy, in orange in stores from Africa, Algeria, the Azores, Israel, Italy, Lebanon, Portugal, and Spain, in peach in baggage from France, Italy, and Spain, in peach in stores from the Azores, Italy, Palestine, and Portugal, in pears in baggage from Italy and Syria, in pear in quarters from Italy, in pear in stores from Portugal, in persimmon in baggage from Italy, in pomegranate

in baggage from Greece and Italy, in prickly pear in baggage from Italy, and in quince in baggage from Italy, with grapes, oranges, and plums from Italy (abandoned on pier); *C. capitata* (?) in plum in baggage from Italy; the melon fly (*Dacus cucurbitae*) in cucumber in cargo and stores from Hawaii, in tomato in stores from Hawaii; the Oriental fruit fly (*D. dorsalis*) in avocado in baggage from Hawaii, in banana in baggage and quarters from Hawaii, a dead adult in a case of cucumbers in cargo from Hawaii, in mango in baggage from Hawaii, in tomato in stores from Hawaii; in *Ochrosia elliptica* in baggage from Hawaii; the olive fruit fly (*D. oleae*) in olive in baggage from Italy, Lebanon, and Syria, in olive in mail from Italy, in olive in quarters from Crete, in olive in stores from Greece; *D. oleae* (?) in olive in stores from Algeria; *Rhagoletis cerasi* in cherry in baggage from Austria, England, France, Germany, Italy, Portugal, and Spain; in cherry in quarters from France, in cherry in stores from France, Italy, Portugal, and Sweden; the walnut husk fly (*R. completa*) in walnut in baggage from Mexico; *R. juglans* in black walnut in baggage from Mexico; *R. pomonella* in apple in baggage from Mexico, in apple in stores from Canada and the Union of South Africa.

INSECTS OTHER THAN FRUIT FLIES

The following miscellaneous insects of special interest were intercepted: A bruchid, *Acanthoscelides griseolus*, in *Rhynchosia* sp. seed in mail from Mexico; an eriophyid mite, *Aceria tulipae*, on garlic in cargo from Mexico and on garlic in stores from Chile; *Adoxophyes orana* (Tortricidae) on cut flowers of lilac in cargo by air from the Netherlands; the citrus blackfly (*Aleurocanthus woglumi*) on leaves of *Citrus* sp. in baggage and in mail from Mexico, on hibiscus leaf in baggage from Mexico, on Mandarin orange leaf in baggage from Mexico, on orange leaves in baggage and in baggage by air from Mexico, on orange leaf in stores from Peru, and on sour lime leaf in cargo from Mexico; *Apsychomyrmex tristani* (Formicidae), a very rare species in most collections, on cane of *Philodendron* sp. in cargo from Costa Rica; a curculionid, *Brachyrhinus rugosostriatus*, in soil and moss packing for *Quercus* sp. in cargo and in soil on roots of *Saxifraga* sp., in cargo from Switzerland; a coccid, *Chrysomphalus ritchiei*, on *Calocarpum sapota* in stores from the Canal Zone; *Coccotrypes dactyliperda* (Scolytidae) in cliff date palm seed in mail from India and in unidentified seed in baggage from Hawaii; the banana root borer (*Cosmopolites sordidus*) in banana in cargo from Nicaragua; a curculionid, *Cylas femoralis*, in sweetpotato in baggage from Liberia; *Epicaerus cognatus* in potato in baggage and stores from Mexico; *Epinotia tessulatana* (Olethreutidae) in Portuguese cypress in baggage from Portugal; an olethreutid, *Gymnandrosoma aurantianum*, in an orange in stores from Brazil; *Laspeyresia juliana* (Olethreutidae) in chestnut in baggage from Italy; a scolytid, *Leperisinus fragini*, in *Ulmus* sp. (?) crate in cargo from England; *Lepidosaphes kuwacola* (Coccidae) on tree peony in air express from Japan; *Liliocercis lili* (Chrysomelidae) in Madonna lily bulb and lily bulb in cargo from France; *Myrmica laevinodis* (Formicidae), an important economic species, on shasta daisy in air express from England; *Naupactus xanthographus* (Curculionidae) in packing around melons in cargo from Chile; the pink bollworm (*Pectinophora gossypiella*) in cotton bolls in baggage from the Bahamas, British West Africa, Hawaii, Italy, and Mexico, in cotton boll in cargo from Mexico, in cottonseed in baggage from Mexico, in cottonseed in baggage by air from Puerto Rico, in cottonseed in cargo from Brazil, Egypt, and India, and in cargo by air from Brazil, in cottonseed in mail from Brazil, Egypt, and Korea, in cottonseed in quarters from Mexico, in seed cotton in baggage, cargo, and quarters from Mexico, in seed cotton in mail from an unknown origin, in okra in baggage by air from Puerto Rico and Trinidad, in okra in mail from Egypt, and in okra in stores from Brazil and Egypt; an olethreutid, *Polychrosis botrana*, in grape in baggage by air from Greece and Italy; *Puto ulter* (Coccidae) on *Brassia verrucosa*, *Epidendrum atropurpureum*, *Oncidium splendendum*, and *Oncidium* sp., all orchids, in cargo by air from Guatemala; *Reticulitermes speratus* (Rhinotermitidae) on tree peony in cargo from Japan; *Sesamia cretica* (Phalaenidae) in broomcorn and corn in baggage from Italy and in broomcorn in cargo from Greece and Italy; the coffee berry borer (*Stephanoderes hampei*) in coffee beans in stores from Brazil; the bulb scale mite (*Tarsonemus laticeps*) in narcissus bulbs in cargo from the Netherlands.

SNAILS

During the year eleven shiploads of returned military equipment were found to be contaminated with the giant African snail (*Achatina fulica*). San Pedro, Calif., again made the largest number of interceptions of snails (6) on ships arriving from

Guam, the Philippines, and Saipan while San Francisco, Calif., made 4 interceptions and Portland, Oreg., made one, all on ships coming from Guam.

Another injurious snail, *Deroceras reticulatum*, distributed in some of our States, was intercepted at New York, N. Y., with celery in stores from Bermuda, with cut flowers of chrysanthemums in baggage from England, and with unidentified plant material in baggage from Italy, at Galveston, Tex., with cabbage in stores from Italy, and at Miami, Fla., with *Cattleya* sp., an orchid, in cargo by air from Venezuela. *Lamellaxis* sp., a third injurious species, not known to occur on the mainland of the United States, was taken at Honolulu, Hawaii with *Renanthera storiei*, an orchid, in cargo from the Philippines.

NOTES ON DISEASES INTERCEPTED

Japan has contributed the greatest number of interceptions (25) of citrus canker (*Xanthomonas citri*), 17 of which were on lemons, the remaining on sweet oranges and one each on pummelo and grapefruit. China supplied nearly as many interceptions (20) on the same above hosts except lemon and one on Mandarin orange. India dropped to third place this year, contributing fewer interceptions (15) than previous years, most of them on sour lime with one each on lemon and calamodin orange. Cancrosis "B" (*Xanthomonas* sp.), closely related to citrus canker, was intercepted six times on lemons from Argentina. Brazil contributed more interceptions (84) of sweet orange fruit scab (*Elsinoe australis*) on orange, lemon, and sour lime than Argentina (16) on the same hosts except sour lime. "Leprosis", a comparatively new disease to the citrus industry possibly caused by a virus or insect injury, has been intercepted once from Bolivia and once from Brazil. Quantities of plants for propagation purposes were intercepted at the ports of entry. *Chrysomyxa rhododendri*, a rust attacking both spruces and rhododendrons, was brought to this country with cut rhododendron flowers four times from Austria, three times from Switzerland, and once from an unknown source. It also came on one occasion from England on the same host, intended for propagation. Japan contributed 4 interceptions of Chinese juniper infected by a leaf rust, *Gymnosporangium harae-anum*. Flowering quince is the alternate host of this rust species. A stem disease, *Coniothyrium cytisallum*, of *Laburnum* sp. and a leaf disease, *C. hellebori*, on Christmas-rose came from the Netherlands. Two rust diseases, *Gymnosporangium juniperi* and *G. juniperinum*, were intercepted on European mountain ash from Norway and Sweden. The alternate host as the species name implies in both cases is juniper. A destructive leaf disease, *Septoria azaleae*, of rhododendron and azalea was brought from Belgium and the Netherlands.

Other pathogens of importance were *Botrytis gladiolorum* on gladiolus and *Tritonia* sp. in cargo from the Netherlands, on gladiolus in mail from Austria, on gladiolus in cargo from Japan, and on gladiolus in baggage from Mexico and the Netherlands; *Cercospora handelli* on rhododendron in cargo from the Netherlands; *C. kaki* on persimmon in stores from Japan; a parasitic lichen, *Mycena citricolor* (formerly *Omphalia flavida*), on gardenia in baggage from Guatemala and on gardenia in cargo from Mexico.

Nematodes have been important plant pests. The golden nematode, (*Heterodera rostochiensis*), causing serious concern for the third year, generally found in soil with various plant material for propagation, was intercepted 80 times from the British Isles, Europe, and the Scandinavian countries. This nematode was also found 57 times in soil on bagging from Belgium, England, the Netherlands, and Scotland, 21 times in soil with potatoes from Denmark, England, Germany, Ireland, Norway, Scotland, and Spain, 9 times in soil with heather and potatoes from Scotland. Other nematodes of importance were *Anguina tritici* in wheat in mail from Syria and Turkey; *Aphelenchoides parietinus* in *Convallaria* sp. in cargo from Denmark; *Aphelenchus avenae* in onion, potato, and soil with cactus plants, all in baggage from Mexico, and in gladiolus in mail from the Netherlands; *Ditylenchus dipsaci* in onion in baggage from Mexico and in *Tigridia* sp. in cargo from the Netherlands; *D. iridis* in iris in cargo from the Netherlands; *Heterodera avenae* in soil with rutabagas in stores from England and in soil with pine in baggage from the Isle of Man; *H. cacti* in soil with cactus in baggage from France and Israel and in soil with *Epiphyllum* sp. and *Mammillaria* sp. in mail from Mexico; *H. punctata* in soil with various host materials from the British Isles, the Scandinavian Countries, and Europe; *H. schachtii* in soil with beets in stores and in soil with grapes and fig plants in baggage from Italy; *Meloidogyne arenaria* in begonia tubers in cargo from Belgium and in roots of clematis in cargo from the Netherlands.

INCOMPLETELY DETERMINED PESTS

In many instances complete determinations of insects and plant pathogens, including nematodes, have been impossible due to their condition on arrival. Some of these potential pests may be hitherto unknown and may be of economic importance. Furthermore, the increasing importance of nematodes in agriculture is paralleled by an increasing number of interceptions by every method of transportation.

INSECTS

Among the incompletely determined insects were the following fruit flies: *Anastrepha* sp., probably *ludens*, at Brownsville, Tex., in an empty boxcar which had carried mangoes from Mexico, at El Paso, Tex., in mango in baggage from Mexico, at Galveston, Tex., in orange in stores from British Honduras; *Anastrepha* sp., probably *mombinpraeoptans*, at New Orleans, La., in guava in quarters from Honduras; *Anastrepha* sp. at Miami, Fla., in custard-apple in baggage by air from Peru, at San Juan, Puerto Rico, in date in baggage in preflight inspection for shipment to the mainland, at Brownsville, Tex., in mamey in baggage from Mexico, at Mobile, Ala., in grapefruit in stores from Peru, at Jacksonville, Fla., in grapefruit in stores from Argentina, at Laredo, Tex., in guava in baggage from Mexico, at New Orleans, La., in guava in baggage by air from Salvador, at New York, N. Y., in guava in baggage by air from Colombia, at Baltimore, Md., in mango in stores from Panama, at Brownsville, Tex., in mango in baggage from Mexico, at Hidalgo, Tex., in mango in baggage from Mexico, at Miami, Fla., in mango in baggage by air from Jamaica, at Laredo, Tex., in mango in baggage from Mexico, at New Orleans, La., in mango in baggage by air from Jamaica and in mango in quarters from Cuba and Guatemala, at New York, N. Y., in mango in baggage from Ecuador, at San Antonio, Tex., in mango in baggage by air from Salvador, at West Palm Beach, Fla., in mango in baggage by air from Jamaica, at Brownsville, Tex., in orange in baggage from Mexico, at Houston, Tex., in orange in baggage by air from Guatemala, at Miami, Fla., in orange in baggage by air and stores from Colombia, at New Orleans, La., in orange in stores from Brazil and Peru, at New York, N. Y. in orange in baggage by air from Colombia, at Philadelphia, Pa., in orange in stores from Brazil, at Port Arthur, Tex., in orange in quarters from Brazil, at Brownsville, Tex., in *Passiflora* sp., in stores from Mexico, at Laredo, Tex., in peach in baggage from Mexico, at Thayer, Tex., in peach in baggage from Mexico, at New York, N. Y., in persimmon in baggage by air from Brazil, at Brownsville, Tex., in plum in stores from Mexico, at New Orleans, La., in sapodilla in baggage by air from Salvador, at San Antonio, Tex., in sapodilla in baggage by air from Colombia and Mexico, at Tampa, Fla., in soursop in baggage by air from Peru, at San Pedro, Calif., in yellow mombin in baggage by air from Salvador, at Nogales, Ariz., in a railway car which had been used for hauling mangoes from Mexico; *Dacus* sp. at Norfolk, Va., in cucumber in stores from the Gold Coast, at Baltimore, Md., in squash in stores from the Union of South Africa, at Gulfport, Miss., in tomato in stores from Hawaii; *Rhagoletis* sp. at Laredo, Tex., in apple and apricot in baggage from Mexico, at New York, N. Y., in apple in stores by air from unknown origin (airplane stopped at London, England, and Gander, Canada). Forty-five interceptions which could not be identified beyond family (Tephritidae) were taken at Boston, Mass., in apple in baggage by air from the Azores and Portugal, in apple in stores by air from Australia, in apricot in stores by air from Portugal, at Hidalgo, Tex., in avocado in baggage from Mexico, at San Francisco, Calif., in avocado in baggage from Hawaii, at New York, N. Y., in azarole hawthorn in baggage from Italy, at San Francisco, Calif., in coffee berry in baggage from Hawaii, in cucumber in cargo from Hawaii, at New York, N. Y., in *Cyphomandra* sp. in mail from Mexico, with assorted fruits in baggage from Italy, at New Orleans, La., in grape in cargo from Argentina, at New York, N. Y., in grape in baggage from Italy and in grapes in stores by air from an unknown origin, at Boston, Mass., in grapefruit in stores from Egypt and the Gold Coast, at Houston, Tex., in grapefruit in quarters from Argentina, at Honolulu, Hawaii, in fruit of *Leucosomia burnettiana* in baggage from the Fiji Islands, at Houston, Tex., in mango in baggage by air from Peru, at Laredo, Tex., in mango in baggage from Mexico, at San Francisco, Calif., in mango in baggage from Hawaii, at Baltimore, Md., in orange in stores from Brazil, at Boston, Mass., in orange in stores from Algeria, Portugal (by air), and Spain, at Galveston, Tex., in orange in stores from Brazil, at Laredo, Tex., in orange in baggage from Mexico, at New York, N. Y., in orange in baggage from Trinidad and in orange in stores by air from the Union of South Africa, at Philadelphia, Pa., in orange in quarters from Egypt, at San Diego, Calif., in papaya in stores from Hawaii, at Boston, Mass., in peach in

stores by air from the Union of South Africa, at New York, N. Y., in pear in baggage by air from Greece, at Galveston, Tex., in pepper in stores from the Gold Coast, at Philadelphia, Pa., in chili pepper in stores from Sierra Leone, at San Francisco, Calif., in bell pepper in cargo from Hawaii, at New York, N. Y., in sorbe apple in baggage from Italy, at Calexico, Calif., in a refrigerator car which had been used to transport bananas from Mexico.

The following miscellaneous insects of special interest were intercepted: An aleyrodid, *Aleurocerus* sp., at San Antonio, Tex., on *Chamaedorea oblongata* in cargo by air from Mexico; *Anaphothrips* sp., near or equals *secticornis* (Tryb.) (Thripidae), at Honolulu, Hawaii, on iris plant, in cargo by air from New Zealand; a coccid, *Annulaspis* sp., at Nogales, Ariz., on bamboo in cargo from Mexico; a scarabaeid, *Anomala* sp. at Seattle, Wash., in soil around dwarf juniper in baggage from Japan; *Anthonomus* sp., near *rectirostris* (L.), (Curculionidae) at Seattle, Wash., in *Prunus* sp. seed in cargo from Japan; *Apion* sp., near *cerdo* Gerst., (Curculionidae) at New York, N. Y., in vetch seed in cargo from Portugal and in vetch seed in mail from Italy; a phalaenid, *Autographa* sp., might be *gamma* (L.), at Mobile, Ala., on cauliflower in stores from England; *Autoserica* sp. (Scarabaeidae) at San Diego, Calif., in soil around dwarf conifers in baggage from Japan; *Brachyrhinus* sp. (Curculionidae) at Seattle, Wash., with astilbe roots in cargo and at Hoboken, N. J., with begonia tubers in mail from the Netherlands, at New York, N. Y., in soil with carnation plants in baggage from Germany, and at New York, N. Y., in soil with oxalis plants in baggage from France; a bruchid, *Bruchus* sp., *ervi* Froel. or very near, at New York, N. Y., in dry lentils in baggage from Italy and in cargo by air from Lebanon; *Bruchus* sp., probably *tristis* Boh., at New York, N. Y., in *Lathyrus* sp. seed in baggage from Italy; *Carposina* sp. (Carposinidae) at San Francisco, Calif., in *Robos magnolia* seed in air freight from Japan; a bruchid, *Caryedon* sp., at Washington, D. C., in seed pod of *Terminalia sericea* in mail from Pretoria; an anthribid, Cimberinae (genus unknown), at Nogales, Ariz., in the blossoms of pine from Mexico. (Insofar as known all the species live, as larvae, in the staminate cones of various pines.) *Cladius* sp., probably *diffimoris* (Panz.), (Tenthredinidae) was intercepted at New York, N. Y., with roses in baggage by air from Czechoslovakia, Germany, Italy, and Scotland; a curculionid, *Cleonus* sp. at Baltimore, Md., and at New York, N. Y., in beets in stores from Egypt; a tortricid, *Cnephasia* sp., near or equals *virgaureana* (Treit.), at New York, N. Y., in soil with viburnum cuttings, primroses, and *Sedum* sp. plants, and narcissus bulbs in baggage from England; *Ctenicera* sp. (Elateridae) at Seattle, Wash., with lily bulbs in mail from Canada, at Norfolk, Va., in soil with potatoes in stores from Denmark, and at Hoboken, N. J., in forest litter packing for violet plants in mail from Germany; an undescribed species of *Diaspis* sp. (Coccidae) at Hidalgo, Tex., on avocado in baggage from Mexico; *Diphaulaca* sp., presumably *panamae* Barber, (Chrysomelidae) at New Orleans, La., on deck of airplane from Guatemala; *Euwra* sp. (Tenthredinidae) at Boston, Mass., in willow withe in cargo by air from France; *Gelechia* sp. (probably new) (Gelechiidae) at Nogales, Ariz., on a leaf of *Jatropha cinerea* in cargo from Mexico; *Gnorimoschema* sp., near or equals *ocellatella* (Boyd), (Gelechiidae) at Philadelphia, Pa., in beets in stores from Egypt; *Gnorimoschema* sp. at New York, N. Y., in Swiss chard in stores from Gibraltar (?); an olethreutid *Gymnandrosoma* sp. at New Orleans, La., in an orange in quarters from Mexico; a psyllid, *Heteropsylla* sp., either undescribed or belonging to a species whose males are unknown, at Nogales, Ariz., with a pod of *Cryptostegia* sp. in baggage from Mexico; *Hypera* sp., near *murinus* (F.), (Curculionidae) at San Francisco, Calif., with *Ribes* sp. in mail from Germany; *Laphygma* sp., probably *exempta* (Wlk.), (Phalaenidae) at Honolulu, Hawaii, in an airplane from Kwajalein; *Lecanium* sp. (Coccidae) at San Francisco, Calif., on a plum tree in baggage from Japan. (This is a species not previously reported from Japan and one probably undescribed.) *Lepidosaphes* sp. (Coccidae) was intercepted at San Francisco, Calif., on coconut in mail from Nigeria. (There is a possibility that this actually may be *L. vermiculus* Mamet but it does not fit rigidly his description and figure.) A pyraustid, *Leucinodes* sp., probably *orbonalis* Gn., was intercepted at Philadelphia, Pa., in eggplant in stores from the Gold Coast; *Lixus* sp., probably *junci* Boh., (Curculionidae) at Boston, Mass., in beet in stores from Palestine; a mirid, *Mala* sp., probably a new species, at Laredo, Tex., on a leaf of *Colocasia* sp. in baggage from Mexico; *Megacyllene* sp., near *boliviana* (Chev.) (Cerambycidae) at New York, N. Y., on loosely baled cube root in cargo from Peru; *Midilia* sp. (Schoenobiidae), probably a new species, at Miami, Fla., on philodendron cutting in cargo by air from Colombia; *Niveaspis* sp. (Coccidae), an undescribed species, at Laredo, Tex., on *Laelia* sp. and *Oncidium* sp. in cargo from Mexico; *Cedionychis* sp. (Chrysomelidae), very interesting and not in the collection at the

U. S. National Museum, at Nogales, Ariz., with lettuce in baggage from Mexico; a chrysomelid, *Phyllobrotica* sp. at Seattle, Wash., in soil packing of lily bulbs in cargo from Japan: *Pityogenes* sp., probably *chalcographus* (L.), (Scolytidae) at Seattle, Wash., in bark of a wooden crate in cargo from Czechoslovakia; *Platypus* sp., probably *curtus* Chap., (Platypodidae) at Charleston, S. C., in *Khaya* sp. log in cargo from the Philippines; *Prays* sp. (Hyponomeutidae) at New York, N. Y., in pomelo in stores from Egypt; a coccid, *Pseudonidia* sp., a new species, at San Francisco, Calif., on *Dendrobium* sp. in air freight from Australia; *Reticulitermes* sp., probably *lucifugus* (Rossi), (Rhinoitermitidae) at New York, N. Y., in soil around roots of a potted *Jasminum* sp. plant in baggage from Italy; *Taeniothrips* sp., near or equals *gracilis* Mlt., (Thripidae) at Buffalo, N. Y., on *Lycoris* sp. bulbs in cargo from Japan and at Hoboken, N. J., in mail from Japan; *Thrips* sp., nearest *physapus* L., (Thripidae) at Washington, D. C., on a leaf of *Fragaria* sp. in mail from Sweden, a scolytid, *Xyleborus* sp., near or equals *confusus* Eichh., at Charleston, S. C., in *Copaifera hemitomophylla* log in cargo from Costa Rica

There were 2,178 interceptions distributed among 554 genera, which could be identified to genus only. A total of 116 could be determined to family or subfamily only.

A total of 2,294 incompletely determined insects were intercepted during the year.

DISEASES

Incompletely determined fungi on plants collected at the ports of entry during the year were the following suspected pathogens: An actinomycete causing stem galls of azalea at Seattle, Wash., in express from England; *Ascochyta* sp., at Philadelphia, Pa., on orange in stores from the Union of South Africa; *Ascochyta* sp., at Seattle, Wash., on *Viburnum rhytidophyllum* in cargo from France; *Cercospora* sp. at Brownsville, Tex., on palm fronds and snapdragon in cargo from Mexico, on avocado in stores from Mexico, and on mistletoe in baggage from Mexico; *Cercospora* sp. at Laredo, Tex., on orchids in baggage and cargo from Mexico; *Cercospora* sp., at Miami, Fla., on *Cynoches chlorochilon*, an orchid, in cargo by air from the Canal Zone; *Cercospora* sp., at New York, N. Y., on croton leaf in baggage by air from the Bahamas; *Cercospora* sp., at San Francisco, Calif., on *Miltonia russelliana*, an orchid, in cargo by air from Brazil; *Cercospora* sp., at San Juan, P. R., on a citrus leaf and on leaves of *Eryngium* sp. in baggage in preflight inspection of planes leaving San Juan for the mainland; *Cercospora* sp., at Seattle, Wash., on *Primula* sp., in mail from British Columbia; *Ceuthospora* sp., at Hoboken, N. J., on mountain laurel leaves in cargo from the Netherlands; *Curvularia* sp., at San Francisco, Calif., on elephant ear in cargo from China; *Cylindrosporium* sp., at San Francisco, Calif., on dry leaf of *Bambusa* sp. in cargo from China and on tree peony in cargo from Japan; *Endoconidiophora* sp., close to *fimbriata* (Ell. & Hals.) Davidson at San Francisco, Calif., on kudzu-bean in cargo from China; *Erwinia* sp. (undescribed) at New York, N. Y., on endive in cargo from Belgium; *Gymnosporangium* sp., at New York, N. Y., on leaves of *Sorbus aucuparia* in baggage by air from Sweden; *Mycosphaerella* sp. at San Juan, P. R., on citrus leaves in baggage in preflight inspection of an airplane leaving San Juan for the mainland; *Mycosphaerella* sp. at New York, N. Y., on leaves of *Arctostaphylos uva-ursi* (bearberry) in baggage from Finland; *Phytophthora* sp., probably of the *cryptogaea* type, at Hoboken, N. J., on *Incarvillea* sp., in cargo from the Netherlands; *Phytophthora* sp., at Hoboken, N. J., on gloxinia in cargo and air express from Belgium; *Plenodomus* sp., at San Francisco, Calif., on snowdrop bulbs in cargo from the Netherlands; *Pseudomonas* sp. (undescribed) at New York, N. Y., on endive in cargo from Belgium; *Sclerotium* sp., at Buffalo, N. Y., on narcissus bulbs in cargo from the Netherlands; *Sclerotium* sp., at Portland, Oregon, on *Tulipa fosteriana* bulb in cargo from the Netherlands; *Sclerotium* sp., at Seattle, Wash., on taro in cargo from China; *Sclerotium* sp., at Philadelphia, Pa., on *Galanthus* sp. bulbs in cargo from the Netherlands; *Sclerotium* sp., at Hoboken, N. J., on *Iris* sp. in air express from Jordan and on *Urceolina miniata* (scarlet pitcherlily) in mail from the Netherlands; *Sclerotium* sp., at New York, N. Y., on lily bulbs and *Muscari* sp. bulbs in cargo from the Netherlands; *Sclerotium* sp. at San Francisco, Calif., on seeds of Japanese aucuba in mail from Italy, on English iris bulbs in mail from England, on *Euphorbia pulcherrima* in mail from Honduras, and on narcissus bulbs in cargo from the Netherlands; *Septoria* sp., at San Antonio, Tex., on palm leaf in cargo by air from Mexico; *Septoria* sp., at Honolulu, Hawaii, on palm in cargo from Truk; *Sphaceloma* sp., at Baltimore, Md., and Boston, Mass., on lemon in stores from the Union of South Africa; *Sphaceloma* sp., at San Pedro, Calif., on

orange in stores from Curacao; *Uredo* sp., at El Paso, Tex., on *Brassavola* sp., an orchid, in cargo by air from Mexico; *Uredo* sp. at Nogales, Ariz., on an orchid in cargo from Mexico; *Uredo* sp. at Brownsville, Tex., on *Diacrium bilamellatum*, an orchid, in cargo by air from the Canal Zone; *Uredo* sp., at Miami, Fla., on *Masdevallia* sp., an orchid, in cargo by air from Costa Rica; *Verticillium* sp., close to *candidum* Pk., at Hoboken, N. J., on corm of *Acidanthera* sp., in cargo from the Netherlands; *Verticillium* sp., at Philadelphia, Pa., on roots of *Alpinia galanga* in stores from India; *Verticillium* sp., at Houston, Tex., on a begonia tuber in cargo from the Netherlands; *Verticillium* sp., at Seattle, Wash., on *Dendrobium* sp., an orchid, in mail from India and on waterchestnut in cargo from China; *Verticillium* sp., at Philadelphia, Pa., on *Lilium* sp. in cargo from the Netherlands.

Nematode interceptions included *Ditylenchus* spp. with lily-of-the-valley pips and various bulbs, including garlic, glory-of-the-snow, colchicum, and iris; *Heterodera* spp. in soil arriving with plants for propagation, vegetables in ships' stores, used bagging, dried roots for pharmaceutical purposes and even Irish shamrocks; *Helicotylenchus* sp., at New York, N. Y., in soil with lily-of-the-valley pips in cargo from Germany and in soil with unidentified plants in baggage from Ireland; *Meloidogyne* sp., probably *incognita* (Kofoed & White) Chitwood at Galveston, Tex., in celery in stores from Jamaica, and in carrots in stores from the Azores at Philadelphia, Pa., in beets in stores from Australia, and in soil with potatoes in stores from the Netherlands; *Rotylenchus* sp., at New York, N. Y., in soil with potatoes in stores from Uruguay, in soil with lily-of-the-valley pips in cargo from Germany, and in soil with peony roots in baggage from Poland; *Rotylenchus* sp., at Mobile, Ala., in soil with coleus plants in quarters from Guatemala and in soil with *Aster* sp. in baggage from Germany; *Rotylenchus* sp., at San Francisco, Calif., in roots of *Convallaria majalis* in mail from France; *Tylenchorhynchus* sp., at Nogales, Ariz., in soil with cactus plants in baggage from Mexico; *Tylenchorhynchus* sp., at Mobile, Ala., in soil on an unidentified plant and on sweetpotato plants in baggage by air from Puerto Rico; *Tylenchus* sp., at New York, N. Y., in soil with lily-of-the-valley pips in cargo from Germany; *Tylenchus* sp., at Washington, D. C., in soil with roots of lily bulbs in mail from England; *Tylenchus* sp., at Mobile, Ala., in soil with *Aster* sp., in baggage from Germany; *Xiphinema* sp., at New York, N. Y., in soil with citrus plants in baggage from Argentina; one interception which could not be identified beyond family (Tylenchidae) was taken at New York, N. Y., in soil with cactus plants in baggage from Italy.

A total of 1,259 incompletely determined pathogens were recorded during the year.

Hosts and insects

- ABIES:**
Laspeyresia strobilella (Lepidoptera)
- ACACIA:**
Ezptochiomeria albomaculata (Hemiptera)
Pantomorus godmani (Coleoptera)
- ACHRAS:**
Anastrepha serpentina (Diptera)
- AGAVE:**
Pseudodiaspis yuccae (Homoptera)
Scyphophorus acupunctatus (Coleoptera)
- ALLIUM PORRUM:**
Acrolepia assectella (Lepidoptera)
Pieris brassicae (Lepidoptera)
- ALLIUM SATIVUM:**
Aceria tulipae (Acarina)
Brachycerus albidentatus (Coleoptera)
Brachycerus algeris (Coleoptera)
Bruchus ervi (Coleoptera)
Dyspessa ulula (Lepidoptera)
Farmena balteus (Coleoptera)
- ALNUS:**
Microleon longipalpis (Lepidoptera)
- ALOE:**
Aleophagus myersi (Homoptera)
- ALPINIA:**
Pulvinaria psidii (Homoptera)
- ANACAMPSEOS:**
Asterolecanium brytae (Homoptera)
- ANANAS:**
Alpheias conspirata (Lepidoptera)
Chalcodermus dentiferus (Coleoptera)
Eutheola bidentata (Coleoptera)
Eurythmia santiagella (Lepidoptera)
Ezptochiomeria albomaculata (Hemiptera)
Genopaschia protomis (?) (Lepidoptera)
Noropsis hieroglyphica (Lepidoptera)
Pheidole megacephala (Hymenoptera)
Platynota rostrana (Lepidoptera)
Ribbia innoxia (Lepidoptera)
Sisamnes contractus (Hemiptera)
"Targionia" bromiliae (Homoptera)
Xylobiops texanum (Coleoptera)
- ANNONA:**
Ceratitis capitata (Diptera)
Stenoma anonella (Lepidoptera)
Talponia batesi (Lepidoptera)
- ANTHURIUM:**
Ceroplastes rubens (Homoptera)
Chrysomphalus umboniferus (Homoptera)
Parthenothrips dracaena (Thysanoptera)
Pulvinaria psidii (Homoptera)
Thamnotettix hyalinapennis (Hemiptera)
Vinsonia stellifera (Homoptera)
- ANTIRRHINUM:**
Cyrtopeltis varians (Hemiptera)
Haplothrips gowdeyi (Thysanoptera)
- APIUM:**
Deroceras reticulatum (Mollusca)
Hyadaphis apii (Homoptera)
- ARCTIUM:**
Pyrausta nubilalis (Lepidoptera)
- ARCTOTIS:**
Pulvinaria psidii (Homoptera)
- ASPARAGUS:**
"Chionaspis" stanotophri (Homoptera)
- ASPASIA:**
Vinsonia stellifera (Homoptera)
- ATTALEA:**
Asterolecanium truncatum (Homoptera)
- BAMBOO:**
Asterolecanium bambusae (Homoptera)
Asterolecanium milaris milaris (Homoptera)
Dinoderus brevis (Coleoptera)
Micrapate labialis (Coleoptera)
- BEGONIA:**
Aleurodicus dugesii (Homoptera)
Brachyrhinus sulcatus (Coleoptera)
Haplothrips gowdeyi (?) (Thysanoptera)
- BERBERIS:**
Liosomaphis berberidis (Homoptera)
- BETA:**
Lixus junci (Coleoptera)
Pachyzancla bipunctalis (Lepidoptera)
- BETULA:**
Oligotrophus betulae (Diptera)
- BOUGAINVILLEA:**
Orthesia praelonga (Homoptera)
- BRASSAVOLA:**
Pseudischnaspis alienus (Homoptera)
- BRASSIA:**
Puto ulter (Homoptera)
- BRASSICA CHINENSIS:**
Lygus lucorum (Hemiptera)
- BRASSICA OLERACEA ACEPTALA:**
Evergestis forficatis (Lepidoptera)
- BRASSICA OLERACEA BOTRYTIS:**
Evergestis forficatis (Lepidoptera)
Leptophobia aripa (Lepidoptera)
Mamestra brassicae (Lepidoptera)
Phytomyza rufipes (Diptera)
- BRASSICA OLERACEA CAPITATA:**
Deroceras reticulatum (Mollusca)
Evergestis forficatis (Lepidoptera)
Mamestra brassicae (Lepidoptera)
Monomorium destructor (Hymenoptera)
Pachyzancla bipunctalis (Lepidoptera)
Pieris brassicae (Lepidoptera)
Sitona crinita (Coleoptera)
- BRASSICA SP.:**
Anaphothrips obscurus (Thysanoptera)
- BROMELIAD:**
Orthodes melanops (Lepidoptera)
- BROUGHTONIA:**
Vinsonia stellifera (Homoptera)
- BRYA:**
Tetraleurodes acaciae (Homoptera)
- BRYOPHYLLUM:**
Frankliniella cubensis (Thysanoptera)
- BURLINGTONIA:**
Asterolecanium epidendri (Homoptera)
- BUXUS:**
Psylla buxi (Homoptera)
- CACTUS:**
Gerstaeckeria mutillaria (Coleoptera)
Hemileuca oliviae (Lepidoptera)
Pseudodiaspis yuccae (Homoptera)
Puto lasiorum (Homoptera)
Sizeonolus luteiceps (Hemiptera)
- CAESALPINTA:**
Minosestes dominicana (Coleoptera)
Stephanoderes buscki (Coleoptera)
- CAJANUS:**
Acanthoscelides armitagei (Coleoptera)
Ancylostomia stercora (Lepidoptera)
Lampides boeticus (Lepidoptera)
Maruca testulalis (Lepidoptera)
Sphenarches caffer (Lepidoptera)
Stephanoderes lecontei (Coleoptera)
- CALLUNA:**
Arctorthesia cataphracta (Homoptera)
Gelechia ericetella (Lepidoptera)
Lochnaea capreae (Coleoptera)
Orthotylus ericetorum (Hemiptera)
Strophosoma retusus (?) (Coleoptera)
Taeniothrips atratus (Thysanoptera)
Taeniothrips ericae (Thysanoptera)
Tingis cardui (Hemiptera)
- CALOCARPUM:**
Chrysomphalus ritchiei (Homoptera)
- CALOTROPIS:**
Haplothrips gowdeyi (Thysanoptera)
- CAMELLIA:**
Aleurotuberculatus similis (Homoptera)
Ceroplastes ceriferus (Homoptera)
Parlatoria camelliae (Homoptera)
- CANAVALIA:**
Haplothrips gowdeyi (Thysanoptera)
Lampides boeticus (Lepidoptera)
Maruca testulalis (Lepidoptera)
Taeniothrips hawaiiensis (Thysanoptera)
- CAPSICUM:**
Gnorimoschema gudmannella (Lepidoptera)
Platynota rostrana (Lepidoptera)
Pyrausta nubilalis (Lepidoptera)
Rhopalosiphum subterraneum (Homoptera)
- CARICA:**
Lichtensia lutea (Homoptera)
- CASSIA:**
Aganactesis indecora (Lepidoptera)
Caryedon fuscus (Coleoptera)
- CASTANEA:**
Curculio elephas (Coleoptera)
Hemimene juliana (Lepidoptera)
Laspeyresia juliana (Lepidoptera)

Hosts and insects—Continued

CASTANEA—Continued

Laspeyresia splendana (Lepidoptera)

CASUARINA:

Leucaspis candida (Homoptera)*Leucaspis loewi* (Homoptera)

CATTLEYA:

Aleuroglandulus emmae (Homoptera)*Asterolecanium epidendri* (Homoptera)*Chrysomphalus tenax* (Homoptera)*Chrysomphalus umboniferus* (Homoptera)*Deroceras reticulatum* (Mollusca)*Eurytoma orchidearum* (Hymenoptera)*Furcaspis bifurmis* (Homoptera)*Iridomyrmex iniquus* (Hymenoptera)*Mordellistena catleyana* (Coleoptera)*Parlatoria pseudaspidiolus* (Homoptera)*Pseudischaspis alienus* (Homoptera)*Tenthercoris venezuelensis* (Hemiptera)*Vinsonia stellifera* (Homoptera)

CEDRUS:

Aspidiotus pseudomeyeri (Homoptera)*Lineaspis striata* (Homoptera)

CELOSIA:

Ligyrocoris aurivilliana (Hemiptera)

CENTAUREA:

Taeniothrips atratus (Thysanoptera)

CEROPEGIA:

"Chionaspis" indigoferae (Homoptera)

CHAENOMELES:

Ceroplastes rubens (Homoptera)

CHAMAEDOREA:

Tetraleurodes acaciae (Homoptera)

CHRYSANTHEMUM:

Cacoecia pronubana (Lepidoptera)*Capitophorus formosanus* (Homoptera)*Cnephasia virgaureana* (Lepidoptera)*Deroceras reticulatum* (Mollusca)*Myrmica laevinodis* (Hymenoptera)*Phytomyza atricornis* (Diptera)*Trupanea stellata* (Diptera)

CHRYSOPHYLLUM:

Anastrepha serpentina (Diptera)

CICER:

Ancylostomia stercorea (Lepidoptera)

CIRSIIUM:

Capitophorus carduinus (Homoptera)

CITRUS AURANTIFOLIA:

Aleurocanthus woglumi (Homoptera)*Anastrepha ludens* (Diptera)*Leucaspis cockerelli* (Homoptera)*Parlatoria cinerea* (Homoptera)*Parlatoria zizyphus* (Homoptera)

CITRUS AURANTIUM (?):

Leucaspis cockerelli (Homoptera)

CITRUS LIMON:

Argyroploce leucotreta (Lepidoptera)*Ceratitidis capitata* (Diptera)*Cryptoblabes gnidiella* (Lepidoptera)*Leucaspis cockerelli* (Homoptera)*Morganella longispina* (Homoptera)*Parlatoria cinerea* (Homoptera)*Parlatoria zizyphus* (Homoptera)*Unaspis yanonensis* (Homoptera)

CITRUS PARADISI:

Anastrepha ludens (Diptera)*Ceratitidis capitata* (Diptera)*Leucaspis cockerelli* (Homoptera)*Parlatoria cinerea* (Homoptera)*Parlatoria zizyphus* (Homoptera)*Tetraleurodes vitrinellus* (Homoptera)*Unaspis citri* (Homoptera)*Unaspis yanonensis* (Homoptera)

CITRUS RETICULATA:

Aleurocanthus woglumi (Homoptera)*Aleurolobus marlatti* (Homoptera)*Argyroploce leucotreta* (Lepidoptera)*Ceratitidis capitata* (Diptera)*Leucaspis cockerelli* (Homoptera)*Parlatoria zizyphus* (Homoptera)*Unaspis yanonensis* (Homoptera)

CITRUS SINENSIS:

Aleurocanthus woglumi (Homoptera)*Aleurothrixus floccosus* (Homoptera)*Anastrepha fraterculus* (Diptera)

CITRUS SINENSIS—Continued

Anastrepha ludens (Diptera)*Anastrepha serpentina* (?) (Diptera)*Argyroploce leucotreta* (Lepidoptera)*Ceratitidis capitata* (Diptera)*Chaetanaphothrips orchidii* (Thysanoptera)*Chrysomphalus personatus* (Homoptera)*Cryptoblabes gnidiella* (Lepidoptera)*Gymnandrosoma aurantium* (Lepidoptera)*Leucaspis cockerelli* (Homoptera)*Parlatoria cinerea* (Homoptera)*Parlatoria zizyphus* (Homoptera)*Pseudonidia trilobitiformis* (Homoptera)*Unaspis citri* (Homoptera)*Unaspis yanonensis* (Homoptera)

CITRUS SP.:

Aleurocanthus woglumi (Homoptera)*Aleuroparadozus gardeniae* (Homoptera)*Aleuroplatus coccolus* (Homoptera)*Aleurothrixus floccosus* (Homoptera)*Dialeurodes citri* (Homoptera)*Dialeurodes citrifolii* (Homoptera)*Exophthalmus roseipes* (Coleoptera)*Leucaspis cockerelli* (Homoptera)

COCOS:

Aonidiella inornata (Homoptera)*Aspidiotus coryphae* (Homoptera)*Aspidiotus destructor* (Homoptera)*Aspidiotus excisus* (Homoptera)*Chrysomphalus personatus* (Homoptera)*Chrysomphalus tingi* (Homoptera)*Ereunetis flavistriata* (Lepidoptera)*Ferrisiana virgata* (Homoptera)*Lepidosaphes mcgregori* (Homoptera)*Phenacaspis sanduicensis* (Homoptera)*Pseudococcus palmarum* (Homoptera)

CODIAEUM:

Lepidosaphes tokionis (Homoptera)*Parlatoria erolonis* (Homoptera)

COELOGYNE:

Chrysomphalus nulliporus (Homoptera)*Lepidosaphes tuberculata* (Homoptera)

COFFEA:

Ceratitidis capitata (Diptera)*Coccus viridis* (Homoptera)*Stephanoderes hampei* (Coleoptera)

COPAIFERA:

Draeculacephala lenticula (Hemiptera)*Platypus rugulosus* (Coleoptera)

CORDYLINAE:

Pulvinaria psidii (Homoptera)

CORIANDRUM:

Frankliniella cubensis (Thysanoptera)*Systole geniculata* (Hymenoptera)

CORNUS:

Lygus campestris (Hemiptera)

CORYLUS:

Curculio nucum (Coleoptera)

CRATAEGUS:

Ceroplastes rubens (Homoptera)

CRYPTOSTEGIA:

Heteropsylla texana (Homoptera)

CUCUMIS:

Dacus cucurbitae (Diptera)*Dacus dorsalis* (Diptera)

CUCURBITA:

Pyrusta nubilalis (Lepidoptera)

CUPRESSUS:

Epinotia tessulatana (Lepidoptera)*Lepidosaphes pallida* (Homoptera)

CURCUMA:

Paraputo taraktogeni (Homoptera)

CYBISTAX:

Acanthoderes circumflexa (Coleoptera)

CYCAD:

Cryptoblabes gnidiella (Lepidoptera)

CYCNOCHES:

Tenthercoris distinguendus (Hemiptera)

CYDONIA:

Anastrepha ludens (Diptera)*Ceratitidis capitata* (Diptera)*Grapholita packardii* (Lepidoptera)

CYMBIDIUM:

Lepidosaphes tuberculata (Homoptera)

Hosts and insects—Continued

- CYNARA:**
Anuraphis cynaræ (?) (Homoptera)
Apion carduorum (Coleoptera)
Iridomyrmex humilis (Hymenoptera)
- CYPRIPEDIUM:**
Parlatoria pseudaspidotus (Homoptera)
- CYTISUS:**
Sparticus villosus (Coleoptera)
- DAHLIA:**
Gortyna flavago (Lepidoptera)
- DAISY:**
Pantomorus godmani (Coleoptera)
- DAUCUS:**
Haplothrips gowdeyi (Thysanoptera)
Loxostege similalis (Lepidoptera)
Mamestra brassicae (Lepidoptera)
Phalonia zephyrana (Lepidoptera)
- DELONIX:**
Ferrisiana virgata (Homoptera)
- DENDROBIUM:**
Chrysomphalus nulliporus (Homoptera)
Vinsonia stelleri (Homoptera)
- DERRIS:**
Dinoderus bifoveolatus (Coleoptera)
- DIANTHUS:**
Cacoecia pronubana (Lepidoptera)
Haplothrips gowdeyi (Thysanoptera)
Taeniothrips atratus (Thysanoptera)
Taeniothrips dianthi (Thysanoptera)
Taeniothrips hawaiiensis (Thysanoptera)
- DIOSCOREA:**
Monomorium destructor (Hymenoptera)
"Targionia" hartii (Homoptera)
- DIOSPYROS:**
Ceratitidis capitata (Diptera)
Ceroplastes rubens (Homoptera)
Lepidosaphes conchiformis (Homoptera)
Parlatoria oleae (Homoptera)
- DOLICHOS:**
Callosobruchus phaseoli (Coleoptera)
- EPIDENDRUM:**
Chrysomphalus tenax (Homoptera)
Conchaspis angræci (Homoptera)
Furcaspis biformis (Homoptera)
Puto ulter (Homoptera)
- ERANTHEMUM:**
Frankliniella cubensis (Thysanoptera)
- ERYTHRINA:**
Specularius impressithorax (Coleoptera)
- EUONYMUS:**
Unaspis euonymi (Homoptera)
- EUPHORBIA:**
Platynota rostrana (Lepidoptera)
- FEROCACTUS:**
Sisonotus luteiceps (Hemiptera)
- FICUS:**
Ceratitidis capitata (Diptera)
Ceroplastes ruscii (Homoptera)
Coccus viridis (Homoptera)
Gynaikothrips ficorum (Thysanoptera)
Homotoma ficus (Homoptera)
Iridomyrmex humilis (Hymenoptera)
Lepidosaphes ficus (Homoptera)
Pulvinaria psidii (Homoptera)
- FRAGARIA:**
Cacoecia pronubana (Lepidoptera)
- GARCINIA:**
Aspidiotus destructor (Homoptera)
- GARDENIA:**
Aleurotuberculus jasmini (Homoptera)
Ceroplastes rubens (Homoptera)
Coccus viridis (Homoptera)
Dialeurodes citri (Homoptera)
Dialeurodes citrifolii (Homoptera)
Dialeurodes kirkaldyi (Homoptera)
Dysdercus mimulus (Hemiptera)
Eucalymnatus tessellatus (Homoptera)
Ferrisiana virgata (Homoptera)
Orthetia praelonga (Homoptera)
Protopulvinaria longivalvata (Homoptera)
Protopulvinaria pyriformis (Homoptera)
Taeniothrips hawaiiensis (Thysanoptera)
- GENTIANA:**
Nemotois violellum (?) (Lepidoptera)
- GLADIOLUS:**
Ezophthalmus laetus (Coleoptera)
- GOSSYPIUM:**
Pectinophora gossypiella (Lepidoptera)
- GRAMMATOPHYLLUM:**
Ceroplastes rubens (Homoptera)
Mertila malayensis (Hemiptera)
- GREVILLEA:**
Icerya aegyptiaca (Homoptera)
- GUAJACUM:**
Aleurothrix floccosus (Homoptera)
Neoclytus cacticus (Coleoptera)
Paraleyrodes goyabae (Homoptera)
- HEDYCHUM:**
Paraputo taraklogeni (Homoptera)
- HELICHRYSUM:**
Haplothrips gowdeyi (Thysanoptera)
- HEUCHERA:**
Hypera nigrostris (Coleoptera)
- HIBISCUS:**
Aleurocanthus woglumi (Homoptera)
Conchaspis angræci (Homoptera)
Frankliniella cubensis (Thysanoptera)
Pectinophora gossypiella (Lepidoptera)
- HYPERICUM:**
Agallia venosa (Hemiptera)
- ILEX:**
Aleuroplatus plumosus (Homoptera)
Notochilus damryi (Hemiptera)
- IPOMOEA:**
Cylas femoralis (Coleoptera)
Cylas formicarius elegantulus (Coleoptera)
Euscepes postfasciatus (Coleoptera)
Palaeopus costicollis (Coleoptera)
- ISOLOMA:**
Coccidella americana (Homoptera)
- IXORA:**
Coccus viridis (Homoptera)
- JASMINUM:**
Aonidiella inornata (Homoptera)
Dialeurodes kirkaldyi (Homoptera)
Parlatoria cinerea (Homoptera)
- JUGLANS:**
Monellia costalis (Homoptera)
Myzocallis caryaefoliae (Homoptera)
Rhagoletis completa (Diptera)
Rhagoletis juglans (Diptera)
- JUNIPERUS:**
Lepidosaphes pallida (Homoptera)
"Poliaspis" pini (Homoptera)
- KHAYA:**
Bostrychophiles cornutus (Coleoptera)
Cordylomera spinicornis (Coleoptera)
Heterobostrychus brunneus (Coleoptera)
- LACTUCA:**
Dicyphus annulatus (Hemiptera)
Draeculacephala minerva (Hemiptera)
- LAELIA:**
Asterolecanium epidendri (Homoptera)
- LATHYRUS:**
Haplothrips gowdeyi (Thysanoptera)
Liriomyza congesta (Diptera)
- LAURUS:**
Cacoecia pronubana (Lepidoptera)
Ceroplastes japonicus (Homoptera)
Chrysomphalus paulistae (Homoptera)
Chrysomphalus personatus (Homoptera)
Trialeurodes lauri (Homoptera)
Trioza magnoliae (Homoptera)
- LEMAIREOCEREUS:**
Lepidosaphes philococcus (Homoptera)
- LENS:**
Bruchus rufipes (Coleoptera)
Bruchus signaticornis (Coleoptera)
Sparticus villosus (Coleoptera)
- LEUCOJUM:**
Lampelia equestris (Diptera)
- LILIUM:**
Crioceris lili (Coleoptera)
Frankliniella cubensis (Thysanoptera)
Prodenia eridania (Lepidoptera)
- LONCHOCARPUS:**
Dinoderus bifoveolatus (Coleoptera)
- LYCOPERSICON:**
Dacus cucurbitae (Diptera)
Dacus dorsalis (Diptera)
Dysdercus mimulus (Hemiptera)
Lineodes integra (Lepidoptera)

Hosts and insects—Continued

LYCOPERSICON—Continued

- Neoleucinodes elegantalis* (Lepidoptera)
Rhopalosiphum subterraneum (Homoptera)

MALUS:

- Allantus cinctus* (Hymenoptera)
Anthonomus pomorum (Coleoptera)
Aspidiotus pyri (Homoptera)
Ceratitis capitata (Diptera)
Cryptoblabes gnidiella (Lepidoptera)
Epidiaspis piricola (Homoptera)
Lepidosaphes conchiformis (Homoptera)
Monanthia echii (Hemiptera)
Parlatoria oleae (Homoptera)
Rhagoletis pomonella (Diptera)

MAMMEA:

- Anastrepha serpentina* (Diptera)
Morganella longispina (Homoptera)

MAMMILLARIA:

- Gerstaeckeria multilaria* (Coleoptera)
Sizeonotus luteiceps (Hemiptera)

MANGIFERA:

- Anastrepha ludens* (Diptera)
Anastrepha mombinpraepians (Diptera)
Aulacaspis tubercularis (Homoptera)
Chrysomphalus personatus (Homoptera)
Cryptorhynchus mangiferae (Coleoptera)
Dacus dorsalis (Diptera)
Phenacaspis sandwicensis (Homoptera)
Pseudonidia trilobitiformis (Homoptera)

MARANTA:

- Pinnaspis buxi* (Homoptera)

MELICOCCA:

- Fiorinia nephelii* (Homoptera)

MESEMBRYANTHEMUM:

- Haplothrips gowdeyi* (Thysanoptera)
Taeniothrips hawaiiensis (Thysanoptera)

MONSTERA:

- Pinnaspis buxi* (Homoptera)

MUSA PARADISIACA:

- Aspidiotus destructor* (Homoptera)

MUSA PARADISIACA SAPIENTUM:

- Aspidiotus destructor* (Homoptera)
Chrysomphalus umboniferus (Homoptera)
Cosmopolites sordidus (Coleoptera)
Dacus dorsalis (Diptera)
Metamasius sericeus (Coleoptera)
Metamasius sericeus carbonarius (Coleoptera)

MUSCARI:

- Eosoma lusitanica* (Coleoptera)

MYRTILLOCACTUS:

- Gargaphia patricia* (Hemiptera)
Lepidosaphes philococcus (Homoptera)

NARCISSUS:

- Lampetia equestris* (Diptera)
Tarsonemus laticeps (Acarina)

NERIUM:

- Explochiomera albomaculata* (Hemiptera)
Iridomyrmex humilis (Hymenoptera)
Morganella longispina (Homoptera)

OCHROSIA:

- Dacus dorsalis* (?) (Diptera)

OLEA:

- Dacus oleae* (Diptera)
Euphillippia olivina (Homoptera)
Euphyllura olivina (Homoptera)
Filippia oleae (Homoptera)
Parlatoria oleae (Homoptera)
Phloeotribus scarabaeoides (Coleoptera)
Pollinia pollonii (Homoptera)
Prays oleellus (Lepidoptera)

ONCIDIUM:

- Conchaspis angraei* (Homoptera)
Furcaspis biformis (Homoptera)
Puto ulter (Homoptera)
Vinsonia stellifera (Homoptera)

OPUNTIA:

- Ceratitis capitata* (Diptera)

ORCHID:

- Acroleucus vicinalis* (Hemiptera)
Apion auctum (?) (Coleoptera)
Aspidiotus destructor (Homoptera)
Asterolecanium epidendri (Homoptera)
Chrysomphalus diversicolor (Homoptera)
Chrysomphalus tenax (Homoptera)
Chrysomphalus umboniferus (Homoptera)
Cleogonus armatus (Coleoptera)

ORCHID—Continued

- Clerada apicornis* (Hemiptera)
Conchaspis angraei (Homoptera)
Diorymerellus laevimargo (Coleoptera)
Eurytoma orchidearum (Hymenoptera)
Explochiomera albomaculata (Hemiptera)
Furcaspis biformis (Homoptera)
Genuchinus v-notalus (Coleoptera)
Lecanodiaspis dendrobii (Homoptera)
Lygaeus circumlittatus (Hemiptera)
Lygaeus circumplacatus (Hemiptera)
Malocampa punctata (Lepidoptera)
Mordellistena cattleyana (Coleoptera)
Mormidea collaris (Hemiptera)
Nysius terrestris (Hemiptera)
Parlatoria pseudaspidiotus (Homoptera)
Praeblyssus albofasciatus (Hemiptera)
Pseudischaspis alienus (Homoptera)
Puto mexicanus (Homoptera)
Puto ulter (Homoptera)
Taduis erirhinoides (Coleoptera)
Tenthecoris angustimarginatus (Hemiptera)
Tenthecoris bicolor (Hemiptera)
Tenthecoris confusus (Hemiptera)
Tenthecoris orchidearum (Hemiptera)
Vinsonia stellifera (Homoptera)

ORCHIS:

- Furcaspis biformis* (Homoptera)

ORNITHOGALUM:

- Haplothrips bagalli* (Thysanoptera)
Lampetia equestris (Diptera)

ORYZA:

- Chilo simplex* (Lepidoptera)

PAEONIA:

- Lepidosaphes kuwacola* (Homoptera)
Reticulitermes speratus (Isoptera)

PALM:

- Aspidiotus herculeanus* (Homoptera)
Chrysomphalus sphaeroides (Homoptera)
Dinoderus bifoveolatus (Coleoptera)
Dysdercus mimulus (Hemiptera)
Furcaspis biformis (Homoptera)
Lepidosaphes mcgregori (Homoptera)
Pinnaspis buxi (Homoptera)
Pseudischaspis alienus (Homoptera)

PANDANUS:

- Pseudococcus giffardi* (Homoptera)

PASSIFLORA:

- Frankliniella cubensis* (Thysanoptera)

PERISTERIA:

- Vinsonia stellifera* (Homoptera)

PERSEA:

- Anastrepha ludens* (Diptera)
Aspidiotus destructor (Homoptera)
Ceratitis capitata (Diptera)
Conotrachelus aguacatae (Coleoptera)
Conotrachelus perseae (Coleoptera)
Dacus dorsalis (Diptera)
Explochiomera albomaculata (Hemiptera)
Stenomoma catenifer (Lepidoptera)
Thamnophthorus schwarzi (Coleoptera)

PETIVERIA:

- Cylas formicarius elegantulus* (Coleoptera)

PETROSELINUM:

- Strophosoma melanogrammmum* (Coleoptera)

PHASEOLUS LUNATUS MACROCARPUS:

- Maruca testulalis* (Lepidoptera)

PHASEOLUS VULGARIS:

- Acanthoscelides obvelatus* (Coleoptera)

PHASEOLUS VULGARIS VAR.:

- Epinotia opposita* (Lepidoptera)
Evers comynatus (Lepidoptera)
Fundella pellucens (Lepidoptera)
Lampides boeticus (?) (Lepidoptera)
Maruca testulalis (Lepidoptera)

PHILODENDRON:

- Apsychomyrmex tristiani* (Hymenoptera)
Chrysomphalus nigropunctatus (Homoptera)
Chrysomphalus sphaeroides (Homoptera)
Chrysomphalus tenax (Homoptera)
Iridomyrmex iniquus (Hymenoptera)
Lepidosaphes carinata (Homoptera)
Pinnaspis buxi (Homoptera)

PHOENIX:

- Coccytrypes dactylipera* (Coleoptera)
Dinoderus bifoveolatus (Coleoptera)

Hosts and insects—Continued

PHYSALIS:

Trichobaris mucorea (Coleoptera)

PICEA:

Hylurgops palliatus (Coleoptera)

Laspeyresia strobilella (Lepidoptera)

Tadus erikimoides
Taeniothrips hawaiiensis

POLAND:

Brachyrhinus ovatus
Hypera nigrostris

PORTUGAL:

Ceratitis capitata
Chaetanaphothrips orchidii
Chrysomphalus diversicolor
Cryptoblabes gnidiella
Curculio elephas
Epinotia tessulatana
Laspeyresia nigricana
Laspeyresia splendana
Melopoplax dilomoides
Microplax plagiatus
Rhagoletis cerasi

PUERTO RICO:

Acanthoscelides armilagai
Anastrepha mombinpraeoptans
Anastrepha suspensa
Ancylostoma stercora
Coccus viridis
Cylas formicarius elegantulus
Exophthalmus roseipes
Frankliniella cubensis
Lepidosaphes ficus
Maruca testulalis
Melamasius sericeus
Pachyzancla perisualis
Pectinophora gossypiella
 "Targionia" sacchari

ST. KITTS:

Monomorium destructor
 "Targionia" hartii
Vinsonia stellifera

ST. LUCIA:

Chrysomphalus umboniferus
 "Targionia" hartii

Countries of origin and diseases—Continued

ST. VINCENT:

Callosobruchus phaseoli
Stephanoderes lecontei

SAIPAN:

Achatina fulica

SALVADOR:

Anastrepha ludens
Anastrepha mombinpraeoptans
Anastrepha serpentina
Anastrepha striata
Leucaspis cockerelli

SCOTLAND:

Brachyrhinus singularis
Ceutorhynchus contractus
Gelechia ericetella
Lampetia equestris
Lochmaea capreae
Orthotylus ericetorum
Taeniothrips atratus

SIAM:

Monomorium destructor
Parlatoria pseudaspidiotus

SOUTH AMERICA:

Coccidella americana
Furcaspis biformis
Pseudaonidia trilobitiformis

SPAIN:

Brachycerus algerus
Ceratitis capitata
Cryptoblabes gnidiella
Curculio elephas
Laspeyresia splendana
Parlatoria zizyphus
Rhagoletis cerasi

SWEDEN:

Callidium aeneum
Dicyphus annulatus
Hylurgops palliatus
Ips acuminatus
Pityogenes bidentatus
Pityogenes chalcographus
Rhagoletis cerasi
Taeniothrips atratus

SWITZERLAND:

Agallia venosa
Brachyrhinus porcatus
Brachyrhinus rugosostriatus
Parlatoria oleae
Rhyparochromus chiragra
Taeniothrips dianthi

SYRIA:

Ceratitis capitata
Dacus oleae
Monanthia echii

TAHITI:

Parlatoria cinerea

TRINIDAD:

Anastrepha mombinpraeoptans
Anastrepha striata
Ancylostomia stercorea
Asterolecanium epidendri
Chrysomphalus personatus

TRINIDAD—Continued

Eurytoma orchidearum
Euscepes postfasciatus
Furcaspis biformis
Maruca testulalis
Orthezia praelonga
Palaeopus costicollis
Parlatoria cinerea
Pectinophora gossypiella
Protopulvinaria longicalvata
Protopulvinaria pyriformis
Rhinocenus stigma
Sphenarches caffer
Thamnotettix hyalinapennis
Vinsonia stellifera

TURKEY:

Curculio elephas

UNION OF SOUTH AFRICA:

Argyroplote leucotrela
Asterolecanium stenae
Bostrychophytes cornutus
Carbula trisignata
"Chionaspis" indigoferae
Haplothrips bagnalli
Heterobostrychus brunneus
Lampetia equestris
Morganella longispina
Phlyctinus callosus
Rhagoletis pomonella
Specularius impressithorax

UNKNOWN:

Ceratitis capitata
Haplothrips gowdeyi
Laphygma exempta
Pectinophora gossypiella
Rhagoletis pomonella (?)
Stenoma catenifer
Taeniothrips atratus
Taeniothrips dianthi

VENEZUELA:

Asterolecanium epidendri
Aulacaspis tubercularis
Coccus viridis
Deroceras reticulatum
Diatraea busckella
Eurytoma orchidearum
Furcaspis biformis
Iridomyrmex iniquus
Protopulvinaria longicalvata
Pseudischinaspis alienus
Stenoma catenifer
Tenthrax venezuelensis
Vinsonia stellifera

VIRGIN ISLANDS:

Cylas formicarius elegantulus
Euscepes postfasciatus
Orthezia praelonga
Vinsonia stellifera

YUGOSLAVIA:

Curculio elephas
Epidiaspis piricola
Laspeyresia splendana
Unaspis euonymi

List of pests (diseases) collected and reported from July 1, 1950, to June 30, 1951, inclusive

[An asterisk indicates State inspection]

Disease and host	Country of origin	Number of interceptions in—			Collected in—
		Consumption	Nonentry	Propagation	
<i>Alternaria citri</i> Ell. & Pierce:					
<i>Citrus paradisi</i> (grapefruit)-----	Argentina		1		Pa.
<i>Citrus reticulata</i> (Mandarin orange)-----	Japan, Mexico	1	2		Calif.,* Tex.
<i>Citrus sinensis</i> (orange)-----	Mexico, Union of South Africa, Yugoslavia.	3	2		Calif.,*N.Y., Pa., Tex.
<i>Citrus</i> sp-----	Mexico	1			Tex.
<i>Alternaria dianthi</i> F. L. Stevens & J. G. Hall:					
<i>Dianthus</i> sp-----	England			1	Wash.
<i>Gypsophila paniculata</i> (babysbreath)-----	Mexico	1			Tex.
<i>Alternaria porri</i> (Ell.) Cif.:					
<i>Allium cepa</i> (onion)-----	do.	1			Tex.
<i>Alternaria raphani</i> Groves & Skolko:					
<i>Mathiola</i> sp. (stock)-----	do.	1			Tex.
<i>Anguina tritici</i> (Steinbuch) Filip.:					
<i>Triticum aestivum</i> (wheat)-----	Syria, Turkey			4	D. C.
<i>Aphanomyces raphani</i> Kendr.:					
<i>Raphanus sativus</i> (radish)-----	Mexico	1			Tex.
<i>Aphelenchoides parietinus</i> (Bastian) Steiner:					
<i>Convallaria</i> sp-----	Denmark			1	N. Y.
<i>Aphelenchus avenae</i> Bastian:					
<i>Allium cepa</i> (onion)-----	Mexico	1			Tex.
<i>Gladiolus</i> sp-----	Netherlands		1		N. J.
Soil with cactus plants-----	Mexico			1	Ariz.
<i>Solanum tuberosum</i> (potato)-----	do.	2			Tex.
<i>Apiospora camptospora</i> Penz. & Sacc.:					
<i>Saccharum officinarum</i> (sugarcane)-----	do.	2			Tex.
<i>Apiospora montagnei</i> Sacc.:					
Bamboo-----	Japan	1			Tex.
<i>Ascochyta citri</i> Penz.:					
<i>Citrus sinensis</i> (orange)-----	Mexico	1			Tex.
<i>Botryosphaeria ribis</i> Gross. & Dugg.:					
<i>Citrus limon</i> (lemon)-----	Italy		1		Ala.
<i>Paeonia suffruticosa</i> (tree peony)-----	Japan			1	Calif.*
<i>Botrytis elliptica</i> (Berk.) Cke.:					
<i>Lilium auratum</i> (goldband lily)-----	do.		2		Calif.*
<i>Lilium hansonii</i> (hanson lily)-----	do.		1		Calif.*
<i>Lilium japonicum</i> (Japanese lily)-----	do.		1		Calif.*
<i>Lilium rubellum</i> (rubellum lily)-----	do.		1		Calif.*
<i>Lilium speciosum rubrum</i> (pink speciosum lily)-----	do.		4		Calif.*
<i>Lilium</i> sp-----	China, Japan	1	1		Calif.*
<i>Lycoris radiata</i> (shorttube lycoris)-----	Japan		1		Calif.*
<i>Botrytis galanthina</i> (Berk. & Br.) Sacc.:					
<i>Galanthus nivalis</i> (snowdrop)-----	Netherlands			5	Calif.*
<i>Galanthus</i> sp-----	do.			8	Md., Mass., N. Y., Pa.
<i>Botrytis gladiolorum</i> Timmermans:					
<i>Gladiolus</i> sp-----	Austria, Japan, Mexico, Netherlands.	1		9	Calif.,* Mich., Tex.
<i>Tritonia</i> sp-----	Netherlands			1	N. J.
<i>Calospora platanoidis</i> (Fr.) Niessl:					
<i>Acer pseudoplatanus</i> (sycamore maple)-----	Denmark			1	N. J.
<i>Catacauma sabal</i> Chardon:					
Palm-----	Mexico	2			Tex.
<i>Cercospora angreci</i> Roum.:					
<i>Odontoglossum</i> sp (orchid)-----	Belgium		2		N. J.
Orchid-----	Mexico		1		Tex.
<i>Stanhopea</i> sp. (orchid)-----	Guatemala		1		N. Y.
<i>Cercospora bocconiae</i> Chupp:					
<i>Bocconia frutescens</i> -----	Mexico			1	Tex.
<i>Cercospora centaureae</i> Died.:					
<i>Centaurea cyanus</i> (cornflower)-----	do.	1			Tex.
<i>Cercospora coffeicola</i> Berk. & Cke.:					
<i>Coffea</i> sp. (coffee)-----	do.			1	Ariz.
<i>Cercospora dudidae</i> Welles:					
<i>Allium cepa</i> (onion)-----	do.	1			Tex.
<i>Cercospora fraxinites</i> Ell. & Ev.:					
<i>Fraxinus</i> sp. (ash)-----	do.	4			Tex.

Hosts and diseases

- ABIES:**
Hormiscium pinophilum (Deuteromycetes)
Sclerotinia kernerii (Ascomycetes)
- ACER:**
Calospora platanoidis (Ascomycetes)
Pestalotia japonica (Deuteromycetes)
- AGAVE:**
Coniosporium agaves (Deuteromycetes)
Lembosia agave (Ascomycetes)
Schizophyllum commune (Basidiomycetes)
Stagnospora macrospora (Deuteromycetes)
- ALLIUM CEPA:**
Alternaria porri (Deuteromycetes)
Aphelenchus avenae (Nematoda)
Cercospora dudidae (Deuteromycetes)
Ditylenchus dipsaci (Nematoda)
- ALLIUM PORRUM:**
Puccinia porri (Promycetes)
Stemphylium botryosum (Deuteromycetes)
- ALLIUM SATIVUM:**
Sclerotium cepivorum (Deuteromycetes)
- ALYXIA:**
Uromyces alyziae (Promycetes)
- ANDROMEDA:**
Mycosphaerella punctiformis (Ascomycetes)
- ANTIRRHINUM:**
Puccinia antirrhini (Promycetes)
- ARAUCARIA:**
Pestalotia funerea (Deuteromycetes)
- ARECA:**
Gloeosporium catechu (Deuteromycetes)
Phomopsis palmicola (Deuteromycetes)
- BAMBOO:**
Apiospora montagnei (Phycomycetes)
Diplodia theobromae (Deuteromycetes)
Papularia sphaerosperma (Deuteromycetes)
Papularia vinosa (Deuteromycetes)
- BEGONIA:**
Chlamydomyces palmarum (Deuteromycetes)
Meloidogyne arenaria (Nematoda)
Thielaviopsis basicola (Deuteromycetes)
- BLETIA:**
Uredo nigropunctata (Promycetes)
- BOCCONIA:**
Cercospora bocconiae (Deuteromycetes)
- BRASSAVOLA:**
Uredo behnickiana (Promycetes)
- BUXUS:**
Microthyrium microscopicum (Ascomycetes)
Puccinia buxi (Promycetes)
- CAJANUS:**
Colletotrichum cajani (Deuteromycetes)
- CAMELLIA:**
Discosia artoceas (Deuteromycetes)
Pestalotia guepini (Deuteromycetes)
Yellow-mottle virus
- CAPSIUM:**
Gloeosporium piperatum (Deuteromycetes)
- CARYA:**
Phyllosticta caryae (Deuteromycetes)
- CASTANEA:**
Cylospora ceratophora (Deuteromycetes)
Stilbum incarnatum (Deuteromycetes)
- CATTLEA:**
Chiodecton sanguineum (Ascomycetes)
Pestalotia conspicua (Deuteromycetes)
Pythium ultimum (Phycomycetes)
- CEANOTHUS:**
Clonostachys araucaria (Deuteromycetes)
- CENTAUREA:**
Cercospora centaureae (Deuteromycetes)
- CHAMAEDOREA:**
Mycosphaerella advena (Ascomycetes)
- CHRYSANthemUM:**
Leptosphaeria vagabunda (Ascomycetes)
Puccinia chrysanthemi (Promycetes)
Septoria chrysanthemi (Deuteromycetes)
Septoria leucanthemi (Deuteromycetes)
- CHUSQUEA:**
Coniosporium chusqueae (Deuteromycetes)
- CICHORIUM:**
Sclerotinia minor (Ascomycetes)
- CITRUS AURANTIFOLIA:**
Elsinoe australis (Ascomycetes)
Xanthomonas citri (Schizomycetes)
- CITRUS GRANDIS:**
Meliola citricola (Ascomycetes)
Phoma citricarpa (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
- CITRUS LIMON:**
Botryosphaeria ribis (Ascomycetes)
Elsinoe australis (Ascomycetes)
Elsinoe fawcetti var. *scabiosa* (Ascomycetes)
Phoma citricarpa (Deuteromycetes)
Septoria citri (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
Xanthomonas sp. (Cancerosis "B") (Schizomycetes)
- CITRUS MITIS (?) :**
Xanthomonas citri (Schizomycetes)
- CITRUS PARADISI:**
Alternaria citri (Deuteromycetes)
Phoma citricarpa (Deuteromycetes)
Septoria citri (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
- CITRUS RETICULATA:**
Alternaria citri (Deuteromycetes)
Hypocrella caulium (Ascomycetes)
Phoma citricarpa (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
- CITRUS SINENSIS:**
Alternaria citri (Deuteromycetes)
Ascochyta citri (Deuteromycetes)
Elsinoe australis (Ascomycetes)
Erwinia citrasmaculans (Schizomycetes)
Leptosia
Myriangium duriae (Ascomycetes)
Phoma citricarpa (Deuteromycetes)
Phoma limonii (Deuteromycetes)
Septoria citri (Deuteromycetes)
Trullula olivascens (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
- CITRUS SP. (orange):**
Elsinoe chlamydospora (Ascomycetes)
- CITRUS SP.:**
Alternaria citri (Deuteromycetes)
Phoma citricarpa (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
- CLEMATIS:**
Meloidogyne arenaria (Nematoda)
- COCOS:**
Diplodia coccarpa (Deuteromycetes)
Diplodia epicocos (Deuteromycetes)
Isaria clavata (Deuteromycetes)
Pestalotia palmarum (Deuteromycetes)
Phomopsis coccis (Deuteromycetes)
Urocystis colchici (Promycetes)
- COFFEA:**
Cercospora coffeicola (Deuteromycetes)
Colletotrichum coffeanum (Deuteromycetes)
- COLCHICUM:**
Urocystis colchici (Promycetes)
- COLOCASIA:**
Dendryphium obtipum (Deuteromycetes)
- CONVALLARIA:**
Aphelenchoides parietinus (Nematoda)
- COTINUS:**
Cylospora rhoina (Deuteromycetes)
- CROSSANDRA:**
Virus—undetermined
- CUCURBITA:**
Diplodia theobromae (Deuteromycetes)
- CYDONIA:**
Entomosporium maculatum (Deuteromycetes)
Fabraea maculata (Ascomycetes)
Monilinia fructigena (Ascomycetes)
- CYMBIDIUM:**
Pestalotia conspicua (Deuteromycetes)
Septoria posekensis (Deuteromycetes)
- CYMBOPOGON:**
Nigrospora sphaerica (Deuteromycetes)
- CYPRIPEDIUM:**
Septoria posekensis (Deuteromycetes)
- DAHLIA:**
Entyloma dahliae (Promycetes)
Stilbum incarnatum (Deuteromycetes)
Vermicularia dematium (Deuteromycetes)
- DAISY:**
Septoria macrospora (Deuteromycetes)

Hosts and diseases—Continued

- DAUCUS:**
Stemphylium radicinum (Deuteromycetes)
- DENDROBIUM:**
Pestalotia conspicua (Deuteromycetes)
Phyllosticta laeliae (Deuteromycetes)
- DIANTHUS:**
Alternaria dianthi (Deuteromycetes)
Puccinia arenariae (Promycetes)
- DIOSPYROS:**
Cercospora kaki (Deuteromycetes)
Pestalotia diospyri (Deuteromycetes)
- ECHINOCACTUS:**
Mycosphaerella opuntiae (Ascomycetes)
- ELEOCHARIS:**
Silbium incarnatum (Deuteromycetes)
- EPIDENDRUM:**
Pestalotia conspicua (Deuteromycetes)
- EUCALYPTUS:**
Pestalotia disseminata (Deuteromycetes)
Sclerosporium scyphophorum (Deuteromycetes)
- FICUS:**
Phomopsis cinerescens (Deuteromycetes)
- FRAGARIA:**
Diplocarpon earliana (Ascomycetes)
Ramularia tulasnei (Deuteromycetes)
- FRAXINUS:**
Cercospora fraxinites (Deuteromycetes)
Marssonina fraxini (Deuteromycetes)
- GALANTHUS:**
Botrytis galanthina (Deuteromycetes)
- GARCINIA:**
Diplodia theobromae (Deuteromycetes)
- GARDENIA:**
Mycena citricolor [*Omphalia flavida*] (Deuteromycetes)
- GAULTHERIA:**
Phyllosticta gaultheriae (Deuteromycetes)
- GLADIOLUS:**
Aphelenchus avenae (Nematoda)
Botrytis gladiolorum (Deuteromycetes)
Curularia lunata (Deuteromycetes)
Fusarium oxysporum f. *gladioli* (Deuteromycetes)
Heterosporium iridis (Deuteromycetes)
Pulaskia parasitica (Deuteromycetes)
Pseudomonas marginata (Schizomycetes)
Tritirachium dependens (Deuteromycetes)
Urocystis gladiolicola (Promycetes)
- GOSSYPIMUM:**
Cercospora gossypina (Deuteromycetes)
Phakopsora desmumii (Promycetes)
Puccinia stakmanii (Promycetes)
- GYPSOPHILA:**
Alternaria dianthi (Deuteromycetes)
- HEDERA:**
Colletotrichum trichellum (Deuteromycetes)
- HELLEBORUS:**
Coniothyrium hellebori (Deuteromycetes)
- HIBISCUS:**
Metasphaeria hibiscicola (Ascomycetes)
Phomopsis ophites (Deuteromycetes)
- HORDEUM:**
Puccinia hordei (Promycetes)
- HYACINTHUS:**
Stemphylium botrysosum (Deuteromycetes)
Xanthomonas hyacinthi (Schizomycetes)
- HYDRANGEA:**
Phoma hortensiae (Deuteromycetes)
- ILEX:**
Gloeosporium aquifolii (Deuteromycetes)
- IPOMOEA:**
Coleosporium ipomoeae (Promycetes)
Diplodia gossypina (Deuteromycetes)
Macrophomina phaseolina (Deuteromycetes)
- IRIS:**
Colletotrichum liliacearum (Deuteromycetes)
Ditylenchus iridis (Nematoda)
Heterosporium iridis (Deuteromycetes)
Paraphelenchus amblygurus (Nematoda)
- JUGLANS:**
Marssonina juglandis (Deuteromycetes)
- JUNIPERUS:**
Gymnosporangium haraeaeum (Promycetes)
Gymnosporangium japonicum (Promycetes)
Mytilidion decipiens (Ascomycetes)
- KIGELIA:**
Diplodia theobromae (Deuteromycetes)
- LABURNUM:**
Coniothyrium cylisellum (Deuteromycetes)
Coniothyrium olivaceum (Deuteromycetes)
- LAELIA:**
Uredo behnickiana (Promycetes)
- LAURUS:**
Cercospora purpurea (Deuteromycetes)
- LESPEDeza:**
Uromyces lespedezae-procumbentis (Promycetes)
- LEUCOTHOE:**
Diplodina rostrupii (Deuteromycetes)
- LILIUM:**
Botrytis elliptica (Deuteromycetes)
Colletotrichum lili (Deuteromycetes)
Gliomastix convoluta (Deuteromycetes)
Memnoniella echinata (Deuteromycetes)
Tritirachium dependens (Deuteromycetes)
- LIMONIUM:**
Cercospora insulana (Deuteromycetes)
- LINUM:**
Pleospora herbarum (Ascomycetes)
- LIPPIA:**
Cercospora lippiae (Deuteromycetes)
- LYCOPERSICON:**
Phytophthora parasitica (Phycomycetes)
Streak (winter blight)
- LYCORIS:**
Botrytis elliptica (Deuteromycetes)
Tritirachium dependens (Deuteromycetes)
- MALUS:**
Coniothyrium pirinum (Deuteromycetes)
Gloeosporium perennans (Deuteromycetes)
Leptothyrium pomi (Deuteromycetes)
Monilinia fructicola (Ascomycetes)
Mycosphaerella pomi (Ascomycetes)
Phoma pomi (Deuteromycetes)
Physalospora oblusa (Ascomycetes)
- MANGIFERA:**
Cercospora mangiferae (Deuteromycetes)
Phyllosticta mortoni (Deuteromycetes)
- MATHIOLA:**
Alternaria raphani (Deuteromycetes)
- MAXILLARIA:**
Dendryphyum toruloides (Deuteromycetes)
- MEDICAGO:**
Fusarium oxysporum f. *medicaginis* (Deuteromycetes)
Pseudopeziza medicaginis (Ascomycetes)
Uromyces striatus var. *medicaginis* (Promycetes)
- MORUS:**
Diplodia gossypina (Deuteromycetes)
- MUSA PARADISIACA SAPIENTUM:**
Cercospora musae (Deuteromycetes)
Hormodendron cladosporioides (Deuteromycetes)
Macrophoma musae (Deuteromycetes)
Stachybotrys subsimplex (Deuteromycetes)
Stachylidium theobromae (Deuteromycetes)
Stemphylium botrysosum (Deuteromycetes)
- MUSCARI:**
Stemphylium ilicis (Deuteromycetes)
- NARCISSUS:**
Fusarium oxysporum f. *narcissi* (Deuteromycetes)
Ophiostoma narcissi (Ascomycetes)
Tritirachium dependens (Deuteromycetes)
- NEPETA:**
Cercospora nepelae (Deuteromycetes)
- NERIUM:**
Cercospora neriella (Deuteromycetes)
- NYMPHAEA:**
Diplodia gossypina (Deuteromycetes)
- ODONTOGLOSSUM:**
Cercospora anagrei (Deuteromycetes)
Septoria posekensis (Deuteromycetes)
- OLEA:**
Gloeosporium olivarum (Deuteromycetes)
Pseudomonas savastanoi (Schizomycetes)
Torula oleae (Deuteromycetes)
- ONCIDIUM:**
Uredo aurantiaca (Promycetes)
Uredo oncidii (Promycetes)

Hosts and diseases—Continued

ORANIA:

Gliomastix convoluta (Deuteromycetes)

ORCHID:

Cercospora angreci (Deuteromycetes)*Pestalotia conspicua* (Deuteromycetes)*Schizophyllum commune* (Basidiomycetes)*Sphaeropsis orchidearum* (Deuteromycetes)

ORNITHOGALUM:

Heterosporium ornithogali (Deuteromycetes)*Puccinia ornithogali-thyrsoideis* (Promycetes)

ORYZA:

Cladosporium oryzae (Deuteromycetes)*Helminthosporium oryzae* (Deuteromycetes)*Nigrospora sphaerica* (Deuteromycetes)*Phaeosphaeria oryzae* (Ascomycetes)*Phyllosticta glumarum* (Deuteromycetes)*Sclerotium irregulare* (Deuteromycetes)

PACHYRHIZUS:

Stilbum incarnatum (Deuteromycetes)

PAEONIA:

Botryosphaeria ribis (Ascomycetes)*Lepiostromella hysterioides* (Deuteromycetes)*Pestalotia paeoniae* (Deuteromycetes)*Phlycteneta ranunculacearum* (Deuteromycetes)

PALM:

Calacauma sabal (Ascomycetes)*Diplodia theobromae* (Deuteromycetes)*Hendersonia sabaleos* (Deuteromycetes)*Mycosphaerella palmae* (Ascomycetes)*Pestalotia palmarum* (Deuteromycetes)

PANDANUS:

Trichoderma viride (Deuteromycetes)

PANICUM:

Sorosporium syntherismae (Promycetes)

PASPALUM:

Cerebella andropogonis (Deuteromycetes)

PASSIFLORA:

Phyllosticta passiflorae (Deuteromycetes)

PERSEA:

Shpaeloma perseae (Deuteromycetes)

PHASEOLUS LUNATUS MACROCARPUS:

Elsinoe phaseoli (Ascomycetes)

PHASEOLUS VULGARIS VAR.:

Isariopsis griseola (Deuteromycetes)*Phytophthora phaseoli* (Phycomycetes)

PHILODENDRON:

Uredo jucunda (Promycetes)

PHRAGMITES:

Lophodermium arundinaceum (Ascomycetes)*Papularia arundinis* (Deuteromycetes)

PICEA:

Thecopsora areolata (Promycetes)

PIERIS:

Diplodina rostrupii (Deuteromycetes)*Pestalotia macrotricha* (Deuteromycetes)

PINUS:

Lophodermium pinastri (Ascomycetes)*Pyrenochaeta acicola* (Deuteromycetes)

PISUM:

Cladosporium pisicola (Deuteromycetes)*Colletotrichum pisi* (Deuteromycetes)*Pseudomonas seminum* (Schizomycetes)

PLUMERIA:

Coleosporium domingense (Promycetes)

POPULUS:

Stereum rufum (Basidiomycetes)

PROSOPIS:

Gloeosporium leguminum (Deuteromycetes)

PRUNUS PERSICA:

Coryneum carpophilum (Deuteromycetes)

PSIDIUM:

Pestalotia psidii (Deuteromycetes)

PUNICA:

Cercospora lythracearum (Deuteromycetes)

PYRUS:

Monilinia fructigena (Ascomycetes)

QUERCUS:

Coniothecium quercina (Deuteromycetes)*Microperella quercus* (Deuteromycetes)

RAPHANUS:

Aphanomyces raphani (Phycomycetes)

RHODODENDRON:

Cercospora handelii (Deuteromycetes)*Ceuthospora lunata* (Deuteromycetes)*Chrysomya rhododendri* (Promycetes)*Diplodina eurhododendri* (Deuteromycetes)*Discosia arctocreas* (Deuteromycetes)*Ezobasidium vacinii* (Basidiomycetes)*Mycosphaerella clintoniana* (Ascomycetes)*Mycosphaerella rhododendri* (Ascomycetes)*Pestalotia guepini* (Deuteromycetes)*Pestalotia macrotricha* (Deuteromycetes)*Pestalotia rhododendri* (Deuteromycetes)*Septoria azaleae* (Deuteromycetes)

RIBES:

Diplodina grossulariae (Deuteromycetes)

RICINUS:

Papulaspora parasitica (Deuteromycetes)

ROSA:

Diplocarpon rosae (Ascomycetes)*Peizella oenotherae* (Ascomycetes)*Phragmidium disciflorum* (Promycetes)*Phragmidium montivagum* (?) (Promycetes)

RUSCUS:

Leptosphaeria rusci (Ascomycetes)*Phoma rusci* (Deuteromycetes)*Phyllosticta ruscicola* (Deuteromycetes)

SACCHARUM:

Apiospora campospora (Ascomycetes)*Colletotrichum falcatum* (Deuteromycetes)*Stigmella sacchari* (Deuteromycetes)

SALIX:

Cryptodiaporthe salicina (Ascomycetes)*Cytospora chrysosperma* (Deuteromycetes)*Cytospora salicis* (Deuteromycetes)*Discella carbonacea* (Deuteromycetes)

SCHOMBURGKIA:

Macrophoma epidendri (Deuteromycetes)

SCIRPUS:

Puccinia oblecta (Promycetes)

SEDUM:

Diplodia sedicola (Deuteromycetes)

SINNINGIA:

Pythium ultimum (?) (Phycomycetes)*Thielaviopsis basicola* (Deuteromycetes)

SOIL:

Aphelenchus avenae (Nematoda)*Heterodera avenae* (Nematoda)*Heterodera cacti* (Nematoda)*Heterodera punctata* (Nematoda)*Heterodera rostochiensis* (Nematoda)*Heterodera schachtii* (Nematoda)*Rotylenchus robustus* (?) (Nematoda)

SOLANUM TUBEROSUM:

Aphelenchus avenae (Nematoda)*Fusarium oxysporum* f. *tuberosi* (Deuteromycetes)*Gliomastix convoluta* (Deuteromycetes)*Macrophoma phaseolina* (Deuteromycetes)*Pseudomonas solanacearum* (Schizomycetes)

SORBUS:

Gymnosporangium juniperi (Promycetes)*Gymnosporangium juniperinum* (Promycetes)*Venturia inaequalis* var. *cinerascens* (Ascomycetes)

SORGHUM:

Colletotrichum graminicolum (Deuteromycetes)

SPINACIA:

Peronospora effusa (Phycomycetes)

STACHYTARPHETA:

Puccinia urbaniana (Promycetes)

STANHOPEA:

Cercospora angreci (Deuteromycetes)*Pestalotia conspicua* (Deuteromycetes)*Uredo guacae* (Promycetes)

STRELITZIA:

Puccinia heliconiae (Promycetes)

TIGRIDIA:

Ditylenchus dipsaci (Nematoda)

TRAPA:

Stilbum incarnatum (Deuteromycetes)

TRICHOLAENA:

Cerebella andropogonis (Deuteromycetes)

TRICHOPILLIA:

Diplodia paraphysaria (Deuteromycetes)

TRIFOLIUM:

Cymadothea trifolii (Ascomycetes)

UNITED STATES DEPARTMENT OF AGRICULTURE**AGRICULTURAL RESEARCH SERVICE****SERVICE AND REGULATORY ANNOUNCEMENTS****LIST OF INTERCEPTED PLANT PESTS, 1952**

(List of Pests Recorded from July 1, 1951, through June 30, 1952, as Intercepted in, on, or with Plants and Plant Products Entering United States Territory.)

Compiled by
JUDITH HUNT
Plant Quarantine Aid

INTRODUCTION

This report summarizes the records of insect pests, plant pathogens, and certain other organisms found in, on, or with plants and plant products (1) imported, (2) offered for but refused entry, (3) held as ships' stores, etc., and hence not offered for entry through customs, (4) offered for entry for immediate transportation and exportation in bond, and (5) in domestic shipments between both Hawaii and Puerto Rico and the mainland. It covers the thirty-ninth year for which interception lists have been issued.

Because of the large number of collections involved, an effort has been made to restrict this list to those insects and plant diseases of known or potential plant quarantine importance. Intercepted plant pests that are known to be widely distributed throughout the United States are not included unless they are of particular interest.

Some collections made late in the year are included in the report for the following year, since determinations cannot be obtained immediately for all of them. Occasionally determinations are delayed for longer periods. The data for this list were obtained from routine reports by personnel of this Bureau, supplemented by information supplied by State and Customs officials. The States of California and Florida maintain staffs of specialists who identify a large proportion of the material collected at their ports. Specialists of the Bureau of Plant Industry, Soils, and Agricultural Engineering determine many of the difficult or unusual pathogens collected at the ports.

All scientific names are reviewed by appropriate specialists in the Department to assure conformance to the international rules of nomenclature.

Although every effort is made to give the correct origin for all collections listed, the alleged origin of all host-plant materials cannot be verified. Questionable items are therefore omitted or the origin is listed as unknown.

From many parts of the world have come importations of various seeds, fruits, bulbs, corms, rhizomes, plants, and plant products. An increasing number of arrivals by air bring added plant pathogens and pests, of which the golden nematode and the fruit flies continue to be most important.

INTERCEPTIONS FROM AIR-BORNE MATERIAL

Frequent interceptions of air-borne plant pests have been made in baggage, express, freight, mail, and stores. During the year 2,436 interceptions were made of insects on imported plant parts or as stowaways, and 329 interceptions of plant diseases. Slightly less than one-third of the diseases were determined as to genus only, but from the evidence offered little or no risk to the United States. Occasionally pests unknown to this country but known to cause disease in the country of origin were intercepted. Some of the most injurious insects intercepted during the year arrived in, on, or with fruits and plant material coming in by plane.

Some important insects found in air-borne material were:

Acalypta parvula in forest litter, moss, and soil used as packing material in baggage from Spain.

Adoxophes orana on cut flowers of lilac in cargo from the Netherlands.

The citrus blackfly (*Alcurocanthus woglumi*) on leaves of sour lime in baggage from Cuba and Mexico, on *Citrus* sp. leaves in baggage from Jamaica, Mexico, and Panama.

The Mexican fruit fly (*Anastrepha ludens*) in mango in baggage from Guatemala and Mexico; in orange in baggage from Mexico, in orange in stores from Guatemala; the West Indian fruit fly (*A. mombinpraeoptans*) in mango in baggage from the Bahamas, Colombia, Guatemala, Jamaica, Mexico, Nicaragua, Panama, Puerto Rico, and Salvador, in yellow mombin in baggage from Costa Rica, Guatemala, Nicaragua, and Salvador, in yellow mombin in stores from Salvador, in unidentified fruit in baggage from Salvador; *A. serpentina* in mamey in baggage from Colombia, in sapodilla in baggage from Ecuador, in sapote (*Calocarpum sapota*) in baggage from Nicaragua; *A. suspensa* in guava in baggage from Cuba and Mexico.

Brachycerus albidentatus in garlic in cargo from Italy.

The black vine weevil (*Brachyrhinus sulcatus*) in grape in stores from Belgium.

The Mediterranean fruit fly (*Ceratitis capitata*) in *Annona* sp. in baggage from Portugal, in apple in stores from France, in cactus in baggage from Italy, in fig in baggage from Italy, in grape in stores from France, in guava in baggage from the Azores, in lemon in baggage from the Madeira Islands, in Mandarin orange in baggage from Italy, in Mandarin orange in stores from Portugal and Spain, in mango in baggage from the Madeira Islands, in orange in baggage from Portugal and Spain, in orange in stores from Spain, in peach in baggage from France, Italy, Portugal, and Tripoli, in peach in quarters from Italy, in peach in stores from the Azores, France, Israel, Italy, and Portugal, in pear in baggage from Greece, in pear in stores from France, in pomegranate in baggage from Greece, Italy, and Lebanon, in pricklypear in baggage from Italy; *C. capitata* (?) in coffee berry in baggage from Hawaii.

Ceroplastes sinensis on stem of *Feijoa* sp. in baggage from New Zealand.

Cylas formicarius in sweetpotato in stores from India.

An adult of the oriental fruit fly (*Dacus dorsalis*) in preflight inspection of an airplane departing from Hawaii for the mainland.

The olive fruit fly (*D. oleae*) in olive in baggage from the Azores, Greece, Italy, Lebanon, and Palestine.

The oriental fruit moth (*Grapholitha molesta*) in peach in baggage from Korea.

Laspeyresia strobilella in spruce cone in baggage from Germany.

Palaeopus costicollis in yam in baggage from Jamaica.

The pink bollworm (*Pectinophora gossypiella*) in cotton boll in baggage from the Bahamas, Greece, Hawaii, and Jamaica, in okra in baggage from Brazil and Trinidad.

Prodenia litura on gladiolus in cargo from Israel.

Rhagoletis cerasi in cherry in baggage from France, Italy, and Switzerland, in cherry in cargo from Switzerland, in cherry in stores from the Azores, Italy, and Portugal.

Tephritis arnicae on dry cut flowers in baggage from Switzerland.

The papaya fruit fly (*Toxotrypana curvicauda*) in papaya in baggage from Trinidad.

Air-borne plant material was found to carry some important plant pathogens not believed to be established in the United States. Among these were the following:

- Cercospora coffeicola* on coffee leaves in baggage from Brazil.
 - "Chrysanthemum virus Q" on a chrysanthemum plant in cargo from Denmark.
 - Chrysomyxa rhododendri* on *Rhododendron* spp. in baggage from Germany, Hungary, and Switzerland, and on *Rhododendron* sp. in mail from Switzerland.
 - Coniothyrium laburnophilum* on *Laburnum* sp. in mail from Denmark.
 - Elsinoe australis* on orange in stores from Argentina and Brazil.
 - "Leprosis" on orange in stores from an unknown source.
 - Lepiosphaeria citricola* on Mandarin orange in baggage from Japan.
 - Phleospora pistaciae* on pistache leaf in baggage from Turkey.
 - Phoma citricarpa* on Mandarin orange in baggage from China and Japan, on orange in baggage from Japan, and on citrus peel in baggage from China; *P. gypsophylae* on *Gypsophila* sp. in cargo from Japan.
 - Phomopsis hellebori* on Christmas-rose in cargo from the Netherlands.
 - Phyllosticta philodendri* on warty philodendron in cargo from Costa Rica.
 - Pythium butleri* on ginger in cargo from Guam.
 - Septoria unedonis* on *Arbutus unedo* in baggage from Greece.
 - Sphenospora kevorkianii* on *Schomburgkia* sp., an orchid, in cargo from Panama.
 - "Tomato aspermy virus" on chrysanthemum plant in cargo from Denmark.
 - Uredo oncidii* on *Oncidium varicosum rogersi*, an orchid, in express from Brazil and on *Oncidium* sp. in cargo from Guatemala; *U. scabies* on *Vanilla planifolia*, an orchid, in cargo from the Canal Zone.
 - Xanthomonas citri* on lime in baggage from India.
- Intercepted plant diseases of limited distribution in the United States or new to the country of origin and found on air-borne material were:
- Heterosporium iridis* on German iris in cargo from New Zealand.
 - Leptosphaeria heterospora* on monarch iris in mail and on *Iris* spp. in cargo from New Zealand, Palestine, and Turkey.
 - Papulaspora coprophila* on gladiolus corms in cargo from Japan.
 - Phoma iridina* on German iris in cargo from New Zealand.
 - Phyllosticta camelliae* on camellia in mail from Japan; *P. dracaenae* on Banks dracaena in cargo from New Zealand; *P. hedericola* on *Fatsyhedera* sp. in cargo from Belgium and on English ivy in baggage from Ireland; *P. maculiformis* on chestnut in baggage from Italy.
 - Scirrhodopsis bambusae* on Bambuseae stem in cargo from Japan.
 - Septoria chrysanthemi* on chrysanthemum in mail from Japan. *S. dianthi* on carnation in baggage from the Azores.
- Nematodes were also found in air-borne material as follows:
- Heterodera punctata* in soil with strawberry plants in cargo from Scotland, in soil on chrysanthemum plants in express from England, in soil on pick-a-back plants in quarters from Germany, and in soil on lupine plants in baggage from England; the golden nematode (*H. rostochiensis*) in soil with various plants from England, France, Germany, Ireland, and Scotland.
 - Meloidogyne hapla* with roots of clematis in cargo from the Netherlands; *M. incognita* in *Asparagus myriocladus* in express from Japan.

NOTES ON INSECTS INTERCEPTED

FRUIT FLIES

The following fruit flies were intercepted:

The Mexican fruit fly (*Anastrepha ludens*) in grapefruit in baggage from Mexico, in Mandarin orange in quarters and stores from Mexico, in mango in baggage from Guatemala and Mexico, in mango peel in an empty boxcar from Mexico, in pulp attached to mango seed in the bed of a truck from Mexico, in orange in quarters and stores from Guatemala, in orange in baggage, quarters, and stores from Mexico, in pear in baggage from Mexico, in ponderosa lemon in baggage from Mexico, in sour orange in quarters and stores from Mexico, in sweet lime in baggage and cargo from Mexico, and an adult in the bed of a truck from Mexico; *A. ludens* (?) in avocado in baggage from Mexico; the West Indian fruit fly (*A. mombinpraepotans*) in unidentified fruit in baggage from Salvador, in mango in baggage from the Bahamas, Colombia, Guatemala, Jamaica, Mexico, Nicaragua, Panama, Puerto Rico, Salvador, and the Virgin Islands, in mango in mail from Nicaragua, in mango in quarters from Honduras, Mexico, Puerto Rico, and Trinidad, in mango in stores

from Honduras and Jamaica, in *Spondias* sp. in baggage from Mexico, in yellow mombin in baggage from Costa Rica, Guatamela, Mexico, Nicaragua, and Salvador, in yellow mombin in mail from Nicaragua, in yellow mombin in stores from Salvador; *A. serpentina* in mamey in baggage from Colombia and Mexico, in sapodilla in baggage from Ecuador, in sapote in baggage from Mexico and Nicaragua; *A. striata* in guava in baggage from Mexico; *A. suspensa* in guava in baggage from Cuba and Puerto Rico.

The Mediterranean fruit fly (*Ceratitis capitata*) in *Annona* sp. in baggage from Portugal, in apple in baggage from Italy, in apple in stores from France and Portugal, in apricot in stores from Algeria, in cactus in baggage from Italy, in coffee in baggage and quarters from Hawaii, in fig in baggage from Greece and Italy, in grape in stores from France, in grapefruit in quarters from France, in grapefruit in stores from Algeria, France, Israel, Lebanon, and Spain, in guava in baggage from the Azores, in lemon in baggage from the Madeira Islands, in Mandarin orange in baggage from Africa and Italy, in Mandarin orange in stores from Italy, Portugal, and Spain, in mango in baggage from the Madeira Islands, in *Opuntia* sp. in baggage from Italy, in orange in baggage from Italy, Portugal, and Spain, in orange in quarters from Israel and Spain, in orange in stores from Egypt, Israel, Italy, Morocco, and Spain, in peach in baggage from France, Italy, Portugal, and Tripoli, in peach in quarters from Italy, in peach in stores from the Azores, France, Israel, Italy, Portugal, and Spain, in pear in baggage from Greece and Italy, in pear in stores from France, in pomegranate in baggage from Greece, Italy, and Lebanon, in prickly pear in baggage and cargo from Italy, in quince in baggage and cargo from Italy; *C. capitata* (?) in coffee in baggage and mail from Hawaii, in mango in mail from Hawaii, in olive in baggage from the Azores.

The melon fly (*Dacus cucurbitae*) in cucumber in cargo and stores from Hawaii, in pepper in stores from Hawaii, in string bean in cargo from Hawaii, in tomato in stores from Hawaii; the Oriental fruit fly (*D. dorsalis*) in banana in quarters from Hawaii, in Malay-apple in baggage from Hawaii, in mango in mail and quarters from Hawaii, an adult in preflight inspection of an airplane leaving Hawaii for the mainland; *D. dorsalis* (?) in bell pepper in stores from Hawaii, in guamachil in baggage from Hawaii, in tomato in stores from Hawaii; the olive fruit fly (*D. oleae*) in olive in baggage from the Azores, Greece, Italy, Lebanon, Libya, and Palestine, in olive in cargo from Italy, in olive in mail from Italy and Turkey.

Rhagoletis cerasi in cherry in baggage from France, Italy, Portugal, and Switzerland, in cherry in cargo from Switzerland, in cherry in stores from the Azores, France, Italy, and Portugal; the walnut husk fly (*R. completa*) in walnut in baggage from Mexico; *R. juglandis* in black walnut in baggage from Mexico; the apple maggot (*R. pomonella*) in baggage from Mexico; *R. pomonella* (?) in apple in stores from Sweden; *R. striatella* in husk tomato in baggage from Mexico.

The papaya fruit fly (*Toxotrypana curvicauda*) in papaya in baggage from Trinidad, in papaya in cargo from Mexico, and on the floor of a truck previously used to transport papayas from Mexico.

INSECTS OTHER THAN FRUIT FLIES

The following miscellaneous insects of interest were intercepted:

A curculionid, *Alcidodes dentipes*, in sweet potato in stores from Sierra Leone.

The citrus blackfly (*Aleurocanthus woglumi*) on leaves of *Citrus* sp. in baggage and cargo from Mexico, on coffee leaves in baggage from Mexico, on leaves of lemon, Mandarin orange, and orange in baggage from Mexico, on leaves of sour lime in baggage from Cuba, Jamaica, and Panama, on leaves of sour lime in baggage and cargo from Mexico.

A bruchid, *Bruchus lentis*, in lentil in baggage by air from Italy.

Cacoecia pronubana (Tortricidae) in pomegranate in baggage from Italy and Yugoslavia.

A phycitid, *Cryptoblabes gnidiella*, in chestnut and pomegranate in baggage from Italy, in pomegranate in baggage by air from Italy, in lemon in stores by air from Italy, in papaya in baggage by air from Bermuda, in seagrape berry in cargo by air from Bermuda.

The mango weevil (*Cryptorhynchus mangiferae*) in mango in baggage and quarters from Hawaii, in mango in baggage by air from India.

A curculionid, *Curculio elephas*, in chestnut in baggage, cargo, and mail from Italy, in chestnut in baggage by air from Italy, in chestnut in stores from Portugal.

Cylas puncticollis (Curculionidae) in sweetpotato in stores from British West Africa, Gold Coast, and Sierra Leone.

A pyraustid, *Evergestis forficalis*, in cabbage and cauliflower in stores from France, in cabbage in baggage by air from Ireland.

Hemimene juliana (Olethreutidae) in chestnut in baggage by air from Italy, in chestnut in baggage from Greece, in Macedonian oak seed in mail from Italy.

An elaterid, *Hypolithus riparius*, in grass sod used as ballast from Scotland.

An olethreutid, *Laspeyresia leguminis*, in string bean in stores from Peru.

Leucinodes orbonalis (Pyraustidae) in eggplant in stores from Indonesia.

A phalaenid, *Mamestra brassicae*, in cabbage in baggage by air from Ireland, in cabbage in stores from Italy, in celery in stores from Denmark, in rutabaga in stores from England, in cabbage and parsley in stores from France.

A bean pod borer, *Maruca testulalis*, in string beans in baggage, cargo, mail, and stores from Hawaii, in string beans in stores from Japan and Netherlands Guiana.

An adult scarabaeid, *Melolontha melolontha*, host unknown, in baggage by air from Germany.

Parlatoria chinensis (Coccidae) on a stem of *Pyrus* sp. in baggage from Japan.

An adult *Phloeotribus scarabaeoides* (Scolytidae) with olive branch in baggage from Italy.

A scolytid, *Pityogenes chalcographus*, in pine and spruce in cargo from Sweden, in bark on crate slats from Sweden.

A chrysomelid, *Psylliodes chrysocephala*, in radish in stores from Italy.

Polychrosis botrana (Olethreutidae) in grape in baggage from Italy.

Prays oleellus (Hyponomeutidae) in olive in baggage from Italy.

Sesamia cretica (Phalaenidae) in broomcorn in cargo from Greece and Italy, in corn in baggage from Italy.

A curculionid, *Sitona lineata*, on chrysanthemum in cargo by air from Denmark, on chrysanthemum in baggage by air from Portugal, on lilac in cargo from the Netherlands, and in beet in stores from England.

A curculionid, *Strophosoma melanogrammmum*, in soil and woods moss with rosaceous plants in mail from Germany.

SNAILS

The giant African snail (*Achatina fulica*) was taken at San Francisco, and San Pedro, Calif., three times each on returned military equipment coming from Formosa, Guam, and the Philippines. Two interceptions of this species were made at San Pedro on scrap tires and a second-hand generator from Guam, and one interception at Houston, Tex., on scrap metal from the South Pacific.

Bradybaena similaris, an injurious snail not established in the United States, was intercepted at Honolulu, Hawaii, in a box with *Vanda* leis during preflight inspection of a cargo shipment to the mainland. Another injurious snail, *Deroceras reticulatum*, known to be in some of our States was taken at New York, N. Y., with cabbage in cargo from the Netherlands; at Boston, Mass., with carnations and calla lilies in baggage by air from the Azores; at Boston, Mass., with lettuce in stores by air from Lebanon; and at Washington, D. C., with clumps of seloia pampasgrass in mail from New Zealand.

NOTES ON DISEASES INTERCEPTED

Japan again contributed the greatest number of interceptions (55) of citrus canker (*Xanthomonas citri*), 32 of which were on oranges, 16 on lemons, 6 on grapefruits, and 1 on sour lime. China contributed 16 interceptions, 13 of which were on oranges, 2 on Mandarin oranges, and 1 on citrus peel. India contributed 1 each on lime, sour lime, pomelo, and grapefruit. From Formosa (?) and Ceylon came 1 each on orange; Malaysia and the Philippines had 1 each on sour lime; and Thailand had 2 on pummelo. Cancrosis "B" (*Xanthomonas* sp. (?)), another bacterial disease of citrus producing symptoms similar to citrus canker, was intercepted 6 times on lemons and once on grapefruit from Argentina.

Chrysomya rhododendri, a spruce and rhododendron rust, was intercepted 5 times on *Rhododendron ferrugineum* from Switzerland and once from Hungary, once each on *R. hirsutum* from England and Germany, and 4 times on *Rhododendron* sp. from Switzerland.

The sweet orange fruit scab (*Elsinoe australis*) was intercepted many times from South America. Of these interceptions 76 were from Brazil, 57 from Argentina, and 1 each from Uruguay and an unknown origin, probably South America, on lemon, Mandarin orange, orange, sour lime, and sour orange.

"Leprosis", a recently reported disease, was intercepted once on Mandarin orange, 8 times on orange from Mexico, and once each on orange from Egypt, Haiti, Panama, and an unknown origin.

Other interceptions were:

Cercospora purpurea on avocado in baggage from Mexico.

Coniothyrium cytisellum on *Laburnocytisus adamii* and *Laburnum watereri* in cargo from the Netherlands.

Cryptospora longispora on Norfolk-Island pine in cargo from Australia and on Norfolk-Island pine in mail from Norfolk Island.

Gymnosporangium haraeum on Chinese juniper and dwarf juniper in mail and baggage from Japan.

Leptosphaeria heterospora on various rhizomatous *Iris* species in cargo and mail from Australia, Canada, England, France, Hashemite Kingdom of Jordan, the Netherlands, New Zealand, Palestine, and Turkey; *L. rusci* on *Ruscus* sp. in cargo from Italy.

Macrophomina phaseolina on *Ixia viridiflora* and *Morea spathacea* in mail from the Union of South Africa, on *Iris nigricans* in mail from Hashemite Kingdom of Jordan, on sweetpotato in baggage from Borneo, and on sweetpotato in stores from Japan.

"Peony virus" on peony in cargo from the Netherlands.

Puccinia arenariae on maiden pink and sweet-william in cargo from Switzerland and on sweet-william in baggage from England; *P. ornithogali-thyrsoideis* on chinkerichiee in mail from the Union of South Africa.

Sphaceloma fawcettii var. *scabiosa* on lemon, grapefruit, and *Citrus* sp. in stores from Australia.

The golden nematode (*Heterodera rostochiensis*) has been found in soil with various plants intended for propagation, 8 times from England, 7 times from Scotland, 4 times from Germany, twice from Ireland, and once each from Denmark, France, the Netherlands, and Sweden.

Of importance also have been interceptions of the *Meloidogyne* group such as *M. arenaria* in *Bletilla* sp., an orchid, in cargo from Japan, in dahlia in mail from India, in potato in stores from Chile, and in turnip in cargo from Mexico; *M. exigua* in dahlia in mail from Australia; *M. hapla* in chrysanthemum, clematis, delphinium, and Hungarian hepatica, all in cargo from the Netherlands, and in soil with an unknown plant in baggage from Germany; *M. incognita* in *Asparagus myriocladus* in express from Japan, in banana root in cargo from Mexico, in dahlia in mail from India, and in *Dioscorea* sp. tuber in express from Nicaragua; *M. incognita* (?) in *Mammillaria phymatothele* in mail from Mexico; *M. incognita* var. *acrita* in *Agapanthus* sp. root in cargo from Japan, in parsnip in stores from the Union of South Africa, *M. incognita* var. *acrita* (close to; possibly n. sp.) in *Pogostemon* sp. root in mail from the Philippines; *M. javanica* in *Bletilla* sp., an orchid, in cargo from Japan and in dahlia in mail from Australia.

Tylenchus alli in garlic in cargo from Mexico; *T. putrefaciens* in garlic in baggage and cargo from Mexico.

INCOMPLETELY DETERMINED PESTS

Occasionally complete specific determinations of nematodes, insects, and fungi have been impossible owing to the condition of the material on arrival. Some of these plant pests may be of economic importance, may be new or hitherto unknown to the United States, unknown for the host plant, or they may come from a new country of origin.

INSECTS

Among the incompletely determined insects were the following fruit flies:

Anastrepha sp., probably *fraterculus* (Wied.), at New York, N. Y., in coffee berry in baggage by air from Peru; *Anastrepha* sp., probably *ludens*, at Laredo, Tex., in apple in baggage from Mexico; at Brownsville, and Laredo, Tex., in orange in baggage from Mexico; at Houston, Tex., in orange in quarters from Mexico; *Anastrepha* sp., probably *mombinpraeoptans*, at Boston, Mass., in grapefruit in stores from Trinidad; at Key West, Fla., in mango in stores from Cuba; at Laredo, Tex., in mango in baggage from Mexico; at New Orleans, La., in mango in stores from Jamaica and in *Spondias* sp. in baggage by air from Salvador; at San Ysidro, Calif., in guava in baggage from Mexico; *Anastrepha* sp.,

probably *serpentina*, at Douglas, Ariz., in mango in baggage from Mexico; at Laredo, Tex., in sapote in baggage from Mexico; *Anastrepha* sp., probably *striata*, at Miami, Fla., in mango in baggage by air from Bolivia and Ecuador.

Anastrepha sp. at Miami, Fla., in *Annona* sp. in baggage by air from Peru; at Brownsville, Tex., in avocado in baggage from Mexico; at Miami, Fla., in cherimoya in baggage by air from Peru; at San Ysidro, Calif., in guava in baggage from Mexico; at New York, N. Y., in guava in baggage from Venezuela; at El Paso, Tex., in guava in baggage from Mexico; at Miami, Fla., in mango in baggage by air from Colombia, Guatemala, and Peru; at Hidalgo, Del Rio, Brownsville, Laredo, and El Paso, Tex., in mango in baggage from Mexico; at Houston, Tex., in mango in stores from Haiti; at New York, N. Y., in mango in baggage from Haiti; at Savannah, Ga., in mango in quarters from Puerto Rico; at Baltimore, Md., in orange in stores from Brazil; at Brownsville, El Paso, and Laredo, Tex., in orange in baggage from Mexico; at Galveston, Tex., in orange in quarters and stores from Brazil; at El Paso, Tex., in peach in baggage from Mexico; at Eagle Pass, Tex., in quince in baggage from Mexico; at Tampa, Fla., in sapodilla in baggage by air from Cuba; at Laredo, Tex., in sapote in baggage from Mexico; at Miami, Fla., in soursop in baggage by air from Peru.

Rhagoletis sp. at Laredo, Tex., in pear in baggage from Mexico.

Thirty-four interceptions which could not be identified beyond family (Tephritidae) were intercepted at Laredo, Tex., in apple in baggage from Mexico; at New York, N. Y., in apple in baggage by air from Tripoli; at Seattle, Wash., in apple in stores from Peru; at Boston, Mass., in apricot in stores by air from an unknown origin; at Honolulu, Hawaii in banana in cargo from Siam; at San Diego, Calif., in cucumber in stores from Hawaii; at New York, N. Y., in fresh date in cargo by air from Lebanon and in globe artichoke in baggage from Italy; at Baltimore, Md., and Houston, Tex., in grapefruit in stores from Brazil; at Galveston, Tex., in grapefruit in stores from Argentina; at Norfolk, Va., in grapefruit in stores from Nigeria; at Philadelphia, Pa., in grapefruit in stores from Gold Coast; at Boston, Mass., in guava in baggage by air from the Azores; at Calexico, Calif., in guava in baggage from Mexico; at Honolulu, Hawaii in guava in cargo by air from Siam; at Boston, Mass., in Mandarin orange in stores from India; at New York, N. Y., in Mandarin orange in stores by air from an unknown origin; at Honolulu, Hawaii in mango in stores by air from the Philippines; at Honolulu, Hawaii in nectarine in baggage by air from Australia; at Baltimore, Md., in orange in stores from Brazil; at Boston, Mass., in orange in stores by air from an unknown origin, and in orange in stores from French West Africa and India; at Galveston, Tex., in orange in stores from Spain; at Mobile, Ala., in orange in stores by air from Panama; at San Juan, P. R., in orange in stores from Africa; at New York, N. Y., in papaya in stores from Gold Coast and in peach in baggage by air from France; at Philadelphia, Pa., in pepper in stores from French West Africa; at Boston, Mass., in sweet lime in stores from the Azores; at San Francisco, Calif., in tomato in stores from Hawaii; at Boston, Mass., in vegetable marrow in stores from the Union of South Africa and with mixed fruit in stores by air from an unknown origin.

The following miscellaneous insects of interest were intercepted:

An aleyrodid, Aleurodicinae, new genus near *Aleurodicus*, at Laredo, Tex., on *Oncidium cavendishianum*, an orchid, in cargo from Mexico.

Aleuroplatus sp., near *sculpturatus* Q. & B. (Aleyrodidae) at Hoboken, N. J., on an unidentified leaf in mail from Brazil.

Apion sp., probably *carduorum* Kby., (Curculionidae) at New York, N. Y., and at Philadelphia, Pa., in globe artichoke in stores from France.

An olothreutid, *Argyroplote* sp., probably *leucotreta* Meyr., at Baltimore, Md., in orange in stores from the Union of South Africa.

Aserica sp. (Scarabaeidae) at Honolulu, Hawaii, in soil with dwarf pine in baggage by air from Japan.

A curculionid, *Baris* sp., at Mobile, Ala. and at New York, N. Y., in turnip in stores from France; at Galveston, Tex., in turnip in stores from Portugal.

A cerambycid, "unlike anything in the Museum collection," at Hoboken, N. J., in root of malabar glorylily in cargo by air from the Union of South Africa.

A coccid, Coccinae, "an interesting species", at Brownsville, Tex., on a leaf of *Bromelia* sp. in baggage from Mexico.

Cryptotermes sp., probably *brevis* (Wlk.) (Kalotermitidae), at San Pedro, Calif., in a wooden packing case in express from Cuba.

Cylas sp., probably *femoralis* Faust (Curculionidae), at New York, N. Y., in sweetpotato in stores by air from the Union of South Africa.

A curculionid, *Epicaerus* sp., probably *cognatus* Sharp, at Brownsville, Tex., in potato in baggage and stores from Mexico; at Eagle Pass, Tex., and Laredo, Tex., in potato in baggage from Mexico; at Hidalgo, Tex., in potato in quarters from Mexico; at Houston, Tex., and New Orleans, La., in potato in stores from Mexico.

Gnorimoschema sp., near or equals *borsaniella* Koehr. (Gelechiidae), at Baltimore, Md., in pepper in stores from Brazil; at Charleston, S. C., and at Galveston, Tex., in pepper in stores from Argentina; *Gnorimoschema* sp., near or equals *ocellatella*, at Galveston, Tex., and at New York, N. Y., in beet in stores from Egypt; at Philadelphia, Pa., in beet in stores from France and Israel.

Gymnandrosoma sp. (Olethreutidae) at New York, N. Y., in orange in stores by air probably from Trinidad.

Lixus sp. (Curculionidae) at Philadelphia, Pa., in beet in stores from Israel.

Sp. of Phalaenidae, "very distinctive—nothing like it in the U. S. National Museum", at Charleston, S. C., on banana leaf in cargo from Ecuador.

Phenacaspis sp. (Coccidae), "not recognized as any described species", at Honolulu, Hawaii on *Grammatophyllum scriptum*, an orchid, in air express from the Philippines.

A curculionid, *Premnotrypes* sp., at Galveston, Tex., in potato in stores from Peru.

Sisamnes sp. (Lygacidae), probably a new species, at Laredo, Tex., on cactus in cargo from Mexico.

A scolytid, *Stephanoderes* sp., probably *lecontei* Hopk., at Honolulu, Hawaii in seed of *Lysidice rhodostegia* in mail from Cuba.

Tetralicia sp. (Aleyrodidae), "undescribed and very interesting", at Nogales, Ariz., on white sapote leaf in baggage from Mexico.

There were 1,926 interceptions distributed among 564 genera, which could be identified to genus only. A total of 86 could be determined to family or subfamily only.

A total of 2,012 incompletely determined insects were intercepted during the year.

DISEASES

Suspected pathogens, some probably new to this country, determined to genus only were:

Ascochyta sp., at Washington, D. C., on *Mahonia bealii* in cargo from the Netherlands; at San Francisco, Calif., on *Odontoglossum grande*, an orchid, in air cargo from Guatemala.

Camarosporium sp., at Nogales, Ariz., on *Agave* sp. in baggage from Mexico; at Hoboken, N. J., on *Cercidiphyllum* sp. in cargo from the Netherlands; at San Francisco, Calif., on *Cymbidium canaliculatum*, an orchid, in mail from Australia; at Laredo, Tex., on *Epidendrum* sp., an orchid, in cargo from Mexico.

Caryospora sp., at San Francisco, Calif., on *Iris atropurpurea* in mail from England, on *Iris germanica* in mail from Australia and on *Iris saari* in mail from Turkey.

Cercospora sp., at San Juan, P. R., on *Eryngium foetidum* in a shipment for the mainland; at Laredo, Tex., on *Philodendron* sp. in baggage and cargo from Mexico.

Coniothyrium sp., probably *olivaceum*, at El Paso, Tex., on sweet lime in baggage from Mexico; at Honolulu, Hawaii, on Mandarin orange in baggage by air from China; at San Francisco, Calif., on coconut in baggage from Hawaii; at Washington, D. C., on Jobs-tears in mail from the Philippines; at San Francisco, Calif., on *Cymbidium* sp., an orchid, in cargo from England; at Laredo, Tex., on *Laelia* sp., an orchid, in cargo from Mexico; at Laredo, Tex., on *Philodendron* sp. in cargo from Mexico.

Coryneum sp., probably *microstictum* Berk. & Br., at Seattle, Wash., on *Rosa* sp. (fruit) in mail from Canada.

Probably *Cryptosphaerella* sp., at San Francisco, Calif., on *Oncidium splendendum*, an orchid, in cargo from Guatemala; *Cryptosphaerella* sp., at Laredo, Tex., on orchid in cargo from Mexico.

Endoconidiophora sp., at San Francisco, Calif., on ginger in cargo from Japan. *Frankiella* sp., close to *alni* (Wor.) Maire & Tison, at Seattle, Wash., on *Cercidiphyllum japonicum* in cargo from Japan.

Haplosporella sp., at Philadelphia, Pa., on wisteria vine in quarters from Japan.

Hendersonia sp., at San Francisco, Calif., on *Epidendrum* sp., an orchid, in cargo from Salvador; at San Francisco, Calif., on *Haworthia margaritifera* in mail from the Union of South Africa; at Nogales, Ariz., an orchid in baggage from Mexico; at Washington, D. C., on rice seed in mail from Cuba and on *Stylocanthes* sp. in mail from Ethiopia.

Hypoderma sp., at Nogales, Ariz., on *Dodonea* sp. in cargo from Mexico.

Hysterocephalum sp., at Brownsville, Tex., on orchid in cargo from Mexico; at San Francisco, Calif., on *Laelia superbiens*, an orchid, in cargo by air from Guatemala.

Lembosioopsis sp., at Brownsville, Tex., on *Miltonia endresii*, an orchid, in cargo by air from Costa Rica.

Leptosphaeria sp., at Calexico, Calif., on bamboo cane in cargo from Mexico; at San Pedro, Calif., on *Phalaenopsis* sp., an orchid, in baggage from the Philippines; at Laredo, Tex., on *Philodendron* sp. in cargo from Mexico.

Leptostroma sp., at Honolulu, Hawaii, on *Agathis australis* in cargo by air from New Zealand; at Nogales, Ariz., on *Hibiscus cannabinus* in baggage from Mexico.

Lophodermium sp., at San Francisco, Calif., on *Sobralia* sp., an orchid, in cargo by air from Nicaragua.

Monilinia sp., suggesting *laxa* (Aderh. & Ruhl.) Honey, at Hoboken, N. J., on rock cotoneaster in cargo from the Netherlands.

Mycosphaerella sp., at Brownsville, Tex., on orange in baggage from Mexico; at Honolulu, Hawaii, on Banks dracaena in cargo by air from New Zealand; at San Francisco, Calif., on *Cymbidium elegans*, an orchid, in cargo by air from India; at Miami, Fla., on *Epidendrum radicans*, an orchid, in cargo by air from Costa Rica; at San Francisco, Calif., on *Epidendrum ybagueense* in cargo by air from the Canal Zone.

Naemosphaeria sp. (?), at Hoboken, N. J., on *Ficus* sp. stem in cargo from Italy.

Nocardia sp., at Hoboken, N. J., on black barberry in cargo from the Netherlands.

Ophiobolus sp., at San Francisco, Calif., on coconut in baggage from Hawaii and Japan; at San Francisco, Calif., on coconut in mail from Guam; at Nogales, Ariz., on orchid in baggage from Mexico.

Pachybasium sp., at Hoboken, N. J., on tulip in cargo from the Netherlands.

Periconia sp., at San Francisco, Calif., on cucumber in stores from Japan.

Pestalotia sp., at Laredo, Tex., on *Philodendron* sp. in cargo from Mexico.

Phaeosphaeria sp., at San Francisco, Calif., on *Acorus* sp. in cargo by air from Japan.

Phyllostictina sp., at Laredo, Tex., on lime leaf in cargo from Mexico; at San Francisco, Calif., on *Cypripedium insigne*, an orchid, in mail from India; at Honolulu, Hawaii, on *Cypripedium* sp. in baggage from Japan and on *Dendrobium undulatum*, an orchid, in cargo by air from Australia; at San Francisco, Calif., on *Dendrobium* spp. in mail from American Samoa; at San Francisco, Calif., on *Dendrobium* sp. in cargo by air from Australia; at Laredo, Tex., on *Oncidium* sp., an orchid, in baggage from Mexico; at Miami, Fla., on orchid leaf in cargo from Brazil.

Phytophthora sp., at New York, N. Y., on orange in stores from Brazil; at El Paso, Tex., on Italian squash in cargo from Mexico; at Hoboken, N. J., on gloxinia in air express from Belgium.

Septoria sp., at Hoboken, N. J., on *Heurnia* sp. in mail from the Union of South Africa.

Rhabdospora sp., at Washington, D. C., on *Dombeya* sp. in mail from Cuba; at San Francisco, Calif., on *Stewartia monadelphica* in cargo from Japan.

Sclerotium sp., at Seattle, Wash., on globe butterflybush in cargo from England; at Hoboken, N. J., on Christmas-rose in cargo from England; at Seattle, Wash., on *Lycoris aurea* and *L. radiata* in cargo from Japan and on *L. squamigera* in mail from Japan; at San Francisco, Calif., on *L. squamigera* in cargo from Japan; at Baltimore, Md., on epipollino in cargo from Italy; at San Francisco, Calif., on potato in stores from New Zealand.

Scolecopeltidium sp., at Brownsville, Tex., on *Odontoglossum chiriquense*, an orchid, in cargo by air from Costa Rica; at Seattle, Wash., on orchid in mail by air from the Canal Zone.

Septoria sp., at Laredo, Tex., on *Agave* sp. and *Cattleya citrina*, an orchid, in cargo and on orange in baggage from Mexico; at Hoboken, N. J., on *Heurnia* sp. and *Stapelia* sp. in mail from the Union of South Africa; at Washington, D. C., on *Medicago* sp. in mail from Ethiopia; at San Francisco, Calif., on *Cypripedium insigne*, an orchid, in cargo from India.

- Stagonospora* sp., at Boston, Mass., on *Stipa tenacissima* in cargo from Italy.
- Streptomyces* sp., at Philadelphia, Pa., on celery in stores from Sweden.
- Tridens* sp., at Hoboken, N. J., on *Cereus nudiflorus* in mail from Cuba.
- Uredo* sp., at Washington, D. C., on *Piper* sp. in cargo from Colombia.
- Verticillium* sp., probably *candidulum* Sacc. var. *binotianum* Sacc., at Honolulu, Hawaii, on *Phalaenopsis aphrodite*, an orchid, in cargo from the Philippines.
- Volutella* sp., at San Pedro, Calif., on ginger in cargo from Japan.
- Incompletely determined nematodes worthy of mention were:
- Aphelenchoides*, new species, at El Paso, Tex., in garlic in cargo from Mexico;
- Aphelenchoides* sp. (undescribed) at Hoboken, N. J., in *Solanum tuberosum* var. "Furore" in cargo from the Netherlands.
- Aphelenchus*, new species, at El Paso, Tex., in wheat in mail from Yugoslavia.
- Ditylenchus* sp., at Brownsville, Tex., El Paso, Tex., and Laredo, Tex., in garlic in cargo from Mexico; at Hoboken, N. J., in bulbs of *Chionodoxa* sp., in corms of *Colchicum* sp., and in bulbs of *Tigridia* sp. in cargo from the Netherlands.
- Helicotylenchus*, new species, at New York, N. Y., in soil with rockcress plants in baggage by air from Germany.
- Heterodera* sp., probably *carotae* Jones at San Juan, P. R., in soil with potatoes in stores from Spain; *Heterodera* sp., possibly *goettingiana* Liebscher, at New York, N. Y., in soil with bagging in cargo from the Netherlands and in soil with ivy plants in baggage from France and at Seattle, Wash., in soil with potatoes in stores from Australia; *Heterodera* sp., probably *trifolii*, at San Juan, P. R., in soil with potatoes in cargo from Spain.
- Heterodera* sp. at San Pedro, Calif., in soil with Amaryllidaceae bulbs in mail from Ireland; at New York, N. Y., in soil on army vehicles from Belgium and Germany and with asparagus in baggage and mail from Germany; at Baltimore, Md., in soil with bagging in cargo from England; at New York, N. Y., in soil with bagging in cargo from Belgium, Denmark, England, France, Germany, Italy, the Netherlands, Scotland, and Switzerland; at Norfolk, Va., in soil with bagging in cargo from Belgium, England, Germany, the Netherlands, and Scotland; at Philadelphia, Pa., in soil with bagging in cargo from Belgium, the Netherlands, and Scotland; at San Pedro, Calif., in soil with burlap bags in cargo from the Netherlands, at New York, N. Y., and at Philadelphia, Pa., in sand and soil ballast from England and Scotland; at Blaine, Wash., in soil with potatoes in stores from Tasmania; at Charleston, S. C., in soil with leek and potatoes in stores from the Netherlands; at Boston, Mass., in soil with chrysanthemum plants in baggage from England, in soil with camellia and rose plants in baggage by air from Italy, in soil with brunsvigia bulbs and unidentified herbs in baggage by air from the Azores; at Hoboken, N. J., in soil with plant material for propagation from England, France, Germany, Italy, the Netherlands, Scotland, Switzerland, and Yugoslavia and in soil with potatoes in cargo from the Netherlands; at New York, N. Y., in soil with an army vehicle from Germany, in soil with dasheens in cargo from the Azores, in soil with forget-me-not plants in quarters by air from England, in soil with onions in cargo from Chile, in soil with potatoes in cargo from Spain, in soil with shamrocks in cargo by air from Ireland, in soil with loquat cuttings in baggage from Lebanon, in soil with *Pelargonium* sp. in baggage from England, in soil with potatoes in baggage by air from Germany, in soil with salsify roots in baggage from Belgium, in soil with potatoes in stores from the Netherlands and Scotland, with plant material for propagation from the Azores, Denmark, England, France, Germany, Greece, Italy, the Netherlands, Scotland, and Switzerland, and in soil with potatoes in baggage from the Azores, England, and Germany; at Norfolk, Va., in soil with carrots in stores from the Netherlands, in soil with parsnips in stores from Ireland, in soil, with potatoes in stores from Belgium, Brazil, Denmark, the Netherlands, and Norway; at Philadelphia, Pa., in soil with cabbage in stores from Portugal, in soil with carrots in stores from England, in soil with gobo roots in stores from Japan, in soil with leeks in stores from Norway, in soil with unknown plants in quarters from France, in soil with shamrocks in mail from Ireland, in soil with potatoes in stores from Australia, Belgium, Brazil, Egypt, England, Germany, Italy (?), the Netherlands, New Zealand, Spain, and Sweden, in soil with plant material for propagation from Germany, Japan, Morocco, the Netherlands, Sweden, and Yugoslavia; at San Francisco, Calif., in soil with potatoes in stores from Australia, England, and Peru, in soil with plant material for propagation from Germany, Italy, the Netherlands, and Yugoslavia; at San Pedro, Calif., in soil with beets and parsnips in stores from England, in soil with white clover in mail from Ireland; at San Juan, P. R., in soil with potatoes in cargo

from Spain; at Seattle, Wash., in soil with carrots in stores from the Netherlands, in soil with plant material for propagation from Canada, England, Germany, Ireland, and Japan.

Hoplolaimus, new species, at Honolulu, Hawaii, in roots of *Asparagus myriocladus* in express from Japan.

Possibly an undescribed species of *Meloidogyne* at San Pedro, Calif., in the root of an unidentified plant in baggage from Salvador; *Meloidogyne* sp., at Hoboken, N. J., in the root of *Aster yunnanensis* in cargo from the Netherlands and in *Begonia multiflora* in cargo from Belgium; at Seattle, Wash., in *Bletilla hyacinthina*, an orchid, in cargo from Japan; at San Pedro, Calif., in carrot in stores from Japan; at Hoboken, N. J., in dahlia tubers in mail from India and in dahlia tubers in cargo from the Netherlands; at Laredo, Tex., in dahlia tubers in mail from Israel and in *Lophophora williamsii* in cargo from Mexico; at Hoboken, N. J., in root of *Passiflora* sp. in baggage from Bermuda and in *Sinningia* sp. in cargo from the Netherlands; at Philadelphia, Pa., in potato in stores from Portugal; at Hoboken, N. J., in root of *Viburnum* sp. in cargo from Belgium.

Paraphelenchus sp., at Seattle, Wash., in *Bletilla hyacinthina* in cargo from Japan.

Pratylenchus sp., at Washington, D. C., in soil with tulip and narcissus bulbs in cargo from Germany.

Rotylenchus sp., at New York, N. Y., in soil with crocus plants in baggage by air from the Netherlands.

A tylenchid, new genus, at Washington, D. C., in soil around dracaena plants in air express from the French Cameroons.

Tylenchus sp., at New York, N. Y., in *Allium neapolitanum* in cargo from Turkey; at Seattle, Wash., in *Bletilla* sp. in cargo from Japan.

Xiphinema sp., at New York, N. Y., in soil with *Aloe* sp. plants in baggage by air from Italy.

A total of 827 incompletely determined pathogens were recorded during the year.

Summary of Numbers of Interceptions Listed in Main Table

Country	Insect	Disease	Country	Insect	Disease

¹ This total represents only pests of known or potential plant-quarantine importance. The total of all interceptions made during the year was 15,311.

NOTE.—Interceptions were also made from American Samoa, Antigua, Belgian Congo, Burma, Caicos Islands, Cook Islands, Cyprus, French Cameroons, Guadeloupe, Iran, Madagascar, New Guinea, New Hebrides, Okinawa, St. Kitts, St. Vincent, Samoa, Solomon Islands, Transvaal, and Tunisia.

Pests (insects) collected and reported from July 1, 1951, through June 30, 1952

[An asterisk indicates State inspection]

Insect and host	Country of origin	Number of interceptions in—			Collected in—
		Consumption	Nonentry	Propagation	
<i>Acala schalleriana</i> (F.) (Tortricidae):					
<i>Rhododendron indicum</i> (indica azalea)	Belgium			1	N. J.
<i>Acalymma trivittata</i> (Mann.) (Chrysomelidae):					
<i>Lactuca sativa</i> (lettuce)	Mexico	1			Ariz.
<i>Acalypta parvula</i> (Fall.) (Tingidae):					
Forest litter, moss, and soil used as packing material	Spain			1	N. Y.
<i>Acanthoscelides griscolus</i> (Fall.) (Bruchidae):					
<i>Sesbania</i> sp.	Mexico			1	Calif.
<i>Acanthoscelides spinipes</i> (Er.) (Bruchidae):					
<i>Acacia</i> sp.	Greece	1		1	Mass., N. Y.
<i>Achatina fulica</i> Fer. (Mollusca):					
Returned military equipment	Formosa, Guam, Philippines	7			Calif.*
Scrap metal	Guam, South Pacific	2			Calif., Tex.
<i>Adoretus sinicus</i> Burm. (Scarabaeidae):					
Orchid	Hawaii	1			Hawaii.
<i>Adozophyes orana</i> (F. R.) (Tortricidae):					
<i>Syringa</i> sp. (lilac)	Netherlands	9			N. Y.
<i>Aeolus vermiculatus</i> Champion (Elateridae):					
Orchid	Mexico			1	Tex.
<i>Agallia lingua</i> Van D. (Cicadellidae):					
<i>Ananas comosus</i> (pineapple)	Mexico	1			Tex.
<i>Aganactesis indecora</i> (Dyar) (Galleriidae):					
<i>Cassia fistula</i> (golden-shower)	Jamaica	1			Fla.*
<i>Agrotis ypsilon</i> (Rott.) (Phalaenidae):					
<i>Brassica oleracea capitata</i> (cabbage)	Australia		1		Tex.
<i>Alcidodes dentipes</i> (Oliv.) (Curculionidae):					
<i>Ipomoea batatas</i> (sweetpotato)	Sierra Leone		1		Pa.
<i>Aleurocanthus woglumi</i> Ashby (Aleyrodidae):					
<i>Citrus aurantifolia</i> (sour lime)	Cuba, Mexico	15			Ariz., Fla.,* Tex.
<i>Citrus limon</i> (lemon)	Mexico	2			Tex.
<i>Citrus reticulata</i> (Mandarin orange)	do	2			Tex.
<i>Citrus sinensis</i> (orange)	do	1			Calif.
<i>Citrus</i> sp.	Jamaica, Mexico, Panama	13			Calif.,* Fla.,* Tex.
<i>Coffea</i> sp. (coffee)	Mexico	2			Ariz., Tex.
<i>Aleuroglandulus emmae</i> Rsl. (Aleyrodidae):					
<i>Impatiens balsamina</i> (?)	do			1	Ariz.
<i>Psidium</i> sp., probably <i>guajava</i>	do			1	Ariz.
<i>Aleurothrixus floccosus</i> (Mask.) (Aleyrodidae):					
<i>Citrus aurantifolia</i> (sour lime)	do	1			Tex.
<i>Aleurotuberculatus jasmini</i> Takah. (Aleyrodidae):					
<i>Jasminum</i> sp.	Philippines			1	Calif.*
<i>Allantus cinctus</i> (L.) (Tenthredinidae):					
<i>Rosa multiflora superba</i>	Netherlands			1	Wash.
<i>Rosa</i> sp.	Belgium, Netherlands			2	N. J.
<i>Amitermes unidentatus</i> Wasm. (Termitidae):					
<i>Khaya</i> sp.	Gold Coast	1			Md.
<i>Amorbia emigratella</i> Busck (Tortricidae):					
<i>Capsicum frutescens grossum</i> (bell pepper)	Mexico	1			Tex.
<i>Gladiolus</i> sp.	do	1			Tex.
<i>Anastrepha ludens</i> (Loew) (Tephritidae):					
<i>Citrus aurantifolia</i> (sweet lime)	do	6			Tex.
<i>Citrus aurantium</i> (sour orange)	do		1		Tex.
<i>Citrus limon ponderosa</i>	do	1			Tex.
<i>Citrus paradisi</i> (grapefruit)	do	7			Tex.
<i>Citrus reticulata</i> (Mandarin orange)	do		2		Ala., Tex.
<i>Citrus sinensis</i> (orange)	Central America, Guatemala, Mexico	157	14		Ariz., Calif.,* La., Tex.

Hosts and Insects

- ACACIA:**
Acanthoscelides spinipes (Coleoptera)
- ACER:**
Parlatoria pyri (Homoptera)
- ACHRAS:**
Anastrepha serpentina (Diptera)
Aspidiotus destructor (Homoptera)
- ARIDES:**
Parlatoria pseudaspidiotus (Homoptera)
Pinnaspis scrobicularum (Homoptera)
- AESCULUS:**
Lecanium coryli (Homoptera)
- AGAVE:**
Chrysomphalus agavis (Homoptera)
- ALLIUM SATIVUM:**
Brachycerus albidentatus (Coleoptera)
Brachycerus algerius (Coleoptera)
Dyspessa ulula (Lepidoptera)
- ALPINIA:**
Pulvinaria psidii (Homoptera)
- ANANAS:**
Agallia lingula (Hemiptera)
Cyclocephala cubana (Coleoptera)
Iridomyrmex humilis (Hymenoptera)
Monomorium destructor (Hymenoptera)
Opogona aurisquamosa (Lepidoptera)
Pheidole megacephala (Hymenoptera)
Platynota rostrana (Lepidoptera)
Ribua innoxia (Lepidoptera)
Sisamnes contractus (Hemiptera)
"Targionia" bromiliae (Homoptera)
- ANNONA:**
Ceratitis capitata (Diptera)
Stenomoma anonella (Lepidoptera)
Talponia batesi (Lepidoptera)
- ANTHURIUM:**
Cero-plastes rubens (Homoptera)
- ANTIRRHINUM:**
Haplothrips gowdeyi (Thysanoptera)
- APIUM:**
Mamestra brassicae (Lepidoptera)
- RACEAE:**
Aspidiotus destructor (Homoptera)
Aspidiotus palmarum (Homoptera)
Pinnaspis buxi (Homoptera)
Vinsonia stellifera (Homoptera)
- ARRACACIA:**
Anuraphis tulipae (Homoptera)
- ASPASIA:**
Vinsonia stellifera (Homoptera)
- ASPLENIUM:**
Ferrisia virgata (Homoptera)
- ASTER:**
Microcephalothrips abdominalis (Thysanoptera)
- BAMBOO:**
Asterolecanium bambusae (Homoptera)
Dinoderus brevis (Coleoptera)
- BAUHINIA:**
Caryedon fuscus (Coleoptera)
- BERZELIA:**
Pseudothrips glaucus (?) (Thysanoptera)
- BETA:**
Gnorimoschema ocellatella (Lepidoptera)
Sitona lineata (Coleoptera)
- BRASSAVOLA:**
Furcaspis bifurmis (Homoptera)
Vinsonia stellifera (Homoptera)
- BRASSICA:**
Conchaspis angraci (Homoptera)
- BRASSICA NAPOBRASSICAE:**
Mamestra brassicae (Lepidoptera)
- BRASSICA OLERACEA BOTRYTIS:**
Evergestis forficatus (Lepidoptera)
Phytomyza rufipes (Diptera)
- BRASSICA OLERACEA CAPITATA:**
Agrotis ypsilon (Lepidoptera)
Deroceras reticulatum (Mollusca)
Evergestis forficatus (Lepidoptera)
Evergestis rimosalis (Lepidoptera)
Mamestra brassicae (Lepidoptera)
Pieris brassicae (Lepidoptera)
- BRASSICA RAPA:**
Pheidole megacephala (Hymenoptera)
- BROMELIAD:**
Lema quinquenotata (Coleoptera)
Microvelia oaxacana (Hemiptera)
- BROUGHTONIA:**
Asterolecanium epidendri (Homoptera)
- BRYOPHYLLUM:**
Haplothrips gowdeyi (Thysanoptera)
Pulvinaria psidii (Homoptera)
- BUXUS:**
Eriophyes canestrinii (Arachnida)
- ACTUS:**
Ceratitis capitata (Diptera)
Cryphula apicatus (Hemiptera)
Dysdercus mimulus (Hemiptera)
Lepidosaphes philococcus (Homoptera)
Sireonotus luteiceps (Hemiptera)
- CAESALPINIA:**
Mimosestes dominicanus (Coleoptera)
- CALLUNA:**
Aphis callunae (Homoptera)
Gelechia ericetella (Lepidoptera)
Micrelus ericae (Coleoptera)
Orthotylus ericetorum (Hemiptera)
Taeniothrips atratus (Thysanoptera)
Taeniothrips ericae (Thysanoptera)
- CALOCARPUM:**
Anastrepha serpentina (Diptera)
- CAMELLIA:**
Parlatoria camelliae (Homoptera)
Pinnaspis uniloba (Homoptera)
- CANAVALIA:**
Lampides boeticus (Lepidoptera)
Marcia testulalis (Lepidoptera)
Taeniothrips hawaiiensis (Thysanoptera)
- CAPSICUM:**
Amorbia emigratella (Lepidoptera)
Arvelius albopunctatus (Hemiptera)
Dacus cucurbitae (Diptera)
Dacus dorsalis (?) (Diptera)
Faustinus cubae (Coleoptera)
Gnorimoschema gudmannella (Lepidoptera)
Platynota rostrana (Lepidoptera)
Pyrausta nubilalis (Lepidoptera)
- CARALLUMA:**
Asterolecanium stentae (Homoptera)
- CARICA:**
Cryptoblabes gnidiella (Lepidoptera)
Toxotrypana curvicauda (Diptera)
- CASSIA:**
Aganactesis indecora (Lepidoptera)
- CASTANEA:**
Aspidiotus cryptoxanthus (Homoptera)
Cryptoblabes gnidiella (Lepidoptera)
Curculio elephas (Coleoptera)
Hemimene juliana (Lepidoptera)
Laspeyresia splendana (Lepidoptera)
- CATASETUM:**
Ferrisia virgata (Homoptera)
- CATTLEYEA:**
Asterolecanium epidendri (Homoptera)
Eurytoma orchidearum (Hymenoptera)
Furcaspis bifurmis (Homoptera)
Pseudischaspis alienus (Homoptera)
Vinsonia stellifera (Homoptera)
- CELOSIA:**
Loxostege similis (Lepidoptera)
- CENTAUREA:**
Pachyzancla bipunctalis (Lepidoptera)
- CEPHALOCEREUS:**
Prostephanus truncatus (Coleoptera)
- CERCIDIUM:**
Pseudodiaspis yuccae (Homoptera)
- CEREUS:**
Lepidosaphes philococcus (Homoptera)
- CHRYSANTHEMUM:**
Cyrtopeltis varians (Hemiptera)
Frankliniella formosae (Thysanoptera)
Pachyzancla bipunctalis (Lepidoptera)
Pheidole megacephala (Hymenoptera)
Pyrausta nubilalis (Lepidoptera)
Sitona lineata (Coleoptera)
Taeniothrips hawaiiensis (Thysanoptera)
- CHRYSOPHYLLUM:**
Aspidiotus herculeanus (Homoptera)
Coccus viridis (Homoptera)
- CITRUS AURANTIFOLIA:**
Aleurocanthus woglumi (Homoptera)
Aleurothrips floccosus (Homoptera)
Anastrepha ludens (Diptera)

Hosts and Insects—Continued

CITRUS AURANTIFOLIA—Continued

- Chrysomphalus personatus* (Homoptera)
- Leucaspis cockerelli* (Homoptera)
- Parlatoria cinerea* (Homoptera)

Pyrausta nubilalis
Rhagoletis cerasi
Sesamia cretica
Trialeurodes lauri

JAMAICA:

Aganactes indecora
Aleurocanthus woglumi
Anastrepha mombinpraeoptans
Asterolecanium epidendri
Asterolecanium pustulans
Coccus viridis
Cylas formicarius var. *elegantulus*
Haplothrips gowdeyi
Leucaspis cockerelli
Leucaspis indica
Monomorium destructor
Palaeopus costicollis
Pectinophora gossypiella
Vinsonia stellifera

JAPAN:

Aspidiotus corticis-pini
Aspidiotus cryptoxanthus
Aspidiotus degeneratus
Aspidiotus destructor
Callidium rufipenne
Ceroplastes rubens
Chilo simplex
Dialeurodes citri
Eulachnus piniformosanus (?)
Fiorinia japonica
Frankliniella formosae
Laspeyresia splendana
Lepidosaphes conchiformis
Lepidosaphes pallida
Malacosoma neustria (?)
Maruca testulalis
Oryctonia jucunda
Parlatoria camelliae
Parlatoria chinensis
Parlatoria pyri
Pentamerisimus oregonensis
Phenacaspis fujicola
Pinnaspis uniloba
"Pulaspis" pini
Protaetia orientalis
Pseudococcus pini
Pyrausta nubilalis
Scepticus insularis
Scotinophara lurida
Spondylis buprestoides
Stephanitis pyrioides
Taeniothrips hawaiiensis
Unaspis ganonensis

JAVA:

Aulacaspis tegalensis

JERUSALEM:

Anuraphis tulipae

KOREA:

Grapholitha molesta

LEBANON:

Bruchus dentipes
Ceratitis capitata
Dacus oleae
Deroceras reticulatum
Lepidosaphes ficus

LIBERIA:

Rostriophytes cornutus
Minthea obsita
Xyloperthella crinitarsis

LIBYA:

Dacus oleae

MADEIRA ISLANDS:

Ceratitis capitata

Iridomyrmex humilis

MARSHALL ISLANDS:

Aonidiella inornata

MEXICO:

Acalymma trivittata
Acanthoscelides griscolus
Aeolus vermiculatus
Agallia lingula
Aleurocanthus woglumi
Aleuroglandulus emmae
Aleurothrixus floccosus
Ambria emigratella
Anastrepha ludens
Anastrepha mombinpraeoptans
Anastrepha serpentina
Anastrepha striata
Arvelius albopunctatus
Aspidiotus destructor
Aspidiotus palmarum
Asterolecanium agavis
Asterolecanium bambusae
Asterolecanium pustulans
Aufesius impressicollis
Bemisia tabaci
Capaneus tetricus
Chrysomphalus albopictus ?
Chrysomphalus personatus
Chrysomphalus umbriferus
Coccotrypes dactyliperda
Conotrachelus aguacalae
Conotrachelus perseae
Cosmopolites sordidus
Crochus scabrosus
Cryptophila apicalis
Cylas formicarius var. *elegantulus*
Cyrtopeltis varians
Dactylopius coccis
Deloyala guttata
Delphacodes dissipata
Diabrotica lepida
Diorymerellus laevi-margo
Dysdercus mimulus
Dysdercus obliquus
Epilachna varivestis
Epinotia opposita
Eustrophinus marginatus
Evergestis rimosalis
Exptochiomera albo-maculata
Exptochiomera formosa
Ferrisia virgata
Frankliniella fortissima
Galgupha texana
Gerstaeckeria mutillaria
Gnori-moschema gudmannella
Gnori-moschema lauernella
Heilipus caecus
Hymenia perspectalis
Isorhinus depressus
Isorhinus undatus
Lardoglyphus zacheri
Lema quinque-notata
Lepidosaphes philococcus
Ligyrocoris abdominalis
Ligyrocoris aurivilliana
Ligyrocoris nitidicollis

Countries of Origin and Insects—Continued

MEXICO—Continued

Lineodes integra
Lorostege similalis
Microvelia oaxacana
Monanthia monotropidia
Mormidea cubrosa
Myodocha longicollis
Neoleucinodes elegantalis
Pachygrontha oedancalodes
Pachyzancla bipunctalis
Paraleyrodus goyabae (?)
Parlatoria cinerea

Hosts and Diseases

ABIES:

Sclerotinia kernerii (Ascomycetes)

ACER:

Tubercularia vulgaris (Deuteromycetes)

AERIDES:

Diplodia paraphysaria (Deuteromycetes)

AGAPANTHUS:

Meloidogyne incognita var. *acrita* (Nematoda)

AGAVE:

Botryosphaeria agaves (Ascomycetes)

Colletotrichum agaves (Deuteromycetes)

Coniothyrium concentricum (Deuteromycetes)

Microdiplodia agaves (Deuteromycetes)

Stagonospora macrospora (Deuteromycetes)

AGROPYRON:

Selenophoma donacis (Deuteromycetes)

ALLIUM CEPA:

Mycosphaerella schoenoprasii (Ascomycetes)

ALLIUM FISTULOSUM:

Mycosphaerella schoenoprasii (Ascomycetes)

ALLIUM SATIVUM:

Sclerotium cepivorum (Deuteromycetes)

Tylenchus allii (Nematoda)

Tylenchus putrefaciens (Nematoda)

ANANAS:

Curvularia lunata (Deuteromycetes)

ANETHUM:

Cercospora anethi (Deuteromycetes)

ANTHURIUM:

Macrophoma anthurii (Deuteromycetes)

ARACHIS:

Cercospora arachidicola (Deuteromycetes)

ARAUCARIA:

Botryosphaeria berengeriana f. *araucariae* (Ascomycetes)

Botryosphaeria ribis (Ascomycetes)

Cryptospora longispora (Ascomycetes)

Gloeosporium araucariae (Deuteromycetes)

ARBUTUS:

Septoria unedonis (Deuteromycetes)

ASPARGUS:

Meloidogyne incognita (Nematoda)

ASTILBE:

Thielaviopsis basicola (Deuteromycetes)

BAMBUSEAE:

Scirrhodopsis bambusae (Phycomycetes)

BERBERIS:

Hendersonia sarmentorum (Deuteromycetes)

Phyllosticta mahonicola (Deuteromycetes)

BETA:

Cercospora beticola (Deuteromycetes)

Meloidogyne incognita (?)

Ramularia beticola (Deuteromycetes)

Uromyces betae (Promycetes)

BLETTILA:

Meloidogyne arenaria (Nematoda)

Meloidogyne javanica (Nematoda)

BOEHMERIA:

Pyrenochaeta erysipoides (Deuteromycetes)

BORASSUS:

Graphiola borassi (Promycetes)

BOTHRIOCHLOA:

Cerebella andropogonis (Deuteromycetes)

UNITED STATES DEPARTMENT OF AGRICULTURE

AGRICULTURAL RESEARCH SERVICE

PLANT QUARANTINE BRANCH

SERVICE AND REGULATORY ANNOUNCEMENTS

LIST OF INTERCEPTED PLANT PESTS, 1953

(List of Pests Recorded from July 1, 1952, through June 30, 1953 as Intercepted in, on, or with Plants and Plant Products Entering United States Territory.)

Compiled by

JUDITH HUNT

Plant Quarantine Aid

INTRODUCTION

This report summarizes the records of insect pests, plant pathogens, and certain other organisms found in, on, or with plants and plant products (1) imported, (2) offered for but refused entry, (3) held as ships' stores, etc., and hence not offered for entry through customs, (4) offered for entry for immediate transportation and exportation in bond, and (5) in domestic shipments between the American Virgin Islands, Hawaii, and Puerto Rico and the mainland. It covers the fortieth year for which interception lists have been issued.

Comprising this list are insects and plant diseases of known or potential plant quarantine importance with a few diseases of particular interest added even though they are rather widely distributed in the United States.

Some collections made late in the year are included in the report for the following year, since determinations cannot be obtained immediately for all of them. Occasionally determinations are delayed for longer periods. The data for this list were obtained from routine reports by personnel of the Plant Quarantine Branch supplemented by information supplied by State and Customs officials. The States of California and Florida maintain staffs of specialists who identify a large proportion of the material collected at their ports. Specialists of the Horticultural Crops Research Branch determine many of the difficult or unusual pathogens collected at the ports.

All scientific names are reviewed by appropriate specialists in the Department to assure conformance to the international rules of nomenclature.

Although every effort is made to give the correct origin for all collections listed, the alleged origin of all host-plant materials cannot be verified. Questionable items are therefore omitted or the origin is listed as unknown.

Since the great increase in air-cargo transportation, a proportionally large number of importations of various plants, plant products, seeds, fruits, rhizomes, corms, and bulbs have arrived rapidly from all parts of the world. The oat nematode is now included with the golden nematode and fruit flies in the category of the more important pests.

INTERCEPTIONS FROM AIR-BORNE MATERIAL

Important plant pests unknown in the United States were intercepted arriving from their native homes where they cause serious damage to agriculture. Some of the most injurious insects, nematodes, and plant diseases intercepted arrived in, on, or with air-borne fruits and plant material. During the year 3,529 interceptions of insects were made in baggage, express, freight, mail, and stores on imported plant parts or as stowaways and 444 interceptions of plant diseases.

Some important insects intercepted in air-borne material were:

Adoxophyes orana on cut flowers of lilac in cargo from Denmark, the Netherlands, and Sweden.

The citrus blackfly (*Aleurocanthus woglumi*) on lime leaf in baggage from Mexico.

Anastrepha fraterculus in guava in baggage from Mexico, in mango in baggage from Nicaragua; *A. ludens* in cherimoya in baggage from Honduras and in orange in baggage and quarters from Mexico; *A. mombinpraeoptans* in guava in baggage from Puerto Rico, in hog plum in baggage from Jamaica, in mangoes in baggage from the Bahamas, Costa Rica, Cuba, Dominican Republic, Guatemala, Haiti, Jamaica, Mexico, Nicaragua, Salvador, and Trinidad, in yellow mombins in baggage from Nicaragua and Salvador; *A. mombinpraeoptans* (?) in guava in baggage from Puerto Rico and in yellow mombin in baggage from Trinidad; *A. serpentina* in sapodilla in baggage from Guatemala; *A. striata* in guavas in baggage from Guatemala and Panama; *A. suspensa* in guavas in baggage and mail from Puerto Rico and in mango in baggage from Cuba.

Caryedon fuscus in golden-shower seed pod in preflight inspection of baggage leaving Hawaii for the mainland.

The Mediterranean fruit fly (*Ceratitidis capitata*) in *Annona* sp. in baggage from the Madeira Islands, in apples in baggage from the Azores and Yugoslavia, in coffee berries in baggage from Brazil, in date in baggage from Lebanon, in guava in baggage from Portugal, in kaki persimmon in baggage from Italy, in loquats in baggage from the Madeira Islands and Portugal, in medlar in baggage from Italy, in orange in baggage from Malta, in orange in stores from an unknown origin, in peaches in baggage from France and Portugal, in peaches in stores from France and Spain, in pear in baggage from Portugal, in persimmon in baggage from Italy, in plum in stores from France, in pricklypear in baggage from Italy, and in quince in baggage from Turkey; *C. capitata* (?) in *Annona* sp. in baggage from the Azores, in apple and fig in baggage from Portugal, in guava in baggage from the Azores, in orange in stores from Israel, and in peach in baggage from Italy.

The Asiatic rice borer (*Chilo simplex*) in rice straw in baggage from Japan.

The banana root borer (*Cosmopolites sordidus*) in banana in baggage from Guadeloupe.

Cylas formicarius var. in sweetpotato in cargo from Thailand.

Dacus caudatus in fruit and seed of *Macrozanonia macrocarpa* in cargo from Indonesia; the Oriental fruit fly (*D. dorsalis*) in avocado, coffee, guava, India almond, and mango in preflight inspection of baggage leaving Hawaii for the mainland, in box of anthuriums in preflight inspection of cargo leaving Hawaii for the mainland; *D. dorsalis* (?) in mango in preflight inspection of baggage leaving Hawaii for the mainland; *D. oleae* in olive in baggage from Italy, Lebanon, Portugal, Spain, and Syria.

Dysdercus flavolimbatus on palm fronds in cargo from Mexico.

Epinotia opposita in string bean in baggage from Mexico.

Ereunetis flavistriata in coconut in preflight inspection of baggage leaving Hawaii for the mainland.

Presumably, the Oriental fruit moth (*Grapholitha molesta*) in peach in baggage from Japan.

A bean pod borer, *Maruca testulalis*, in a lei of mauna loa flowers in preflight inspection of baggage leaving Hawaii for the mainland.

Paraputo taraktogoni on *Curcuma amada* tuber in express from India.

The pink bollworm (*Pectinophora gossypiella*) in cottonseed in express from the American Virgin Islands, in cargo from Italian Somaliland, and in preflight inspection of cottonseed in baggage leaving Hawaii for the mainland, in okra in baggage from Haiti, Trinidad, and Turkey.

Polychrosis botrana in grapes in baggage from Germany and Italy.

Prays oleellus in olive in baggage from Italy.

Rhagoletis cerasi in cherries in baggage from France, Germany, and Italy, in

cherries in stores from France, Italy, the Netherlands, and Portugal; the apple maggot (*R. pomonella*) in apple in stores from Mexico.

The papaya fruit fly (*Toxotrypana curvicauda*) in papaya in baggage from Panama.

Interceptions of air-borne plant pathogens not believed to be established in the United States or of limited distribution were as follows:

Cercospora pini-densiflorae on Japanese white pine in cargo from Japan.

Coniothyrium hellebori on Christmas-rose in cargo from the Netherlands.

Cryptospora longispora on Norfolk-Island-pine in cargo from Australia.

Puccinia horiana on *Chrysanthemum morifolium* and *Chrysanthemum* sp. in baggage from Japan and on *Chrysanthemum* sp. in quarters from Japan; *P. kusanoi* on bamboo leaf in baggage from the Philippines; *P. ornithogalli-thyrsoideis* on chinkerichiee in express from the Union of South Africa.

Urocystis gladiolicola on corms of *Gladiolus tristis* in mail from Ireland.

Uromyces alyziae on alyxia in preflight inspection of baggage and cargo leaving Hawaii for the mainland.

Citrus canker (*Xanthomonas citri*) on lemon in baggage from Truk Islands.

Nematodes were also found in air-borne material as follows:

The oat nematode (*Heterodera avenae*) in soil with narcissus and galanthus bulbs and assorted plants in baggage from Germany, in soil with *Malus* sp. roots in cargo from Italy, in soil with geranium plants in baggage from Sweden, in soil with oleander plants in baggage from Yugoslavia; *H. punctata* in soil with carnation plants in baggage from Austria, in soil with delphinium plants in baggage from England, in soil with a beech tree in baggage from Ireland, in soil with unidentified plants in baggage from Italy; the golden nematode (*H. rostochiensis*) in soil with amaryllis bulbs in baggage from Denmark, in soil with lavender plants in baggage from England, in soil with potatoes in baggage from Germany, in soil with heather in baggage and mail from Scotland, in soil with miniature rose plants in baggage from Scotland.

NOTES ON INSECTS INTERCEPTED

FRUIT FLIES

The following fruit flies were intercepted:

Two adults of *Anastrepha distincta* with cargo shipment of bananas from Panama; *A. fraterculus* in orange in stores from Brazil, in mango in baggage from Mexico and in mango in air baggage from Nicaragua, in guava, peach, and pear in baggage from Mexico; *A. fraterculus* (?) in guava in air baggage from Nicaragua and in sapodilla in baggage from Venezuela; the Mexican fruit fly (*A. ludens*) in avocado, white sapote (*Casimiroa edulis*), citron, and grapefruit in baggage from Mexico, in cherimoya in air baggage from Honduras, in oranges in baggage and stores from Guatemala and Mexico, in oranges in air baggage, air quarters, quarters, and stores from Mexico, in garbage can (host unknown) from Mexico, in mangoes in baggage and stores from Mexico, in peach, pear, pomegranate, quince, sapote, sour orange, and sweet lime in baggage from Mexico; *A. ludens* (?) in orange in air baggage and in orange, pear, and sweet lime in baggage from Mexico; the West Indian fruit fly (*A. mombinpraeoptans*) in cashew nut in cargo from Tortola, in grapefruit in stores from Brazil, in guava in air baggage from Puerto Rico and in guava in baggage from Honduras, in mangoes in air baggage from the Bahamas, Costa Rica, Cuba, Dominican Republic, Guatemala, Haiti, Jamaica, Mexico, Nicaragua, Salvador, and Trinidad, in hog plum in air baggage from Jamaica, in jobo de la India in stores from Guadeloupe, in mangoes in baggage from Dominican Republic, Mexico, and Panama, in mango in mail from Puerto Rico, in mangoes in stores from Honduras, Mexico, and Nicaragua, in mango in quarters from Jamaica, in plum in baggage from Mexico, in purple mombin in cargo from the British Virgin Islands, in rumberry eugenia in cargo from Jost Van Dykes and Tortola, in yellow mombins in air baggage from Nicaragua and Salvador; *A. mombinpraeoptans* (?) in guava in air baggage from Puerto Rico and in yellow mombin in stores from Trinidad; *A. parallela* (?) in grapefruit in stores from Brazil; *A. serpentina* in mamey and mango in baggage from Mexico, in orange in stores from Brazil, in sapodilla in air baggage from Guatemala, and in sapodilla in baggage from Trinidad; *A. striata* in guavas in air baggage from Guatemala and Panama; *A. suspensa* in grapefruit in stores from Trinidad, in mango in air baggage from Cuba, in guavas in air baggage and air mail from Puerto Rico, and in guavas in baggage from Cuba and Mexico.

The Mediterranean fruit fly (*Ceratitidis capitata*) in *Annona* sp. in air baggage from the Madeira Islands. in apples in air baggage from the Azores and Yugo-

slavia, in apple in baggage from Italy, in coffee berries in air baggage from Brazil and in coffee berries in baggage from Hawaii, in date in air baggage from Lebanon, in fig in mail from France, in grapefruit in stores from Egypt, in guava in air baggage from Portugal, in kaki persimmon in air baggage from Italy, in lemon in baggage from Italy, in loquats in air baggage from the Madeira Islands and Portugal, in Mandarin oranges in baggage and cargo from Italy, in medlar in air baggage from Italy, in orange in air baggage from Malta, in orange in baggage from Italy, in oranges in quarters from Italy and Spain, in orange in air stores from an unknown origin, in oranges in stores from Brazil, Italy, and Morocco, in peaches in air baggage from France and Portugal, in peaches in air stores from France and Spain, in pear in air baggage from Portugal, in pear in baggage from Italy, in persimmon in air baggage from Italy, in plum in air stores from France, in prickly-pear in air baggage and baggage from Italy, in quince in air baggage from Turkey, in quince in baggage from Greece and Italy, in strawberry guava in mail from the Azores; *C. capitata* (?) in *Annona* sp. in air baggage from the Azores, in apples in air baggage from the Azores and Portugal, in apple in baggage from the Union of South Africa, in coffee berries in air baggage from Brazil and in coffee berries in baggage from Hawaii, in fig in air baggage from Portugal, in grapefruit in stores from Italy, Mozambique, and the Union of South Africa, in guava in air baggage from the Azores, in loquat in mail from the Azores, in Mandarin orange in baggage from Israel, in orange in baggage from Malta, in orange in air stores from Israel, in oranges in stores from Italy, Morocco, Spain, and an unknown origin, in peaches in air baggage and baggage from Italy, in peach in stores from the Union of South Africa, in pear in baggage from Italy, in pepper in stores from Hawaii, in persimmon, pomegranate, and quince in baggage from Italy.

Dacus caudatus in *Macrozanonia macrocarpa* in air cargo from Indonesia; the melon fly (*D. curcurbitae*) in balsam-pear in baggage from the Philippines, in cucumber, pepper, squash, and tomato in stores from Hawaii, in pumpkin in cargo from Hawaii; the Oriental fruit fly (*D. dorsalis*) in avocado in air baggage, mail, and stores from Hawaii, in coffee berries, guava, and India almond in preflight inspection of baggage leaving Hawaii for the mainland, in a box of anthuriums in preflight inspection of cargo leaving Hawaii for the mainland, in guava in baggage and quarters from Hawaii, in mango in preflight inspection of mail leaving Hawaii for the mainland, in tomato in stores from Hawaii, 2 adults in an airplane leaving Hawaii for the mainland; *D. dorsalis* (?) in mango in preflight inspection of baggage leaving Hawaii for the mainland; *D. oleae* in olives in air baggage from Italy, Lebanon, Portugal, Spain, and Syria, in olive in baggage and mail from Italy.

Rhagoletis cerasi in cherries in air baggage from France, Italy, and Germany, in cherries in air stores from France, Italy, the Netherlands, and Portugal; *R. cerasi* (?) in cherry in air baggage from Italy, *R. pomonella* in apples in baggage and air stores from Mexico, in thornapple in baggage from Mexico; *R. pomonella* (?) in apple in baggage from Mexico.

The papaya fruit fly (*Toxotrypana curvicauda*) in papaya in air baggage from Panama, in papaya in cargo from Mexico, and in papaya in stores from Trinidad.

INSECTS OTHER THAN FRUIT FLIES

The following miscellaneous insects of interest were intercepted:

Acrolepia assectella (Hyponomeutidae) in garlic in stores from France.

The citrus blackfly (*Aleurocanthus woglumi*) on leaves of *Citrus* sp. in baggage, cargo, and stores from Mexico, on coffee leaf, grapefruit leaf, leaf of Mandarin orange, orange leaf, and sweet lime leaf in baggage from Mexico and on sour lime leaves in cargo and stores from Mexico.

A curculionid, *Anthonomus rectirostris*, with seed of *Prunus serrulata lannesiana* in mail from Japan.

Antonina graminis (Coccidae) on Bermuda grass in mail from Mexico.

Three curculionids, *Apion aenum* and *A. radiolus* in hollyhock mallow in baggage from Italy and *A. carduorum* in globe artichoke in stores from France and Italy.

Brachycerus albidentatus (Curculionidae) in garlic in baggage and cargo from Italy and *B. algirus* in garlic in cargo from Italy and Spain.

Abruchid, *Bruchus luteicornis*, in vetch seed in cargo from France.

An olethreutid, *Cryptophlebia leucotreta*, in grapefruit and orange in stores from Belgian Congo and the Union of South Africa and in pummelo in quarters and stores from the Union of South Africa.

Cylas formicarius (Curculionidae) in sweetpotatoes in cargo and air stores from India and in sweetpotato in stores from the Straits Settlements; *C. formicarius* var. in sweetpotato in air cargo from Thailand.

A curculionid, *Diaprepes famelicus* var., on cut flowers of hibiscus and lilies in baggage from Bermuda.

Dyspessa ulula (Cossidae) in garlic in cargo from Italy and Spain.

A bean pod borer, *Epinotia opposita*, in string beans in baggage, cargo, and stores from Mexico and in string beans in stores from Peru and Uruguay.

A gelechiid, *Gnorimoschema borsaniella* (?) in pepper in stores from Brazil.

A phalaenid, *Gortyna flavago*, in cardoon in cargo from Italy.

Gymnandrosoma aurantianum (Olethreutidae) in orange in stores from Brazil.

Leucinodes orbonalis (Pyraustidae) in eggplant in stores from the Cape Verde Islands.

A curculionid, *Lixus junci*, in beet in stores from Egypt.

Phyllotreta consobrina (Chrysomelidae) and *P. undulata* in cabbage in stores from France; *P. nigripes* in watercress in air stores from France.

Polychrosis botrana (Olethreutidae) in grapes in air baggage from Germany and Italy.

Prays oleellus (Hyponomeutidae) in olive in air baggage from Italy.

A chrysomelid, *Psylliodes chrysocephala*, in turnip in stores from France.

Rhynchaenus populi (Curculionidae) on lilac in cargo from the Netherlands.

A pentatomid, *Scotinophora lurida*, with rice straw packing in cargo from Japan.

Sesamia cretica (Phalaenidae) in broomcorn in cargo from France, Greece, Italy, and Turkey.

Stenoma catenifer (Stenomidae) in avocado seed in air baggage, baggage, quarters, and stores from Mexico.

A scolytid, *Stephanoderes hampei*, in coffee in mail from Belgian Congo, Brazil, and an unknown origin.

Tortrix excessana (Tortricidae) and *T. postvittana* in apples in cargo from New Zealand.

Vinsonia stellifera (Coccidae) on *Broughtonia* sp. in air cargo from Jamaica, on *Garcinia* sp. in mail from the Canal Zone, and on several different orchids, all for propagation, from the Canal Zone, Jamaica, Panama, Trinidad, and Venezuela.

SNAILS

The giant African snail (*Achatina fulica*) continues to be intercepted with scrap metal and returned war equipment from the South Pacific. Five interceptions were made at San Francisco, Calif., on returned war equipment from Guam, the Philippines, and Saipan, 5 at San Pedro, Calif., on scrap metal and returned war equipment from Guam, and one at Houston, Tex., on scrap army vehicles from Guam or Saipan.

Other injurious snails intercepted and not known to be established in some states were:

Bradybaena similaris with *Anthurium* sp. flowers and tree fern block in preflight inspection of baggage leaving Hawaii for the mainland, with ti leaves during preflight inspection of cargo leaving Hawaii for the mainland and with *Billbergia* sp., fern chips, and *Heliconia* sp. blossoms during preflight inspection of mail leaving Hawaii for the mainland; at Philadelphia, Pa., with celery in stores from Lebanon.

Deroceras reticulatum at Boston, Mass., with cabbage in stores from England, with a stalk of fennel in stores from Belgium and in soil with assorted plants in air baggage from the Azores; at Honolulu, Hawaii with *Cymbidium* sp., an orchid, in air cargo from Australia, with unknown leaves in air baggage from Japan, with lettuce in air quarters from the Philippines; at New York, N. Y., with lettuce in stores from Portugal; at Miami, Fla., with Araceae plants in air baggage from Costa Rica; at New Orleans, La., with cabbage in stores from Spain; at Philadelphia, Pa., with celery in stores from the Netherlands and with cabbage in stores from Italy, New Zealand, and Spain.

Helix aspersa with cut flowers during preflight inspection of baggage leaving Hawaii for the mainland; at Nogales, Ariz., with agave plants in baggage from Mexico.

Limax marginatus at Honolulu, Hawaii with *Chaenomeles* sp. in air baggage from Japan and with cabbage in stores from Spain; *L. maximus* at Philadelphia, Pa., with cabbage in stores from Italy.

Monacha obstructa, not in the United States and probably injurious, at San Pedro, Calif., with vegetables in stores from Lebanon (?).

NOTES ON DISEASES INTERCEPTED

Japan continues to be the origin of the greatest number of interceptions (120) of citrus canker (*Xanthomonas citri*), 74 of which were on oranges, 19 on lemons, 10 on grapefruit, 6 on Mandarin oranges, 3 each on sour oranges and *Citrus* sp., 2 each on pummelo and *Citrus aurantium* var., and 1 on sour lime. Eleven interceptions came from China, 3 on Mandarin oranges and 8 on oranges. India contributed 4 interceptions, all on sour limes. Korrer Island had 2 interceptions, 1 on lime and the other one on orange. Two interceptions on oranges arrived from unknown origin. One came from Ceylon on sour lime, 1 on lemon from Truk Islands, 1 on lemon peel from the Philippines, 1 on orange peel from Saipan, and 1 on lime from the Marianas.

"Cancrosis B" (*Xanthomonas* sp. (?)), another bacterial disease of citrus producing symptoms similar to citrus canker, was intercepted 4 times on lemon in stores from Argentina.

Chrysomyxa rhododendri, a spruce and rhododendron rust, was intercepted 13 times on *Rhododendron ferrugineum* from Switzerland and once from Austria, twice on *Rhododendron* sp. from Switzerland, and once on *R. azaleodendron* from England.

The sweet orange fruit scab (*Elsinoe australis*) was intercepted 107 times. Of these interceptions 42 were from Argentina, 57 from Brazil, 1 from Paraguay, and 7 from Uruguay, on lemon, Mandarin orange, orange, sour lime, and sour orange.

Other interceptions were:

Cercospora angreii on *Odontioda madeline*, an orchid, in cargo from Belgium; *C. handelii* on rhododendron in cargo from Belgium and the Netherlands; *C. pinidensiflorum* on Japanese white pine in air cargo from Japan; *C. rhododendri* on rhododendron in cargo from the Netherlands.

Coleosporium bletiae on *Phajus wallichii*, an orchid, in mail from India.

Coniothyrium cytisellum on *Laburnum watereri* and *Laburnum* sp. in cargo from the Netherlands; *C. hellebori* on *Helleborus lividus* in cargo from England, on *H. niger* in mail from England, and on *Helleborus* spp. in cargo and air cargo from the Netherlands; *C. viburni* on *Viburnum burkwoodi* in cargo from the Netherlands.

Cryptospora longispora on Norfolk-Island-pine in air cargo from Australia.

Gymnosporangium haraceanum on Chinese juniper in cargo and mail from Japan and on juniper in air baggage from Japan; *G. sabiniae* on *Juniperus chinensis* pfitzeriana in cargo from Germany; *G. yamadai* on apple in stores from Japan.

Macrophomina phaseolina on gladiolus in cargo from Japan, on iris rhizome in mail from Turkey, and on *Ixia* spp. in mail from the Union of South Africa.

Ochropsora kraunhiae on wisteria leaf in baggage from Japan.

Phakopsora desmii on cotton leaf in baggage from the Dominican Republic.

Physalosporina sutherlandiae on *Sutherlandia frutescens* in mail from the Union of South Africa.

Puccinia aeluropi on stem and leaf of *Aeluropus* sp. in mail from Turkey; *P. horiana* on *Chrysanthemum morifolium* and *Chrysanthemum* sp. in air baggage and air quarters from Japan; *P. kalchbrenneriana* on chinkerichee in mail from the Union of South Africa; *P. kusanoi* on leaf of *Bambusa* sp. in air baggage from the Philippines; *P. longicornis* on bamboo leaf in baggage from China; *P. ornithogalithyroides* on chinkerichee in air express and mail from the Union of South Africa; *P. tetragonia* var. *austroafricana* on *Tetragonia arbuscula* in mail from the Union of South Africa; *P. vagans* on *Epilobium* sp. leaf in mail from Turkey.

Sphaceloma fawcetti var. *scabiosa* on lemon in stores from Australia and in quarters from New Zealand.

Thecopora areolata on Norway spruce in baggage from Norway.

Urocystis gladiolicola on corms of *Gladiolus tristis* in air mail from Ireland.

Uromyces alyxiae on alyxia in air baggage and air cargo from Hawaii; *U. mulini* on seed pod of *Mulina* sp. in mail from Argentina.

The golden nematode (*Heterodera rostochiensis*) was intercepted in soil associated with potatoes as well as with various materials other than its normal hosts. Among these were used burlap bagging, yam roots, and unauthorized plants with soil about their roots. It was also found in soil collected from railway cars used to haul potatoes in Mexico, which represented the first evidence of its occurrence in that country. It was taken 35 times from England, 25 times from Scotland, 9 times from Germany, 4 times from Denmark, 3 times from Mexico, twice each from Ireland, the Netherlands, and Peru, and once each from Austria, France, Luxembourg, and Wales.

The oat nematode (*Heterodera avenae*) which is causing considerable damage to cereals and oats in Europe was intercepted in soil with various lots of unauthorized plant material, with vegetables in ships' stores, in sand used as ballast, and in

soil with bagging. Of these interceptions 8 were from England, 7 from Germany, 6 from Scotland, 4 each from France and Spain, 3 each from Italy and the Netherlands, 2 from Mexico, and one each from Belgium, Gibraltar (?), Ireland, Sweden, Union of South Africa, Wales (?), and Yugoslavia.

INCOMPLETELY DETERMINED PESTS

In certain instances a complete determination as to species of nematodes, insects, and fungi is impossible, either due to the condition of the material on arrival, or because the pests belong to genera new to the host or new to the country of origin. Some such pests may be of economic importance and new or hitherto unknown to the United States.

INSECTS

Among the incompletely determined insects were the following fruit flies:

Anastrepha sp., possibly *fraterculus*, at Houston, Tex., and at Philadelphia, Pa., in grapefruit in stores from Argentina; at New Orleans, La., in orange in stores from Argentina; at New York, N. Y., in oranges in stores from Argentina and Brazil; at Seattle, Wash., in *Spondias* sp. in air mail from Nicaragua; *Anastrepha* sp., probably *ludens*, at Brownsville, Tex., in orange and sweet lime in baggage from Mexico; at Eagle Pass, Tex., in orange in baggage from Mexico; at El Paso, Tex., in mango, orange, and sapote in baggage from Mexico; at Galveston, Tex., and Houston, Tex., in oranges in quarters from Mexico; at Laredo, Tex., in orange, peach, and pear in baggage from Mexico; *Anastrepha* sp., probably *mombin-praeoptans*, at Brownsville, Tex., in mango in baggage from Mexico; at Laredo, Tex., in guava in baggage from Mexico; at Mobile, Ala., in mango in stores from Honduras; at New Orleans, La., in mango in baggage from either Cuba or Salvador; at New York, N. Y., in mango in baggage from an unknown origin and in *Spondias* sp. in stores from Brazil; *Anastrepha* sp., probably *serpentina*, at Brownsville, Tex., in mamey in baggage from Mexico; *Anastrepha* sp., probably *suspensa*, at Hidalgo, Tex., in guava in baggage from Mexico.

Anastrepha sp., at Baltimore, Md., in oranges in stores from Brazil and Trinidad; at Brownsville, Tex., in a box car from Mexico and in apple, mango, and orange in baggage from Mexico; at El Paso, Tex., in mango in air baggage from Mexico; at Laredo, Tex., in guava in cargo from Mexico and in mango, peach, and pear in baggage from Mexico; at Miami, Fla., in mangoes in air baggage from Colombia, Costa Rica, Honduras, and Salvador, in mango in baggage from Peru, in pear in air baggage from Peru, and in tree seed in air baggage from Cuba; at New Orleans, La., in *Inga* sp. (?) in air baggage from Salvador and in passionflower in air baggage from Nicaragua; at New York, N. Y., in allspice and mangoes in air baggage from Jamaica and Puerto Rico and in orange in air stores from Argentina; at Nogales, Ariz., in mango in baggage from Mexico; at Port Arthur, Tex., in orange in quarters from Mexico; at San Juan, P. R., in mango in preflight inspection of baggage leaving Puerto Rico for the mainland; at San Pedro, Calif., in guava in air baggage from Salvador and in yellow mombin in air baggage from Guatemala; at Tampa, Fla., in orange in air baggage from Guatemala.

Dacus sp., probably *cucurbitae*, at Houston, Tex., in tomato in stores from Hawaii; *Dacus* sp., probably *oleae*, at New York, N. Y., in olive in baggage from Italy; *Dacus* sp. at Washington, D. C., in mango in airplane garbage from Thailand.

Rhagoletis sp., probably *cerasi*, at Boston, Mass., in plum in air stores from Portugal.

Tephritis sp. (Tephritidae) at New York, N. Y., in compositae flower seed in mail from Italy.

Thirty-six interceptions which could be identified to family only (Tephritidae) were intercepted at National Airport, Arlington, Va., in apple in stores from Iceland; at Baltimore, Md., in grapefruit in stores from the Union of South Africa; at Boston, Mass., in fig and *Tuber* sp. (truffle) in air baggage from Italy and in peach in air stores from Portugal; at Eagle Pass, Tex., in mango in baggage from Mexico; at Galveston, Tex., in apple in garbage can from Japan and in basket with apples in stores from Peru, in orange in stores from Peru, in orange in quarters from the Union of South Africa, and in squash in stores from Egypt; at Houston, Tex., in pummelo in quarters from the Union of South Africa; at Honolulu, Hawaii in mango and *Passiflora* sp. in preflight inspection of baggage leaving Hawaii for the mainland; at Honolulu, Hawaii on straw flower in air baggage from the Philippines, in coffee berry in preflight inspection of baggage leaving Hawaii for the mainland, in papaya in air stores from Fiji, in coffee berry in preflight

inspection of mail leaving Hawaii for the mainland; at Miami, Fla., in seeds of an unknown fruit in air mail from India; at New Orleans, La., in orange in stores from Argentina; at New York, N. Y., in apples in air stores from Germany and Mexico, in coffee berry in air baggage from Brazil, in grape in cargo from the Union of South Africa, in *Passiflora* sp., in air baggage from Brazil, in pepper in stores from the Straits Settlements, and in persimmon in baggage from Italy; at Norfolk, Va., (one pupa) in soil with carrots in stores from the Netherlands; at Philadelphia, Pa., with compositae cut flowers in furnishings from Cuba, in orange in stores from Argentina, in orange in quarters from Sierra Leone, and in pepper in stores from the Union of South Africa; at San Francisco, Calif., in cucumber in stores from Hawaii and in *Passiflora* sp. in quarters from Hawaii; at San Juan, P. R., in apple in baggage from Spain; at Washington, D. C., in *Crataegus monogyna* in mail from Turkey.

Other incompletely determined insects worthy of mention were:

Adoxoplatus (Pentatomidae), new species, at Laredo, Tex., with an orchid plant in cargo from Mexico.

An aleyrodid, *Aleurodicinae*, new genus near *Aleurodicus*, at Laredo, Tex., on *Laelia* sp., an orchid, in cargo from Mexico.

Andaspis (Coccidae), new species, at San Francisco, Calif., on hibiscus in air freight from New Guinea.

Aphthona sp., probably *ovata* Foudr. (Chrysomelidae), at New York, N. Y., on lilac and viburnum in air cargo from the Netherlands.

Autoserica sp. (Scarabaeidae) at Seattle, Wash., in soil around juniper plants in baggage from Japan; at San Pedro, Calif., in soil with plants in baggage from Japan; and at Honolulu, Hawaii, in soil with bamboo plants in air baggage from Japan.

Baris sp. (Curculionidae) at Philadelphia, Pa., in beet in stores from France (?), at Brownsville, Tex., with gladiolus in air cargo from Mexico and in turnip in stores from Belgium.

Blastodacna sp., may be *atra* Haw. (Blastodacnidae), at New York, N. Y., in apple in mail from Germany.

Brachyrhinus sp. (Curculionidae) at Hoboken, N. J., in packing with rhododendron plants in cargo from the Netherlands; at Houston, Tex., in dahlia stalk in baggage from the Netherlands; at New York, N. Y., in roots of a cyclamen plant in baggage from the Netherlands; and at Seattle, Wash., in soil with *Chamaecyparis* sp. in express from the Netherlands.

Carposina sp., may be *schirrhosella* (H.-S.) (Carposinidae), at Washington, D. C. in rose hips in mail from Turkey.

A coccid, *Chrysomphalus* sp., close to *tenax* McKenzie, but distinct and not placed yet as anything described, at San Pedro, Calif., on bark of avocado in express and mail from Guatemala.

Cladius sp., probably *difformis* (Panz.) (Tenthredinidae), at Hoboken, N. J., on rose in mail from England and at New York, N. Y., on rose in air baggage from England.

Cleonus sp. (Curculionidae) at New York, N. Y., in carrot in stores from Italy.

Epicaerus sp. (Curculionidae) at Brownsville, Tex., in potatoes in baggage and stores from Mexico; at Galveston, Tex., Houston, Tex., Mobile, Ala., New Orleans, La., and New York, N. Y., in potatoes in stores from Mexico.

A phalaenid, *Eublemma* sp., probably *anticalis* (Wlk.), at Washington, D. C., on stem of *Asparagus falcatus* in express from Natal, Africa.

Fessonia sp. (Smaridiidae) at New York, N. Y., on yam root in air cargo from the Union of South Africa. This represents the first specimen in the Museum Collection from the Union of South Africa.

A gelechiid at Nogales, Ariz., in fiber of *Populus* sp., in mail from Mexico. "A most interesting species (lies between *Pectinophora* and *Platyedra*) and probably represents a new genus * * *. The species of this group usually feed in Malvaceae so your species is the more interesting because of its departure from this habit."

Gnorimoschema sp., near or = *ocellatella* Boyd, at New York, N. Y., and Norfolk, Va., in beets in stores from Egypt and at Philadelphia, Pa., in beets in stores from Egypt, France, and Italy.

Heilipus sp., probably *lauri* Boh., at El Paso, Tex., in avocado seed in air express from Mexico.

Laspeyresia sp., near or = *strobilella* (L.) (Olethreutidae), at Boston, Mass., in Norway spruce in mail from Germany.

Lecanium sp., may be *kunoensis* Kuw. (Coccidae), at San Diego, Calif., on a dwarf tree of *Pyrus* sp. in baggage from Japan.

Lixus sp. (Curculionidae) at Boston, Mass. and Galveston, Tex., in beetles in stores from Egypt; at Laredo, Tex., in cactus plant in mail from Mexico; and at Philadelphia, Pa., in beetles in stores from France and Italy.

Lorryia (Tydeidae), a new species, at Miami, Fla., on leaf and bark of *Citrus* sp. in air baggage from Argentina.

An otitid, "an extremely unusual larva", at New York, N. Y., in mango in baggage from Trinidad.

Parlatoria sp. (Coccidae), "apparently not identical with anything yet described", at Washington, D. C., on mango budwood in air express from India.

Phytomyza sp., possibly *atricornis* Mg., at Philadelphia, Pa. in parsnip in stores from Italy.

Platypus sp., probably *rugulosus* Chap. (Platypodidae), at Baltimore, Md., in mahogany log in cargo from Gold Coast, Africa.

Prodecatoma (Eurytomidae), new species, at Washington, D. C., with grape seed in mail from Colombia.

A curculionid, *Premnotrypes* sp., at Galveston, Tex., in potatoes in stores from Colombia and Peru; at New York, N. Y., in potatoes in air baggage and stores from Colombia; at Philadelphia, Pa., in potato in stores from Peru; and at Port Arthur, Tex., in potato in stores from Ecuador.

A coccid, *Pseudantonina* sp., or a related genus and probably undescribed, at Washington, D. C., on *Eragrostis neesii* plant in mail from Brazil.

Psylliodes sp. (Chrysomelidae) at Galveston, Tex., in cabbage and cauliflower in stores from England; at Philadelphia, Pa., in cabbage in stores from Japan; at Galveston, Tex., in rutabaga in stores from Ireland; at Philadelphia, Pa., in rutabaga in stores from England; at New York, N. Y., in radish in stores from Belgium (?) and in turnip in stores from France; at Galveston, Tex., in turnips in stores from Denmark, England, France, and Mozambique; at Houston, Tex., in turnips in stores from England, France, Greece, and Italy; at Mobile, Ala., in turnips in stores from England and Italy; at New Orleans, La., in turnip in stores from Germany; at Norfolk, Va., in turnip in stores from England; at Philadelphia, Pa., in turnips in stores from Egypt and England; and at San Francisco, Calif., in turnip in stores from England.

Rhynchites sp. (Curculionidae) at New York, N. Y., in cherry in air baggage from Lebanon.

Serica sp. (Scarabaeidae) at San Francisco, Calif., in soil with iris roots in mail from Japan.

Sesamia sp., near or = *vuteria* (Stoll) (Phalaenidae), at New York, N. Y., in corn in baggage from Portugal.

Stenoma sp., probably *catenifer* Wlsm. (Stenomidae), in avocado seed in air baggage from Salvador.

A mirid, Termatophylinae, new genus and new species, at Laredo, Tex., on Bromeliad plant in mail from British Honduras.

Thrips sp., probably *robustus* Pr. (Thripidae), at Portland, Oreg., on stemless gentian in mail from Switzerland.

Xyleborus spp. (Scolytidae) at Baltimore, Md., in *Khaya* sp. log in cargo from Gold Coast, Africa.

There were 2,304 interceptions distributed among 593 genera, which could be identified to genus only.

DISEASES

Suspected pathogens, some probably new to this country, determined to genus only were:

Ascochyta sp. at Honolulu, Hawaii, on scarlet ixora in air cargo from Australia; at Boston, Mass., on alfalfa in cargo from Kenya, Africa; at Brownsville, Tex., on palm frond in air cargo from Mexico and at San Francisco, Calif., on eggplant in stores from Japan.

Camarosporium sp. at El Paso, Tex., on cactus plant in baggage from Mexico; at Honolulu, Hawaii, on lemon in air baggage from Australia, at Brownsville, Tex., on *Laelia gouldiana*, an orchid, in air cargo from Mexico.

Ceratosphaeria sp. at Brownsville, Tex., on *Odontoglossum insleayi*, an orchid, in air cargo from Mexico.

Ceratostomella sp. at Hoboken, N. J., on *Dendrobium heterocarpum*, an orchid, in mail from India; at Philadelphia, Pa., on *Inga laurina* in air baggage from Puerto Rico.

Cercospora sp. at Brownsville, Tex., on palm frond in air cargo from Mexico; at Philadelphia, Pa., on pine in mail from Germany.

Cladosporium sp., close to *miyakei* Sacc. & Trotter, at San Juan, P. R., on rice straw in mail from Greece.

Claviceps sp., close to *inconspicua* Langdon, at Washington, D. C., on *Hyparrhenia lintonii* in mail from Kenya, Africa; *Claviceps* sp., probably *inconspicua* Langdon; at Washington, D. C., on *Hyparrhenia* sp. in mail from Madagascar.

Coleosporium sp. at Buffalo, N. Y., on pine needles in baggage from Canada.

Colletotrichum sp. at Laredo, Tex., on philodendron in cargo from Mexico.

Coniothyrium sp., probably *fuckelii* Sacc., at Miami, Fla., on citrus stem in baggage from Argentina; *Coniothyrium* sp., probably *stanhopeae* P. Henn., on *Cattleya citrina*, an orchid, in mail from Mexico; *Coniothyrium* sp. at El Paso, Tex., on avocado in baggage from Mexico; at San Francisco, Calif., on coconut in stores from the Philippines; at San Diego, Calif., on coconut in baggage from Panama; at Baltimore, Md., on lemon in stores from the Union of South Africa; at Hoboken, N. J., on *Nidularium* sp. in cargo from France; at Honolulu, Hawaii, on *Notospartium carmicheliae* in air cargo from New Zealand; at Philadelphia, Pa., on pineapple in quarters from Sierra Leone; at Seattle, Wash., on rhododendron leaf in baggage from Canada; at San Pedro, Calif., on rice seed in air baggage from Nicaragua.

Curvularia sp., probably *lunata* (Pat.) Howell, at Brownsville, Tex., on pineapple in cargo from Mexico; *Curvularia* sp. at Brownsville, Tex., on pineapple in cargo from Mexico.

Cyphella sp., suggests *hydrocyphella* Pilat, at Brownsville, Tex., on banana in cargo from Guatemala.

Dothiorella sp. at New York, N. Y., on orange in baggage from Japan.

Endoconidiophora sp., close to *fimbriata* (Ell. & Halst.) Davidson or *paradoxa* Dade, at New Orleans, La., on malanga in stores from Cuba.

Hypoderma sp. at Philadelphia, Pa., on arborvitae twig in stores from Japan.

Leprosis at Honolulu, Hawaii, on Mandarin orange in air baggage from Japan; at Laredo, Tex., on orange in baggage from Mexico.

Libertiella sp. at Miami, Fla., on citrus stem in baggage from Argentina.

Mycosphaerella sp. at Honolulu, Hawaii on scarlet ixora in air cargo from Australia; at Honolulu, Hawaii on *Piper methysticum* in air baggage from the Philippines; at San Francisco, Calif., on tree peony in mail from Japan.

Ophiobolus sp. at San Francisco, Calif., on coconut in baggage from Hawaii, in mail from Samoa, and in quarters from the Philippines.

Parodiella sp., probably *grammodes* (Kunze) Cke., at Washington, D. C., on *Antheophora pubescens* in mail from Transvaal.

Pestalotia sp. at San Antonio, Tex., on *Chamaedorea* sp. in air cargo from Mexico; at Laredo, Tex., on philodendron in cargo from Mexico.

Phragmocarpella sp. at Honolulu, Hawaii, on *Eucalyptus* sp. in baggage from Japan.

Phyllosticta sp. at Honolulu, Hawaii, on *Myrtus bullata* in air cargo from New Zealand and on scarlet ixora in air cargo from Australia.

Phyllostictina sp. at Seattle, Wash., on *Areca alicae* in mail from the Canal Zone; at Laredo, Tex., on *Beaucarnea* sp. in cargo from Mexico; at San Francisco, Calif., on *Coelogyne* sp., an orchid, in mail from the Philippines; at San Francisco, Calif., on dracena leaf in baggage from Hawaii; at Philadelphia, Pa., on *Eurya japonica* leaf in furnishings from Japan; at Laredo, Tex., on green pepper in cargo from Mexico.

Phytophthora sp. at Hoboken, N. J., on *Cattleya* sp., an orchid, in cargo from Venezuela; at New York, N. Y., on orange in stores from Italy.

Platypeltella sp. at El Paso, Tex., on palm in baggage from Mexico.

Puccinia sp., new species, at Boston, Mass., on bamboo leaf in mail from China.

Pyrenochaeta sp. at Washington, D. C., on *Sutherlandia frutescens* in mail from the Union of South Africa.

Sclerotium sp. at Seattle, Wash., on *Lithospermum* sp. in mail from England; at Seattle, Wash., on *Magnolia* sp. and rhododendron in cargo from the Netherlands; at Seattle, Wash., on tree peony in cargo from France.

Scolecopeltidium sp. at Laredo, Tex., on *Epidendrum* sp., an orchid, in cargo from Mexico.

Septoria sp. at Washington, D. C., on *Jacquinia pungens* in mail from Mexico.

Stemphylium sp. at Brownsville, Tex., on gladiolus in air cargo from Mexico; at Houston, Tex., on gladiolus in air baggage from Mexico.

Ustilago sp., probably *sphaerogena* Burr., on *Echinochloa crusgalli* seed in mail from Madagascar.

Verticillium sp. at Brownsville, Tex., on papaya in stores from Mexico.

Incompletely determined nematodes worthy of mention were:

Anguina sp. at Washington, D. C., in *Calamagrostis longearistata* (grass) in

mail from Brazil and in *Ehrharta calycina* in mail from the Union of South Africa. *Aphelenchus* sp., undescribed, at Hoboken, N. J., in roots of *Helleborus* sp. in air cargo from the Netherlands.

Chiloplacus, new species, at Hoboken, N. J., in *Helleborus* sp. in cargo from the Netherlands.

Ditylenchus, new species, at Hoboken, N. J., in *Colchicum* sp. (corm) in mail from England—an interesting form but not the species usually found in colchicum. *Ditylenchus* sp., at El Paso, Tex., in garlic in cargo from Mexico; at Hoboken, N. J., in giant autumn-crocus and *Kniphofia* sp. in cargo from the Netherlands and in iris bulbs in mail from England.

Helicotylenchus sp. at San Juan, P. R., in soil with roots of mango trees in air cargo from Martinique, in soil with *Ixora decora* and other plants in air cargo from Honduras, and in soil with orchid plants in air baggage from Trinidad.

Heterodera sp. was intercepted 404 times at 16 different ports in soil with bagging, in soil attached to army vehicles, soil used as ballast, in soil with surplus army motor transmission, in soil with plants for propagation, in soil with vegetables in ships' stores, and in soil with plants in baggage and cargo—some coming in by air. Interceptions were made from soil on material coming from the following countries: Argentina, Australia, Austria, Azores, Belgium, Chile, Denmark, Egypt, England, Finland, France, Germany, Greece, Ireland, Israel, Italy, Japan, Lebanon, Luxembourg, Mexico, the Netherlands, New Zealand, Norway, Portugal, Scotland, Spain, Sweden, Switzerland, Trinidad, Union of South Africa, and Yugoslavia.

What appears to be a new species of *Meloidogyne*, closely related to *M. exigua* Goeldi, at Hoboken, N. J., in roots of *Sedum praealtum* in baggage from Guatemala; *Meloidogyne*, some resemblance to *M. hapla* Chitwood, but obviously a new species, at Philadelphia, Pa., in potato in stores from Cuba; *Meloidogyne*, possibly a new species, related to *M. incognita* (Kofoid & White) Chitwood, at Boston, Mass., in potato in stores from Chile; *Meloidogyne* sp., of the *incognita* group but a new form, in roots of *Synadenium* sp. in mail from the Union of South Africa; *Meloidogyne*, possibly a new species, resembling somewhat *M. javanica* (Treub.) Chitwood, at Philadelphia, Pa., in potato in stores from Brazil.

Nemonchus sp. at San Juan, P. R., in soil with tree roots of mango in air cargo from Martinique.

Neotylenchus, possibly a new species, on fungi on *Malus* root in cargo from the Netherlands.

Paraphelenchus sp. at Philadelphia, Pa., in taro in stores from Japan.

Paratylenchus sp. at Hoboken, N. J., in root of delphinium in air cargo from the Netherlands.

Tetylenchus, new species, at Nogales, Ariz., in soil with cactus plants in cargo from Mexico.

Tylencholaimus sp. at San Juan, P. R., in soil with roots of *Ixora decora* and other plants in air cargo from Honduras.

A total of 825 incompletely determined pathogens were recorded during the year.

Summary of Numbers of Interceptions Listed in Main Table

Country	Insect	Disease	Country	Insect	Disease
<i>Number</i>	<i>Number</i>		<i>Number</i>	<i>Number</i>

¹ This total represents only pests of known or potential plant-quarantine importance. The total of all interceptions made during the year was 16,567.

NOTE.—Interceptions were also made from Afghanistan, Burma, Canton Island, Eniwetok, Ethiopia, French West Africa, Indo-China, Iran, Iraq, Johnston Island, Midway, New Guinea, Nigeria, Northern Ireland, St. Vincent, Samoa (American), Surinam, Tasmania, and Tunisia.

Pests (insects) collected and reported from July 1, 1952, to June 30, 1953

[An asterisk indicates State inspection]

Insect and host	Country of origin	Number of interceptions in—			Collected in—
		Consumption	Nonentry	Propagation	
<i>Achatina fulica</i> Fer. (Mollusca):					
Returned war equipment.....	Guam, Philippines, Saipan.	10			Calif.* , Tex.
Scrap metal.....	Guam.....	1			Calif.*

Host and Insects

ABRUS:

Caryedon fuscus (Coleoptera)

ACACIA:

Mimosestes dominicanus (Coleoptera)*Mimosestes sallaei* (Coleoptera)*Thrips flavus* (Thysanoptera)

ACALYPHA:

Catorama herbarium (Coleoptera)*Pachyzancla bipunctalis* (Lepidoptera)*Pheidole megacephala* (Hymenoptera)*Tricentrus albomaculatus* (Homoptera)

AOER:

Parlatoria pyri (Homoptera)*Xyleborus morstatti* (Coleoptera)

ACHRAS:

Anastrepha fraterculus (?) (Diptera)*Anastrepha serpentina* (Diptera)

AGAVE:

Chrysomphalus agavis (Homoptera)*Helix aspersa* (Mollusca)

ALLIUM CEPA:

Glycyphagus domesticus (Acarina)

ALLIUM PORRUM:

Acrolepia assectella (Lepidoptera)*Phlyctaenia ferrugalis* (Lepidoptera)

ALLIUM SATIVUM:

Brachycerus albidentatus (Coleoptera)*Brachycerus algerius* (Coleoptera)*Dyspessa ulula* (Lepidoptera)

ALPINIA:

Adoretus sinicus (Coleoptera)*Anidiella inornata* (Homoptera)*Pantomorus godmani* (Coleoptera)*Pulvinaria psidii* (Homoptera)*Siphanta acuta* (Homoptera)

ALSTONIA:

Coccus viridis (Coleoptera)

ALYXIA:

Coccus capparidis (Homoptera)*Pinna sp. uniloba* (Homoptera)

ANACARDIUM:

Anastrepha mombinpraeoptans (Diptera)

ANANAS:

Alpheias conspirata (Lepidoptera)*Blissus leucopterus insularis* (Hemiptera)*Dolichotetranychus floridanus* (Acarina)*Iridomyrmex humilis* (Hymenoptera)*Ligyrus ebenus* (Coleoptera)*Myocrochus carinatus* (Coleoptera)*Onthophagus taurus* (Coleoptera)*Pheidole megacephala* (Hymenoptera)*Platococcus symmicta* (Lepidoptera)*Ribua innoxia* (Lepidoptera)*Sisamnes contractus* (Hemiptera)*"Targionia" bromiliae* (Homoptera)

ANDROPOGON:

Galgupha rinculata (Hemiptera)*Pseudopidoproctus fulleri* (Homoptera)

Host and Insects—Continued

- ANEMONE:
Thrips angusticeps (Thysanoptera)
Thrips major (Thysanoptera)
- ANNONA:
Amorbia emigratella (Lepidoptera)
Anastrepha ludens (Diptera)
Ceratitis capitata (Diptera)
Stenomoma anonella (Lepidoptera)
Talponia batesi (Lepidoptera)
- ANOIGANTHUS:
Brithys pancratii (Lepidoptera)
- ANTHURIUM:
Adoretus sinicus (Coleoptera)
Bradybaena similis (Mollusca)
Ceroplastes rubens (Homoptera)
Chrysomphalus umboniferus (Homoptera)
Pulvinaria psidii (Homoptera)
Siphanta acuta (Homoptera)
- ANTIGONON:
Asterolecanium epidendri (Homoptera)
- ANTIRRHINUM:
Haplothrips gowdeyi (Thysanoptera)
Taeniothrips atratus (Thysanoptera)
- APIUM:
Anuraphis tulipae (Homoptera)
Bradybaena similis (Mollusca)
Cavariella capreae (Homoptera)
Deroceras reticulatum (Mollusca)
Taeniothrips atratus (Thysanoptera)
- ARACEAE:
Deroceras reticulatum (Mollusca)
Pinnaspis buri (Homoptera)
- ARUNDINARIA:
Brevipalpus phoenicis (Acarina)
Leucaspis cockerelli (Homoptera)
- ASPLENIUM:
Ferrisia virgata (Homoptera)
- ASTER:
Capitophorus formosanus (Homoptera)
- BAMBOO:
Asterolecanium bambusae (Homoptera)
Asterolecanium militaris militaris (Homoptera)
Asterolecanium militaris robustum (Homoptera)
Conarthrus vicinus (Coleoptera)
- BAMBUSA:
Asterolecanium bambusae (Homoptera)
Lepidosaphes vermiformis (Homoptera)
Odonaspis greeni (Homoptera)
- BEAUCARNEA:
Lepidosaphes philococcus (Homoptera)
- BETA:
Lixus junci (Coleoptera)
- BETULA:
Eriophyes leionectus (Acarina)
- BILLBERGIA:
Bradybaena similis (Mollusca)
- BLIGHIA:
Coccus viridis (Homoptera)
- BRASSAVOLA:
Furcaspis bifurmis (Homoptera)
- BRASSIA:
Furcaspis bifurmis (Homoptera)
Puto uller (Homoptera)
Vinsonia stellifera (Homoptera)
- BRASSICA OLERACEA BOTRYTIS:
Barathra brassicae (Lepidoptera)
Phytomyza atricornis (?) (Diptera)
- BRASSICA OLERACEA CAPITATA:
Deroceras reticulatum (Mollusca)
Evergestis forficatus (Lepidoptera)
Evergestis rimosalis (Lepidoptera)
Limax marginatus (Mollusca)
Limax maximus (Mollusca)
Mamestra brassicae (Lepidoptera)
Phyllotreta atra (Coleoptera)
Phyllotreta consobrina (Coleoptera)
Phyllotreta undulata (Coleoptera)
Phytomyza atricornis (?) (Diptera)
- BRASSICA RAPA:
Listroderes costirostris obliquus (Coleoptera)
Mamestra brassicae (Lepidoptera)
Psylliodes chrysoccephala (Coleoptera)
- BRASSICA SP.:
Diocalandra taitensis (Coleoptera)
- BROMELIACEAE:
Chrysomphalus umboniferus (Homoptera)
- BROMUS:
Frankliniella cestrum (Thysanoptera)
- BROUGHTONIA:
Vinsonia stellifera (Homoptera)
- BRYOPHYLLUM:
Monomorium destructor (Hymenoptera)
- BULBOPHYLLUM:
Pinnaspis exercitata (Homoptera)
- BUXUS:
Eriophyes canestrinii (Acarina)
- CACTUS:
Lepidosaphes philococcus (Homoptera)
Sixeonotus luteiceps (Hemiptera)
- CAESALPINIA:
Mimosites dominicanus (Coleoptera)
- CAJANUS:
Ancylostoma stercora (Lepidoptera)
Callosobruchus maculatus (Coleoptera)
Neodryocetes guinea (Coleoptera)
- CALADIUM:
Aleurotrachelus trachoides (Homoptera)
- CALATHEA:
Aspidiotus palmarum (Homoptera)
- CALLUNA:
Ctenicera cupreus (Coleoptera)
Frankliniella intonsa (Thysanoptera)
Gelechia ericetella (Lepidoptera)
Micrelus ericae (Coleoptera)
Orthotylus ericetorum (Hemiptera)
Taeniothrips atratus (Thysanoptera)
Taeniothrips ericae (Thysanoptera)
Taeniothrips vulgatissimus (Thysanoptera)
Thrips flavus (Thysanoptera)
Thrips major (Thysanoptera)
Wachtliella ericina (?) (Diptera)
- CALOPHYLLUM:
Ceroplastes rubens (Homoptera)
- CAMELLIA:
Aspidiotus degeneratus (Homoptera)
Ceroplastes rubens (Homoptera)
Parlatoria camelliae (Homoptera)
Pseudonidia clavigera (Homoptera)
Pseudoparlatoria punctata (Homoptera)
- CANANGA:
Taeniothrips hawaiiensis (Thysanoptera)
- CANAVALIA:
Lampides boeticus (Lepidoptera)
Marcia testulalis (Lepidoptera)
Taeniothrips vitticornis (Thysanoptera)
- CANNA:
"Targionia" saechari (Homoptera)
- CAPSIUM:
Ceratitis capitata (?) (Diptera)
Dacus cucurbitae (Diptera)
Gnorimoschema borsaniella (?) (Lepidoptera)
Gnorimoschema gudmannella (Lepidoptera)
Neoleucinodes elegantalis (Lepidoptera)
Pheidole megacephala (Hymenoptera)
Platynota rostrana (Lepidoptera)
Pyrausta nubilalis (Lepidoptera)
- CARICA:
Pseudoparlatoria ostreata (Homoptera)
Toxotrypana curvicauda (Diptera)
- CASIMIROA:
Anastrepha ludens (Diptera)
- CASSIA:
Aganactes indecora (Lepidoptera)
Caryedon fuscus (Coleoptera)
- CASTANEA:
Curculio elephas (Coleoptera)
Laspeyresia splendana (Lepidoptera)
- CATTLEA:
Chrysomphalus tenax (Homoptera)
Eurytoma orchidearum (Hymenoptera)
Furcaspis bifurmis (Homoptera)
Pseudischnaspis alienus (Homoptera)
Vinsonia stellifera (Homoptera)
- CELTIS:
Aspidiotus pectinatus (tentative) (Homoptera)
- CENTAUREA:
Haplothrips gowdeyi (Thysanoptera)
- CHAENOMELES:
Anisotabis marginalis (Orthoptera)
Ceroplastes ceriferus (Homoptera)
Lepidosaphes machili (Homoptera)
Limax marginatus (Mollusca)
- CHAMAECYPARIS:
Aspidiotus pseudomeyeri (tentative) (Homoptera)
Lepidosaphes newsteadii (Homoptera)

Host and Insects—Continued

CHAMAEDOREA:

- Asterolecanium epidendri* (Homoptera)
- Asterolecanium inlabefactum* (Homoptera)
- Chrysomphalus sphaeroides* (Homoptera)

CHRYSANTHEMUM:

- Capitophorus formosanus* (Homoptera)
- Frankliniella formosae* (Thysanoptera)
- Haplothrips gowdeyi* (Thysanoptera)
- Macrodactylus mexicanus* (Coleoptera)
- Microcephalothrips abdominalis* (Thysanoptera)
- Taeniothrips atratus* (Thysanoptera)
- Taeniothrips distalis* (Thysanoptera)
- Thrips major* Uzel (Thysanoptera)

CISTUS:

- Adoxophyes orana* (Lepidoptera)
- Macroplox fasciata* (Hemiptera)

CITRUS AURANTIFOLIA:

- Aleurocanthus woglumi* (Homoptera)
- Aleurothrixus floccosus* (Homoptera)
- Anastrepha ludens* (Diptera)
- Coccus viridis* (Homoptera)
- Leucaspis cockerelli* (Homoptera)
- Parlatoria cinerea* (Homoptera)
- Tetraneura ursum* (Homoptera)
- Unaspis citri* (Homoptera)

CITRUS AURANTIUM:

- Anastrepha ludens* (Diptera)

CITRUS GRANDIS:

- Cryptophlebia leucotreta* (Lepidoptera)
- Morganella longispina* (Homoptera)
- Parlatoria zizyphus* (Homoptera)

CITRUS LIMON:

- Aonidiella inornata* (Homoptera)
- Ceratitis capitata* (Diptera)
- Coccus viridis* (Homoptera)
- Leucaspis cockerelli* (Homoptera)
- Parlatoria zizyphus* (Homoptera)
- Unaspis yanonensis* (Homoptera)

CITRUS MEDICA:

- Anastrepha ludens* (Diptera)

CITRUS PARADISI:

- Aleurocanthus woglumi* (Homoptera)
- Anastrepha ludens* (Diptera)
- Anastrepha mombinpraeopians* (Diptera)
- Anastrepha parallela* (?) (Diptera)
- Anastrepha suspensa* (Diptera)
- Ceratitis capitata* (Diptera)
- Cryptophlebia leucotreta* (Lepidoptera)
- Leucaspis cockerelli* (Homoptera)
- Parlatoria cinerea* (Homoptera)
- Unaspis citri* (Homoptera)
- Unaspis yanonensis* (Homoptera)

CITRUS RETICULATA:

- Aleurocanthus woglumi* (Homoptera)
- Aonidiella citrina* (Homoptera)
- Ceratitis capitata* (Diptera)
- Parlatoria zizyphus* (Homoptera)
- Unaspis yanonensis* (Homoptera)

CITRUS SINENSIS:

- Aleurocanthus woglumi* (Homoptera)
- Aleurothrixus floccosus* (Homoptera)
- Anastrepha fraterculus* (Diptera)
- Anastrepha ludens* (Diptera)
- Anastrepha serpentina* (Diptera)

- Pseudococcus saipanensis* (Homoptera)
- Stenotrupis marshalli* (?) (Coleoptera)
- Taeniothrips hawaiiensis* (Thysanoptera)

CODIAEUM:

- Asterolecanium pustulans* (Homoptera)
- Ferrisia virgata* (Homoptera)
- Lepidosaphes tokionis* (Homoptera)
- Orthezia praelonga* (Homoptera)
- Parlatoria crotonis* (Homoptera)
- Tricentrus albomaculatus* (Homoptera)

COFFEA:

- Aleurocanthus woglumi* (Homoptera)
- Ceratitis capitata* (Diptera)
- Coccus viridis* (Homoptera)
- Dacus dorsalis* (Diptera)
- Stephanoderes hampei* (Coleoptera)

COLA:

- Selenothrips rubrocinctus* (Thysanoptera)

COLEUS:

- Lampides boeticus* (Lepidoptera)

CONVALLARIA:

- Schwiebia talpa* (Acarina)
- Sitona lineata* (Coleoptera)

CORDYLINE:

- Amorbia emigratella* (Lepidoptera)
- Bradybaena similaris* (Mollusca)
- Ferrisia virgata* (Homoptera)
- Haplothrips gowdeyi* (Thysanoptera)
- Mitastethus browni* (Coleoptera)
- Orydema longulum* (Coleoptera)
- Pantomorus godmani* (Coleoptera)
- Pinnaspis buzi* (Homoptera)
- Taeniothrips hawaiiensis* (Thysanoptera)

CORYLUS:

- Curculio nucum* (Coleoptera)

CRATAEGUS:

- Rhagoletis pomonella* (Diptera)

CRYPTOMERIA:

- Diaspis carueli* (Homoptera)

CUCUMIS:

- Dacus cucurbitae* (Diptera)

CUCURBITA:

- Dacus ciliatus* (?) (Diptera)
- Dacus cucurbitae* (Diptera)

CURCUMA:

- Parapulo taraktogoni* (Homoptera)

CYCAD:

- Aulacoscelia elongata* (Coleoptera)

CYCNOCHES:

- Brevipalpus phoenicis* (Acarina)

CYDONIA:

- Anastrepha ludens* (Diptera)
- Ceratitis capitata* (Diptera)

CYMBIDIUM:

- Chrysomphalus pinnulifera* (tentative) (Homoptera)
- Deroceras reticulatus* (Mollusca)
- Lepidosaphes tuberculata* (Homoptera)
- Plautia brunneipennis* (Hemiptera)

CYNARA:

- Apion carduorum* (Coleoptera)
- Gortyna flavago* (Lepidoptera)
- Gortyna ochracea* (Lepidoptera)
- Iridomyrmex humilis* (Hymenoptera)

CYNODON:

- Antonina graminis* (Homoptera)

CYPRIPEDIUM:

- Coccus capparidis* (Homoptera)

CYTISUS:

- Apion fuscirostre* (Coleoptera)

DAHLIA:

- Frankliniella paucispinosa* (Thysanoptera)
- Taeniothrips atratus* (Thysanoptera)
- Thrips flavus* (Thysanoptera)
- Thrips nigropilosus* (Thysanoptera)

Host and Insects—Continued

DAISY:

Taeniothrips gracilis (Thysanoptera)

DENDROBIUM:

Anaphotrips corbetti (Thysanoptera)
Delichotetranychus vandergooti (Acarina)
Ferrisia virgata (Homoptera)
Lepidosaphes tuberculata (Homoptera)

DIANTHUS:

Ausefus impressicollis (Hemiptera)
Frankliniella formosae (Thysanoptera)
Frankliniella intonsa (Thysanoptera)
Iridomyrmex humilis (Hymenoptera)
Lygus rugulipennis (Hemiptera)
Macrosiphum gei (?) (Homoptera)
Taeniothrips atratus (Thysanoptera)
Taeniothrips dianthi (Thysanoptera)
Taeniothrips vulgarissimus (Thysanoptera)
Thrips flavus (Thysanoptera)
Thrips major (Thysanoptera)

DIOSCOREA:

Palaeopus costicollis (Coleoptera)
 "Targionia" *hartii* (Homoptera)

DIOSPYROS:

Ceratitis capitata (Diptera)
Glycyphagus domesticus (Acarina)
Parlatoria oleae (Homoptera)
Phenacaspis aucubae (Homoptera)
Pseudococcus kraunhiae (Homoptera)

DRACAENA:

Pinaspis buxi (Homoptera)
Syrilla oceanica (Diptera)

EPIDENDRUM:

Asterolecanium epidendri (Homoptera)
Furcaspis biformis (Homoptera)
Pheidole megacephala (Hymenoptera)
Vinsonia stellifera (Homoptera)

ERIOBOTRYA:

Ceratitis capitata (Diptera)

ERYTHRINA:

Specularius impressothorax (Coleoptera)

EUGENIA:

Anastrepha mombinpraeoptans (Diptera)
Heterotermes convezinotatus (Isoptera)

EUPHORBIA:

Micrapate labialis (Coleoptera)

EURYA:

Aspidiotus degeneratus (Homoptera)

FICUS:

Asterolecanium pustulans (Homoptera)
Autoserica castanea (Coleoptera)
Ceratitis capitata (Diptera)
Ceroplastes ruscii (Homoptera)
Lepidosaphes ficus (Homoptera)
Pseudanidia trilobitiformis (Homoptera)

FOENICULUM:

Deroceras reticulatum (Mollusca)

FRAXINUS:

Chrysomphalus personatus (Homoptera)

FREEZIA:

Frankliniella bispinosa (Thysanoptera)

GALANTHUS:

Apion carduorum (Coleoptera)

GARCINIA:

Vinsonia stellifera (Homoptera)

GARDENIA:

Ceroplastes rubens (Homoptera)
Coccus viridis (Homoptera)
Dialeurodes citri (Homoptera)
Dialeurodes kirkaldyi (Homoptera)
Eucalymnatus tessellatus (Homoptera)
Ferrisia virgata (Homoptera)
Pealius hibisci (Homoptera)
Protactia fusca (Coleoptera)
Protopulvinaria longivalvata (Homoptera)
Pulvinaria psidii (Homoptera)
Taeniothrips hawaiiensis (Thysanoptera)
Taeniothrips vitticornis (Thysanoptera)

GASTROCHEIS:

Chrysomphalus pinnulifera (tentative) (Homoptera)

GAYLUSSACIA:

Stephanitis oberi (Hemiptera)

GERBERA:

Haplothrips gowdeyi (Thysanoptera)
Taeniothrips gracilis (Thysanoptera)

GLADIOLUS:

Anuraphis tulipae (Homoptera)
Aphanus umbrosus (Hemiptera)

GLADIOLUS—Continued

Draculacephala producta (Homoptera)
Exptochiomeria oblonga (Hemiptera)
Frankliniella bispinosa (Thysanoptera)
Frankliniella formosae (Thysanoptera)
Frankliniella fortissima (Homoptera)
Frankliniella intonsa (Thysanoptera)
Iridomyrmex humilis (Hymenoptera)
Pheidole megacephala (Hymenoptera)
Taeniothrips atratus (Thysanoptera)
Taeniothrips hawaiiensis (Thysanoptera)
Taeniothrips vulgarissimus (Thysanoptera)
Thrips flavus (Thysanoptera)

GLIRICIDIA:

Tetraleurodes acaciae (Homoptera)

GOSSYPIUM:

Bucculatrix thurberiella (Lepidoptera)
Oryzaenarus hyalinipennis (Hemiptera)
Pectinophora gossypiella (Lepidoptera)
Ptinus tectus (Coleoptera)

GYPSOPHILA:

Thrips flavus (Thysanoptera)
Thrips nigropilosus (Thysanoptera)

HEDERA:

Iridomyrmex humilis (Hymenoptera)

HELIANTHUS:

Thrips major (Thysanoptera)

HELICONIA:

Bradybaena similis (Mollusca)
Pantomorus godmani (Coleoptera)
Protactia fusca (Coleoptera)

HIBISCUS:

Crociosema plebeiana (Lepidoptera)
Diaprepes famelicus var. (Coleoptera)
Frankliniella bispinosa (Thysanoptera)
Haplothrips gowdeyi (Thysanoptera)
Lepidosaphes tokionis (Homoptera)
Pectinophora gossypiella (Lepidoptera)
Pheidole megacephala (Hymenoptera)
Taeniothrips gracilis (Thysanoptera)

HYACINTHUS:

Aglossa cuprealis (Lepidoptera)
Prodenia ornithogalli (Lepidoptera)

HYMENOCALLIS:

Trionymus lounsburyi (Homoptera)

IPOMOEA:

Cylas formicarius (Coleoptera)
Cylas formicarius var. (Coleoptera)
Cylas formicarius elegantulus (Coleoptera)
Eusepes postfasciatus (Coleoptera)

IRIS:

Anuraphis tulipae (Homoptera)
Blissus leucopterus hirtus (Hemiptera)
Bregmatothrips iridis (Thysanoptera)

IXORA:

Coccus viridis (Homoptera)
Ferrisia virgata (Homoptera)
Pulvinaria psidii (Homoptera)

JASMINUM:

Dialeurodes kirkaldyi (Homoptera)
Frankliniella bispinosa (Thysanoptera)

JUNIPERUS:

Lepidosaphes newsteadi (Homoptera)
Lepidosaphes pallida (Homoptera)

KADSURA:

Ceroplastes rubens (Homoptera)

KALMIA:

Chrysomphalus paulistus (Homoptera)

KERRIA:

Ailantus cinctus (Hymenoptera)

KHAYA:

Cordylomera spinicornis (Coleoptera)

LACTUCA:

Deroceras reticulatum (Mollusca)
Dicyphus annulatus (Hemiptera)
Macrosiphum formosanum (Homoptera)
Taeniothrips atratus (Thysanoptera)
Thrips angusticeps (Thysanoptera)

LAELIA:

Asterolecanium epidendri (Homoptera)
Chrysomphalus umboniferus (Homoptera)
Ferrisia virgata (Homoptera)
Furcaspis biformis (Homoptera)

LANSIUM:

Pheidole megacephala (Hymenoptera)

LATANIA:

Aspidiotus destructor (Homoptera)

Host and Insects—Continued

LATHYRUS:

- Bruchus tristis* (Coleoptera)
- Calocoris norvegicus* (Hemiptera)

- Taeniothrips atratus* (Thysanoptera)
- Taeniothrips gracilis* (Thysanoptera)
- Taeniothrips vulgarissimus* (Thysanoptera)
- Thrips flarus* (Thysanoptera)
- Thrips major* (Thysanoptera)

LAURUS:

- Chrysomphalus paulistus* (Homoptera)
- Iridomyrmex humilis* (Hymenoptera)
- Lecanium corni* (Homoptera)
- Piezodorus lituratus* (Hemiptera)
- Trialeurodes lauri* (Homoptera)

LEONOTIS:

- Pheidole megacephala* (Hymenoptera)

LEONTOPODIUM:

- Frankliniella pallida* (Thysanoptera)
- Taeniothrips atratus* (Thysanoptera)

LEUCOPHYLLUM:

- Chionaspis leucadendri* (Homoptera)

LILIUM:

- Aglossa cuprealis* (Lepidoptera)
- Diaprepes famelicus* var. (Coleoptera)
- Euborellia moesta* (Orthoptera)
- Pheidole megacephala* (Hymenoptera)
- Prodenia ornithogalli* (Lepidoptera)
- Taeniothrips gracilis* (Thysanoptera)

LITCHI:

- Pulvinaria psidii* (Homoptera)

LIVISTONA:

- Aspidiotus destructor* (Homoptera)

LUPINUS:

- Bruchus tristis* (Coleoptera)

LYCASTE:

- Iridomyrmex iniquus* (Hymenoptera)
- Puto ulter* (Homoptera)
- Vinsonia stellifera* (Homoptera)

LYCOPERSICON:

- Dacus cucurbitae* (Diptera)
- Dacus dorsalis* (Diptera)
- Lineodes integra* (Lepidoptera)
- Neoleucinodes elegantalis* (Lepidoptera)
- Platynota rostrana* (Lepidoptera)

MACADAMIA:

- Cryptophlebia illepidata* (Lepidoptera)

MACROZANONIA:

- Dacus caudatus* (Diptera)

MALUS:

- Allantus cinctus* (Hymenoptera)
- Argyresthia conjugella* (Lepidoptera)
- Ceratitis capitata* (Diptera)
- Cryptoblabes gnidiella* (Lepidoptera)
- Epiaispis piricala* (Homoptera)
- Glycyphagus domesticus* (Acarina)
- Grapholitha molesta* (Lepidoptera)
- Parlatoria oleae* (Homoptera)
- Rhagoletis pomonella* (Diptera)
- Tortrix excessana* (Lepidoptera)
- Tortrix postvittana* (Lepidoptera)

MALVA:

- Apion aneum* (Coleoptera)
- Apion radiolus* (Coleoptera)

MAMMEA:

- Anastrepha serpentina* (Diptera)

MAMMILLARIA:

- Gerstaeckeria mutillaria* (Coleoptera)
- Sezenotus luteiceps* (Hemiptera)

MANGIFERA:

- Anastrepha fraterculus* (Diptera)
- Anastrepha ludens* (Diptera)
- Anastrepha mombinpraeptans* (Diptera)
- Anastrepha serpentina* (Diptera)
- Anastrepha suspensa* (Diptera)
- Aspidiotus herculeanus* (Homoptera)
- Aulacaspis tubercularis* (Homoptera)
- Chrysomphalus personatus* (Homoptera)
- Dacus dorsalis* (Diptera)
- Euborellia pilebeja* (Orthoptera)
- Phenacaspis sandwicensis* (Homoptera)
- Pseudococcus lilacinus* (Homoptera)
- Sternonchetus mangiferae* (Coleoptera)

MAXILLARIA:

- Furcaspis bififormis* (Homoptera)

MELIA:

- Chrysomphalus personatus* (Homoptera)

MELILOTUS:

- Frankliniella cestrum* (Thysanoptera)

MENTHA:

- Phorodon menthae* (Homoptera)

MESPILUS:

- Ceratitis capitata* (Diptera)

MOMORDICA:

- Dacus cucurbitae* (Diptera)

MONSTERA:

- Cyrtosiphum sphaeroides* (Homoptera)
- Chrysomphalus tenax* (Homoptera)
- Protaetia fusca* (Coleoptera)

MUSA PARADISIACA SAPIENTUM:

- Cosmopolites sordidus* (Coleoptera)
- Metamasius sericeus* (Coleoptera)
- Metamasius sericeus carbonarius* (Coleoptera)

MUSCARI:

- Bouheila maroccana* (Homoptera)

MUSSAENDA:

- Ferrisia virgata* (Homoptera)
- Pulvinaria psidii* (Homoptera)

NARCISSUS:

- Lampetia equestris* (Diptera)
- Taeniothrips gracilis* (Thysanoptera)

NERIUM:

- Asterolecanium pustulans* (Homoptera)
- Cryptoblabes gnidiella* (Lepidoptera)
- Haplothrips gowdeyi* (Thysanoptera)
- Morganella longispina* (Homoptera)
- Pseudaonidia trilobitiformis* (Homoptera)

NIPA:

- Pinnaspis buzi* (Homoptera)

NOLINA:

- Chrysomphalus smilacis* (Homoptera)

ODONTOGLOSSUM:

- Ferrisia virgata* (Homoptera)
- Puto ulter* (Homoptera)

OLEA:

- Aspidiotus braunschvigi* (tentative) (Homoptera)
- Dacus oleae* (Diptera)
- Parlatoria oleae* (Homoptera)
- Prays oleellus* (Lepidoptera)

ONCIDIUM:

- Furcaspis bififormis* (Homoptera)
- Pseudischinaspis alienus* (Homoptera)
- Tenthecoris vestitus* (Hemiptera)
- Vinsonia stellifera* (Homoptera)

OPERCULINA:

- Asterolecanium epidendri* (Homoptera)
- Ferrisia virgata* (Homoptera)
- Sybra alternana* (Coleoptera)

OPUNTIA:

- Ceratitis capitata* (Diptera)

ORCHID:

- Amorbia emigratella* (Lepidoptera)
- Anaphothrips orchidaceus* (Thysanoptera)
- Anchonus foveifrons* (Coleoptera)
- Asterolecanium epidendri* (Homoptera)
- Capaneus tetricus* (Hemiptera)
- Chrysomphalus odontoglossi* (Homoptera)
- Chrysomphalus tenax* (Homoptera)
- Chrysomphalus umboniferus* (Homoptera)
- Corimelaena elegans* (Hemiptera)
- Diorymerellus laevimargo* (Coleoptera)
- Epilachna varivestis* (Coleoptera)
- Eustrophinus marginatus* (Coleoptera)
- Fulvius anthocoridis* (Hemiptera)
- Furcaspis bififormis* (Homoptera)
- Galgupha magna* (Hemiptera)
- Iridomyrmex humilis* (Hymenoptera)
- Iridomyrmex iniquus* (Hymenoptera)
- Leucaspis cockerelli* (Homoptera)
- Ligyrocoris nitidicollis* (Hemiptera)
- Macropygium reticulare* (Hemiptera)
- Monomorium destructor* (Hymenoptera)
- Myochrous femoralis* (Coleoptera)
- Myodocha longicollis* (Hemiptera)
- Nasutitermes nigriceps* (Isoptera)
- Neolobophora ruficeps* (Orthoptera)
- Pantomorus godmani* (Coleoptera)
- Paralleloplexis cattleyae* (?) (Diptera)
- Parlatoria pseudaspidiotus* (Homoptera)
- Pheidole megacephala* (Hymenoptera)
- Pseudaonidia trilobitiformis* (Homoptera)
- Pseudischinaspis alienus* (Homoptera)
- Puto ulter* (Homoptera)
- Tenthecoris angustimarginatus* (Hemiptera)

Host and Insects—Continued

ORCHID—Continued

- Tenthecoris bicolor* (Hemiptera)
Tenthecoris confusus (Hemiptera)
Tenthecoris distinguendus (Hemiptera)
Tenthecoris vestitus (Hemiptera)
Vinsonia stellifera (Homoptera)

ORNITHOGALUM:

- Frankliniella schultzei* (Thysanoptera)
Haplothrips nigricornis (Thysanoptera)
Haplothrips wouramboulchii (Thysanoptera)

ORYZA:

- Chilo simplex* (Lepidoptera)
Haltomorphia picta (Hemiptera)
Scotinophara lurida (Hemiptera)

PACHYCEREUS:

- Lepidosaphes philococcus* (Homoptera)

PAEONIA:

- Phassus excrecens* (?) (Lepidoptera)

PALM:

- Aleurotrachelus trachoides* (Homoptera)
Aspidiotus destructor (Homoptera)
Asterolecanium inlabefactum (Homoptera)
Chrysocoris grandis (Hemiptera)
Chrysomphalus sphaeroides (Homoptera)
Dysdercus flavolimbatus (Hemiptera)
Furcaspis biformis (Homoptera)
Oncometopia fowleri (Homoptera)
Paraleyrodes citri (?) (Homoptera)
Pinnaspis buxi (Homoptera)

PEDILANTHUS:

- Furcaspis biformis* (Homoptera)

PERSEA:

- Anastrepha ludens* (Diptera)
Aspidiotus destructor (Homoptera)
Aspidiotus diffinis (Homoptera)
Aspidiotus herculeanus (Homoptera)
Chrysomphalus albopictus (Homoptera)
Chrysomphalus personatus (Homoptera)
Conotrachelus aguacatae (Coleoptera)
Dacus dorsalis (Diptera)
Pseudoschnaspis longissima (Homoptera)
Stenomoma catenifer (Lepidoptera)
Tuckerella pavoniformis (Acarina)

PHALAENOPSIS:

- Chrysomphalus tingi* (Homoptera)

PHASEOLUS:

- Epinotia opposita* (Lepidoptera)
Fundella pellucens (Lepidoptera)
Laspeyresia leguminis (Lepidoptera)
Maruca testulalis (Lepidoptera)
Pyrastus nubilalis (Lepidoptera)

PHILODENDRON:

- Aonidiella citrina* (Homoptera)
Asterolecanium epidendri (Homoptera)
Asterolecanium pustulans (Homoptera)
Chrysomphalus albopictus (Homoptera)
Chrysomphalus sphaeroides (Homoptera)
Chrysomphalus tenax (Homoptera)
Fulvius anthocorides (Hemiptera)
Lepidosaphes carinata (Homoptera)
Pinnaspis buxi (Homoptera)

PHLOX:

- Sitona lineata* (Coleoptera)

PHOENIX:

- Ceratitis capitata* (Diptera)

PICEA:

- Hylurgops palliatus* (Coleoptera)
Pityogenes chalcographus (Coleoptera)

PINUS:

- Eulachnus piniformosanus* (?) (Homoptera)
Hylurgops palliatus (Coleoptera)
Ips sexdentatus (Coleoptera)
Lepidosaphes newsteadii (Homoptera)
Pityogenes bidentatus (Coleoptera)
Pityogenes chalcographus (Coleoptera)
Poliaspis pini (Homoptera)
Pseudococcus pini (Homoptera)
Ptochoryctis tsugensis (?) (Lepidoptera)

PITHECELLOBIUM:

- Cryptophlebia illepidia* (Lepidoptera)

PITTIOSPORUM:

- Frankliniella bispinosa* (Thysanoptera)

PLUMERIA:

- Coccus viridis* (Homoptera)
Chonchaspis newsteadii (Homoptera)
Taeniothrips hawaiiensis (Thysanoptera)

POLIANTHES:

- Iridomyrmex humilis* (Hymenoptera)
Pheidole megacephala (Hymenoptera)
Taeniothrips hawaiiensis (Thysanoptera)

PORTULACA:

- Ferrisia virgata* (Homoptera)

PORTULACARIA:

- Selenaspis portulacariae* (Homoptera)

PRIMULA:

- Frankliniella intonsa* (Thysanoptera)
Taeniothrips picipes (Thysanoptera)

PROSOPIA:

- Tetraleurodes acaciae* (Homoptera)

PRUNUS DOMESTICA:

- Anastrepha mombinpraepotans* (Diptera)
Aspidiotus diffinis (Homoptera)
Ceratitis capitata (Diptera)
Epidiaspis piricola (Homoptera)
Listroderes subcinctus (Coleoptera)
Megalometis chilensis (Coleoptera)
Parlatoria oleae (Homoptera)
Porotermes quadricollis (Isoptera)

PRUNUS PERSICA:

- Anastrepha fraterculus* (Diptera)
Anastrepha ludens (Diptera)
Ceratitis capitata (Diptera)
Grapholitha molesta (Lepidoptera)

PRUNUS PERSICA NECTARINA:

- Listroderes subcinctus* (Coleoptera)
Megalometis chilensis (Coleoptera)

PRUNUS SERRULATA LANNESIANA:

- Anthrenomus rectirostris* (Coleoptera)

PRUNUS SPINOSA (?):

- Diaplasus gigantorhynchus* (Acarina)
Eriophyes similis (Acarina)

PRUNUS SP. (CHERRY)

- Rhagoletis cerasi* (Diptera)

PRUNUS VAR.:

- Ericerus pela* (Homoptera)

PSIDIUM:

- Aleurogondulus emmae* (Homoptera)
Anastrepha fraterculus (Diptera)
Anastrepha mombinpraepotans (Diptera)
Anastrepha striata (Diptera)
Anastrepha suspensa (Diptera)
Ceratitis capitata (Diptera)
Dacus dorsalis (Diptera)
Paraleyrodes goyabae (?) (Homoptera)

PUNICA:

- Amorbia emigralella* (Lepidoptera)
Anastrepha ludens (Diptera)
Ceratitis capitata (?) (Diptera)
Cryptoblabes gnidiella (Lepidoptera)
Mimosestes sallaei (Coleoptera)

PYRUS:

- Anastrepha fraterculus* (Diptera)
Anastrepha ludens (Diptera)
Ceratitis capitata (Diptera)
Epidiaspis piricola (Homoptera)
Glycyphagus domesticus (Acarina)

QUERCUS:

- Aspidiotus zonatus* (Homoptera)
Curculio elephas (Coleoptera)

RATHBUNIA:

- Icerya palmieri* (Homoptera)

RHODODENDRON:

- Acroneciza ramicis* (Lepidoptera)
Aleurolobus rhododendri (Homoptera)
Dialeurodes chilendani (Homoptera)
Gracilaria azaleella (Lepidoptera)
Pseudococcus gahani (Homoptera)
Sitona lineata (Coleoptera)
Stephanitis pyrioides (Hemiptera)

RHUS:

- Parlatoria oleae* (Homoptera)

RICINUS:

- Coccus viridis* (Homoptera)

RORIPPA:

- Hydrellia nasturtii* (Diptera)
Phyllotreta nigripes (Coleoptera)

ROSA:

- Eutetranychus banksi* (Acarina)
Ferrisia virgata (Homoptera)
Frankliniella intonsa (Thysanoptera)
Pseudococcus gahani (Homoptera)
Taeniothrips atratus (Thysanoptera)

Host and Insects—Continued

- ROSA**—Continued
Thrips angusticeps (Thysanoptera)
Thrips flarus (Thysanoptera)
Thrips major (Thysanoptera)
- RUSCUS**:
Aspidiotus britannicus (Homoptera)
- SACCHARUM**:
Iridomyrmex humilis (Hymenoptera)
Monomorium destructor (Hymenoptera)
Pseudococcus boninsis (Homoptera)
"Targionia" sacchari (Homoptera)
Trionymus sacchari (Homoptera)
- SALIX**:
Ceroplastes ceriferus (Homoptera)
- SAManea**:
Sinorylon conigerum (Coleoptera)
- SAPOTE**:
Anastrepha ludens (Diptera)
Chrysomphalus personatus (Coleoptera)
Eutetranychus banksi (Acarina)

Brevipalpus chilensis (Acarina)
Cryptoblabes gnidiella (Lepidoptera)
Iridomyrmex humilis (Hymenoptera)
Lecanium corni (Homoptera)
Leptoglossus chilensis (Hemiptera)
Phylloxera callosa (Coleoptera)
Polychrosis botrana (Lepidoptera)
- WISTERIA**:
Chionaspis wistariae (Homoptera)
Phenacoccus fujicola (Homoptera)
- YUCCA**:
Asterolecanium agavis (Homoptera)
- ZANTEDESCHIA**:
Iridomyrmex humilis (Hymenoptera)
- ZEALANDIA**:
Moodna bisinuella (Lepidoptera)
- ZELKOVA**:
Eriococcus abeliceae (Homoptera)
Lepidosaphes kuwacola (Homoptera)
- ZINGIBER**:
Orydema fusiforme (Coleoptera)
Pheidole megacephala (Hymenoptera)
- ZINNIA**:
Taeniothrips atratus (Thysanoptera)
Thrips flarus (Thysanoptera)

Hosts Unknown

- AIRPLANE**:
Adoretus sinicus (Coleoptera)
Anomala cuprea (Coleoptera)
Anomala viridana (Coleoptera)
Apogonalia stali (Homoptera)
Eurtinus notatipennis (Hemiptera)
Conoderus vagus (Coleoptera)
Coptotermes formosanus (Isoptera)
Crocosema plebeiana (Lepidoptera)
Cylas formicarius elegantulus (Coleoptera)
Dacus dorsalis (Diptera)
Draeculacephala producta (Homoptera)
Iridomyrmex humilis (Hymenoptera)
- AIRPLANE**—Continued
Mimosastes sallaei (Coleoptera)
Nysius coenosulus (Hemiptera)
Perkinsiella vitiensis (Homoptera)
Protaetia fusca (Coleoptera)
Protaetia orientalis (Coleoptera)
Sinorylon conigerum (Coleoptera)
Syrilla oceanica (Diptera)
Taeniothrips atratus (Thysanoptera)
Taeniothrips vulgarissimus (Thysanoptera)
Xystrocerca globosa (Coleoptera)
- BEAN**:
Bruchus tristis (Coleoptera)

Hosts Unknown—Continued

BULB:

Monomorium destructor (Hymenoptera)
Oryzodema fusiforme (Coleoptera)

FERN:

Bradybaena similis (Mollusca)

FLOWERS:

Amorbia emigratella (Lepidoptera)
Frankliniella bispinosa (Thysanoptera)
Frankliniella formosae (Thysanoptera)
Frankliniella schultzei (Thysanoptera)
Haplothrips gowdeyi (Thysanoptera)
Helix aspersa (Mollusca)
Microcephalothrips abdominalis (Thysanoptera)
Monomorium destructor (Hymenoptera)
Oryzocarenum bicolor (Hemiptera)
Protaetia fusca (Coleoptera)
Pseudothrips glaucus (Thysanoptera)
Taeniothrips atratus (Thysanoptera)
Taeniothrips vulgarissimus (Thysanoptera)
Thrips nigropilosus (Thysanoptera)

FOREST LITTER:

Hypera nigritrostris (Coleoptera)

GRASS:

Aspidiotus bilobis (Homoptera)
Asterolecanium miliaris miliaris (Homoptera)

HERB:

Aglossa cuprealis (Lepidoptera)
Monomorium destructor (Hymenoptera)
Zetha chavesi (Orthoptera)

IN BOX OF ANTHURIUMS:

Dacus dorsalis (Diptera)

IN GARBAGE CAN:

Anastrepha ludens (Diptera)

LEAF:

Aleuroplatus denticulatus (Homoptera)
Aleurothrixus myrtacei (Homoptera)
Chrysomphalus personatus (Homoptera)
Deroceras reticulatum (Mollusca)
Leucaspis cockerelli (Homoptera)
Targionia laurina (Homoptera)
Tetraleurodes acaciae (Homoptera)
Unaspis euonymi (Homoptera)
Vinsonia stellifera (Homoptera)

LEGUMINOSAE POD:

Ancylostomia stercora (Lepidoptera)

MERCHANDISE:

Cryptotermes formosanus (Isoptera)

MOSS:

Frankliniella bispinosa (Thysanoptera)

PACKING:

Listroderes subcinctus (Coleoptera)

PAPER WRAPPING:

Aglossa cuprealis (Lepidoptera)

PLANT:

Aleyrodes proletella (Homoptera)
Aspidiotus palmarum (Homoptera)
Asterolecanium pustulans (Homoptera)
Ceroptastes rubens (Homoptera)
Chrysomphalus umboniferus (Homoptera)
Coccus viridis (Homoptera)
Cryptoblabes gnidiella (Lepidoptera)
Dialeurodes kirkaldyi (Homoptera)
Ferrisia virgata (Homoptera)
Pulvinaria psidii (Homoptera)
Taeniothrips dianthi (Thysanoptera)

RAILWAY CAR:

Pectinophora gossypiella (Lepidoptera)

RETURNED WAR EQUIPMENT:

Achatina fulica (Mollusca)

RHIZOME:

Monomorium destructor (Hymenoptera)

ROOT:

Minthea rugicollis (Coleoptera)

SCRAP METAL:

Achatina fulica (Mollusca)

STRAW JACKET:

Glycyphagus domesticus (Acarina)
Tydeus interruptus (Acarina)

SUCCULENT:

Lepidosaphes bladhiae (tentative) (Homoptera)

SUITCASE:

Iridomyrmex humilis (Hymenoptera)

TREE FERN:

Bradybaena similis (Mollusca)

TREE SEED:

Caryedon fuscus (Coleoptera)
Pholidote megacephala (Hymenoptera)

TRUCK:

Pectinophora gossypiella (Lepidoptera)

VEGETABLES:

Monacha obstructa (Mollusca)

WITH BANANAS:

Anastrepha distincta (Diptera)

WOOD:

Chilo simplex (Lepidoptera)
Cryptotermes brevis (Isoptera)
Heterobostrychus aequalis (Coleoptera)
Kaloterms durbanensis (Isoptera)
Minthea rugicollis (Coleoptera)
Pogonocherus hispidulus (Coleoptera)
Sinoxylon anale (Coleoptera)
Sinoxylon conigerum (Coleoptera)

WOOL:

Calonota festiva (Coleoptera)

Countries of Origin and Insects

ALGERIA:

Bruchus guttalis
Parlatoria zizyphus

AMERICAN VIRGIN ISLANDS:

Furcaspis bifurmis
Pectinophora gossypiella

ANGLO-EGYPTIAN SUDAN:

Pectinophora gossypiella

ANGOLA:

Specularius impressithorax

ANTIGUA:

Aspidiotus palmarum
Coccus viridis
Pectinophora gossypiella
Pulvinaria psidii
"Targionia" hartii

ARGENTINA:

Frankliniella bispinosa
Frankliniella cestrum
Glycyphagus domesticus
Nysius simulans
Parlatoria cinerea
Pectinophora gossypiella
Pinus tectus

AUSTRALIA:

Calonota festiva
Ceroptastes rubens
Deroceras reticulatum
Eucalyptinus tessellatus
Haplothrips gowdeyi
Lepidosaphes tuberculata

AUSTRALIA—Continued

Oryzocarenum bicolor
Phorodon menthae
Plautia brunneipennis
Pseudococcus gahani
Pulvinaria psidii

AZORES:

Aglossa cuprealis
Ceratitis capitata
Deroceras reticulatum
Iridomyrmex humilis
Onthophagus taurus
Taeniothrips atratus
Thrips flavus
Zetha chavesi

BAHAMAS:

Anastrepha mombinpraeoptans
Ancylostomia stercora
Callosobruchus maculatus
Ferrisia virgata
Morganella longispina

BARBADOS:

Aspidiotus destructor
"Targionia" hartii
Vinsonia stellifera

BELGIAN CONGO:

Cryptophlebia leucotreta
Stephanoderes hampei

BELGIUM:

Apion fuscirostre
Deroceras reticulatum

Countries of Origin and Insects—Continued

BELGIUM—Continued

Evergestis forficatis
Gracilaria azalea
Ips sczedenatus
Phlyctaenia ferrugalis
Phytomyza atricornis (?)

BERMUDA:

Coccus viridis
Cryptolabes gnidiella
Diaprepes famelicus var.
Frankliniella bispinosa
Haplothrips gowdeyi
Iridomyrmex humilis
Monomorium destructor
Morganella longispina
Pheidole megacephala
Prodenia ornithogalli
Taeniothrips gracilis

BRAZIL:

Anastrepha fraterculus
Anastrepha mombinpraeoptans
Anastrepha parallela (?)
Anastrepha serpentina
Aspidiotus destructor
Asterolecanium degeneratum
Asterolecanium pustulans
Ceratitis capitata
Chrysomphalus paulistus
Cryptolabes gnidiella
Eurytoma orchidearum
Frankliniella paucispinosa
Galgupha vinctulata
Gnorimoschema borsaniella (?)
Gymnandrosoma aurantianum
Iridomyrmex iniquus
Maruca testulalis
Neoleucinodes elegantalis
Pachyzancla bipunctalis
Pectinophora gossypiella
Pheidole megacephala
Stenoma catenifer
Stephanoderes hampei

BRITISH EAST AFRICA:

Dinoderopsis serriger (?)

BRITISH GUIANA:

Neodryocetes guianae
Pinnaspis buzi

BRITISH HONDURAS:

Pseudischnaspis alienus

BRITISH VIRGIN ISLANDS:

Anastrepha mombinpraeoptans

BRITISH WEST INDIES:

Callosobruchus maculatus
Leucaspis cockerelli
Unaspis citri

CANADA:

Blissus leucopterus hirtus
Hylurgopinus rufipes
Taeniothrips atratus
Taeniothrips vulgatissimus

CANAL ZONE:

Ancylostoma stercorea
Aspidotus destructor
Asterolecanium epidendri
Brevipalpus phoenicis
Chrysomphalus personatus
Chrysomphalus umboniferus
Coccus viridis

Fundella pelluscens
Furcaspis bififormis
Lepidosaphes tokionis
Leucaspis cockerelli
Myochrous femoralis
Pseudoanidia trilobitiformis
Pseudischnaspis alienus
Stenoma catenifer
Vinsonia stellifera

CAPE VERDE ISLANDS:

Leucinodes orbonalis
Pheidole megacephala

CENTRAL AMERICA:

Leucaspis cockerelli

CEYLON:

Aspidiotus herculeanus

CHILE:

Brachyrimus rugosostriatus
Brevipalpus chilensis
Epidiaspis pirticola

CHILE—Continued

Leptoglossus chilensis
Listroderes subcinctus
Megalometis chilensis
Porotermes quadricollis

CHINA:

Chilo simplex
Coptotermes formosanus
Lepidosaphes tuberculata
Minthea rugicollis
Parlatoria zizyphus
Taeniothrips gracilis

COLOMBIA:

Anaphothrips orchidaceus
Chrysomphalus umboniferus
Coccus viridis
Dialeurodes citrifolii
Euscapes postfasciatus
Pseudoanidia trilobitiformis
Stenoma catenifer
Unaspis citri

COSTA RICA:

Anastrepha mombinpraeoptans
Aspidiotus destructor
Aspidiotus herculeanus
Chrysomphalus personatus
Deroceras reticulatum
Furcaspis bififormis
Leucaspis cockerelli
Metamasius sericeus
Neolobophora ruficeps
Pseudischnaspis longissima

CUBA:

Aganactes indecora

Nectria galligena (Ascomycetes)
ARAUCHARIA:
Botryosphaeria berengeriana f. araucariae (Ascomycetes)
Cryptospora longispora (Ascomycetes)
ARDISIA:
Phoma ardisiae (Deuteromycetes)
ARECA:
Colletotrichum arecae (Deuteromycetes)
Gloeosporium catechu (Deuteromycetes)
Phomopsis palmicola (Deuteromycetes)
ARRHENATHERUM:
Claviceps purpurea (Ascomycetes)
ASPARAGUS:
Meloidogyne javanica (Nematoda)
ASTER:
Coleosporium solidaginis (Promycetes)
ASTILBE:
Thielaviopsis basicola (Deuteromycetes)
AVENA:
Helminthosporium avenae (Deuteromycetes)
Heterosporium avenae (Deuteromycetes)
Nigrospora sphaerica (Deuteromycetes)
Puccinia coronata (Promycetes)
Puccinia graminis var. *avenae* (Promycetes)
AXONOPUS:
Colletotrichum graminicolum (Deuteromycetes)
Fusarium gramineum (Deuteromycetes)
BACCHARIS:
Puccinia baccharidis (Promycetes)
BAMBOO:
Apiospora punctum (Phycomycetes)
Hyponectria aureo-nitens (Ascomycetes)
BAMBUSA:
Melanospora globosa (Ascomycetes)
Puccinia kusanot (Promycetes)
Puccinia longicornis (Promycetes)
BEGONIA:
Xanthomonas begoniae (Schizomycetes)
BERBERIS:
Cueurbitaria berberidis (Ascomycetes)
BETA:
Papulaspora parasitica (Deuteromycetes)
BLETIA:
Uredo nigropuncta (Promycetes)
BOUGAINVILLEA:
Cercospora mirabilis (Deuteromycetes)
BRASSICA OLERACEA:
Mycosphaerella brassicicola (Ascomycetes)
BRASSICA OLERACEA BOTRYTIS:
Gloeosporium concentricum (Deuteromycetes)
Mycosphaerella brassicicola (Ascomycetes)
- BRASSICA OLERACEA CAPITATA:**
Peronospora parasitica (Phycomycetes)
Pseudomonas maculicola (?) (Schizomycetes)
BROMUS:
Colletotrichum graminicolum (Deuteromycetes)
Ustilago bullata (Promycetes)
BUXUS:
Macrophoma candollei (Deuteromycetes)
Phyllosticta limbalis (Deuteromycetes)
Puccinia buxi (Promycetes)
Volutella buxi (Deuteromycetes)
CACTUS:
Erysiporum cactivorum (Deuteromycetes)
CAMELLIA:
Discosia arctocreas (Deuteromycetes)
CAPSIUM:
Gloeosporium piperatum (Deuteromycetes)
Phoma destructiva (Deuteromycetes)
Phomopsis capsici (Deuteromycetes)
CARICA:
Asperisporium caricae (Deuteromycetes)
Fusarium diversisporum (Deuteromycetes)
CASTANEA:
Diplodia theobromae (Deuteromycetes)
Phoma eriophorum (?) (Deuteromycetes)
CATASETUM:
Uredo nigropunctata (?) (Promycetes)
CATTLEYA:
Diplodia paraphysaria (Deuteromycetes)
Phyllosticta laeliae (Deuteromycetes)
CENTROSEMA:
Cercospora centrosema (Deuteromycetes)
CEREUS:
Phyllosticta cacti (Deuteromycetes)
CHAENOMELES:
Graphis scripta (Ascomycetes)
CHAMACEYPARIS:
Pestalotia funerea (Deuteromycetes)
CHAMAEDOREA:
Aschersonia aleyrodis (Deuteromycetes)
Mycosphaerella advena (Ascomycetes)
CHRYSANTHEMUM:
Aphelenchoides ritzema-bosi (?) (Nematoda)
Puccinia chrysanthemi (Promycetes)
Puccinia horiana (Promycetes)
Septoria chrysanthemi (Deuteromycetes)
CICHORIUM:
Pseudomonas marginalis (Schizomycetes)
CITRUS AURANTIFOLIA:
Elsinoe australis (Ascomycetes)
Meliola citricola (Ascomycetes)
Sphaceloma fawcetti (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
CITRUS AURANTIUM:
Elsinoe australis (Ascomycetes)
Sphaceloma fawcetti (?) (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
CITRUS AURANTIUM VAR.:
Xanthomonas citri (Schizomycetes)
CITRUS GRANDIS:
Fusarium juruanum (Deuteromycetes)
Fusarium lateritium (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
CITRUS LIMON:
Elsinoe australis (Ascomycetes)
Phoma citricarpa (Deuteromycetes)
Phoma limoni (?) (Deuteromycetes)
Phoma rigida (?) (Deuteromycetes)
Pleospora herbarum (Ascomycetes)
Septoria citri (Deuteromycetes)
Sphaceloma fawcetti (Deuteromycetes)
Sphaceloma fawcetti var. *scabiosa* (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
Xanthomonas sp. (?) (Cancerosis "B") (Schizomycetes)
CITRUS NOBILIS:
Meliola citricola (Ascomycetes)
CITRUS PARADISI:
Ascochyta citri (Deuteromycetes)
Phoma citricarpa (Deuteromycetes)
Septoria citri (Deuteromycetes)
Xanthomonas citri (Schizomycetes)
CITRUS RETICULATA:
Elsinoe australis (Ascomycetes)
Gloeosporium folliculorum (Deuteromycetes)
Phoma citricarpa (Deuteromycetes)
Sphaceloma fawcetti (Deuteromycetes)
Xanthomonas citri (Schizomycetes)

UNITED STATES DEPARTMENT OF AGRICULTURE

AGRICULTURAL RESEARCH SERVICE

PLANT QUARANTINE BRANCH

SERVICE AND REGULATORY ANNOUNCEMENTS

LIST OF INTERCEPTED PLANT PESTS, 1954

(List of Pests Recorded from July 1, 1953, through June 30, 1954 as Intercepted in, on, or with Plants and Plant Products Entering United States Territory)

Compiled by

JUDITH HUNT

Plant Quarantine Aid

INTRODUCTION

This report, covering the forty-first year for which interception lists have been issued, summarizes the records of insect pests, plant pathogens, and certain other organisms found in, on, or with plant products (1) imported, (2) offered for but refused entry, (3) held as ships' stores, etc., and hence not offered for entry through customs, (4) offered for entry for immediate transportation and exportation in bond, and (5) in domestic shipments between the American Virgin Islands, Hawaii, and Puerto Rico and the mainland.

Comprising this list are insects and plant diseases of known or potential plant quarantine significance to the United States. Many diseases of particular interest are included even though they are found of general or of limited distribution in the United States. The latter pathogens are the interceptions which are either (1) new to the country of origin, or (2) new to the host plant, or (3) are of such limited distribution in the United States that they are worthy of mention.

Some collections made late in the year are included in the report for the following year, since determinations cannot be obtained immediately for all of them. Occasionally determinations are delayed for longer periods. The data for this list were obtained from routine reports by personnel of the Plant Quarantine Branch supplemented by information supplied by State and Customs officials. The States of California and Florida maintain staffs of specialists who identify a large proportion of the material collected at their ports. Specialists of the Field Crops Research Branch and the Horticultural Crops Research Branch determine many of the pathogens collected at the ports that are unusual or difficult to identify.

All scientific names are reviewed by appropriate specialists in the Department to assure conformance to the international rules of nomenclature.

Although every effort is made to give the correct origin for all collections listed, the alleged origin of all host-plant materials cannot be verified. Questionable items are therefore omitted or the origin is listed as unknown.

Since the great increase in air-cargo transportation, a proportionally larger number of importations of various plants, plant products, seeds, fruits, rhizomes, corms, and bulbs arrive rapidly from all parts of the world. The golden nematode, oat nematode, and fruit flies are included in the category of the more important pests taken from this source.

INTERCEPTIONS FROM AIR-BORNE MATERIAL

Increasingly frequent interceptions of important air-borne plant pests, unknown to this country, were made during the year. Some of the most injurious insects, nematodes, and plant diseases intercepted arrived in, on, or with air-borne fruits and plant material. During the year 3,145 interceptions of insects and 507 interceptions of plant diseases were made in baggage, express, freight, mail, and stores on imported plant parts.

Some important insects intercepted with air-borne material were:

Adoxophyes orana on cut flowers of lilac in baggage and cargo from the Netherlands.

The citrus blackfly (*Aleurocanthus woglumi*) on *Citrus* sp. leaf in baggage and on a lime leaf in cargo from Mexico.

Anastrepha fraterculus (?) in cherimoya in baggage from Colombia and Peru.

The Mexican fruit fly (*Anastrepha ludens*) in orange in baggage from Guatemala and Mexico, in mango in baggage from Mexico, and in orange in stores from Mexico.

The West Indian fruit fly (*Anastrepha mombinpraeoptans*) in *Annona* sp. in baggage from Costa Rica, in guava in baggage from Costa Rica, Dominican Republic, and Salvador, in guava in mail from Puerto Rico, in mango in baggage from the Bahamas, Costa Rica, Cuba, Guatemala, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Puerto Rico, and Salvador, and in yellow mombin in baggage from Guatemala, Nicaragua, and Salvador.

Anastrepha serpentina in sapodilla in baggage from Mexico, in sapodilla in quarters from South America; *A. serpentina* (?) in sapodilla in baggage from Nicaragua.

Anastrepha suspensa in guava in baggage from Cuba.

Apion carduorum in globe artichoke in baggage from Italy.

Bruchus ervi in lentils in baggage from Italy and in lentils in mail from Syria.

Carposina sasakii in apple in stores from Japan.

The Mediterranean fruit fly (*Ceratitis capitata*) in apricot in baggage from Italy, in avocado in baggage from Hawaii, in coffee berries in baggage from Brazil, in coffee berries in preflight inspection of baggage leaving Hawaii for the mainland, in grapefruit in baggage from Israel, in guava in baggage from the Azores, in Mandarin orange in baggage from Hawaii, in Mandarin orange in stores from Italy and Portugal, in mango in preflight inspection of baggage leaving Hawaii for the mainland, in nectarine and peach in baggage from Italy, in quince in baggage from Argentina, in orange in baggage from Spain, in orange in stores from Italy. *C. capitata* (?) in apricot in baggage from Portugal, in *Crataegus* sp. in baggage from Italy, in fig in baggage from Greece and the Madeira Islands, in guava in baggage from Israel and Italy, and in medlar, pricklypear, and quince in baggage from Italy.

The Asiatic rice borer (*Chilo suppressalis*) in rice straw in baggage from Spain.

An adult of the melon fly (*Dacus cucurbitae*) on cut flowers of *Anthurium* sp. in baggage from Hawaii and a larva in tomato in preflight inspection of stores leaving Hawaii for the mainland.

The oriental fruit fly (*Dacus dorsalis*) in guava and Malay-apple in preflight inspection of baggage leaving Hawaii for the mainland; adults of *D. dorsalis* were found on airplanes in preflight inspection of planes leaving Hawaii for the mainland; *D. dorsalis* (?) in avocado and India-almond in preflight inspection of baggage leaving Hawaii for the mainland, in santol in baggage from the Philippines.

The olive fly (*Dacus oleae*) in olive in baggage from Egypt, Italy, and Lebanon.

The Tahitian coconut weevil (*Diocalandra taitensis*) in coconut in preflight inspection of baggage leaving Hawaii for the mainland.

Laspeyresia splendana in chestnut in baggage from Greece.

A bean pod borer, *Maruca testulalis*, on mauna loa lei in preflight inspection of baggage leaving Hawaii for the mainland, in string beans in stores from India, and in string beans in preflight inspection of baggage leaving Puerto Rico for the mainland.

Adults of *Nephotettix apicalis* on airplanes from the Philippines.

The pink bollworm (*Pectinophora gossypiella*) in cottonseed in baggage from Egypt and in okra in preflight inspection of baggage leaving Puerto Rico for the mainland.

Polychrosis botrana in grapes in baggage from Greece and Spain and in grapes in stores from France.

Rhagoletis cerasi in cherry in baggage from Austria, Germany, Portugal, and Spain, in cherry in stores from Belgium, England, France, and Italy; *R. cerasi* (?) in cherry in baggage from the Azores and the Netherlands and in cherry in stores from Switzerland.

The apple maggot (*Rhagoletis pomonella*) in apple in baggage from Mexico.

An avocado moth, *Stenoma catenifer*, in avocado in baggage from Brazil.

A mango weevil, *Sternonchetus mangiferae*, in mango in baggage from India and in preflight inspection of baggage leaving Hawaii for the mainland.

Interceptions of air-borne plant pathogens not believed to be established in the United States or of limited distribution were:

Chrysomyxa rhododendri on rhododendron in baggage and cargo from Austria and in mail and quarters from Switzerland.

Cryptospora longispora on Norfolk-Island-pine seed in mail from Norfolk Island.

Fusicladium eribotryae on loquat in baggage from the Azores.

Kuehneola japonica on rose in baggage from Japan.

Phoma citricarpa on lemon in stores from Australia and New Zealand, on Mandarin orange in baggage from China, on orange peel from an unknown origin, and on citrus peel in baggage from China and Hawaii.

Phyllosticta micrococcoides (?) on lemon in baggage from Thailand.

Puccinia belamcandae on leaf of *Belamcanda* sp. in cargo from India; *P. horriana* on *Sphenanthemum* in baggage, quarters, and stores from Japan.

Sphenospora kevorkianii on *Stelis* sp., an orchid, in express from Trinidad.

Uredo gynandrearum (?) on an orchid leaf in cargo from the Canal Zone.

The following nematodes were also found in the air-borne material:

The oat nematode (*Heterodera avenae*) in soil with holly seedlings in baggage from Ireland.

The golden nematode (*Heterodera rostochiensis*) in soil with horseradish in mail from Denmark, in soil with chrysanthemum, gaillardia, and primrose plants in baggage from Germany, in soil with lily and privet plants in baggage from England.

Heterodera punctata in soil with *Cymbidium* sp., an orchid, plants in cargo and mail from England, in soil with an unidentified plant in baggage from England.

NOTES ON INSECTS INTERCEPTED

FRUIT FLIES

The following fruit flies were intercepted:

Anastrepha fraterculus in orange in stores from Brazil and in peach in baggage from Mexico; *A. fraterculus* (?) in cherimoyas in air baggage from Colombia and Peru, in mango in stores from Chile, and in orange in quarters from Brazil.

The Mexican fruit fly (*Anastrepha ludens*) in grapefruit in baggage, quarters, and stores from Mexico, in mango in baggage and air baggage from Mexico, in oranges in baggage and air baggage from Guatemala and Mexico, in oranges in quarters, stores, and air stores from Mexico, in orange in air stores from an unknown origin, in pomegranate, quince, and sweet lime in baggage from Mexico, 127 larvae were found on the floor of a refrigerator car from Mexico; *A. ludens* (?) in mango and orange in baggage from Mexico and in orange in air baggage from Mexico.

The West Indian fruit fly (*Anastrepha mombinpraeoptans*) in guavas in air baggage from Costa Rica, Dominican Republic, and Salvador, in guava in air mail from Puerto Rico, in mangoes in baggage from Cuba, Guatemala, Honduras, Mexico, Panama, Puerto Rico, and Trinidad (?), in mangoes in air baggage from the Bahamas, Costa Rica, Cuba, Guatemala, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Puerto Rico, and Salvador, in mangoes in cargo from Cuba, Dominica,

Mexico, and Puerto Rico, in mangoes in quarters from Guatemala, Honduras, Mexico, Panama, and Puerto Rico, in mangoes in stores from the Dominican Republic, Jamaica, and Nicaragua, and in mango in air stores from Jamaica, in yellow mombin in baggage from Mexico, in yellow mombins in air baggage from Guatemala, Nicaragua, and Salvador, and in yellow mombin in air mail from Nicaragua. *A. mombinpraeoptans* (?) in mango in quarters from Panama.

Anastrepha serpentina in mamey in baggage from Mexico, in sapodillas in air baggage and stores from Mexico, in sapodilla in air quarters from South America; *A. serpentina* (?) in sapodilla in air baggage from Nicaragua.

Anastrepha striata in guava in baggage from Mexico.

Anastrepha suspensa in guava in air baggage from Cuba.

The Mediterranean fruit fly (*Ceratitis capitata*) in apple in baggage from Italy, in apple in stores from Spain, in apricots in air baggage from Italy, in apricot in stores from Portugal, in avocado in preflight inspection of air baggage leaving Hawaii for the mainland, in coffee berries in air baggage and mail from Brazil, in coffee berries in baggage from Hawaii, in coffee berries in preflight inspection of baggage leaving Hawaii for the mainland, in coffee berries found in mail leaving Hawaii for the mainland, in grapefruit in air baggage from Israel, in grapefruit in stores from the Canary Islands and Egypt, in guava in air baggage from the Azores, in guava in stores from the Union of South Africa, in lemon in baggage from Italy, in Mandarin oranges in stores from Algeria and Portugal, in Mandarin orange in preflight inspection of baggage leaving Hawaii for the mainland, in Mandarin oranges in baggage and air stores from Italy, in Mandarin orange in air stores from Portugal, in mango in preflight inspection of baggage leaving Hawaii for the mainland, in orange in baggage from Brazil, in oranges in stores from the Canary Islands and Portugal, in oranges in baggage, air baggage, and air stores from Italy, in oranges in air baggage and quarters from Spain, in nectarine and peach in air baggage from Italy, in pear in quarters from Spain, in pepper in stores from Hawaii, in pricklypear in baggage from Italy, in quince in air baggage from Argentina, in quince in cargo from Greece. *C. capitata* (?) in apricot in air baggage from Portugal, in coffee berries in air baggage from Brazil, in coffee berries in baggage from Hawaii, in coffee berries in preflight inspection of baggage leaving Hawaii for the mainland, in coffee berries found in inspection of mail leaving Hawaii for the mainland, in *Crataegus* sp. in air baggage from Italy, in fig in air baggage from Greece, in fig in baggage from the Madeira Islands, in grapefruit in stores from Brazil, Italy, and Spain, in guava in air baggage from Israel and Italy, in Mandarin orange in stores from Lebanon, in medlar in air baggage from Italy, in oranges in stores from Algeria and Argentina, in orange in baggage from Italy, in pricklypears in baggage and air baggage from Italy, in quince in air baggage from Italy, and in sorbe apple in baggage from Italy.

The melon fly (*Dacus cucurbitae*) with cut flowers of anthurium in preflight inspection of baggage leaving Hawaii for the mainland, in bell pepper, pepper, cucumber, pumpkin, and tomato in stores from Hawaii, in string beans in mail leaving Hawaii for the mainland; *D. cucurbitae* (?) in cucumber in stores from Hawaii.

The oriental fruit fly (*Dacus dorsalis*) in avocado, banana, mango, and *Ochrosia elliptica* in baggage from Hawaii, in guava and Malay-apple in preflight inspection of baggage leaving Hawaii for the mainland, in mango in mail from Guam, in mango and peach in mail leaving Hawaii for the mainland, 4 adults of *D. dorsalis* were found in preflight inspection of airplanes leaving Hawaii for the mainland; *D. dorsalis* (?) in avocado and India-almond in preflight inspection of baggage leaving Hawaii for the mainland, in grapefruit in stores from Ceylon, and in santol in air baggage from the Philippines.

The olive fruit fly (*Dacus oleae*) in olives in baggage and stores from Italy, in olive in baggage from Greece, in olives in air baggage from Egypt, Italy, and Lebanon; *D. oleae* (?) in olive in stores from Italy.

Rhagoletis cerasi in cherries in air baggage from Austria, Germany, Italy, Portugal, and Spain, in cherries in baggage from Germany and Italy, in cherries in air stores from Belgium, England, France, and Italy, in cherries in air quarters from Italy; *R. cerasi* (?) in apple in air baggage from the Azores, in cherry in air baggage from the Netherlands, in cherries in air stores from England, France, and Switzerland.

Rhagoletis juglandis (?) in black walnut in baggage from Mexico.

The apple maggot (*Rhagoletis pomonella*) in apples in baggage and air baggage from Mexico, in apple in mail from Canada; *R. pomonella* (?) in thornapple in baggage from Mexico.

INSECTS OTHER THAN FRUIT FLIES

The following miscellaneous insects of interest were intercepted:

Adoxophyes orana (Tortricidae) on cut flowers of lilac in air baggage and air cargo from the Netherlands.

The citrus blackfly (*Aleurocanthus woglumi*) on leaves of *Citrus* sp. in baggage and air baggage from Mexico, on grapefruit leaf in baggage from Mexico, on lime leaves in air baggage, cargo, air cargo and quarters from Mexico, on sour lime leaves in cargo and stores from Mexico, and on orange leaves in baggage and cargo from Mexico.

A curculionid, *Baris lepidii*, in horseradish in cargo from Germany, Poland, and Yugoslavia.

Brachycerus albidentatus (Curculionidae) in garlic in baggage and stores from Italy.

Brachycerus algirus in garlic in baggage and cargo from Italy and in garlic in cargo and stores from Spain.

A bruchid, *Bruchidius incarnatus*, in broadbean in baggage from Egypt and Lebanon and in vetch seed in cargo from Italy.

Cacographis osteolalis (Schoenobiidae) "very interesting material, genus and species not represented by larvae in the National Museum collection prior to this material; also first record for its food plant", in roots of *Colocasia* sp. in cargo from Mexico.

Carposina sasakii (Carposinidae) in apple in air stores from Japan.

A coccid, *Ceroplastes sinensis*, on budwood of grapefruit in mail from Morocco.

Cryptoblabes gnidiella (Phycitidae) in *Caryota* sp. in air baggage from Brazil, with grapes in air baggage from Italy, on loquat in air baggage from Bermuda, in orange in air stores from Spain, in pomegranate in baggage and cargo from Greece, in pomegranate in baggage from Italy, in pomegranate in air baggage from Libya, in pomegranate in stores from Portugal, in pomegranate in cargo from Spain, and in Mandarin orange in air stores from the Azores.

Cylas formicarius, possibly subspecies *formicarius*, in sweetpotato in cargo (food for monkeys) from India.

Cylas puncticollis in sweetpotato in stores from British West Africa and Nigeria.

Dendrothrips ornatus (Thripidae) on lilac leafbud in cargo from the Netherlands.

Dyspessa ulula (Cossidae) in garlic in cargo from Hungary, Italy, and Morocco.

Gortyna flavago (Phalaenidae) in globe artichoke in stores from Algeria and Italy.

An avocado weevil, *Heilipus lauri*, in avocado in mail from Mexico.

Heterotermes convexinotatus, a termite, very destructive to buildings, in jicama in baggage from Mexico, in a log in cargo from Colombia, and on an orchid root in baggage from Panama.

A curculionid, *Listroderes subcinctus*, with grapes in cargo from Chile.

Megacerus leucosomus (Bruchidae), an interesting species and new to the collection in the National Museum, in tree morning-glory seed in mail from Mexico and in seed of *Rivea corymbosa* in mail and *Rivea* sp. seed in express from Mexico.

A cicadellid, *Nephotettix apicalis*, in an airplane from the Philippines.

Phalonia zephyrana (Phaloniidae) a so-called carrot stem borer, in carrots in stores from Algeria and Trieste.

A curculionid, *Phlyctinus callosus*, with grapes in cargo from the Union of South Africa.

A chrysomelid, *Phyllotreta vittula*, on watercress in stores from France.

Polychrosis botrana (Olethreutidae) in grapes in air baggage from Greece and Spain and in grapes in air stores from France.

Prays oleellus (Hyponomeutidae) with olives in air baggage from Italy.

Sesamia cretica (Phalaenidae) in broomcorn in cargo from Greece and in broomcorn in cargo and mail from Italy.

A bostriichid, *Sinoxylon anale*, in a wooden case in cargo from Pakistan and with amaryllis in cargo from Japan.

SNAILS

The giant African snail (*Achatina fulica*) was reported three times during the year with scrap metal coming from the Caroline Islands and Guam. Two of these interceptions were made at San Pedro, Calif., and one at Baltimore, Md.

Other injurious snails intercepted and not known to be in the United States or of limited distribution were:

Bradybaena similaris with *Anthurium* sp. (leaves) and tree fern in preflight inspection of mail leaving Hawaii for the mainland, with plant foliage, ti leaves,

and Vanda Miss Jocquim, an orchid, in preflight inspection of air cargo leaving Hawaii for the mainland; at Miami, Fla., with miscellaneous plants in air baggage from Jamaica.

Deroceras reticulatum at San Juan, P. R., with asters (cut flowers) in air cargo from Haiti and with cabbage in stores from Spain; at New Orleans, La., with cabbage in stores from Argentina; at Philadelphia, Pa., with cabbage in stores from Belgium; at Savannah, Ga., with cabbage in stores from Belgium and Brazil; at New York, N. Y., with endive in cargo from Belgium, with grapes in baggage from England, with soil with hydrangea plants in air baggage from Iceland, in soil with cedar seedlings in baggage from Canada, with unidentified plants in baggage from Wales, and with turnips in stores from Northern Ireland; at Philadelphia, Pa., with leek in stores from England; at Honolulu, Hawaii with parsley in air stores from Australia and with yam bean in preflight inspection of mail leaving Hawaii for the mainland.

Limax marginatus at New Orleans, La., with cabbage in stores from the Netherlands.

Limax maximus at New York, N. Y., with radishes in air baggage from Lebanon; at Seattle, Wash., in soil with dwarf pine in baggage from Japan.

Theba pisana at Philadelphia, Pa., with lettuce in stores from France and with bales of cork in cargo from Morocco; at New York, N. Y., with bales of cork in cargo from Morocco.

NOTES ON DISEASES INTERCEPTED

Japan continues to be the origin of the greatest number of interceptions (72) of citrus canker (*Xanthomonas citri*), 35 of which were on oranges, 15 on grapefruit, 13 on lemons, 4 on sour oranges, 2 on Mandarin oranges, one each on sour lime, *Citrus* sp. ("summer orange"), and *Citrus ichangensis* var. (yazu.). Seven interceptions came from China, 4 on Mandarin orange and 3 on orange peel. India furnished 5 interceptions, all on sour limes while the Philippines contributed one on lemon and one on orange. One came from Formosa on pummelo, 1 from Guam on lime, 1 from Java on sour lime, and 1 from Thailand on grapefruit.

"Cancrosis B" (*Xanthomonas* sp. (?)), another bacterial disease of citrus, producing symptoms similar to citrus canker, was intercepted three times on lemons from Argentina.

The sweet orange scab (*Elsinoe australis*) was intercepted 62 times. Of these interceptions 38 were from Brazil on lemon, orange, sour lime, and sour orange; 21 from Argentina on lemon, Mandarin orange, and orange; 2 from Uruguay on orange; and 1 from Paraguay on grapefruit.

Other interceptions were:

Dasyscypha virginea on rhododendron in cargo from the Netherlands.

Elsinoe phaseoli on lima beans in air baggage from Puerto Rico.

Fusicladium depressum on fennel in stores from Italy.

Guignardia traversi on *Stanhopea* sp., an orchid, in cargo from Mexico.

Myiocopron orchidearum on an orchid stem in baggage from Mexico.

Oospora microcarpa on stem of *Chamaecyparis* sp. from the Netherlands.

Phoma araucariae on Norfolk-Island-pine seed in mail from Australia; *P. sabdariffae* on kenaf hibiscus in cargo from Cuba.

Phyllachora cynodontis on Bermuda grass in mail from Spain; *P. orbicula* on bamboo leaf in cargo from China.

Phyllosticta micrococcoides (?) on lemon in air baggage from Thailand; *P. ruscicola* on *Ruscus* sp. in cargo from Italy.

Pleospora gigantea on *Agave* sp. in baggage from Mexico.

Puccinia belamcandae on *Belamcanda* sp. leaf in air cargo from India; *P. horriana* on chrysanthemums in air baggage, air quarters, and air stores from Japan; *P. ornithogali-thyrsoides* on chinkerichie in cargo and mail from the Union of South Africa.

Pyrenochaeta terrestris on primrose in cargo from the Netherlands.

Sclerotopsis testudinea on tree peony in mail from Japan.

Sphenospora kevorkianii on *Stelis* sp., an orchid, in air express from Trinidad.

Taphrina bullata (?) on Japanese flowering cherry in cargo from Japan.

Tolyposporium ehrenbergii on sorghum seed in mail from India.

Uredo gynandrearum (?) on an orchid leaf in air cargo from the Canal Zone.

Urocystis gladiolicola on gladiolus in mail from the Netherlands.

Uromyces alyxiae on maile leaf in mail from Hawaii.

The oat nematode (*Heterodera avenae*) was intercepted 32 times. Nine of these came from Germany, 6 from Italy, 4 from the Netherlands, 3 from Denmark, 2 each from England and Japan, and 1 each from Canada, Ireland, Mexico (?), Scotland, Spain, and Sweden. These interceptions were made from soil with bagging, with plant material for propagation, with cargo shipments of vegetables and with vegetables in ships' stores.

The golden nematode (*Heterodera rostochiensis*) was intercepted 94 times. Twenty-seven of these came from Germany, 26 from England, 16 from Scotland, 8 from Mexico, 5 from Peru, 3 from Ireland, 2 each from Argentina and Denmark, and 1 each from Belgium, the Netherlands, Northern Ireland, Poland and an unknown origin. Twelve of these interceptions were taken with soil on potatoes, its normal host, while others were taken with soil on bagging; soil with vegetables in baggage, cargo, and mail; in soil with bulbs in baggage, cargo, and mail for propagation; in plant material in baggage and mail for propagation; in soil with plant material in ships' furnishings and quarters; and in soil on a used truck.

Another intercepted nematode of interest, not known to be established in the United States is:

Ditylenchus hyacinthi on paper white narcissus bulbs in cargo from France.

INCOMPLETELY DETERMINED PESTS

Frequently inspectors find insects, nematodes, or pathogens affecting plant material in such a stage or condition that complete or accurate determination is impracticable or impossible. Some of these pests may be of economic importance, or new to the host or to the country of origin, or hitherto unknown in the United States.

INSECTS

Among the incompletely determined insects were the following fruit flies: *Anastrepha* sp., possibly *fraterculus*, at Jacksonville, Fla., in grapefruit in stores from Trinidad; at Miami, Fla., in mango in air baggage from Colombia; at New York, N. Y., in peach in air baggage from an unknown origin; at San Juan, P. R., in sapodilla in air baggage from the Dominican Republic.

Anastrepha sp., probably *ludens*, at Brownsville, Tex., in mamey sapote in stores from Mexico; at El Paso, Tex., in mango in baggage from Mexico; at Galveston, Tex., in oranges in quarters and stores from Mexico; at Houston, Tex., in grapefruit in quarters and stores from Mexico and in mango in air baggage from Mexico; at Laredo, Tex., in grapefruit, mango, orange, and pear in baggage from Mexico; at Nogales, Ariz., in mango in baggage from Mexico; at San Ysidro, Calif., in mango and orange in baggage from Mexico.

Anastrepha sp., probably *mombinpraeoptans*, at Charlotte Amalie, St. Thomas in guava in cargo from Tortola; at Miami, Fla., in guava in air mail from Puerto Rico; at Mobile, Ala., in mango in ship's garbage from Trinidad; at New York, N. Y., in mango in baggage from Colombia; at San Juan, P. R., in mango in air baggage from the Dominican Republic.

Anastrepha sp., probably *serpentina*, at Mobile, Ala., in orange in quarters from Netherlands Guiana; at New York, N. Y., in orange in stores from Brazil; at San Juan, P. R., in sapodilla in air baggage from Trinidad.

Anastrepha sp. at Baltimore, Md., in orange in stores from Brazil; at Brownsville, Tex., in *Spondias* sp. in stores from Mexico; at Galveston, Tex., in mamey and mango in baggage from Cuba (?) and in sapote in quarters from Mexico; at Hidalgo, Tex., in mango in baggage from Mexico; at Jacksonville, Fla., in grapefruit in air stores from Trinidad; at Laredo, Tex., in mango and quince in baggage from Mexico; at Miami, Fla., in guavas in air baggage from Costa Rica and Honduras, in hog plum in air baggage from Costa Rica, in mangoes in air baggage from Colombia, Ecuador, and Mexico, in oranges in air baggage and air stores from Colombia; at New York, N. Y., in cactus fruit in air stores from Colombia, in mangoes in air baggage from the Bahamas and Jamaica, in pricklypear in air stores from Colombia; at Norfolk, Va., in orange in air quarters from Trinidad; at Christiansted, St. Croix in guava berry in cargo from Tortola; at San Juan, P. R., in mango in air baggage from the Dominican Republic; at San Pedro, Calif., in guava in air baggage from Nicaragua.

Rhagoletis sp., either *completa* Cresson or *boycei* Cresson, at Hidalgo, Tex. and Nogales, Ariz., in black walnut in baggage from Mexico.

Rhagoletis sp., possibly *pomonella* (Walsh), in crab apple in baggage from Mexico.

Rhagoletis sp., in thornapple in baggage from Mexico.

Thirty-eight interceptions, identified to family only (Tephritidae), were intercepted at the following ports: At Baltimore, Md., in vegetable marrow in stores from the Union of South Africa; at Boston, Mass., in grapefruit in stores from the Union of South Africa, in persimmon and pricklypear in air baggage from Italy; at Brownsville, Tex., in caladium root in cargo from Mexico; at Eagle Pass, Tex., in apple in baggage from Mexico; at El Paso, Tex., in mango and thornapple in baggage from Mexico; at Galveston, Tex., in grapefruit in stores from Brazil; at Honolulu, Hawaii in purple granadilla in preflight inspection of baggage leaving Hawaii for the mainland, in mango in air baggage from the Philippines, in coffee berry in mail leaving Hawaii for the mainland, in persimmon in air baggage from Australia, and two larvae on the floor of the rear baggage pit of an airplane carrying coconuts, taroes, limes, and papayas from Fiji to Canton Islands; at Houston, Tex., in orange in quarters from Argentina and in tomato in stores from Hawaii; at New York, N. Y., in *Crataegus* sp. in baggage from Italy, in palm fruit in air baggage from Italy, in passionflower in air baggage from Colombia, and one pupa in box containing bay berries and other unidentified berries in air baggage from Italy; at Mobile, Ala., in mango in quarters from Trinidad; at Nogales, Ariz., in Caribe pepper in cargo from Mexico; at Philadelphia, Pa., in cabbage in stores from Egypt, in orange in stores from Peru, and in vegetable marrow in stores from French West Africa; at Port Arthur, Tex., in orange in quarters from the Union of South Africa; at Roma, Tex., in pear in baggage from Mexico; at Seattle, Wash., in mango in mail from Guam and in mango in air baggage from the Philippines; at San Juan, P. R., in apple in air baggage from Brazil and in persimmon in air baggage from Trinidad; at San Pedro, Calif., in apple in stores from England (?) and in coffee berries in air cargo from Colombia; at San Ysidro, Calif., in *Crataegus* sp. in baggage from Mexico; at Washington, D. C., in India jujuba in mail from India.

Other incompletely identified insects worthy of mention were:

Acanthocinus sp., probably *aedilis* (L.) (Cerambycidae), at Mobile, Ala., with debris of pine bark and peat moss in cargo from Germany.

Acanthoscelides sp. (Bruchidae), a new species, at Washington, D. C., in *Hoffmanseggia falcaria* seed in mail from Argentina.

Agrotis sp., may be *lineatus* (F.) (Elateridae), at Hoboken, N. J., in horse-radish roots in cargo from Germany.

Aleurodicus sp. (Aleyrodidae), a new species, at Laredo, Tex., on *Laelia anceps*, an orchid, in cargo from Mexico.

Altica sp., possibly *oleracea* L. (Chrysomelidae), at Chicago, Ill., in forest litter in mail from Germany.

Amblycerus sp., near *pygidialis* (Suff.) (Bruchidae), a new species, at Laredo, Tex., in seeds of *Cordia* sp. in baggage from Mexico.

Aphthona sp., probably *coerulea* (Geoffr.) (Chrysomelidae), at New York, N. Y. with leaves of *Rubus* spp., in air stores from France.

Archips sp., doubtfully *pronubana* (Hbn.) (Tortricidae), at Philadelphia, Pa., in pomegranate in baggage from Yugoslavia.

Ardis sp., probably *brunniventris* (Htg.) (Tenthredinidae), at New York, N. Y., in rose stem in air baggage from Switzerland.

Baris sp. (Curculionidae) at Philadelphia, Pa., in turnip in stores from Italy; at Nogales, Ariz., with chrysanthemums (cut flowers), lettuce, and onions in baggage from Mexico.

Batrachedra sp. (Cosmopterygidae), a new species, at Washington, D. C., in agave plant in mail from Guatemala.

Blaps sp., probably *gigas* (L.) (Tenebrionidae), at New York, N. Y., and Philadelphia, Pa., on bark of cork oak in cargo from Morocco.

Brachyrhinus sp. (Curculionidae) at Hoboken, N. J., with roots of rhododendron in cargo from Belgium.

Callosobruchus sp. (Bruchidae), a new species, at New Orleans, La., in leguminous seed in cargo from Pakistan.

Caryedes sp., near *braziliensis* (Thunb.) (Bruchidae), at Washington, D. C., in *Canavalia* sp. seed in mail from Guatemala.

Cleonus sp. (Curculionidae) at Brownsville, Tex., in carrot in stores from Italy; at Philadelphia, Pa., in carrot in stores from Portugal; at Washington, D. C., with seed of *Nenax microphylla* in mail from the Union of South Africa.

Coccinae (Coccidae), uncertain as to genus, at Hoboken, N. J., on *Crassula alstonii* in air cargo from the Union of South Africa.

Dendarus sp., near *tristis* Rossi (Tenebrionidae), at New York, N. Y., with cork oak bark in cargo from Morocco.

Dicraeus sp., near *longinervis* Beck. (Chloropidae), at Washington, D. C., with seed heads of *Ischaemum brachya therum* in mail from Transvaal.

Epicaerus sp. (Curculionidae) at San Diego, Calif., in potato in stores from Mexico; at Hidalgo and Laredo, Tex., in potatoes in baggage from Mexico; at Brownsville and Houston, Tex., in potatoes in stores from Mexico.

Ereunetis sp., near or = *minuscule* Wlsm. (Tineidae), at San Juan, P. R., in flamboyant seed pod in preflight inspection of baggage leaving Puerto Rico for the mainland.

Eulia sp., near *salubricola* Meyrick (Tortricidae), at New York, N. Y., in nectarine in cargo from Chile.

Eulia sp. at Baltimore, Md., New York, N. Y., and Philadelphia, Pa., in plums in cargo from Chile; at New York, N. Y., in peach in cargo from Chile; at Baltimore, Md. and New York, N. Y., in grapes in cargo from Chile.

Eurychilella sp. (Miridae), a new species, at Brownsville, Tex., with philodendron seedlings in cargo from Mexico.

Galerucella sp., probably *tenella* (L.) (Chrysomelidae), at Hoboken, N. J., on *Chamaecyparis* sp. leaf in cargo from the Netherlands.

Gnorimoschema sp., may be *borsaniella* Koehr. (Gelechiidae), at Philadelphia, Pa., in pepper in stores from Brazil.

Gnorimoschema sp., near or = *ocellatella* Boyd, at Philadelphia, Pa., in beet in stores from Italy.

Gymnandrosoma sp. (Olethreutidae) at Brownsville, Tex., in cacao in baggage from Mexico; at Nogales, Ariz., in guamuchil in baggage from Mexico.

Hepialus sp. (Hepialidae) at New York, N. Y., in horseradish in cargo from Germany.

Laspeyresia sp., probably *grossana* (Haw.) (Olethreutidae), at Norfolk, Va., in valonia cup in cargo from Greece.

Longitarsus sp., probably *parvulus* Payk. (Chrysomelidae), at Seattle, Wash., on rhododendron in cargo from the Netherlands; at Boston, Mass., in sand around cut flowers in furnishings from England; at Norfolk, Va., in soil with celery in stores from the Netherlands.

Mothonica sp. (Stenomidae), presumably undescribed, at Miami, Fla., in palm seed in air cargo from Cuba.

Nasutitermes sp. (Termitidae) at New York, N. Y., in cacao pod in cargo from Costa Rica; at San Pedro, Calif., on an orchid plant in air cargo from Trinidad.

Neoleucon sp. (Miridae), a new species, at Brownsville and Laredo, Tex., with philodendron leaves in cargo from Mexico.

Phyllotreta sp., probably *undulata* Kutsch. (Chrysomelidae), at Newport News, Va., on cabbage in stores from Scotland.

Prays sp. (Hyponomeutidae), at Galveston, Tex., in grapefruit in stores from Indonesia.

Premnotrypes sp. (Curculionidae) at New York, N. Y. in potato in stores from Chile; at Boston, Mass., and Philadelphia, Pa., in potatoes in stores from Peru.

Psylliodes sp. (Chrysomelidae) at Galveston, Tex., in turnip in stores from Belgium; at New York, N. Y. in turnips in stores from Algeria and France; at Philadelphia, Pa., in turnips in stores from England, France, and Portugal; at Port Arthur, Tex., in turnip in stores from Portugal.

Rhynchaenus sp., evidently *populi* (F.) (Curculionidae), at New York, N. Y. on lilac leaf in air cargo from the Netherlands.

Scarabaeid, "a very remarkable larvae", at Mobile, Ala., in soil with hibiscus plants in baggage from Trinidad.

Selenaspis sp., very close to *lounsburyi* Marl. (Coccidae), at Hoboken, N. J., on *Mesembryanthemum cradockense* leaf in mail from the Union of South Africa.

Sesamia sp., near or *nonagrioides* (Lef.) (Phalaenidae), at National Airport, Arlington, Va., in pepper in air stores from Morocco.

Stephanoderes sp. (Scolytidae) at Philadelphia, Pa., in fig cutting in baggage from Italy; at Mobile, Ala., in Leguminosae seed pod and Malvaceae seed pod in mail from Puerto Rico, and in royal poinciana seed pod in quarters from Trinidad; at Port Everglades, Fla., in royal poinciana in air baggage from the Bahamas; at Houston, Tex., with an unknown plant in air cargo from Mexico.

Termatophylloides sp. (Miridae), a new species, at Brownsville, Tex., on an orchid plant in cargo from Mexico.

Tychius sp., probably *flavicollis* Steph. (Curculionidae), at Washington, D. C., in *Lotus* sp. seed pod in mail from Turkey.

There were 1,857 interceptions distributed among 621 genera, which could be identified to genus only.

DISEASES

Pathogens, some probably new to this country, determined to genus only were: *Ascochyta* sp. at El Paso, Tex., on *Cymbidium* sp., an orchid, in air cargo from Mexico; at Hoboken, N. J., on root of *Scabiosa caucasica* vars. in cargo from the Netherlands.

Ceratostomella sp. at Hoboken, N. J., on root of *Davidia involucrata* in cargo from the Netherlands.

Cercospora sp., close to *holarrhenae* Thirum. and Chupp, at Washington, D. C., on leaf of Apocynaceae in mail from India.

Cercospora sp. at Laredo, Tex., on philodendron leaf in cargo from Mexico; at Miami, Fla., on philodendron leaf in air cargo from Colombia; at New Orleans, La., on leaf of *Origanum* sp. in air baggage from Mexico.

Cerebella sp., probably *andropogonis* Ces., at Portland, Oreg., on *Themeda quadrivalis* in mail from India.

Coniothyrium sp. at El Paso, Tex., on cactus plant in baggage from Mexico; at San Antonio, Tex., on solanaceous fruit in air baggage from Mexico.

Corynespora sp., close to *cassicola* (Berk. & Curt.) Wei, at Houston, Tex. on palm frond in air cargo from Mexico.

Diplodina sp. at Hoboken, N. J., on *Leucothoe catesbaei* foliage in cargo from the Netherlands.

Discosia sp., a new species, at Laredo, Tex., on philodendron leaf in cargo from Mexico.

Dothiorella sp. at Philadelphia, Pa., on coconut husk in mail from Panama and on palm in quarters from Japan; at San Francisco, Calif. on *Howea forsteriana* seeds in mail from Australia and on Norfolk-Island-pine seeds in mail for Norfolk Island.

Glomerella sp., probably *cingulata* (Ston.) Spauld. & Schrenk., at Houston, Tex. on palm frond in air cargo from Mexico.

Graphium sp., at Hoboken, N. J., on peony in cargo from Japan.

Guignardia sp., at Philadelphia, Pa., on kenaf hibiscus in cargo from Cuba.

Heterosporium sp., suggesting *variabile* Cke., at El Paso, Tex., on *Cymbidium* sp., an orchid, in air cargo from Mexico.

Mycosphaerella sp., a new species, at Honolulu, Hawaii, on *Odontoglossum pulchellum*, an orchid, in air cargo from Mexico.

Mycosphaerella sp. at Brownsville, Tex., on *Chamaedorea* sp. (?) in baggage from Mexico; at Honolulu, Hawaii, on gladiolus leaf in air quarters from Japan; at Laredo, Tex., on *Epidendrum* sp., an orchid, in cargo from Mexico; at Miami, Fla., on *Epidendrum radicans*, an orchid, in air cargo from Costa Rica.

A fungus, close to *Pedilospora* sp., at San Francisco, Calif., on waternut in cargo from China.

Phomopsis sp., at Brownsville, Tex., on papaya in baggage from Mexico; at San Pedro, Calif. on leaf of *Aechmea* sp. in air cargo from Mexico, on Bromeliaceae leaf in air baggage from Colombia. and on stem of *Monstera deliciosa* in air cargo from Mexico; at Philadelphia, Pa., on kenaf hibiscus stem in cargo from Cuba.

Phyllostictina sp. at Miami, Fla., on Norfolk-Island-pine seed in air mail from Norfolk Island; at San Francisco, Calif., on Norfolk-Island-pine seed in mail from Norfolk Island.

Probably *Plenodomus* sp. at Philadelphia, Pa., on horseradish in stores from Germany.

Puccinia sp., possibly a new species at Nogales, Ariz., on *Tricholaena repens*, a grass, in mail from Mexico.

Pyrenochaeta sp. at Houston, Tex., on palm frond in air cargo from Mexico.

Pythium sp. at Hoboken, N. J., on *Cymbidium* sp., an orchid, in air mail from England.

Sclerotium sp. at San Francisco, Calif., on a caladium bulb in cargo from China; at Seattle, Wash., on *Helleborus* sp. in cargo from the Netherlands.

Septoria sp., undescribed, at Hoboken, N. J., on leaf of *Anthurium* sp. in cargo from Belgium. *Septoria* sp. at Hoboken, N. J., on *Dryas octopetala* in air mail from Switzerland.

Sphenospora sp., undescribed, at Honolulu, Hawaii, on *Oncidium* sp., an orchid, in air cargo from the Dominican Republic.

Stemphylium sp., at New York, N. Y., on cut flowers of gladiolus in air cargo from Israel.

Uredo sp., undescribed, at Miami, Fla., on *Oncidium pulchellum*, an orchid, in air cargo from Jamaica.

Incompletely determined nematodes worthy of mention were:

Aphelenchoides sp. at Honolulu, Hawaii in garlic in cargo from Japan; at Hoboken, N. J., in soil with stems and buds of willow in mail from Greenland.

Ditylenchus sp., undescribed, at New York, N. Y., in hyacinth bulbs in cargo from France and in narcissus bulbs in cargo from France and Italy.

Heterodera sp., possibly *avenae* Eidam, at Boston, Mass., in soil with shamrock plants in mail from Ireland; at El Paso, Tex., in soil with potatoes in railway car from Mexico; at Hoboken, N. J., in soil with unidentified plants in mail from Austria; at New York, N. Y. in soil with used bags in cargo from Scotland, in soil with clematis and daisy plants in baggage from England, and in soil with horseradish in cargo from Germany; at Philadelphia, Pa., in soil with dasheens in stores from Egypt.

Heterodera sp., probably *cacti* Filip. & Schuur. Stek., at Brownsville, Tex., in soil with geranium cuttings in baggage from Mexico; at El Paso, Tex. in soil with plants in baggage from Mexico.

Heterodera sp., probably *schachtii* Schmidt, at Chicago, Ill., in soil with perennial plants and bulbs in mail from Scotland; at San Pedro, Calif., with carrots and potatoes in stores from the Netherlands.

Heterodera sp., possibly a new species, at San Francisco, Calif., in soil with *Allium* sp. (multiplying onion) in baggage from China.

Heterodera sp. was intercepted 600 times at 20 ports of entry in soil attached to automobiles, in soil with old bagging, in soil used as ballast, in soil with plants for propagation, in soil with plant material in baggage, furnishings, mail and quarters, in soil in railway cars carrying potatoes, in soil with vegetables in baggage, cargo, mail, and stores. These interceptions were made on material coming from the following countries: Argentina, Australia, Austria, Azores, Belgium, Brazil, Canada, Chile, China, Colombia, Cyprus, Denmark, Egypt, England, Faroe Islands, Finland, France, Germany, Great Britain, Greece, Ireland, Isle of Capri, Italy, Japan, Latvia, Lebanon, Malta, Mexico, Morocco, Netherlands, New Zealand, Northern Ireland, Norway, Poland, Portugal, Scotland, Spain, Sweden, Switzerland, Tunisia, Turkey, Union of South Africa, Wales, and Yugoslavia.

Meloidogyne sp. at Hoboken, N. J., in roots of *Anemone pulsatilla alba*, *A. sylvestris*, *Cimicifuga foetida simplex*, *Clematis* spp., and *Heliopsis* sp. in cargo from the Netherlands, in *Cestrum* spp. in air cargo from the Union of South Africa, in roots of *Clematis jackmani* and *Clematis* sp. in cargo from Germany, in roots of Delphinium vars. in air cargo from the Netherlands, and in peony root in air mail from England; at Seattle, Wash., in dahlia tuber in cargo from Japan.

Panagrolaimus sp., possibly represents a new species closely related to *rigidus* (A. Schneid.) Thorne, at San Pedro, Calif., in seeds of Norfolk-Island-pine in mail from Australia.

Pratylenchus sp. at Hoboken, N. J., in roots of aster, astilbe, and *Clematis* spp., in cargo from the Netherlands, in roots of clematis in cargo from Germany, in roots of clematis hybrid and delphinium in air cargo from the Netherlands, in roots of *Chrysanthemum maximum* var. in air mail from Scotland, in roots of *Echinacea purpurea* in cargo and mail from the Netherlands, in roots of *Helleborus* spp. in air cargo, air mail and cargo from the Netherlands, in roots of *Kniphofia* sp., phlox, *Primula* spp., *Pulmonaria* spp., *Rudbeckia* sp., *Trollius* sp., and *Veronica spicata erica* in cargo from the Netherlands.

Psilenchus sp. at Hoboken, N. J., in soil with stems and buds of willow in mail from Greenland.

A total of 1,077 incompletely determined pathogens were recorded during the year.

Summary of Numbers of Interceptions Listed in Main Table

Country	Insect	Disease	Country	Insect	Disease

¹ This total represents only pests of known or potential plant-quarantine importance. The total of all interceptions made during the year was 15,910.

NOTE.—Interceptions were also made from Aruba, Bolivia, British East Africa, Curacao, Ethiopia, Faroe Islands, Gibraltar, Gold Coast, Greenland, Isle of Capri, Ivory Coast, Kwajalein, Latvia, Madagascar, Malaysia, Malta, Marshall Islands, Natal, New Caledonia, Okinawa, Orange Free State, St. Barthelemy, St. Lucia, Samoa, Tahiti, Tanganyika, Transvaal, Tunisia, Uganda, and Wake Island.

Pests (insects) collected and reported from July 1, 1953, through June 30, 1954

[An asterisk indicates State inspection]

Insect and host	Country of origin	Number of interceptions in—			Collected in—
		Consumption	Nonentry	Propagation	
<i>Acala schalleriana</i> (F.) (Tortricidae): Rhododendron sp.	Belgium			1	N. Y.
<i>Acalymma trivittata</i> (Mann.) (Chrysomelidae): Cucurbita maxima (squash)	Mexico	1			Ariz.
<i>Acanthoscelides armitagei</i> (Pic) (Bruchidae): Cajanus cajan (pigeonpea)	Canal Zone, Trinidad	5			Mass., N. Y.
Cicer arietinum (chickpea)	Canal Zone		2		N. Y.
Flemingia strobilifera	do	1			Wash.
Pachyrhizus erosus	Costa Rica		1		D. C.
Rumex sp. (sorrell)	Canal Zone	1			N. Y.
Tamarindus indica (tamarind)	Panama		1		N. J.
<i>Acanthoscelides obreptus</i> Bridw. (Bruchidae): Phaseolus lunatus (civet bean)	Guatemala		1		D. C.
<i>Acanthoscelides obvelatus</i> Bridw. (Bruchidae): Phaseolus vulgaris (kidney bean)	Costa Rica, Mexico		2		D. C.
" <i>Acanthoscelides</i> " spinipes (Er.) (Bruchidae): Acacia farnesiana (sweet acacia)	Italy		1		N. Y.
Acacia tortuosa	Greece, Italy	1		1	N. Y.
Acacia sp.	Argentina, Greece		2		D. C., Mass.
Cupressus sp. (cypress)	Argentina		1		N. Y.
<i>Aceria gossypii</i> (Banks) (Eriophyidae): Gossypium sp. (cotton)	Dominican Republic	1			Fla.
<i>Achatina fulica</i> Fer. (Mollusca): Scrap metal	Caroline Islands, Guam	3			Calif., Md.
<i>Acrolepia assectella</i> (Zell.) (Hyponomeutidae): Allium porrum (leek)	Belgium, France, Italy, Germany, Netherlands		6		N. Y., Pa.
<i>Acronicta rumicis</i> (L.) (Phalaenidae): Kolkwitzia amabilis	Netherlands			1	N. J.
<i>Adoretus sinicus</i> Burm. (Scarabaeidae): Airplane	Hawaii		3		Hawaii.
Alpinia sp. (red ginger)	do	1			Hawaii.
Baggage	Japan (?)	1			Hawaii.
Cordyline terminalis (ti)	Hawaii	1		1	Hawaii.
Flowers—unidentified	do	3			Calif., Hawaii.
Hibiscus sp.	do			1	Hawaii.
<i>Adorophyes orana</i> (F. R.) (Tortricidae): Syringa sp. (lilac)	Netherlands	20			N. Y.
<i>Aegaleus bicinctus</i> (Germar) (Pentatomidae): Vitis vinifera (European grape)	Union of South Africa	1			N. Y.
<i>Aeolus pictus</i> (Cand.) (Elateridae): Grass sod	Nicaragua			1	Tex.
<i>Agallia lingula</i> Van D. (Cicadellidae): Airplane	Guatemala		1		Tex.
<i>Aglossa cuprealis</i> (Hbn.) (Pyralidae): Sorghum vulgare technicum (broomcorn)	Azores	1			N. Y.
Triticum aestivum (wheat)	Portugal	1			Mass.
<i>Agonoxena argaula</i> Meyr. (Agonoxenidae): Cocos nucifera (coconut)	Guam	1			Hawaii.
<i>Agriotes limosus</i> (Lec.) (Elateridae): Soil around cedar seedlings	Canada			1	N. Y.
Soil around evergreen seedlings	do			1	N. Y.
Soil around rose and other plants	do			1	N. Y.
<i>Agriotes obscurus</i> (L.) (Elateridae): Armoracia rusticana (horseradish)	Germany, Sweden, Yugoslavia, Netherlands	5			N. Y.
Spiraea sp.			1		N. J.
<i>Agrotis ypsilon</i> (Rott.) (Phalaenidae): Soil around cabbage roots	Canada			1	N. Y.
<i>Akis bacarozzo</i> Schrank (Tenebrionidae): Quercus suber (cork oak)	Morocco	2			N. Y.
<i>Aleurocanthus woglumi</i> Ashby (Aleyrodidae): Citrus aurantifolia (lime)	Mexico	14	3		Calif., Tex.
Citrus aurantifolia (sour lime)	do	5	1		Tex.
Citrus paradisi (grapefruit)	do	1			Tex.
Citrus sinensis (orange)	do	2			Tex.
Citrus sp.	do	9			Tex.
<i>Aleurothrixus myrtacei</i> Bondar (Aleyrodidae): Gardenia augusta (gardenia)	Central America	1			Calif.*

Pests (insects) collected and reported from July 1, 1953, through June 30, 1954—Con.

Hosts and Insects

- ABRUS:**
Caryopemon cruciger (Coleoptera)
- ABUTILON:**
Ozycaenus albidipennis (Hemiptera)
- ACACIA:**
"Acanthoscelides" spinipes (Coleoptera)
Caryedon fuscus (Coleoptera)
Lycius linearis (Coleoptera)
Nasutitermes nigriceps (Isoptera)
Pantomorus godmani (Coleoptera)
Sinozylon conigerum (Coleoptera)
Stator pruinus (Coleoptera)
Trogosylon aequale (Coleoptera)
Xylopsocus castanoptera (Coleoptera)
- ACER:**
Coptophylla gymnaspsis (Acarina)
Pulvinaria horii (Homoptera)
- ACHRAS:**
Anastrepha serpentina (Diptera)
- AERIDES:**
Furcaspis biformis (Homoptera)
- A GAPANTHUS:**
Haplothrips gowdeyi (Thysanoptera)
- ALLIUM PORRUM:**
Acrolepia assectella (Lepidoptera)
Deroceras reticulatum (Mollusca)
- ALLIUM SATIVUM:**
Brachycerus albidentatus (Coleoptera)
Brachycerus algeris (Coleoptera)
Dyspessa ulula (Lepidoptera)
Melalopus plicatus (Coleoptera)
- ALLOTHEROPSIS:**
Paromius gracilis (Hemiptera)
- ALPINIA:**
Adoretus sinicus (Coleoptera)
- AMARYLLIDACEAE:**
Platynota rostrana (Lepidoptera)
- AMARYLLIS:**
Sinozylon anale (Coleoptera)
Taeniothrips gracilis (Thysanoptera)
- AMHERSTIA:**
Pseudodaonidia trilobitiformis (Homoptera)
- ANANAS:**
Alpheias conspirata (Lepidoptera)
Ereunetes flavistriata (Lepidoptera)
Heterobostrychus aequalis (Coleoptera)
Pheidole megacephala (Hymenoptera)
Platynota rostrana (Lepidoptera)
Ribua innoxia (Lepidoptera)
Talurus rugosus (Coleoptera)
Thecla ziba (Lepidoptera)
- ANDROPOGON:**
Diplozys capensis (Hemiptera)
- ANNONA:**
Anastrepha fraterculus (?) (Diptera)
Anastrepha mombinpraepotans (Diptera)
Bephraia maculicollis (Hymenoptera)
Cerconota anonella (Lepidoptera)
Lepidosaphes mimosarum (?) (Homoptera)
Talponia batesi (Lepidoptera)
- ANTHURIUM:**
Bradybaena similis (Mollusca)
Dacus cucurbitae (Diptera)
Hyalopeplus pellicidus (Hemiptera)
Protopulvinaria pyrifomis (Homoptera)
- ANTIRRHINUM:**
Pheidole megacephala (Hymenoptera)
Prodenia eridania (Lepidoptera)
- APIUM:**
Anuraphis tulipae (Homoptera)
- ARACEAE:**
Mecistorhinus marmoratus (Hemiptera)
- ARMORACIA:**
Agrotis obscurus (Coleoptera)
Athous hirtus (Coleoptera)
Athous niger (Coleoptera)
Baris lepidii (Coleoptera)
Frankliniella tenuicornis (Thysanoptera)
- ARUNDINA:**
Leucaspis cockerelli (Homoptera)
- ASPARGUS:**
Callosobruchus maculatus (Coleoptera)
- ASPASIA:**
Asterolecanium epidendri (Homoptera)
- ASTER:**
Deroceras reticulatum (Mollusca)
Haplothrips gowdeyi (Thysanoptera)
- ASTRAGALUS:**
Bruchidius caninus (Coleoptera)
- ATHYRIUM:**
Liophloeus tessulatus (Coleoptera)
- ATYLOSIA:**
Callosobruchus theobromae (Coleoptera)
- AUCUBA:**
Brevipalpus inornatus (Acarina)
- BAMBOO:**
Asterolecanium bambusae (Homoptera)
Asterolecanium milaris milaris (Homoptera)
Asterolecanium milaris robustum (Homoptera)
Dinoderus bifoveolatus (Coleoptera)
Odonaspis greeni (Homoptera)
- BAUHINIA:**
Gibbibruchus speculiferus (Coleoptera)
- BEGONIA:**
Frankliniella bispinosa (Thysanoptera)
Iridomyrmex humilis (Hymenoptera)
- BERBERIS:**
Liosomaphis berberidis (Homoptera)
- BETA:**
Callosobruchus maculatus (Coleoptera)
Energestis forficatus (Lepidoptera)
Gnorimoschema ocellatella (Lepidoptera)
Lirius junci (Coleoptera)
Pachyzancla bipunctalis (Lepidoptera)
- BILLBERGIA:**
Aspidiotus palmarum (Homoptera)
- BRASSAVOLA:**
Furcaspis biformis (Homoptera)
Galupha punctifer (Hemiptera)
Vinsonia stellifera (Homoptera)
- BRASSIA:**
Vinsonia stellifera (Homoptera)
- BRASSICA NAPOBRASSICA:**
Ceutorhynchus pleurostigma (Coleoptera)
- BRASSICA OLERACEA BOTRYTIS:**
Energestis forficatus (Lepidoptera)
Phytomyza rufipes (Diptera)
- BRASSICA OLERACEA CAPITATA:**
Barathra brassicae (Lepidoptera)
Ceutorhynchus pleurostigma (Coleoptera)
Deroceras reticulatum (Mollusca)
Energestis forficatus (Homoptera)
Hellula undalis (Homoptera)
Limax marginatus (Mollusca)
Phytomyza rufipes (Diptera)
- BRASSICA RAPA:**
Ceutorhynchus pleurostigma (Coleoptera)
Deroceras reticulatum (Mollusca)
Hellula undalis (Lepidoptera)
- BROMELIAD:**
Cephalodonta callosa (Coleoptera)
Chrysomphalus decorosus (Homoptera)
- BROMUS:**
Brachyplax palliata (Hemiptera)
- BRYOPHYLLUM:**
Monomorium destructor (Hymenoptera)
- BUXUS:**
Eriophyes canestrinii (Acarina)
Pinnaspis buxi (?) (Homoptera)
- CACTUS:**
Fulvius brevicornis (Hemiptera)
Lepidosaphes philococcus (Homoptera)
- CAESALPINIA:**
Mimosestes dominicanus (Coleoptera)
- CAJANUS:**
Acanthoscelides armitagei (Coleoptera)
Ancylostoma stercora (Lepidoptera)
Callosobruchus maculatus (Coleoptera)
Callosobruchus phaseoli (Coleoptera)
Callosobruchus theobromae (Coleoptera)
Sphenarches caffer (Lepidoptera)
- CALLUNA:**
Gelechia ericetella (Lepidoptera)
Micrelus ericae (Coleoptera)
Oedemera annulata (Coleoptera)
- CALOPOGONIUM:**
Heterotermes converinotatus (Isoptera)

Hosts and Insects—Continued

- CAMELLIA:**
Aspidiotus degeneratus (Homoptera)
Brevipalpus phoenicis (Acarina)
Parlatoria camelliae (Homoptera)
- CANAVALLA:**
Lampides boeticus (Lepidoptera)
Maruca testulalis (Lepidoptera)
- CAPSICUM:**
Ceratitis capitata (Diptera)
Dacus cucurbitae (Diptera)
Gnorimoschema gudmannella (Lepidoptera)
Monomorium destructor (Hymenoptera)
Pyrausta nubilalis (Lepidoptera)
- CARICA:**
Pheidole megacephala (Hymenoptera)
Pseudoparlatoria punctata (Homoptera)
- CARYOTA:**
Cryptoblabes gnidiella (Lepidoptera)
- CASSIA:**
Caryedon fuscus (Coleoptera)
Sennius alticola (Coleoptera)
Stator limbatus (Coleoptera)
- CASTANEA:**
Curculio elephas (Coleoptera)
Iridomyrmex humilis (Hymenoptera)
Laspeyresia splendana (Lepidoptera)
- CATTLEYA:**
Asterolecanium epidendri (Homoptera)
Eurytoma orchidearum (Hymenoptera)
Furcaspis biformis (Homoptera)
Pseudischchnus alienus (Homoptera)
Tenthecoris venezuelensis (Homoptera)
- CEDRUS:**
Lecanium fletcheri (Homoptera)
- CHAMAECYPARIS:**
Megastigmus cryptomeriae (Hymenoptera)
- CHAMAEDOREA:**
Chrysomphalus sphaerioides (Homoptera)
Dinaspis aculeata (?) (Homoptera)
Epilachna varivestis (Coleoptera)
Icerya montserratensis (Homoptera)
Metamasius sericeus carbonarius (Coleoptera)
Stolas illustris (Coleoptera)
Tapinaspis annulus (Coleoptera)
Tapinaspis wesmali (Coleoptera)

CUPRESSUS:

- "Acanthoscelides" spinipes* (Coleoptera)

CYNOCHES:

- Vinsonia stellifera* (Homoptera)

CYDONIA:

- Anastrepha ludens* (Diptera)
- Ceratitis capitata* (Diptera)

CYMBIDIUM:

- Lepidosaphes tuberculata* (Homoptera)

CYNARA:

- Apion carduorum* (Coleoptera)
- Gortyna flavago* (Lepidoptera)
- Sphaeroderma testaceum* (Coleoptera)

CYNODON:

- Odonaspis ruthae* (Homoptera)

CYPRIPEDIUM:

- Coccus capparidis* (Homoptera)

CYTISUS:

- Sparteus villosus* (Coleoptera)

DAHLIA:

- Haplothrips gowdeyi* (Thysanoptera)
- Oxycarenus hyalinipennis* (Hemiptera)
- Pyrausta nubilalis* (Lepidoptera)
- Tetranychus tumidus* (Acarina)

DAISY:

- Haplothrips gowdeyi* (Thysanoptera)

DAUCUS:

- Phalonia zephyrana* (Lepidoptera)
- Tyrophagus infestans* (Acarina)

DENDROBIUM:

- Coccus capparidis* (Homoptera)
- Furcaspis bifor mis* (Homoptera)
- Pheidole megacephala* (Hymenoptera)

DENDROCALAMUS:

- Antonina bambusae* (Homoptera)

DESMODIUM:

- Bruchidius caeruleus* (Coleoptera)

DIANTHUS:

- Prodenia eridania* (Lepidoptera)

DIOSCOREA:

- Monomorium destructor* (Hymenoptera)
- Pheidole megacephala* (Hymenoptera)
- "Targionia" hartii* (Homoptera)

DIOSPYROS:

- Parlatoria oleae* (Homoptera)

DOLICHOS:

- Callosobruchus analis* (Coleoptera)
- Callosobruchus maculatus* (Coleoptera)
- Callosobruchus phaseoli* (Coleoptera)

EPIDENDRUM:

- Furcaspis bifor mis* (Homoptera)
- Pheidole megacephala* (Hymenoptera)
- Vinsonia stellifera* (Homoptera)

ERICA:

- Thrips flavus* (Thysanoptera)
- Thrips major* (Thysanoptera)

ERIOBOTRYA:

- Cryptoblabes gnidiella* (Lepidoptera)

EUGENIA:

- Dacus dorsalis* (Diptera)

EUPHORBIA:

- Pheidole megacephala* (Hymenoptera)
- Pterolophia alternans* (Coleoptera)

FICUS:

- Ceratitis capitata* (?) (Diptera)
- Lepidosaphes ficus* (Homoptera)

FLEMINGIA:

- Acanthoscelides armitagei* (Coleoptera)

FOUQUIERIA:

- Xerococcus fouquieriae* (Homoptera)

FRAGARIA:

- Brevipalpus phoenicis* (Acarina)

GARDENIA:

- Aleurothrixus myrtacei* (Homoptera)
- Coccus viridis* (Homoptera)
- Dialeurodes citri* (Homoptera)
- Eucalyptinus tessellatus* (Homoptera)
- Protopulvinaria longivalvata* (Homoptera)
- Protopulvinaria pyrifor mis* (Homoptera)

GARDENIA—Continued

- Pseudaonidia clavigera* (Homoptera)
- Pulvinaria psidii* (Homoptera)
- Taeniothrips hawaiiensis* (Thysanoptera)

GLADIOLUS:

- Anuraphis tulipae* (Homoptera)
- Erypochiomeria confusa* (Hemiptera)
- Myzus ascalonicus* (Homoptera)

GLYCINE:

- Callosobruchus maculatus* (Coleoptera)

GLYCYPHYZA:

- Bruchidius halodendri* (Coleoptera)

GONGORA:

- Asterolecanium epidendri* (Homoptera)
- Furcaspis bifor mis* (Homoptera)
- Vinsonia stellifera* (Homoptera)

GOSSYPIUM:

- Aceria gossypii* (Acarina)
- Pectinophora gossypiella* (Lepidoptera)

GRUSONIA:

- Dactylopius coccus* (Homoptera)

HEDERA:

- Myzus ascalonicus* (Homoptera)

HELICONIA:

- Aspidiotus palmarum* (Homoptera)
- Canthion triangularis* (Coleoptera)
- Ceresium unicolor* (Coleoptera)

HIBISCUS:

- Adoretus sinicus* (Coleoptera)
- Asterolecanium pustulans* (Homoptera)
- Crocosemose plebeiana* (Lepidoptera)
- Diaelus auratus* (Coleoptera)
- Frankliniella bispinosa* (Thysanoptera)
- Iridomyrmex humilis* (Hymenoptera)
- Pectinophora gossypiella* (Lepidoptera)
- Pheidole megacephala* (Hymenoptera)
- Platyedra vilella* (Lepidoptera)
- Taeniothrips gracilis* (Thysanoptera)
- Tetranychus marianae* (Acarina)

IPOMOEA:

- Bemisia inconspicua* (Homoptera)
- Cylas formicarius elegantulus* (Coleoptera)
- Cylas formicarius*, possibly *formicarius* (Coleoptera)
- Cylas puncticollis* (Coleoptera)
- Euscapes postfasciatus* (Coleoptera)
- Megacerus leucosomus* (Coleoptera)
- Palaeopus costicollis* (Coleoptera)

IRIS:

- Anuraphis tulipae* (Homoptera)

IXORA:

- Coccus viridis* (Homoptera)
- Protopulvinaria longivalvata* (Homoptera)
- Vinsonia stellifera* (Homoptera)

JASMINUM:

- Dialeurodes kirkaldyi* (Homoptera)
- Pseudoparlatoria ostreata* (Homoptera)

JATROPHA:

- Aspidiotus diffinis* (Homoptera)

JUGLANS:

- Aspidiotus zonatus* (Homoptera)
- Rhagoletis juglandis* (?) (Diptera)

JUNIPERUS:

- Lepidosaphes pallida* (Homoptera)
- Paratetranychus ununguis* (Acarina)

KHAYA:

- Cordylomeria spinicornis* (Coleoptera)

KOLKOWITZIA:

- Aconitica rumicis* (Lepidoptera)

LABURNUM:

- Sparteus villosus* (Coleoptera)

LACTUCA:

- Spissistilus festinus* (Homoptera)
- Theba pisana* (Mollusca)

LAELIA:

- Chrysomphalus nigropunctatus* (Homoptera)
- Trochuda raspa* (Lepidoptera)

LANSIUM:

- Pseudococcus lilacinus* (Homoptera)

LATHYRUS:

- Bruchus azoricus* (?) (Coleoptera)
- Bruchus tristiculus* (Coleoptera)
- Bruchus tristis* (Coleoptera)
- Haplothrips gowdeyi* (Thysanoptera)
- Taeniothrips gracilis* (Thysanoptera)

Hosts and Insects—Continued

LAURUS:

- Eucalymnatus tessellatus* (Homoptera)
- Vinsonia stellifera* (Homoptera)

LENS:

- Bruchus ervi* (Coleoptera)
- Bruchus lentis* (Coleoptera)
- Bruchus signaticornis* (Coleoptera)
- Callosobruchus maculatus* (Coleoptera)

LILIUM:

- Clorada apicicornis* (Hemiptera)

LONICERA:

- Frankliniella bispinosa* (Thysanoptera)

LYCOPERSICON:

- Blissus leucopterus* (Hemiptera)
- Blissus leucopterus insularis* (Hemiptera)
- Chalepus bellulus* (Coleoptera)
- Dacus cucurbitae* (Diptera)
- Disonychia collata* (Coleoptera)

Ligyrocoris aurivilliana (Hemiptera)

- Mecotetartus antennatus* (Coleoptera)
- Neoleucinodes elegantalis* (Lepidoptera)
- Physonota attenuata* (Coleoptera)
- Platynota rostrana* (Lepidoptera)
- Prodenia eridania* (Lepidoptera)

MACADAMIA:

- Cryptophlebia illepidia* (Lepidoptera)

MALUS:

- Argyresthia conjugella* (Lepidoptera)
- Carpodina sasakii* (Lepidoptera)
- Ceratitis capitata* (Diptera)
- Ezptochioma confusa* (Hemiptera)
- Glycyphagus domesticus* (Acarina)
- Grapholitha molesta* (Lepidoptera)
- Nysius huttoni* (Hemiptera)
- Parlatoria oleae* (Homoptera)
- Rhagoletis cerasi* (?) (Diptera)
- Rhagoletis pomonella* (Diptera)

MAMMEA:

- Anastrepha serpentina* (Diptera)

MAMMILLARIA:

- Gerstaeckeria multilaria* (Coleoptera)

MANGIFERA:

- Anastrepha fraterculus* (?) (Diptera)
- Anastrepha ludens* (Diptera)
- Anastrepha mombinpraepians* (Diptera)
- Aulacaspis tubercularis* (Homoptera)
- Ceratitis capitata* (Diptera)
- Ceroplastes rubens* (Homoptera)

Hosts and Diseases

ACIDANTHERA:

Macrophomina phaseolina (Deuteromycetes)

AGAVE:

Phomopsis gloriosa (Deuteromycetes)

Pleospora gigantea (Ascomycetes)

Stagonospora macrospora (Deuteromycetes)

ALPHANES:

Phomopsis palmicola (Deuteromycetes)

ALLIUM FISTULOSUM:

Mycosphaerella schoenoprasii (Ascomycetes)

ALLIUM PORRUM:

Mycosphaerella schoenoprasii (Ascomycetes)

ALLIUM SATIVUM:

Tylenchus allii (Nematoda)

ALYXIA:

Uromyces alyziae (Promycetes)

ANANAS:

Curcularia lunata (Deuteromycetes)

Diplodia ananassae (Deuteromycetes)

ANTHOSCHMIDTIA:

Colletotrichum graminicola (Deuteromycetes)

ANTHURIUM:

Uredo anthurii (Promycetes)

APIUM:

Cercospora apii (Deuteromycetes)

ARACHIS:

Cercospora personata (Deuteromycetes)

Puccinia arachidis (Promycetes)

ARAUCARIA:

Cryptospora longispora (Ascomycetes)

Macrophoma araucariae (Deuteromycetes)

Pestalotia micheneri (Deuteromycetes)

Phoma araucariae (Deuteromycetes)

ARBUTUS:

Pucciniastrum sparsum (Promycetes)

ARECA:

Colletotrichum arecae (Deuteromycetes)

Gloeosporium catechu (Deuteromycetes)

Phomopsis palmicola (Deuteromycetes)

ARMERIA:

Cercospora insulana (Deuteromycetes)

ARTEMESIA:

Uredo absinthii (Promycetes)

AVENA:

Puccinia coronata (Promycetes)

Septoria tritici f. avenae (Deuteromycetes)

Ustilago kollerii (Promycetes)

BAMBOO:

Phyllachora orbicula (Ascomycetes)

Puccinia ignava (Promycetes)

BAMBUSA:

Puccinia ignava (Promycetes)

Scirrhodothia bambusae (Ascomycetes)

BELAMCANDA:

Puccinia belamcandae (Promycetes)

BOMBAX:

Trypethelium eluteriae (?) (Promycetes)

BRASSICA:

Phoma lingam f. napobrassicae (Deuteromycetes)

BRIZA:

Entyloma brizae (Promycetes)

BROMELIAD:

Botryosphaeria ribis (Ascomycetes)

BROMUS:

Puccinia glumarum (Promycetes)

Septoria bromi (Deuteromycetes)

CAMELLIA:

Virus—camellia ring spot

CAMPANULA:

Coleosporium campanulae (Promycetes)

CAPSICUM:

Curcularia tunata (Deuteromycetes)

Gloeosporium piperatum (Deuteromycetes)

CARICA:

Asperisporium caricae (Deuteromycetes)

CASSIA:

Phyllachora canafistulae (Ascomycetes)

CATTLE YEA:

Cercospora angraeci (Deuteromycetes)

Uredo behnickiana (Promycetes)

CEDRUS:

Pestalotia funerea (Deuteromycetes)

CHAENOMELES:

†Taphrina bullata (?) (Ascomycetes)

CHAMAECYPARIS:

Oospora microcarpa (Deuteromycetes)

CHAMAEDOREA:

Aschersonia goldiana (Deuteromycetes)

Aschersonia turbinata (Deuteromycetes)

CHLOROGALUM:

Stagonospora macrospora (Deuteromycetes)

CHRYSANTHEMUM:

Meloidogyne incognita (Nematoda)

Puccinia chrysanthemi (Promycetes)

Puccinia horiana (Promycetes)

CITRUS AURANTIFOLIA:

Elsinoe australis (Ascomycetes)

Xanthomonas citri (Schizomycetes)

CITRUS AURANTIUM:

Elsinoe australis (Ascomycetes)

Xanthomonas citri (Schizomycetes)

CITRUS GRANDIS:

Xanthomonas citri (Schizomycetes)

CITRUS ICHANGENSIS:

Xanthomonas citri (Schizomycetes)

CITRUS LIMON:

Elsinoe australis (Ascomycetes)

Meliola citricola (Ascomycetes)

Phoma citricarpa (Deuteromycetes)

Phyllosticta micrococcoides (?) (Deuteromycetes)

Septoria citri (Deuteromycetes)

Xanthomonas citri (Schizomycetes)

Xanthomonas sp. (?) ("Cancrosis B") (Schizomycetes)

CITRUS PARADISI:

Ascochyta citri (Deuteromycetes)

Elsinoe australis (Ascomycetes)

Phoma citricarpa (Deuteromycetes)

Septoria citri (Deuteromycetes)

Xanthomonas citri (Schizomycetes)

CITRUS RETICULATA:

Elsinoe australis (Ascomycetes)

Phoma citricarpa (Deuteromycetes)

Septoria citri (Deuteromycetes)

Xanthomonas citri (Schizomycetes)

CITRUS SINENSIS:

Ascochyta citri (?) (Deuteromycetes)

Cercospora angolensis (?) (Deuteromycetes)

Elsinoe australis (Ascomycetes)

Phoma citricarpa (Deuteromycetes)

Septoria citri (Deuteromycetes)

Xanthomonas citri (Schizomycetes)

CITRUS SP.:

Cercospora angolensis (?) (Deuteromycetes)

Elsinoe australis (Ascomycetes)

Phoma citricarpa (Deuteromycetes)

Xanthomonas citri (Schizomycetes)

COCOS:

Cytospora palmarum (Deuteromycetes)

Diplodia epicoccos (Deuteromycetes)

Phomopsis cocoes (Deuteromycetes)

COELOGYNE:

Septoria posekensis (Deuteromycetes)

COLCHICUM:

†Urocystis colchici (Promycetes)

CORNUS:

Coryneum microstictum (Deuteromycetes)

CRATAEGUS:

†Fabraea maculata (Ascomycetes)

CYMBIDIUM:

†Colletotrichum orchidearum (Deuteromycetes)

Memnoniella echinata (Deuteromycetes)

Pestalotia conspicua (Deuteromycetes)

Septoria posekensis (Deuteromycetes)

CYNODON:

Phyllachora cynodontis (Ascomycetes)

CYPRIPEDIUM:

Septoria posekensis (Deuteromycetes)

DAHLIA:

Meloidogyne hapla (Nematoda)

DENDROBIUM:

Pestalotia conspicua (Deuteromycetes)

†Phyllosticta laetiae (Deuteromycetes)

UNITED STATES DEPARTMENT OF AGRICULTURE

AGRICULTURE RESEARCH SERVICE

PLANT QUARANTINE BRANCH

SERVICE AND REGULATORY ANNOUNCEMENTS

LIST OF INTERCEPTED PLANT PESTS, 1955

(List of Pests Recorded from July 1, 1954, through June 30, 1955 as Intercepted in, on, or with Plants and Plant Products Entering United States Territory.)

Compiled by
JUDITH HUNT
Plant Quarantine Aid

INTRODUCTION

Interception lists have been issued for forty-one years. Beginning with February 2, 1914, a "News Letter" was published at irregular intervals up until 1921 when it was issued on an annual basis which has continued to the present time. This forty-second report is composed of plant pests found in, on, or with plant products (1) imported, (2) offered for but refused entry, (3) held as ships' stores, etc., and hence not offered for entry through customs, (4) offered for entry for immediate transportation and exportation in bond, and (5) in domestic shipments between the American Virgin Islands, Hawaii, and Puerto Rico and the mainland.

The pests listed include insects, snails, fungi, bacteria, nematodes, and viruses causing diseased conditions of known or potential plant quarantine significance to the United States. Some common organisms are included if they are (1) new to the country of origin, or (2) new to the host plant, or (3) are of such limited distribution in the United States that they are worthy of mention.

Some collections made late in the year are included in the report for the following year, since determinations cannot be obtained immediately for all of them. Occasionally determinations are delayed for longer periods. The data for this list were obtained from identifications made by specialists of the Entomology Research Branch and from routine reports by personnel of the Plant Quarantine Branch supplemented by information supplied by State officials. The States of California and Florida maintain staffs of specialists who identify a large proportion of the material collected at their ports. Specialists of the Field Crops Research Branch and the Horticultural Crops Research Branch determine many of the pathogens that are unusual or difficult to identify. Specialists in the latter organization also identify many of the host plants shown in the list.

The scientific names conform to the International Rules of Nomenclature.

The correct origin of host plants is verified insofar as it is possible. Questionable cases are omitted or the origin is listed as unknown.

INTERCEPTIONS FROM AIRBORNE MATERIAL

The rapid development of air transportation from all parts of the world has resulted in a greater number of importations of plants and plant products. Constant vigilance at the airports is necessary to prevent the introduction of foreign pests.

Some important interceptions of airborne plant pests were made during the year. A total of 3,150 insects and 482 diseases were found in baggage, express, freight, mail, or stores on imported plants or plant products while other interceptions were made by preflight inspection of airplanes leaving Hawaii and Puerto Rico for the mainland.

Some important insects intercepted with airborne material were:

Adoxophyes orana on apple in stores from England, and on cut flowers of lilac and lily in cargo from the Netherlands.

The citrus blackfly (*Aleurocanthus woglumi*) on *Citrus* sp. leaves in baggage from Mexico.

Anastrepha fraterculus in guava in baggage from Colombia.

The Mexican fruit fly (*Anastrepha ludens*) in mamey in baggage from Nicaragua; in mango in baggage from Guatemala, Mexico, and Salvador; in mango in cargo from Guatemala; in orange in baggage from Guatemala and Mexico; and in orange in stores from Mexico.

The West Indian fruit fly (*Anastrepha mombinpraeoptans*) in guava in baggage from Guatemala; in mango in baggage from Brazil, Cuba, Dominican Republic, Guatemala, Honduras, Jamaica, Mexico, Nicaragua, and Salvador; in mango in quarters from Panama; in purple mombin in baggage from Cuba and Nicaragua; in *Spondias* sp. in baggage from Costa Rica, Nicaragua, and Salvador; in *Spondias* sp. in cargo from Costa Rica; in yellow mombin in baggage from Guatemala, Nicaragua, and Salvador; and in yellow mombin in cargo and mail from Guatemala.

Anastrepha serpentina in mamey in baggage from Salvador, in sapodilla in baggage from Guatemala, Nicaragua, and Salvador.

Carposina sasakii in apple in baggage and stores from Japan, in peach in baggage from Japan.

The Mediterranean fruit fly (*Ceratitis capitata*) in apple in stores from the Azores; in apricot in stores from an unknown origin; in coffee berry in baggage from Brazil; in coffee berry in preflight inspection of baggage leaving Hawaii for the mainland; in fig in baggage from the Azores and Italy; in loquat in baggage from Portugal; in Mandarin orange in stores from Morocco and Portugal; in nectarine in baggage from Italy; in orange in baggage from the Azores, Italy, Portugal, and Spain; in orange in cargo from Italy; in orange in quarters from France (?); in orange in stores from the Azores, Portugal, and Spain; in peach in baggage from France; in peach in stores from Italy; in pear in baggage from Italy; in pear in stores from the Azores; in pricklypear in baggage from the Italy. *C. capitata* (?) in apple in stores from an unknown origin; in avocado in baggage from Hawaii; in apricot in stores from an unknown origin; and in *Passiflora* sp. in baggage from Portugal.

Cylas formicarius formicarius in sweetpotato in cargo from India and Japan.

The oriental fruit fly (*Dacus dorsalis*) in coffee berry, in mountain apple, with an orchid plant, in fruit of *Terminalia* sp., and in ti berry in preflight inspection of baggage leaving Hawaii for the mainland. *D. dorsalis* (?) in Arabian coffee berries in preflight inspection of baggage leaving Hawaii for the mainland.

The olive fruit fly (*Dacus oleae*) in olive in baggage from Greece, Italy, and Lebanon.

Possibly *Dacus tryoni* in pear in stores from Australia.

An aleyrodid, *Frauenfeldtiella jalinekii* on a leaf of *Viburnum tinus* var. in cargo from England.

Haplothrips cotlei on carnation in baggage from Greece.

The pink bollworm (*Pectinophora gossypiella*) in cottonseed in baggage from Jamaica and in cotton boll in preflight inspection of baggage leaving Hawaii for the mainland.

Rhagoletis cerasi in cherry in baggage from Germany and Yugoslavia, and in cherry in stores from Europe, France, Italy, and Sweden. *R. cerasi* (?) in apple

in baggage from the Azores; in cherry in mail from Sweden; and in *Passiflora* sp. in baggage from the Azores.

Xanthogramma calopus with chinkerichiee in cargo from the Union of South Africa.

Interceptions of airborne plant pathogens not believed to be established in the United States or of limited distribution were:

Cercospora kalmiae on mountain laurel leaves in quarters from England and the Netherlands.

Guignardia traversi on *Dendrobium forbesii* and *Coelogyne* sp., orchids, in cargo from New Guinea.

Micropeltis bakeri on an orchid plant in baggage from Panama.

Mycosphaerella cattleyae on *Cattleya bowringiana*, an orchid, in cargo from Guatemala and on *Epidendrum radicans*, an orchid, in cargo from Costa Rica.

Mycosphaerella euryae on *Eurya japonica* in baggage from Japan.

Phakopsora jatrochicola on bellyache nettlespurge in cargo from Guadeloupe.

Phyllostictina pyriformis on *Dendrobium forbesii*, an orchid, in cargo from New Guinea; on an orchid plant in cargo from Panama; and on *Stanhopea wardii*, an orchid, in cargo from the Canal Zone.

Physothermum schroeteri on *Scirpus* sp. in baggage from Portugal.

Puccinia cannae on *Canna* sp. leaf in baggage from Jamaica.

Puccinia pelargonii-zonalis on horseshoe geranium in baggage from Hawaii.

Ramularia vallisumbrosae on narcissus stem in baggage from England.

Septoria selenophomoides on *Cymbidium* sp., an orchid, in cargo from England; on *Laelia* sp., an orchid, in cargo from Brazil; and on *Odontoglossum* sp., an orchid, in cargo from Mexico.

Sphaceloma spondiadis on yellow mombin in baggage from the Barbados.

Sphaceloma zorniae on *Zornia* sp. in baggage from St. Kitts.

Uredo anthurii on an anthurium leaf in cargo from Panama.

Uredo nigropuncta on *Bletia* sp., an orchid, in baggage from the Bahamas.

Uromyces alyxiae on maille in baggage from Hawaii.

Xanthomonas citri on Mandarin orange in baggage from China, Japan, and the Philippines; on sweet orange in cargo (refused entry) and stores from Japan, and on *Citrus* sp. (peel) in stores from Japan.

Xanthomonas sp. (Cancerosis B) on lemon in stores from Argentina.

The following nematodes were also found in airborne material:

Heterodera humuli in soil with hops in cargo from Switzerland.

Heterodera punctata in soil with aloe plants in baggage from Finland; in soil with heather plants in mail from Scotland; and in soil with orchid plants from England.

Heterodera rostochiensis in soil with carnation plants in baggage and heather plants in baggage and mail from Scotland; in soil with crown of thorns plant in baggage from Denmark; in soil with amaryllis plants, in soil with carnation plants, in soil with crocus corms, in soil with lily-of-the-valley pips and in soil with shamrock plants, all in baggage, from Germany; in soil with horseradish roots in cargo from Germany; in soil with carnation and lupine plants in baggage from England; in soil with *Pelargonium* sp. plants in baggage from Ireland; and in soil with potatoes in baggage from Sweden.

NOTES ON INSECTS INTERCEPTED

FRUIT FLIES

The following fruit flies were intercepted:

Anastrepha fraterculus in grapefruit in stores from Brazil and Peru; in guava in baggage from Colombia; in orange in stores from Argentina; in orange in quarters from Argentina and Brazil; and in peach and pear in baggage from Mexico. *A. fraterculus* (?) in orange in stores from Brazil.

The Mexican fruit fly (*Anastrepha ludens*) in avocado in baggage from Mexico, in grapefruit in baggage and stores from Mexico; in mamey in stores from Mexico and in air baggage from Nicaragua; in mango in air baggage from Guatemala, Mexico, Nicaragua and Salvador; in mango in baggage, cargo, and quarters from Mexico; in orange in baggage, air baggage, cargo, quarters, stores and air stores from Mexico; in orange in air baggage from Guatemala; in peach, pear, quince, and white sapote in baggage from Mexico; and in sweet lime in baggage and quarters from Mexico.

The West Indian fruit fly (*Anastrepha mombinpraeoptans*) in guava in air baggage from Guatemala; in mango in air baggage from Brazil, Cuba, Dominican

Republic, Guatemala, Honduras, Jamaica, Mexico, Nicaragua, and Salvador; in mango in baggage from Costa Rica, Jamaica, and Mexico; in mango in cargo from Puerto Rico; in mango in stores from Cuba, Haiti, Jamaica, and Mexico; in mango in quarters from Cuba and Panama; in pear in baggage from Mexico; in purple mombin in air baggage from Cuba and Nicaragua; in quince in baggage from Mexico; in *Spondias* sp. in air baggage from Costa Rica, Nicaragua, and Salvador; in *Spondias* sp. in air cargo from Costa Rica; in yellow mombin in air mail from Guatemala; and in yellow mombin in air baggage from Guatemala, Nicaragua and Salvador.

Anastrepha serpentina in mamey in air baggage from Salvador; in mango in baggage from Colombia and Ecuador; in orange in stores from Brazil; in sapodilla in baggage from Mexico; in sapodilla in air baggage from Guatemala, Nicaragua, and Salvador; and in sapote in baggage from Salvador.

Anastrepha striata in guava in baggage from Costa Rica and Mexico.

Anastrepha suspensa in guava in quarters from Puerto Rico.

The Mediterranean fruit fly (*Ceratitis capitata*) in apple in baggage from Italy; in apple in air stores from the Azores; in apricot in air stores from an unknown origin; in coffee berry in baggage and mail from Hawaii; in coffee berry in air baggage from Brazil and Hawaii; in fig in air baggage from the Azores and Italy; in grapefruit in quarters from Egypt; in grapefruit in stores from Egypt, Israel, and Spain; in loquat in baggage from Portugal; in Mandarin orange in baggage and stores from Italy; in Mandarin orange in air stores from Morocco and Portugal; in nectarine in air baggage from Italy; in orange in baggage from Israel, Italy, and Spain; in orange in air baggage from the Azores, Italy, Portugal, and Spain; in orange in air cargo from Italy; in orange in quarters from Israel and Spain; in orange in air quarters from France (?); in orange in stores from Egypt, Cyprus, Israel, Italy, Spain, Spanish Morocco, and an unknown origin; in orange in air stores from the Azores, Portugal and Spain; in peach in air baggage from France; in air stores from Italy; in pear in baggage and air baggage from Italy; in pear in air stores from the Azores; in persimmon in baggage from Italy; in pomegranate in baggage from Italy; in pomelo in baggage from Italy; in pricklypear in baggage and air baggage from Italy; and in quince in baggage from Greece and Italy. *C. capitata* (?) in apple in air stores from an unknown origin; in apricot in air stores from an unknown origin; in avocado in air baggage from Hawaii; in coffee berry in air baggage from Brazil and Hawaii; in Mandarin orange in stores from Algeria; in orange in mail from Cyprus; in orange in quarters from Spanish Morocco; in orange in stores from Portugal; in pepper in stores from Angola; and in *Passiflora* sp. in air baggage from Portugal.

The melon fly (*Dacus cucurbitae*) in cucumber in cargo and stores from Hawaii and in tomato in stores from Hawaii. *D. cucurbitae* (?) in cucumber and tomato in stores from Hawaii.

The oriental fruit fly (*Dacus dorsalis*) in airplane from Hawaii; in banana in baggage from Hawaii; in seed pulp of *Calophyllum inophyllum* in mail from Hawaii; in coffee berries in air baggage and mail from Hawaii; in guava in mail from Guam; in mango in baggage, mail, and quarters from Hawaii; in mountain apple in air baggage from Hawaii; an adult on an orchid plant in air baggage from Hawaii; in fruit of *Terminalia* sp. in air baggage from Hawaii; and in ti berries in air baggage from Hawaii. *D. dorsalis* (?) in Arabian coffee berries in air baggage from Hawaii and in coffee berries in mail from Hawaii.

The olive fruit fly (*Dacus oleae*) in olive in baggage and air baggage from Italy and in olive in air baggage from Greece and Lebanon. *D. oleae* (?) in olive in air baggage from Italy.

Possibly *Dacus tryoni* (Queensland fruitfly) in pear in air stores from Australia.

Rhagoletis cerasi in cherry in air baggage from Germany and Yugoslavia and in cherry in air stores from Europe, France, Italy, and Sweden. *R. cerasi* (?) in apple in air baggage from the Azores; in cherry in air mail from Sweden; and in fruit of *Passiflora* sp. in air baggage from the Azores.

The apple maggot (*Rhagoletis pomonella*) in apple in baggage from Mexico.

INSECTS OTHER THAN FRUIT FLIES

A bulb mite, *Aceria tulipae*, on garlic in cargo from Lebanon, in garlic in stores from India.

The citrus blackfly (*Aleurocanthus woglumi*) on leaves of *Citrus* sp. in air baggage, baggage, and stores from Mexico; on leaf of calamondin orange in baggage from

Mexico; on lime leaf in cargo from Mexico; on orange leaves in mail and stores from Mexico; and on leaves of sour lime in baggae and cargo from Mexico.

A coccid, *Aspidiotus hedericola*, on ivy in baggage from Italy.

Baris lepidii (Curculionidae) in horseradish in cargo from Germany.

A bruchid, *Callosobruchus marshalli*, in cowpea seed in mail from Kenya, Africa and the Union of South Africa.

An adult of *Chrysopera combinans* (Phalaenidae), "neither genus or species represented in the National Museum collection," on an airplane from Kwajalein.

A cossid, *Dyspessa ulula*, in garlic in cargo from Italy.

Hylemya floralis (Muscidae) in horseradish roots in cargo from Sweden.

A curculionid, *Hypera brunneipennis*, with cotton samples in cargo from Mexico, with garlic in cargo from Egypt.

Apparently *Icerya aegyptiaca* (Coccidae) on an orchid plant in cargo from Mexico. "Have no previous record of this from Mexico or apparently from the new world."

Kaloterms flavicollis (Kalotermitidae), a vineyard and fruit tree pest, on quince in baggage from Italy.

A curculionid, *Naupactus xanthographus*, in grape in cargo from Chile.

Pheidole megacephala, "a very important economic species of ant," with *Bulbophyllum* sp. in cargo from New Guinea; on petioles of *Caryota* sp. in baggage from Cuba; with fruit of *Lansium* sp. in air baggage from the Philippines; with orchid plants in air mail from the Canal Zone and Honduras; in soil on roots of an unknown plant in air baggage from Bermuda; in soil with banana rhizomes in air baggage from Bermuda; and with St. Augustine grass in air baggage from Bermuda.

Phloeotribus scarabaeoides (Scolytidae) with olive cuttings in baggage from Italy.

A syrphid, *Xanthogramma calopus*, new to the National Museum collection, with chinkierichee flowers in air cargo from the Union of South Africa.

Trogoderma granarium (khapra beetle) in floor sweepings in flour mill in Mexico, with *Hordeum* sp. seed in mail from Afghanistan; with peanuts in cargo from India; on rice bags in stores from Mexico and, with wheat in cargo from Mexico.

Trogoderma parabile (Dermestidae) with an unknown grain and with wheat in cargo from Mexico.

SNAILS

The giant African snail (*Achatina fulica* Fer.) was not reported during the year but other injurious snails intercepted, not known to be in the United States and of economic importance, were:

Bradybaena similis with cut flowers of *Anthurium* sp. in preflight inspection of baggage leaving Hawaii for the mainland; with cut flowers of *Anthurium* sp. in mail leaving Hawaii for the mainland; with leaves of bird-of-paradise-flower in baggage in preflight inspection of baggage leaving Hawaii for the mainland; with bird-of-paradise-flower in mail leaving Hawaii for the mainland; with cut flowers of *Vanda* sp. in cargo leaving Hawaii for the mainland; at Honolulu, Hawaii with dwarf trees in air baggage from Japan; at Mobile, Ala., with St. Augustine grass in air baggage from Bermuda; at New Orleans, La., with sweetpotatoes in stores from Brazil; at New York, N. Y., with cut flowers of lilies in baggage from Bermuda; at Philadelphia, Pa., with pumpkins in stores from Japan.

Deroceras reticulatum at Boston, Mass., with globe artichoke in stores from Italy; with lettuce in stores from Ireland; with turnips and beets in stores from the Union of South Africa; at Honolulu, Hawaii with lettuce in air stores from Australia; with orchid plants in air express from Costa Rica; with *Heliconia* sp. foliage in air cargo leaving Hawaii for the mainland; with ti leaves in baggage and mail leaving Hawaii for the mainland; at Miami, Fla., with orchids in air baggage from Guatemala and Jamaica; with orchid plants in air cargo from Costa Rica and Ecuador; with orchid pseudobulbs in air cargo from Venezuela; at New Orleans, La., with cabbage in stores from Italy; at New York, N. Y., with cauliflower in stores from Belgium; with escarole in stores from France; with lettuce in stores from Italy; with lettuce in air stores from Sweden; and with potatoes in air baggage from Ireland; at Philadelphia, Pa., with beets in stores from New Zealand; with carrots in stores from Chile; with celery in stores from Portugal; with cabbage in stores from England, Germany, Italy, and the Netherlands; with leek in stores from Germany; with lettuce in stores from England; and with turnips in stores from France.

Helix nemoralis at San Pedro, Calif., on a returned tractor from England.

Lamellaxis gracilis at Miami, Fla., with orchid plants in air cargo from Cuba.

Limax marginatus at Miami, Fla., with *Anthurium* sp. plants and orchid plants in air cargo from Costa Rica and with orchid plants in air baggage from Guatemala; at Boston, Mass. with assorted plants and soil in air baggage from Portugal; and at Philadelphia, Pa., with cabbage in stores from Germany. *L. marginatus* (?) at Honolulu, Hawaii with *Asparagus* sp. in cargo from Japan; at Philadelphia, Pa., with cabbage in stores from the Azores.

Limax maximus at New York, N. Y., with woody plants in baggage from England; at Philadelphia, Pa., with cabbage in stores from Norway.

Theba pisana at Boston, Mass., on wall of a refrigerator in stores from an unknown origin; at New York, N. Y., with globe artichoke in stores from Italy; at Washington, D. C., with lettuce in air stores from Germany. *T. pisana* (?) at Philadelphia, Pa., with lettuce in stores from the Netherlands.

NOTES ON DISEASES INTERCEPTED

The sweet orange scab (*Elsinoe australis*) was intercepted 84 times; sixty-two of these interceptions came from Brazil on sour orange, lemon, sweet orange, satsuma orange, and sour lime; 18 from Argentina on lemon, Mandarin orange, sweet orange, and sour lime; 1 from Paraguay on sweet orange; 3 from Uruguay on sweet orange.

Citrus canker (*Xanthomonas citri*) was intercepted 104 times; 83 of these came from Japan, 13 from China, 3 from India, 2 from New Guinea, and 1 each from Indonesia, the Philippines, and an unknown origin. These interceptions were made from the following hosts: *Citrus* sp. (leaf), *Citrus* sp. (peel), grapefruit, lemon, Mandarin orange, pummelo, sour lime, sour orange, and sweet orange.

Cancrosis B (*Xanthomonas* sp.), another bacterial disease of citrus, producing symptoms similar to citrus canker, was intercepted 3 times on lemon and once on sweet orange from Argentina, and once on lemon from Brazil.

Other interceptions were:

Anthostomella keissleri on *Brassavola nodosa*, an orchid, in air mail from the Canal Zone and on an orchid plant in air cargo from Costa Rica.

Cercospora kalmiae on mountain laurel in quarters of airplanes from England, the Netherlands, and an unknown origin.

Cercospora protearum on *Protea* sp. leaf in air cargo from the Union of South Africa.

Chrysomyxa ledicola on spruce in baggage from Canada.

Chrysomyxa ledi var. *rhododendri* on *Rhododendron eremastum* and *R. hirsutum* in cargo from England and on rock rhododendron in air mail from Switzerland.

Gymnosporangium haraeaeum on juniper in baggage from Japan.

Micropeltis bakeri on *Epidendrum* sp., an orchid, in air mail from the Canal Zone and on an orchid plant in air baggage from Panama.

Neovossia indica, "interesting and not in the United States," on wheat in mail from Afghanistan.

Phakopsora jatrophicola, "an interesting tropical rust," on bellyache nettlespurge in air cargo from Guadeloupe.

Phomopsis orchidophilus on *Laelia* sp., an orchid, in mail from Mexico.

Phyllostictina pyriformis on various orchids in air cargo from the Canal Zone, New Guinea, and Panama and on orchid in cargo from Mexico.

Puccinia aeluropi on stems of *Aeluropus littoralis* in mail from Afghanistan.

Puccinia pelargonii-zonalis, "new to the United States as far as is known," on horseshoe geranium leaf in air baggage from Hawaii.

Puccinia poae-nemoralis on a stem of *Poa* sp. in mail from Afghanistan.

Puccinia scirpi, "not reported in the United States," on *Scirpus* sp. in cargo from Italy.

A ringspot virus on watermelon in cargo from Mexico and on watermelon in stores from Spanish Morocco.

Septoria phleina (?) on timothy seed in mail from Afghanistan.

Septoria selenophomoides on various orchids in air cargo from Brazil, England, and Mexico, and on *Stanhopea* sp., an orchid, in mail from Mexico.

Sphaceloma spondiadis on yellow mombin in air baggage from the Barbados.

Sphaceloma zorniae, on *Zornia* sp. in air baggage from St. Kitts.

Uredo oncidii on *Oncidium varicosum*, an orchid, in mail from Brazil, and on *Oncidium* spp. in air cargo from Costa Rica, Honduras, and Trinidad.

INCOMPLETELY DETERMINED PESTS

Pests of potential economic importance have been determined to genus only because they were either (1) a new host or distribution record, (2) immature specimens, (3) in poor condition for specific determination, or (4) there is a lack of authentic material in our collection for comparison.

INSECTS

Among the incompletely determined insects were the following fruit flies:

Anastrepha sp., possibly *fraterculus* at Baltimore, Md., in orange in stores from Brazil; at Brownsville, Tex., in apple in baggage from Mexico; at Eagle Pass, Tex., in quince in baggage from Mexico; at Houston, Tex., in grapefruit in stores from Brazil; at New York, N. Y., in coffee berry in air baggage from Colombia; at Progreso, Tex., in pear in baggage from Mexico; at San Juan, P. R., in sapodilla in air baggage from Brazil.

Anastrepha sp., probably *ludens*, at Brownsville, Tex., in pear in baggage from Mexico; at Hidalgo, Tex., in pear in baggage from Mexico; at Houston, Tex., in orange in quarters from Mexico; at Laredo, Tex., in avocado and pear in baggage from Mexico; at Nogales, Ariz., in mango in baggage from Mexico; at San Pedro, Calif., in sapote (*Calocarpum sapota*) in air baggage from Mexico; at San Ysidro, Calif., in mango in baggage from Mexico.

Anastrepha sp., probably *mombinpraeoptans*, at Brownsville, Tex., in mamey in cargo from Mexico; in mango in baggage from Mexico; and in mango in air baggage from Nicaragua; at Galveston, Tex., in pomegranate in quarters from Cuba; at Laredo, Tex., in orange and guava in baggage from Mexico; at New Orleans, La., in yellow mombin in air baggage from Salvador; at New York, N. Y., in mango in air baggage from Colombia; at Philadelphia, Pa., in grapefruit in stores from Trinidad; at Christiansted, St. Croix in guava-berry (*Eugenia floribunda*) in cargo from Tortola; at San Antonio, Tex., in orange in air baggage from Mexico; at San Pedro, Calif., in orange in air baggage from Guatemala.

Anastrepha sp., probably *serpentina*, at Brownsville, Tex., in mamey in baggage from Mexico; at Progreso, Tex., in quince in baggage from Mexico.

Anastrepha sp., probably *striata*, at Nogales, Ariz., in guava in baggage from Mexico.

Anastrepha sp. at Baltimore, Md., in orange in stores from Brazil; at Brownsville, Tex., in Mandarin orange in air baggage from Brazil; at Charleston, S. C., in orange in stores from Cuba; at Eagle Pass, Tex., in garbage can for seized fruits from Mexico; at El Paso, Tex., in mango in air baggage from Mexico; at Houston, Tex., in mango in air baggage from Guatemala; at Laredo, Tex., in apple in baggage from Mexico; at Miami, Fla., in coffee berries in air baggage from Brazil; in Mandarin orange in air baggage from Argentina; in mango in air baggage from Colombia, Honduras, and Peru; and in orange in air baggage and air stores from Colombia; at New York, N. Y., in plum in air baggage from Venezuela; at Nogales, Ariz., in mango in baggage from Mexico; at Roma, Tex., in pear in baggage from Mexico; at Charlotte Amalie, St. Thomas in mango in cargo from Dominica; at San Pedro, Calif., in coco-plum in baggage from Nicaragua.

Dacus sp., at Honolulu, Hawaii in *Syzygium cumini* in air baggage from the Philippines.

Rhagoletis sp., probably *juglandis* Cress. in black walnut in baggage from Mexico.

Rhagoletis sp. at Washington, D. C., with rose hips in mail from Afghanistan.

Forty interceptions, identified to family only, Tephritidae, were intercepted at the following ports: National Airport, Arlington, Va., in orange in passenger's baggage thought to be from Italy; at Boston, Mass., in bag containing apples, apricots, and cherries in air stores from an unknown origin; in cherry in air stores from an unknown origin; in chili pepper in stores from Natal, South Africa; in cucumber in stores from French West Africa; in grapefruit in stores from Argentina; and in orange in baggage from an unknown origin; at Brownsville, Tex., in mango in baggage from Mexico; at Honolulu, Hawaii in *Eugenia malaccensis* in

air stores from the Philippines; in peach in air stores from Australia; in pepper in air baggage from Thailand; and in santol in air baggage from the Philippines; at Houston, Tex., in apple in air cargo from Peru and in grapefruit and orange in stores from Brazil; at New York, N. Y., in apricot in cargo from the Union of South Africa; in grape in cargo from Argentina and the Union of South Africa; in lemon in baggage from Italy; in orange in baggage from the Union of South Africa; in peach in cargo from the Union of South Africa; and with cut flowers of zinnias in baggage from Bermuda; at Philadelphia, Pa., in apple in stores from Japan; in lemon in stores from Australia; in pepper in stores from Belgian Congo; two pupae in soil around horseradish roots in stores from Germany; and in squash in stores from French West Africa; at Roma, Tex., in orange in baggage from Mexico; at San Juan, P. R., in pepper in air baggage from Trinidad; in pulp of tree seeds in air baggage from British Guiana; at Seattle, Wash., in mango in air baggage from the Philippines; at Washington, D. C., in mango in mail from Guam and in oval leaf whortleberry in mail from Japan.

Other incompletely determined insects worthy of mention were:

An aleyrodid, Aleyrodicinae, new species and new genus, near *Aleurodicus*, at Laredo, Tex., on *Epidendrum* sp., an orchid, and *Laelia* sp., an orchid, in cargo from Mexico; at Brownsville, Tex., on orchid plants in cargo from Mexico; at Miami, Fla., on an orchid plant in cargo from Guatemala.

An aleyrodid, new species and new genus, near *Bellitudo*, at San Diego, Calif. on an unidentified leaf in cargo from Ecuador.

A pentatomid, *Alitocoris* sp., a new species, at Laredo, Tex., on an orchid plant in cargo from Mexico.

Amphelasma sp. (Chrysomelidae), new to the National Museum collection, at Laredo, Tex., on an orchid plant in cargo from Mexico.

Aonidia sp. (Coccidae), "a very curious insect—not described," at Washington, D. C., on mango budstick in express from Ceylon.

Bruchidius sp., near *cisti* (F.) (Bruchidae) at Washington, D. C., with *Astragalus* sp. seed and seed pods in mail from Afghanistan.

Bruchidius sp., near *orchesioides* Heyd. (Bruchidae), at Houston, Tex., with seed of *Cyamopsis tetragonoloba* from Pakistan.

Bruchidius sp., probably *perparulus* (Boh.) (Bruchidae), at New York, N. Y., in *Trifolium ochroleucum* seed in cargo from Italy.

Bruchidius sp., possibly *stylophorus* (Daniel) (Bruchidae), at Washington, D. C., with a seed pod of *Medicago intertexta* from Sicily.

Bruchus sp., probably *hamatus* Miller (Bruchidae), at Washington, D. C., in legume seed in mail from Turkey; at Hoboken, N. J., in legume seed in mail from Tangier, France.

A curculionid, *Brachyrhinus* sp., at New York, between stems of a cardoon thistle plant in air baggage from Italy; on Grecian laurel foliage in furnishings from Italy; and at Washington, D. C., with seed head of *Trifolium* sp. in mail from Turkey.

Cerococcus sp. (Coccidae), "does not appear to agree with anything described," at Washington, D. C., on leaf and stem of black pepper in mail from Indonesia.

Dyspessa sp. (Cossidae) at New York, N. Y., with garlic in cargo from Morocco.

Epicaerus sp., probably *cognatus* Sharp (Curculionidae), at Houston, Tex., in potato in baggage and stores from Mexico.

Epicaerus sp. at Baltimore, Md., and Laredo, Tex., in potato in stores from Mexico; at Eagle Pass, Tex., in potato in railway car from Mexico.

A curculionid, *Eucaclophagus*, a new species near *graphipterus* Champ., at Miami, Fla., on a pseudobulb of *Cynoches ventricosum*, an orchid, in air cargo from Guatemala.

"*Eulia*" sp. (Tortricidae), probably new, at New York, N. Y., on nectarine in cargo from Chile.

Gnorimoschema sp., near or = *borsaniella* (Koehr.) (Gelechiidae), at Baltimore, Md., in pepper in stores from Hawaii.

Gnorimoschema sp., probably *ocellatella* (Boyd) (Gelechiidae), at Philadelphia, Pa., in beet in stores from Egypt and France.

Gymnandrosoma sp. (Olethreutidae) at Galveston, Tex., in grapefruit in stores from Trinidad, in orange in quarters from Ecuador.

Lixus sp. (Curculionid) at Baltimore, Md., in beet in stores from Algeria; at Philadelphia, Pa., in beet in stores from Egypt and Italy.

Longitarsus sp., probably *parvulus* (Payk.) (Chrysomelidae), at Hoboken, N. J., with grass packing with hop roots in mail from Belgium.

Megacerus sp. (Bruchidae), new to the National Museum collection, at Houston, Tex., in an unidentified pod in cargo from Ecuador.

A coccid, *Platyalecanium* sp., or close—"pretty surely undescribed," at Miami, Fla., on a leaf of *Vanda* sp., an orchid, in cargo from Thailand.

A coccid, *Pseudoparlatoria* sp., "close to *noacki* Ckll. but not same and may well be undescribed," at Hoboken, N. J., on *Anthurium reticulatum* leaf in air cargo from Colombia.

Puto sp. (Coccidae), "does not fit any described species and consider it might be undescribed," at Honolulu, Hawaii on *Elleanthus* sp., an orchid, in air express from Costa Rica.

A curculionid, *Zeugorygma* sp., probably *orangiae* Mshl. or a new species, at Washington, D. C., with seed heads of *Digitaria tricholanoides* in mail from the Orange Free State, Union of South Africa.

A total of 1,532 incompletely determined insects of quarantine significance were recorded during the year.

DISEASES

Asterina sp., apparently undescribed, at Washington, D. C., on *Shortia soldanelloides* in air express from Japan.

Cercospora st. at Hoboken, N. J., on a leaf of an anthurium hybrid in air express from Colombia; at Brownsville, Tex., on a leaf of *Chamaedorea* sp. in air cargo from Mexico; at Houston, Tex., on frond of *Collina elegans* (?) in air cargo from Mexico; at San Francisco, Calif., on umbrella pine in air cargo from Japan. "Unreported to the host and the United States as far as is known."

Clypeollela sp., probably undescribed, at Honolulu, Hawaii on *Gardenia* sp. in air baggage from Tahiti.

Coleosporium (?) sp., at San Francisco, Calif., on *Dendrochilum cobbianum*, an orchid, in air cargo from the Philippines.

Cytospora sp. at Mobile, Ala., on *Terminalia bellerica* in quarters from Trinidad—"none reported on this host as far as is known."

Helminthosporium sp., probably new, at Laredo, Tex., on onion in cargo from Mexico.

Mycosphaerella sp. at Washington, D. C., on seed of *Hyparrhenia lintonii* in mail from Kenya—"none reported on this host as far as is known."

Pestalotia sp. at San Francisco, Calif., on *Araucaria klinkii* seed in air cargo from New Guinea; at San Juan, P. R., on *Ixora* sp. leaf in air cargo from Trinidad—"none reported on this host as far as is known"; at San Pedro, Calif., on a philodendron leaf in air baggage from Mexico—"probably new to the host"; at Hoboken, N. J., on *Visnea mocanera* leaf in air mail from Portugal—"new for the host."

Phyllosticta sp. at San Francisco, Calif., on umbrella pine in air cargo from Japan—"unreported for the host and the United States as far as is known."

Phyllostictina sp. on a ti leaf during preflight inspection of the quarters of an airplane leaving Hawaii for the mainland; at San Francisco, Calif., on a gardenia leaf in mail from Japan—"none reported on this host as far as is known"; on a gardenia plant in preflight inspection of cargo leaving Hawaii for the mainland; at San Francisco, Calif., on umbrella pine in air cargo from Japan—"unreported for the host and the United States as far as is known."

Probably *Physalospora* sp. at Washington, D. C., on *Melica* sp. in mail from Afghanistan.

Pyrenochaeta sp. at San Juan, P. R., on an ixora leaf in air cargo from Trinidad—"none reported on this host as far as is known."

Rhabdospora sp. at San Pedro, Calif., on a ginkgo stem in mail from Japan.

Septoria sp. at Miami, Fla., on a camellia leaf in air baggage from Peru; at San Antonio, Tex., on an anthurium leaf in air baggage from Mexico; at Houston, Tex., on *Chamaedorea* sp. in cargo from Mexico; and at Washington, D. C., on a stem of *Puccinellia* sp. in mail from Afghanistan.

NEMATODES

Incompletely determined nematodes worthy of mention were:

Aphelenchoides sp., at New York, N. Y. in *Colocasia* sp. tuber in stores from Japan.

Heterodera sp., probably *avenae*, at Hoboken, N. J., in soil with roots of rhododendron in mail from England; at New York, N. Y., in soil with horseradish in cargo from Germany.

Heterodera sp., probably *cacti*, at Laredo, Tex., in soil in baggage from Mexico.

Heterodera sp., probably *carotae* Jones, at Philadelphia, Pa., in soil with carrots in stores from Lebanon.

Heterodera sp., possibly *punctata*, at Hoboken, N. J., in soil with delphinium plants in cargo from England.

Heterodera sp., probably *rostochiensis*, at Nogales, Ariz., in soil with cactus in baggage from Mexico.

Heterodera sp., possibly *trifolii* (Goffart) Oostenbrink, at Hoboken, N. J., in soil with roses in cargo from Germany.

Other members of the genus *Heterodera* were intercepted 310 times at 20 ports from the following countries: Argentina, Australia, Austria, Azores, Belgium, Bermuda, Canada, Chile, Cuba, Czechoslovakia, Denmark, Egypt, England, Finland, France, French West Africa, Germany, Greece, Ireland, Italy, Japan, Israel, Luxembourg, Mexico, Morocco, Netherlands, New Zealand, Norway, Peru, Poland, Portugal, Scotland, Spain, Sweden, and Yugoslavia. These interceptions were made from soil samples, sand ballast, soil with army cargo, and soil with plant material in baggage, cargo, mail, and quarters; in soil with vegetables in cargo and stores; in soil with bulbs and tubers in baggage, cargo, and mail; in soil in sweepings from empty railway cars; and in soil in sweepings from railway cars carrying potatoes.

Meloidogyne sp. at Hoboken, N. J., in rhizomes of calla lily in cargo and mail from France and in cargo from Italy; in tubers of *Achimenes* spp., in cargo and mail from the Netherlands; in astilbe and Siberian bugloss roots in cargo from the Netherlands; in *Calla* sp. rhizomes in cargo from Italy; in kamchatka bugbane roots in cargo from the Netherlands; in roots of *Clematis* spp. in cargo from the Netherlands and in air mail from England; in Geum hybrid roots in cargo from the Netherlands; in isoloma tuber in mail from the Netherlands; in roots of Japanese iris in cargo from Japan; in a tuber of *Naegelia* sp. in cargo from the Netherlands; in peony roots in mail from England and in peony roots in cargo from the Netherlands; in shamrock roots in cargo from Ireland; in tubers of *Reichsteineria macropoda* in cargo and mail from the Netherlands; in roots of *Weigela middendorffiana* in cargo from the Netherlands; at San Diego, Calif., in begonia roots in baggage from Mexico; in celery roots in stores from Norway; in potatoes in stores from Chile and Denmark; at San Pedro, Calif., in roots of an unknown plant in baggage from Hawaii.

Pratylenchus sp., closely related to *minyus* Sher and Allen, at New York, N. Y., in *Colocasia* sp. tuber in stores from Japan.

Pratylenchus sp. at Hoboken, N. J., in roots of *Bletilla hyacinthina*, an orchid, in air mail from the Netherlands; in roots of Christmas rose in cargo and air cargo from the Netherlands; in roots of *Clematis* spp., in cargo from the Netherlands and in air mail from England; in roots of *Epipactis gigantea*, an orchid, in air mail from the Netherlands; in roots of *Helleborus* spp. in cargo from the Netherlands and in mail from England; in rhizome of Japanese iris in cargo from the Netherlands; in roots of *Iris* spp. in cargo from England; in roots of *Kniphofia* sp. in cargo from the Netherlands; in roots of solomonseal in cargo from the Netherlands; in Siberian bugloss in cargo from the Netherlands; in roots of *Trollius* spp. in cargo and air cargo from the Netherlands; and in western bleedingheart in cargo from the Netherlands.

A total of 745 incompletely determined pathogens of quarantine significance were recorded during the year.

Summary of Numbers of Interceptions Listed in Main Table

Country	Insect	Disease	Country	Insect	Disease
	Number	Number		Number	Number

¹ This total represents only pests of known or potential plant-quarantine importance. The total of all interceptions made during the year was 18,504.

NOTE.—Interceptions were also made from Bolivia, East Africa, Ethiopia, French West Africa, Hungary, Israel, Majuro, Marshall Islands, Natal, Nevis, Palestine, Pretoria, Saipan, Saudi Arabia, Tanganyika, Tangier, Tasmania, and Tortola.

Pests collected and reported from July 1, 1954, through June 30, 1955

[An asterisk indicates State inspection]

Pest and host	Country of origin	Number of interceptions in—			Collected in—
		Consumption	Non-entry	Propagation	
<i>Acanthoscelides armitagei</i> (Pic) (Bruchidae):					
<i>Cajanus cajan</i> (pigeonpea).....	Brazil.....			1	D. C.
<i>Phaseolus vulgaris</i> (kidney bean).....	St. Vincent.....	1			Oreg.
<i>Acanthoscelides obvelatus</i> Bridw. (Bruchidae):					
<i>Phaseolus vulgaris</i> (kidney bean).....	Mexico.....			2	D. C.
<i>Aceria tulipae</i> (Keif.) (Eriophyidae):					
<i>Allium sativum</i> (garlic).....	India, Lebanon.....	1	1		Minn., Tex.
<i>Acrolepia assectella</i> (Zell.) (Hyponomeutidae):					
<i>Allium porrum</i> (leek).....	Germany, Italy.....		4		Pa.
<i>Adoretus sinicus</i> (Burm.) (Scarabaeidae):					
Airplane.....	Hawaii.....		5		Hawaii.
Baggage.....	do.....	5			Hawaii.
On box of foliage.....	do.....	1			Hawaii.
On suitcase.....	do.....	1			Hawaii.
Wrapping paper.....	do.....	1			Hawaii.
<i>Adoxophyes orana</i> (F. R.) (Tortricidae):					
<i>Lilium</i> sp. (lily).....	Netherlands.....	1			N. Y.
<i>Malus sylvestris</i> (apple).....	England.....		1		N. Y.
<i>Syringa</i> sp. (lilac).....	Netherlands.....	12			N. Y.
<i>Agonum rugulosus</i> (Chap.) (Platypodidae):					
<i>Copaifera hemitomophylla</i> ("cattivo").....	Colombia.....	1			Ga.
<i>Agriotes limosus</i> (Lec.) (Elateridae):					
Soil around evergreens.....	Canada.....			1	N. Y.
<i>Agrotis ypsilon</i> (Rott.) (Phalaenidae):					
<i>Lactuca sativa</i> (lettuce).....	Egypt.....		1		Pa.
<i>Aleurocanthus woglumi</i> Ashby (Aleyrodidae):					
<i>Citrus aurantifolia</i> (lime).....	Mexico.....	2			Tex.
<i>Citrus aurantifolia</i> (sour lime).....	do.....	2			Ariz., Tex.
<i>Citrus mitis</i> (calamondin orange).....	do.....	1			Ariz.
<i>Citrus sinensis</i> (orange).....	do.....	1	1		Tex.
<i>Citrus</i> sp.....	do.....	7	1		Ariz., Tex.
Soil.....	do.....		1		Ariz.
<i>Aleuroparadoxus gardeniae</i> Rsl. (Aleyrodidae):					
<i>Coffea</i> sp. (coffee).....	do.....	1			Tex.
<i>Gardenia augusta</i> (gardenia).....	do.....	1			Calif.*
<i>Aleuroplatus coccolus</i> Q. (Aleyrodidae):					
<i>Chamaedorea</i> sp.....	do.....	1			Tex.
<i>Aleuroplatus plumosus</i> (Q.) (Aleyrodidae):					
<i>Kalmia</i> sp.....	England.....		2		Mass.
<i>Aleurothrix floccosus</i> (Mask.) (Aleyrodidae):					
<i>Citrus sinensis</i> (orange).....	Dominican Republic.....	1			P. R.
<i>Citrus</i> sp., probably <i>limon</i> (lemon).....	Mexico.....	1			Tex.
<i>Citrus</i> sp.....	Argentina, Mexico.....	1	1		Fla.*, Tex.
<i>Aleurotuberculatus similis</i> Takah. (Aleyrodidae):					
<i>Camellia japonica</i> (camellia).....	Japan.....			1	D. C.
<i>Aleyrodes azalea</i> Baker & Moles (Aleyrodidae):					
<i>Rhododendron mucronatum</i>	do.....			1	N. J.
<i>Rhododendron obtusum japonicum</i>	do.....			1	N. J.
<i>Rhododendron</i> sp.....	Belgium.....			1	N. J.
<i>Algarobius prosopis</i> (Lec.) (Bruchidae):					
Airplane.....	Hawaii.....		3		Hawaii.
<i>Allantus cinctus</i> (L.) (Pentthredinidae):					
<i>Kerria japonica pleniflora</i>	Netherlands.....			1	N. J.
<i>Malus sylvestris</i> (apple).....	Canada.....	1			N. Y.
<i>Rosa multiflora</i> (Japanese rose).....	Netherlands.....			2	N. J.
<i>Alpheias conspirata</i> Hein (Galleriidae):					
<i>Ananas comosus</i> (pineapple).....	Mexico.....	3			Tex.
<i>Amorbia emigratella</i> Busck (Tortricidae):					
<i>Armeria</i> sp. (statice).....	do.....	1			Tex.
<i>Bromeliad</i>	do.....			1	Ariz.
<i>Gardenia</i> sp.....	Hawaii.....	1			Calif.*
<i>Glaudiolus</i> sp.....	Mexico.....	3			N. Y., Tex.
<i>Lycopersicon esculentum</i> (tomato).....	do.....	1			Tex.
<i>Amorbia emigratella</i> Busck (?) (Tortricidae):					
<i>Zantedeschia aethiopica</i> (calla lily).....	do.....	1			Tex.
<i>Anastrepha fraterculus</i> (Wied.) (Tephritidae):					
<i>Citrus paradisi</i> (grapefruit).....	Brazil, Peru.....		2		Pa., Tex.
<i>Citrus sinensis</i> (orange).....	Argentina, Brazil.....		3		La., Tex.
<i>Prunus persica</i> (peach).....	Mexico.....	3			Tex.
<i>Psidium guajava</i> (guava).....	Colombia.....	1			Fla.*
<i>Pyrus communis</i> (pear).....	Mexico.....	3			Tex.

Pests collected and reported from July 1, 1954, through June 30, 1955—Continued

Hosts and Insects

- ACACIA:**
Caryedon fuscus (Coleoptera)
Xylothrips religiosus (Coleoptera)
- ACALYPHA:**
Phenacoccus gossypii (Homoptera)
- ACER:**
Parlatoria theae (Homoptera)
Periphyllus californiensis (Homoptera)
- ACHRAS:**
Anastrepha serpentina (Diptera)
- AGARICUS:**
Nemapogon granella (Lepidoptera)
- AGAVE:**
Furcaspis bififormis (Homoptera)
- ALLIUM CEPA:**
Eumerus tuberculatus (Diptera)
Nezara viridula (Hemiptera)
- ALLIUM PORRUM:**
Acrolepis assectella (Lepidoptera)
Deroceras reticulatum (Mollusca)
- ALLIUM SATIVUM:**
Aceria tulipae (Acarina)
Brachycerus albidentatus (Coleoptera)
Brachycerus algirus (Coleoptera)
Dyspessa ulula (Lepidoptera)
Hypera brunneipennis (Coleoptera)
- ALOE:**
Furcaspis bififormis (Homoptera)
- ALPINIA:**
Coccus viridis (Homoptera)
Pentalonia nigronervosa (Homoptera)
Pulvinaria psidii (Homoptera)
- AMARYLLIS:**
Peridroma margaritosa (Lepidoptera)
- ANANAS:**
Alpheias conspirata (Lepidoptera)
Metamasius stricatus (Coleoptera)
Pangaeus rugifrons (Hemiptera)
Platynota rostrana (Lepidoptera)
Ribua innoxia (Lepidoptera)
Sisamnes contractus (Hemiptera)
"Targionia" bromellae (Homoptera)
Thecia ziba (Lepidoptera)
- ANNONA:**
Aspidiotus destructor (Homoptera)
Bephrata maculicollis (Hymenoptera)
Cerconota anonella (Lepidoptera)
Talponia batesi (Lepidoptera)
- ANTHURIUM:**
Bradybaena similis (Mollusca)
Ceroplastes rubens (Homoptera)
Cryphula apicatus (Hemiptera)
Eptochiomeria confusa (Hemiptera)
Limax marginatus (Mollusca)
Myochrous carinatus (Coleoptera)
Pinnaspis buxi (Homoptera)
Plusia chalcites (?) (Lepidoptera)
Pulvinaria psidii (Homoptera)
Vinsonia stellifera (Homoptera)
- APIUM:**
Deroceras reticulatum (Mollusca)
Peridroma margaritosa (Lepidoptera)
- ARACEAE:**
Pulvinaria psidii (Homoptera)
- ARACHIS:**
Caryedon fuscus (Coleoptera)
Trogoderma granarium (Coleoptera)
- ARACHNANTHE:**
Vinsonia stellifera (Homoptera)
- ARAUCARIA:**
Ericoccus araucariae (Homoptera)
- ARECA:**
Aspidiotus palmarum (Homoptera)
- ARMERIA:**
Amorbia emigratella (Lepidoptera)
Reticulitermes flavipes (Isoptera)
- ARMORACIA:**
Baris lepidii (Coleoptera)
Hylemya floralis (Diptera)
- ASPARGUS:**
Limax marginatus (Mollusca)
- ASPASIA:**
Leucaspis cockerelli (Homoptera)
Vinsonia stellifera (Homoptera)
- ASPLENIUM:**
Ceroplastes rubens (Homoptera)
- AUCUBA:**
Phenacaspis aucubae (Homoptera)
- BAMBOO:**
Asterolecanium bambusae (Homoptera)
Asterolecanium epidendri (Homoptera)
Asterolecanium miliaris robustum (?) (Homoptera)
Dinoderus brevis (Coleoptera)
Eucalandra setulosa (Coleoptera)
Minthea rugicollis (Coleoptera)
Trogosyllum prostomoides (Coleoptera)
- BAMBUSA:**
Odonaspis secreta (Homoptera)
- BETA:**
Deroceras reticulatum (Mollusca)
Gnorimoschema ocellatella (Lepidoptera)
Lixus junci (Coleoptera)
- BOUGANVILLEA:**
Pantomorus godmani (Coleoptera)
- BRASSAVOLA:**
Chrysomphalus tenax (Homoptera)
Furcaspis bififormis (Homoptera)
- BRASSIA:**
Leucaspis cockerelli (Homoptera)
Vinsonia stellifera (Homoptera)
- BRASSICA OLERACEA BOTRYTIS:**
Barathra brassicae (Lepidoptera)
Deroceras reticulatum (Mollusca)
Evergestis rimosalis (Lepidoptera)
Phytomyza rufipes (Diptera)
- BRASSICA OLERACEA CAPITATA:**
Barathra brassicae (Lepidoptera)
Deroceras reticulatum (Mollusca)
Helix aspersa (Mollusca)
Limax marginatus (Mollusca)
Limax maximus (Mollusca)
Phytomyza rufipes (Diptera)
Pieris brassicae (Lepidoptera)
Taeniothrips vulgatissimus (Thysanoptera)
- BRASSICA RAPA:**
Deroceras reticulatum (Mollusca)
- BRASSICA SP.:**
Nystus raphanus (Hemiptera)
Phyllotreta aeneicollis (Coleoptera)
- BROMELIAD:**
Amorbia emigratella (Lepidoptera)
Chrysomphalus personatus (Homoptera)
Ligyrocoris abdominalis (Hemiptera)
Megalocysta gibbifera (Hemiptera)
- BROUGHTONIA:**
Coccus viridis (Homoptera)
Vinsonia stellifera (Homoptera)
- BRYOPHYLLUM:**
Coccus viridis (Homoptera)
Monomorium destructor (Hymenoptera)
Pheidole megacephala (Hymenoptera)
Phenacaspis sandwicensis (Homoptera)
- BUXUS:**
Eriophyes canestrinii (Acarina)
Psylla buxi (Homoptera)
- CACTUS:**
Dendrocoris variegatus (Hemiptera)
Lepidosaphes philococcus (Homoptera)
- CAJANUS:**
Acanthoscelides armitagei (Coleoptera)
Ancylostoma stercora (Lepidoptera)
Callosobruchus maculatus (Coleoptera)
Callosobruchus phaseoli (Coleoptera)
Maruca testulalis (Lepidoptera)
- CALADIUM:**
Pentalonia nigronervosa (Homoptera)
- CALATHEA:**
Pentalonia nigronervosa (Homoptera)
- CALLUNA:**
Brachyrrhinus sulcatus (Coleoptera)
Gelechia ericetella (Lepidoptera)
Orthotylus ericetorum (Hemiptera)
Scotopostethus decoratus (Hemiptera)
Strophosoma limbatus (Coleoptera)
Strophosoma melanogrammus (Coleoptera)
- CALOPHYLLUM:**
Dacus dorsalis (Diptera)
- CAMELLIA:**
Aleurotuberculatus similis (Homoptera)
Aspidiotus degeneratus (Homoptera)
Parlatoria camelliae (Homoptera)

Hosts and Insects—Continued

- CANAVALIA:**
Lampides boeticus (Lepidoptera)
Maruca testulalis (Lepidoptera)

AZORES

Bruchus azoricus (?)
Ceratitis capitata
Glycyphagus domesticus
Helix aspersa
Limax marginatus (?)
Rhagoletis cerasi (?)

BAHAMAS:

Crenidorsum commune
Melipotis famelica
Phenacoccus gossypii
Protopulvinaria pyriformis
 "Targionia" sacchari

BELGIAN CONGO:

Olethreutes leucotreta
Pinnaspis pattersoni (tentative)

BELGIUM:

Aleyrodes azaleae
Anuraphis tulipae
Barathra brassicae
Bruchus brachialis
Deroceras reticulatum
Napomyza lateralis
Phytomyza rufipes

BERMUDA:

Antonina graminis
Bradybaena similis
Bruchus tristis
Coccus viridis
Haplothrips gowdeyi
Homoeosoma electellum
Iridomyrmex humilis
Kalotermes snyderi
Nezara viridula
Pentalonia nigronervosa
Peridroma margaritosa
Pheidole megacephala
Phenacoccus gossypii
Prodenia eridania
Prodenia ornithogalli
Pseudococcus boninensis
Unaspis citri

BRAZIL:

Acanthoscelides armilatus
Anastrepha fraterculus
Anastrepha mombinpraeoptans
Anastrepha serpentina
Asterolecanium epidendri
Aulacaspis mangiferae
Bephrata maculicollis
Bradybaena similis
Callosobruchus analis
Callosobruchus maculatus
Ceratitis capitata
Cercanota anonella
Chrysomphalus personatus
Diabrotica speciosa
Dinoderus bifoveolatus
Euscepes postfasciatus
Gymnandrosoma aurantianum
Maruca testualis
Micrapate labialis
Microtheba ochrotoma
Neoleucinodes elegantalis
Parlatoria cinerea
Pectinophora gossypiella
Pseudonidia trilobitiformis
Stenoma catenifer
Tyrophagus infestans

BRITISH GUIANA:

Morganella longispina

BRITISH GUIANA—Continued

Parlatoria zizyphus

BRITISH HONDURAS:

Vinsonia stellifera

CANADA:

Agriotes limosus
Allantus cinctus
Athous haemorrhoidalis (?)
Brachyrhinus ovatus
Brachyrhinus rugosostriatus
Bruchus brachialis
Galerucella ranthomelaena
Lecanium fletcheri
Parlatoria oleae
Phenacaspis pinifoliae (?)
Philaenus leucophthalmus
Sitona hispidula

CANAL ZONE:

Ancylostoma stercora
Aspidiotus destructor
Asterolecanium epidendri
Brevipalpus phoenicis
Chrysomphalus personatus
Chrysomphalus umboniferus
Conchaspis orchidarum
Furcaspis biformis
Galgupha punctifer
Leucaspis cockerelli
Megalocysta gibbifera
Nasutitermes corniger
Odonaspis ruthae
Parlatoria pseudaspidiotus
Pheidole megacephala
Platynota rostrana (?)
Pseudonidia trilobitiformis
 "Targionia" hartii
Tenthecoris bicolor
Tenthecoris distinguendus
Tenuipalpus pacificus
Unaspis citri
Vilga dissimilis
Vilga divaricata
Vinsonia stellifera
Zonitoides arboreus

CANARY ISLANDS:

Gnorimoschema ocellatella
Leucaspis pusilla

CAPE VERDE ISLANDS:

Callosobruchus maculatus
Caryedon fuscus

CAYMAN ISLANDS:

Aspidiotus destructor

CENTRAL AMERICA:

Iridomyrmex humilis
Phyllophaga congrua
Stenoma catenifer

CEYLON:

Fureaspis biformis
Parlatoria pseudaspidiotus

CHILE:

Deroceras reticulatum
Leptoglossus chilensis
Megalometis chilensis
Metamasius sericeus
Naupactus xanthographus
Nezara viridula
Nodonota tristis
Pantomorus godmani

CHINA:

Aonidiella inornata
Callosobruchus maculatus
Chrysomphalus diversicolor (tentative)
Fulvius brevicornis
Heterobostrychus aequalis
Lyctus brunneus
Paratetranychus pratensis

COLOMBIA:

Agonum rugulosus
Anastrepha fraterculus
Anastrepha serpentina
Draeculacephala clypeata
Leucaspis cockerelli
Microceroterms exidius
Nysius californicus
Ochterus perbosci

Countries of Origin and Insects—Continued

COLOMBIA—Continued

Pinnaspis buxi
Unaspis citri

COSTA RICA:

Anastrepha mombinpraeoptans
Anastrepha striata
Asterolecanium epidendri
Chrysomphalus umboniferus
Deroceras reticulatum
Furcaspis bifurmis
Limax marginatus
Pentalonia nigronervosa
Phelomerus aberrans
Pseudoschnaspis alienus
Tetranychus mariannae
Tetranychus daphne

CUBA:

Anastrepha mombinpraeoptans
Aspidiotus destructor
Asterolecanium epidendri
Coccus viridis
Cylas formicarius elegantulus
Dialeurodes citrifolii
Gynaikothrips ficorum
Hedylepta indicata
Lamellazis gracilis
Parlatoria cinerea
Pheidole megacephala
Phyllotreta aeneicollis
Pinnaspis buxi
Platynota rostrana
Prodenia eridania
Pibua innozia
Selenothrips rubrocinctus
"Targionia" hartii
Unaspis citri
Vinsonia stellifera

CYPRUS:

Ceratitis capitata

DOMINICA:

Aonidiella comperi
Protopulvinaria longivalvata
Pseudaonidia trilobitiformis
Unaspis citri
Vinsonia stellifera

DOMINICAN REPUBLIC:

Aleurothrixus floccosus
Anastrepha mombinpraeoptans
Ancylostoma stercora
Platynota rostrana

ECUADOR:

Anastrepha serpentina
Bemisia inconspicua
Deroceras reticulatum
Metamasius sericeus
Stenomus catenifer

EGYPT:

Agrotis ypsilon
Ceratitis capitata
Gnorimoschema ocellatella
Hypera brunneipennis
Nodona tristis
Sinorhynchos ceratoniae
Tyrophagus infestans

ENGLAND:

Adoxophyes orana
Aleuroplatus plumosus
Anuraphis tulipae
Barathra brassicae
Brachyrhinus sulcatus
Callosobruchus maculatus
Dasyneura affinis
Deroceras reticulatum
Dialeurodes chittendeni
Eriophyes canestrinii
Frauenfeldtiella jelinekii
Helix nemoralis
Lampetia equestris
Laspeyresia splendana
Limax maximus
Periphyllus californiensis
Phytomyza atricornis (?)
Phytomyza rufipes
Pinnaspis buxi
Psylla buxi
Puletharia vitis

ENGLAND—Continued

Pyrausta nubilalis
Taeniothrips vulgarissimus

ENIWETOK:

Lepidosaphes esakii
Texananus spatulatus

ENIWETOK (?):

Perkinsteella saccharicida

EUROPE:

Rhagoletis cerasi

FIJI ISLANDS:

Aspidiotus palmarum
Perkinsteella vittensis
Sternonchetus mangiferae
Xylothrips religiosus

FORMOSA:

Parlatoria zizyphus
Trogoderma granarium

FRANCE:

Asterobemisia carpinis
Barathra brassicae
Bruchus brachialis
Bruchus guttalis
Bruchus lentis
Bruchus luteicornis
Ceratitis capitata
Chrysomphalus personatus
Deroceras reticulatum
Gortyna flavago
Lampetia equestris
Parlatoria zizyphus
Phytomyza rufipes
Polychrosis botrana
Rhagoletis cerasi

GERMANY:

Acrolepis assectella
Ardis sulcata
Argyrothrips confugella
Aspidiotus pyri
Baris lepidus
Brachyrhinus porcatus
Deroceras reticulatum
Epidiaspis piriicola
Lampetia equestris
Laspeyresia strobilella
Leucaspis loewi
Limax marginatus
Phalonia zephyrana
Phytomyza rufipes
Rhagoletis cerasi
Sitona hispidula
Theba pisana

GOLD COAST:

Leucinodes orbonalis
Xyloperthella crinitarsis

GREECE:

Anuraphis cardui
Bruchus ervi
Bruchus lentis
Callosobruchus maculatus
Capitophorus chrysanthemi
Ceratitis capitata
Curculio elephas
Dacus oleae
Haplothrips cottei
Oreillus depressus
Parlatoria oleae
Sesamia cretica
Siphonius phyllireae
Stephanitis pyri
Unaspis euonymi

GRENADA:

Asterolecanium pustulans
Callosobruchus phaseoli

GUAM:

Aonidiella inornata
Asterolecanium pustulans
Cassida circumdata
Conoderus pallipes
Dacus dorsalis
Lepidosaphes esakii
Pachodynerus nasidens
Prodenia litura
Pseudaonidia clavigera

Countries of Origin and Insects—Continued

GUATEMALA:

Anastrepha ludens
Anastrepha mombinpraeoptans
Anastrepha serpentina
Aulacaspis mangiferae
Chrysomphalus umboniferus
Deroceras reticulatum
Farinococcus guatemalensis
Galgupha punctifer
Limax marginatus
Metamasius sericeus
Oligonychus peruvianus
Ortholomus jamaicensis (?)
Protopulvinaria longivalvata
Puto ulter
Tetranychus desertorum
Vinsonia stellifera

HAITI:

Anastrepha mombinpraeoptans
Coccus viridis
Haplothrips gowdeyi
Parlatoria zizyphus
Systole geniculata

HAWAII:

Adoretus sinicus
Algarobius prosopis
Amorbia emigratella
Aphis citricidus
Araceus rieillardii
Asterolecanium pustulans
Atractomorpha ambigua
Bradybaena similis
Caryedon fuscus
Ceratitis capitata
Cero-plastes rubens
Coccus capparidis
Coccus viridis
Conoderus exsul
Coptotermes formosanus
Cryptophlebia illepidia
Cryptotermes brevis
Cylas formicarius
Dacus cucurbitae
Dacus dorsalis
Deroceras reticulatum
Diocalandra taitensis
Dynatospechus calandroides
Ereunetis flavistriata
Euscepes postfasciatus
Furcaspis biformis
Lampides boeticus
Lepidosaphes tokionis
Lycus brunneus
Maruca testulalis
Mauria subnotatus
Megacerus alternatus
Mimosestes sallaei
Neoscalella seznotata
Nomophila noctuella
Nysius dallasi
Omphisa anastomosalis
Onthophagus incensus
Opogona purpuritella
Orchidophilus aterrimus
Oxydema fusiforme
Oxydema longulus
Pantomorus godmani
Parlatoria crotonis
Parlatoria pseudaspidiotus
Passalococcus luzonensis
Pealius hibisci
Pectinophora gossypiella
Pentalonia nigronervosa
Perkinsiella saccharicida
Phenacaspis sandwicensis
Pinnaspis hui
Plusia chalcites
Pseudoanidia clavigera
Pseudococcus palmarum
Pulvinaria psidii
Sclenothrips rubrocinctus
Spodoptera mauritia
Sternonchus mangiferae
Sybra alternans
Tetranychus cucurbitae

HAWAII—Continued

Trionymus sacchari
Zonitoides arboreus

HONDURAS:

Anastrepha mombinpraeoptans
Chrysomphalus umboniferus
Furcaspis biformis
Ligyrocotis abdominalis
Metamasius sericeus
Pheldole megacephala
Prodenia eridania
Pseudischinaspis alienus
Pseudoparlatoria ostreata
Tenthetoris confusus
Zonitoides arboreus

INDIA:

Aceria tulipae
Asterolecanium epidendri
Brevipalpus phoenicis
Callosobruchus analis
Caryedon fuscus
Cylas formicarius
Cylas formicarius formicarius
Dinoderus brevis
Ferrisia virgata
Heterobostrychus aequalis
Minthea rugicollis
Monomorium destructor
Omphisa anastomosalis
Sinozygon conigerum
Sternonchus mangiferae
Tetranychus piercei
Trogoderma granarium

INDONESIA:

Callosobruchus analis
Coccus viridis
Pinnaspis theae (?)

IRAN:

Bruchus lentis
Bruchus tristis

IRAQ:

Callosobruchus maculatus
Eurygaster integriceps

IRELAND:

Arion ater
Deroceras reticulatum
Tarsonemus laticeps

ISRAEL:

Ceratitis capitata
Gnorimoschema ocellatella
Oryctareus hyalinipennis
Virachola livia (?)

ITALY:

Acrolepia assectella
Anuraphis cardui
Aspidiotus hedericola
Barathra brassicae
Brachycerus albidentatus
Brachycerus algeris
Brevipalpus australis
Brevipalpus phoenicis
Bruchidius gilvus
Bruchus eroi
Bruchus signaticornis
Bruchus tristis
Bruchus tristis
Callosobruchus maculatus
Ceratitis capitata
Cero-plastes ruscii
Cero-plastes sinensis
Cryptoblabes gnidiella
Curculio elephas
Dacus oleae
Deroceras reticulatum
Diaspis zamiae
Dicyphus annulatus
Drasterius bimaculatus
Dyspessa ulula
Epidiaspis piricola
Forficula decipiens
Helix aspersa
Hemimene juliana
Iridomyrmex humilis
Kaloterme flavicollis
Lampetia equestris
Laspeyresia splendana

Countries of Origin and Insects—Continued

ITALY—Continued

Leucaspis loewi
Lixus junci
Monosteira unicastata
Nemapogon granella
Nezara heegeri
Parlatoria oleae
Parlatoria zizyphus
Phalonia zephyrana
Phloeotribus scarabaeoides
Pieris brassicae
Polychrosis botrana
Prays oleellus
Pseudococcus gahani
Pygopleurus vulpes, probably *chrysonota*
Pyrausta nubilalis
Rhagoletis cerasi
Sesamia cretica
Theba pisana

JAMAICA:

Anastrepha mombinpraeoptans
Asterolecanium epidendri
Chrysomphalus tenax
Coccus viridis
Deroceras reticulatum
Fundella pellucens
Furcaspis biformis
Maruca testulalis
Monomorium destructor
Palaeopus costicollis
Pectinophora gossypiella
Pseudoparlatoria ostreata
Vinsonia stellifera

JAPAN:

Aleurotuberculatus similis
Aleyrodes azaleae
Aonidiella inornata
Aonidiella marginipora
Arcte caerulea
Aspidiotus degeneratus
Bradybaena similis
Callosobruchus analis
Callosobruchus maculatus
Carposina sasaki
Ceroplastes japonica
Chilo suppressalis
Chrysomphalus bifasciculatus
Conoderus pallipes
Coptotermes formosanus
Cylas formicarius formicarius
Dialeurodes citri
Eumerus tuberculatus
Glycyphagus domesticus
Grapholitha molesta
Laspeyresia splendana
Lepidosaphes pallida
Lepidosaphes tuberculata
Limax marginatus (?)
Maruca testulalis
Nephotettix apicalis
Nesosteles incisus
Nysius dallasi
Odonaspis secreta
Parlatoria camelliae
Parlatoria theae
Parlatoria zizyphus
Pectinophora gossypiella
Phenacaspis aucubae
"Poliaspis" pini
Porthetria mathura (?)
Prodenia litura
Pseudococcus matsumotoi
Pseudococcus pini
Pulvinaria korii
Pyrausta nubilalis
Scaphoideus albivittatus
Schoenobius incertulus
Stephanitis pyrioides
Unaspis yanonensis

JAPAN (?) :

Autoserica castanea
Trogoxylon aequale

KENYA:

Callosobruchus maculatus
Callosobruchus marshalli
Callosobruchus phaseoli

KOREA:

Chilo suppressalis

KWAJALEIN:

Chrysopera combinans
Lepidosaphes esakii
Mniotricha lichenigera
Pachybrachius nigriceps

LEBANON:

Aceria tulipae
Bruchus ervi
Bruchus tristis
Dacus oleae
Dialeurodes kirkaldyi

LIBERIA:

Leucinodes orbonalis

MADEIRA ISLANDS:

Glycyphagus domesticus

MALTA:

Ceratitis capitata

MARTINIQUE:

Ferrisia virgata

MARTINIQUE (?) :

"*Targionia*" *sacchari*

MEXICO:

Acanthoscelides obvelatus
Aleurocanthus woglumi
Aleuroparadozus gardeniae
Aleuroplatus coccolus
Aleurothrix floccosus
Alpheias conspirata
Amorbia emigratella
Anastrepha fraterculus
Anastrepha ludens
Anastrepha mombinpraeoptans
Anastrepha serpentina
Anastrepha striata
Aspidiotus destructor
Aspidiotus diffinis
Asterolecanium bambusae
Asterolecanium epidendri
Asterolecanium pustulans
Aufeis impressicollis
Aulacoscelis melanocera
Brevipalpus phoenicis
Cacographis osteolalis
Cactophagus validirostris
Calligrapha diversa
Capaneus tetricus
Caulophilus latinasus
Ceratomyza atrofasciata (?)
Chelysoma variabilis
Chilo loftini
Chrysomphalus decorosus
Chrysomphalus lilacinus
Chrysomphalus odontoglossi
Chrysomphalus personatus
Chrysomphalus sphaerioides
Chrysomphalus tenax (?)
Chrysomphalus tingi
Chrysomphalus umboniferus
Conotrachelus aguacatae
Corythucha mclfreshi
Corythucha spinosa
Cosmopolites sordidus
Chryphula apicalis
Chryphula apicatus
Curculio q-griseae
Cylas formicarius elegantulus
Dendrocoris variegatus
Diabrotica lepida
Diorymerellus laevimargo
Disonycha antennata
Dysdercus concinnus
Dysdercus mimulus
Dysdercus obliquus
Epinotia aporema
Eurytoma orchidearum
Eutetranychus banksi
Everes comyntas
Evergestis rimosalis
Erptochiomeria albomaculata
Erptochiomeria confusa
Farinococcus guatemalensis
Genuchinus v-notatus
Geocoris flavilineus
Gnorimoschema gudmannella

Countries of Origin and Insects—Continued

UNITED STATES DEPARTMENT OF AGRICULTURE

AGRICULTURE RESEARCH SERVICE

PLANT QUARANTINE DIVISION

LIST OF INTERCEPTED PLANT PESTS, 1956

(List of Pests Recorded from July 1, 1955, through June 30, 1956 as Intercepted in, on, or with Plants and Plant Products Entering United States Territory.)

Complied by
Judith Hunt
Plant Quarantine Aid

INTRODUCTION

This forty-third report of interceptions summarizes the records of insect pests, plant pathogens, and certain other organisms found in, on, or with plant products (1) imported, (2) offered for but refused entry, (3) held as ships' stores, etc., and hence not offered for entry through customs, (4) offered for entry for immediate transportation and exportation in bond, and (5) in domestic shipments between the American Virgin Islands, Hawaii, and Puerto Rico and the mainland.

This report deals with insects and plant diseases of known or potential plant quarantine significance to the United States. Some common organisms are included if they are (1) new to the country of origin, or (2) new to the host plant, or (3) are of such limited distribution in the United States that they are worthy of mention.

The data for this list which includes some for the previous year, are largely obtained from identifications made by specialists of the Entomology Research Division and Plant Quarantine Division, supplemented by information supplied by State officials. Some, however represent critical studies and determinations made by specialists of the Crops Research Division who also identified many of the host plants cited.

All scientific names are reviewed by specialists in the Department to assure conformance to the International Rules of Nomenclature.

Every effort is made to give the correct origin for all collections listed, questionable cases are omitted or the origin is listed as unknown.

INTERCEPTIONS FROM AIRBORNE MATERIAL

The rapid growth of air transportation continues to increase the danger of foreign plant pests being introduced by this means. In addition to international air travel, commerce in plants and plant products by air is developing steadily. The short time in which pests may now be brought from all parts of the world makes conditions more favorable for their survival and necessitates constant vigilance to apprehend them at ports of entry.

Pests were intercepted on plant material arriving by baggage, express, freight, mail, and stores. During the year 3,367 interceptions were made of insects on imported plant parts or as stowaways, and 476 interceptions of plant diseases.

Some important insects intercepted in airborne material were:

The citrus blackfly (*Aleurocanthus woglumi*) on leaf of *Citrus* sp. in baggage from Mexico.

Anastrepha distincta (?) in inga pod in express from Guatemala.

Anastrepha fraterculus in sapodilla in baggage from Venezuela.

The Mexican fruit fly (*Anastrepha ludens*) in mango in baggage from Mexico; in orange in baggage and stores from Mexico; and in orange in baggage from Guatemala.

The West Indian fruit fly (*Anastrepha mombinpraeopians*) in mango in baggage from Costa Rica, Cuba, Guatemala, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, and Salvador; in mango in cargo from Costa Rica, Guatemala, and Puerto Rico; in mango in mail from Puerto Rico and Salvador; and in mango in quarters from Guatemala.

Anastrepha serpentina in *Annona* sp. in baggage from Peru; in sapodilla in baggage from Guatemala, Nicaragua, and Salvador; and in star-apple in cargo from Guatemala. One adult of *A. serpentina* in cabin of an airplane from Central America or South America.

Anastrepha striata in guava in baggage from British Honduras, Costa Rica, Nicaragua, and Salvador and in guava in quarters from Guatemala.

Carposina sasakii in apple in baggage and stores from Japan.

The Mediterranean fruit fly (*Ceratitis capitata*) in apple in baggage from Italy; in apple in quarters from Portugal; in apple in stores from the Azores, Portugal, and Spain; in apricot in baggage and stores from Italy; in apricot in stores from an unknown origin; in coffee berries in baggage from Brazil; in coffee berries in pre-flight inspection of baggage and cargo leaving Hawaii for the mainland; in fig in baggage from the Island of Rhodes and Italy; in guava in baggage from the Azores and Israel; in loquat in baggage from the Azores; in Mandarin orange in baggage from Cape Verde Islands and Israel; in medlar in baggage from Italy; in nectarine in stores from France; in orange in baggage from Israel, Italy, Lebanon, and Portugal; in orange in stores from the Azores, Israel, Portugal, and Spain; in peach in baggage from Italy, Lebanon, Portugal, and Spain; in peach in cargo from Italy; in peach in stores from Brazil, France, Italy, Portugal, and Spain; in pear in baggage from France, Portugal, and Spain; in pear in quarters from Libya and an unknown origin; in pear in stores from Portugal; in pricklypear in baggage from Italy; in quince in baggage from Greece; and in sweet lime in baggage from the Azores. *C. capitata* (?) in green almond in baggage from Greece; in guava in baggage from Portugal; in guava in quarters from South America; in lemon in stores from Spain; in mango and mountain apple in preflight inspection of baggage leaving Hawaii for the mainland; in nectarine in stores from Brazil; in orange in baggage from Israel and Italy; in orange in stores from the Azores, Portugal, and Spain; in peach in baggage from Italy; in peach in stores from Spain; in pear in quarters from Italy; and in persimmon in baggage from Italy.

The banana root borer (*Cosmopolites sordidus*) in root of banana plant in baggage from Panama.

Cylas formicarius ssp. in sweetpotato in cargo from the Philippines and Thailand.

An adult of *Dacus cucurbitae* was found in preflight inspection of a plane leaving Hawaii for the mainland and another adult of the same species was found on the flight deck of an airplane originating in Midway.

Dacus dorsalis in coffee berries, mango, papaya, and ti berries in preflight inspection of baggage leaving Hawaii for the mainland. An adult of *D. dorsalis* was found in an airplane leaving Hawaii for the mainland and another adult was found on an airplane

from the West Pacific. *D. dorsalis* (?) in *Thevetia peruviana* in preflight inspection of baggage leaving Hawaii for the mainland.

Dacus oleae in olive in baggage from Greece, Italy, Lebanon, and Portugal and in olive in stores from Italy.

Possibly *Dacus passiflora* in mango in baggage from the Fiji Islands.

Olethreutes leucotreta in orange in stores from the Union of South Africa.

The pink bollworm (*Pectinophora gossypiella*) in cottonseed in baggage from Puerto Rico; in cotton boll in preflight inspection of baggage leaving Hawaii for the mainland; and in seed cotton in baggage from Italy.

Rhagoletis cerasi in cherry in baggage from France, Germany, and Italy, in cherry in quarters from France; and in cherry in stores from the Azores, France, Israel, Italy, Portugal, and Switzerland.

The khapra beetle (*Trogoderma granarium*) in rice in cargo from India.

Interceptions of airborne plant pathogens of interest were:

Chrysomya ledi var. *rhododendri* on alpine azalea in baggage from Switzerland.

Daphne mosaic virus on foliage of daphne in mail from England.

Guignardia traversi on *Stanhopea* sp. in cargo from the Canal Zone.

Ophiotothella orchidearum on *Epidendrum* sp. in cargo from Cuba.

Phleospora pistaciae on pistache nut in baggage from Lebanon.

Phoma citricarpa on *Citrus* sp. in baggage from the Philippines; on lemon in stores from Portugal; and on Mandarin orange in baggage from Indo-China.

Phyllostictia pyrifomis on an orchid leaf in cargo from Honduras.

Puccinia asparagi on asparagus in baggage from Greece.

Puccinia buxi on a box leaf in baggage from Italy.

Puccinia scirpi on stems of *Scirpus maritimus* in baggage from Portugal.

Puccinia urbaniana on leaf of *Stachytarpheta jamaicensis* in baggage from Martinique.

Septoria unedonis on leaf of strawberry tree in baggage from Ireland.

Uredo behnickiana on a leaf of *Phajus* sp. in cargo from Jamaica.

Uredo guacae on leaf of *Epidendrum* sp. in cargo from Jamaica; and on an orchid leaf in cargo from Honduras.

Uredo oncidii on leaf of *Oncidium pulchellum* in baggage from Jamaica.

Uromyces transversalis on a gladiolus leaf in cargo from the Union of South Africa.

Citrus canker (*Xanthomonas citri*) on Mandarin orange in baggage from China; on Mandarin orange in baggage and stores from Japan and the Philippines; on an orange in baggage from China and Japan; and on an orange in stores from Japan.

The following nematodes were also found in airborne material:

The oat nematode (*Heterodera avenae*) in soil with dried seed beans in baggage from Brazil; in soil with fuchsia and oleander plants in baggage from Austria; in soil with strawberry plants in cargo from Germany; and in soil with tulip bulbs in baggage from Spain.

Heterodera fici in soil with carnation and fig plants in baggage from Italy; and in soil with fig roots in mail from Italy.

Heterodera humuli in soil with hop cuttings in cargo from Switzerland.

Heterodera punctata in soil with narcissus bulbs and plants in baggage from Germany; in soil with geranium plants and gladiolus corms in baggage from Ireland.

The golden nematode (*Heterodera rostochiensis*) in soil with pine seedlings in baggage from Germany; in soil with begonia, carnation, clover, and geranium plants in baggage from Germany; and in soil with potatoes in mail from England.

Pratylenchus penetrans with roots of clematis in cargo from the Netherlands.

NOTES ON INSECTS INTERCEPTED

FRUIT FLIES

The following fruit flies were intercepted:

Anastrepha distincta (?) in inga pod in air express from Guatemala.

Anastrepha fraterculus in grapefruit and orange in stores from Brazil and in sapodilla in air baggage from Venezuela. *A. fraterculus* (?) in grapefruit in stores from Brazil; and in orange in stores from Argentina and Brazil.

The Mexican fruit fly (*Anastrepha ludens*) in apple in baggage from Mexico; in grapefruit in baggage from Mexico and in grapefruit in stores from Nicaragua; in Mandarin orange in baggage from Mexico; in mango in baggage, air baggage, and quarters from Mexico; in orange in baggage and air baggage from Guatemala; in orange in baggage, air baggage, quarters, stores and air stores from Mexico; and in pear, pomegranate, ponderosa lemon, quince, sapote, and sweet lime in baggage from Mexico.

The West Indian fruit fly (*Anastrepha mombinpraeoptans*) in almonds in quarters from Trinidad; in grapefruit in stores from Barbados; in guava in baggage from Mexico and in air baggage from Nicaragua and Trinidad; in guava-berry in baggage and cargo from Tortola; in mango in air baggage from Costa Rica, Cuba, Guatemala, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, and Salvador; in mango in baggage from Mexico, Panama, and Puerto Rico; in mango in air cargo from Costa Rica, Guatemala, and Puerto Rico; in mango in cargo from Dominica; in mango in air mail from Puerto Rico and Salvador; in mango in air quarters from Guatemala; in mango in quarters from Cuba and Haiti; in mango in stores from Guatemala, Panama, and Puerto Rico; in pear in baggage from Mexico; in purple mombin in air baggage from Nicaragua; in *Spondias* sp. in air baggage from Nicaragua and Salvador; in *Spondias* sp. in baggage from Panama; in yellow mombin in air baggage from Guatemala, Nicaragua, and Salvador; in yellow mombin in air cargo from Guatemala; and in yellow mombin in cargo from Jost Van Dykes.

Anastrepha serpentina in *Annona* sp. in air baggage from Peru; in mamey sapote in baggage from Mexico; in sapodilla in air baggage from Guatemala, Nicaragua, and Salvador; and in star-apple in air cargo from Guatemala. One adult of *A. serpentina* in passenger's cabin of an airplane from Central America or South America.

Anastrepha striata in guava in air baggage from British Honduras, Costa Rica, Nicaragua, and Salvador; in guava in baggage from Mexico; in guava in air quarters from Guatemala; and in mango in stores from Panama.

The Mediterranean fruit fly (*Ceratitis capitata*) in apple in air baggage and baggage from Italy; in apple in air quarters from Portugal; in apple in air stores from the Azores, Portugal, and Spain; in apple in stores from Spain; in apricot in air baggage from Italy; in apricot in cargo and stores from Spain; in apricot in air stores from Italy and an unknown origin; in carambola in baggage from Hawaii; in coffee berries in air baggage from Brazil; in coffee berries in baggage from Hawaii; in coffee berries in preflight inspection of baggage and cargo leaving Hawaii for the mainland; in coffee berries in mail leaving Hawaii for the mainland; in *Crataegus* sp. in baggage from Italy; in fig in air baggage from the Island of Rhodes and Italy; in grapefruit in quarters from Israel; in grapefruit in stores from Israel and Italy; in guava in air baggage from the Azores and Israel; in loquat in air baggage from the Azores; in Mandarin orange in air baggage from Cape Verde Islands and Israel; in Mandarin orange in baggage from Italy; in medlar in air baggage from Italy; in nectarine in air stores from France; in orange in air baggage from Israel, Italy, Lebanon, and Portugal; in orange in baggage from Algeria, Greece, and Italy; in orange in quarters from the Union of South Africa; in orange in air stores from the Azores, Israel, Portugal, and Spain; in orange in stores from Brazil, Canary Islands, Egypt, Israel, Italy, and Spain; in peach in air baggage from Italy, Lebanon, Portugal, and Spain; in peach in baggage from an unknown origin; in peach in air stores from Brazil, France, Italy, Portugal, Spain, and an unknown origin; in peach in stores from France; in pear in air baggage from France, Portugal and Spain; in pear in baggage from Spain; in pear in air quarters from Libya and unknown origin; in pear in quarters from Portugal; in pear in air stores from Portugal; in pear in stores from Spain; in pomegranate in baggage from Italy; in pricklypear in air baggage from Sicily; in pricklypear in baggage and stores from Italy; in quince in air baggage from Greece; and in sweet lime in air baggage from the Azores. *C. capitata* (?) in almond in air baggage from Greece; in apple in air quarters from the Azores (?); in apple in air stores from Portugal; in coffee berry in preflight inspection of baggage leaving Hawaii for the mainland; in grape in baggage from Italy; in grapefruit in stores from British East Africa; in guava in air baggage from the Azores and Portugal; in guava in air quarters from an unknown origin; in lemon in air stores from Spain; in mango and mountain apple in preflight inspection of baggage leaving Hawaii for the mainland; in nectarine in air stores from Brazil; in orange in air baggage from Israel and Italy; in orange in baggage from Italy and Palestine; in orange in air stores from the Azores, Portugal, and Spain; in orange in stores from Brazil; in peach in air baggage from Italy; in peach in air stores from Spain and an unknown origin; in pear in air quarters from Italy; in persimmon in air baggage from Italy; and in pricklypear in baggage from Italy.

The melon fly (*Dacus cucurbitae*) in cucumber and tomato in stores from Hawaii. One adult of the melon fly was found on an airplane during preflight inspection at Hickam Field, Hawaii and another adult was found at Hickam Field on the flight deck of an airplane originating in Midway.

The oriental fruit fly (*Dacus dorsalis*) in coffee berries, mango, papaya, and ti berries in preflight inspection of baggage leaving Hawaii for the mainland; and in *Ficus* sp., guava, and persimmon in mail leaving Hawaii for the mainland. One adult of *D.*

dorsalis was found on an airplane from the West Pacific (?) and another adult was found during preflight inspection of a plane leaving Hawaii for the mainland. *D. dorsalis* (?) in mango in baggage from Hawaii; in *Thevetia peruviana* in preflight inspection of baggage leaving Hawaii for the mainland; and in tropical almond in mail leaving Hawaii for the mainland.

The olive fruit fly (*Dacus oleae*) in olive in air baggage from Greece, Italy, Lebanon, and Portugal; and in olive in baggage, air stores, and stores from Italy.

Dacus passiflorae (?) in mango in air baggage from the Fiji Islands.

Rhagoletis cerasi in cherry in air baggage from France, Germany, and Italy; in cherry in air quarters from France; and in cherry in air stores from the Azores, France, Israel, Italy, Portugal, Switzerland, and an unknown origin.

Rhagoletis completa in black walnut in baggage from Mexico.

The apple maggot (*Rhagoletis pomonella*) in apple in air baggage and baggage from Mexico.

The papaya fruit fly (*Toxotrypana curvicauda*) in papaya in stores from Costa Rica.

INSECTS OTHER THAN FRUIT FLIES

The following miscellaneous insects of unusual interest were intercepted:

The citrus blackfly (*Aleurocanthus woglumi*) on an orange leaf and on a leaf of *Citrus* sp. in baggage from Mexico and on sour lime leaf in cargo from Mexico.

A tortricid, *Austrotortrix postvittana* in apple in cargo from New Zealand.

Bruchophagus glycyrrhizae (Eurytomidae) on *Glycyrrhiza* sp. in mail from Iran.

Coptotermes niger, a very destructive termite, in wooden packing case in cargo from Nicaragua.

A curculionid, *Cylas formicarius* ssp. in sweetpotato in air cargo from the Philippines and Thailand and in *Ipomoea* sp. in cargo from China.

Dyspessia ukula (Cossidae) in garlic in cargo from Italy.

A coccinellid, *Epilachna paenulata*, on banana in cargo from Ecuador.

A coccinellid, *Epilachna philippinensis*, on clothing of a crew member on an airplane from Guam.

Frankliniella schultzei (Thripidae) on carnation in air quarters from South America and on chinkerichiee in air cargo, cargo, and mail from the Union of South Africa.

A chrysomelid, *Lilioeris lilii* with lily bulbs in air baggage from Italy.

Olethreutes leucotreta (Olethreutidae) in grapefruit from the Union of South Africa; in orange in stores from Mozambique and the Union of South Africa; and in navel orange in air quarters from North Africa (?).

The durra stem borer (*Sesamia cretica*) in broomcorn in cargo from Italy.

Stephanoderes hampei (Scolytidae) in coffee berries in baggage and mail from Brazil; and in coffee berries in mail from Ceylon.

Trogoderma granarium (Dermestidae) with used burlap bags in cargo from India; with grain bags containing wheat bran, corn meal, and crushed oats from Australia; in rice in stores from Formosa and India; in split peas in stores from India; and in peanut in stores from Formosa.

SNAILS

The giant African snail (*Achatina fulica*) was intercepted on cut flowers of torch ginger during preflight inspection of baggage leaving Hawaii for the mainland.

Bradybaena similis, an injurious snail not established in the United States, was intercepted 119 times with cut flowers and plant material in baggage, cargo, and mail leaving Hawaii for the mainland. It was also intercepted with pineapple in baggage from Brazil and cut flowers of *Lilium* sp. in baggage from Bermuda.

Lamellaris gracilis, injurious in greenhouses and not established in the United States, was found on a philodendron plant during mail inspection of material leaving Hawaii for the mainland.

Other snails of economic importance but of limited distribution in the United States worthy of mention are: *Deroceras reticulatum*, *Limax flavus*, *L. marginatus*, *Milax gagates*, *Oxychilus allarius*, *Theba pisana*, and *Zonitoides orboreus*.

NOTES ON DISEASES INTERCEPTED

The sweet orange scab was intercepted 74 times; 16 of these interceptions came from Argentina on lemon, Mandarin orange, and orange; 57 from Brazil on grapefruit, lemon, Mandarin orange, orange, and sour lime; and one from an unknown origin on orange.

Citrus canker (*Xanthomonas citri*) was intercepted 137 times; 96 of these came from

Japan, 33 from China, 3 from Thailand, 2 from the Philippines, and one each from Ceylon, India, and the Straits Settlements. These interceptions were made from the following hosts: *Citrus grandis*, *C. ichangensis* var., *C. x ichangensis*, *C. sinensis* junos, grapefruit, lemon, Mandarin orange, sour lime, sour orange, and sweet orange.

Cancrosis B. (*Xanthomonas* sp.), another bacterial disease of citrus, producing symptoms similar to citrus canker, was intercepted twice on lemon from Brazil and once on grapefruit from Brazil (?).

Other interceptions are:

Cercospora cyripedii on an orchid leaf in mail from Mexico; and on leaf of *Stanhopea* sp. in baggage from Mexico.

Daphne mosaic virus on daphne foliage in air mail from England.

Diaporthe citri on grapefruit in stores from Ecuador.

Eudarlucula australis on chrysanthemum in air baggage from Japan.

Monilinia fructigena on plum in air baggage from France.

Phoma citricarpa on grapefruit in stores from British East Africa; on grapefruit in stores from Egypt; on grapefruit in baggage from Pakistan; on lemon in air stores from Portugal; and on Mandarin orange in air baggage from Indo-China.

Puccinia erythraeensis on leaves of *Hyparrhenia lintonii* in mail from Kenya.

Puccinia miscanthi on *Miscanthus* sp. in baggage from Japan.

Puccinia phyllostachydis on bamboo leaf in express from Japan.

NEMATODES

The oat nematode (*Heterodera avenae*) was intercepted 32 times from the following countries: Austria, Brazil, Denmark, England, Germany, Greece, Israel, Italy, Spain, and Tunisia. These interceptions were taken in soil with dried seed beans, soil with bulbs, soil with plant material, soil with snails, soil with vegetables, soil with automobiles, and with soil scooped up by a jet plane which crashed in England.

The golden nematode (*Heterodera rostochiensis*) was intercepted 25 times from the following countries: Argentina, England, Germany, Ireland, Mexico, Peru, and Scotland. These interceptions were taken in soil with bulbs, with plant material, and with vegetables.

Rotylenchus bradys, not known to be established in the United States, was intercepted in yam in baggage from Trinidad.

Some other nematodes of possible concern were several species of the genus *Meloidogyne* intercepted from Brazil, Canada, Greece, Guatemala, Hawaii, Israel, Italy, Japan, Mexico, Netherlands, Syria, and Trinidad with various plant materials and with vegetables.

INCOMPLETELY DETERMINED PESTS

Frequently insects or pathogens affecting plant material are found in such stage or conditions that an accurate determination is impossible or impracticable. Some of these pests may be of economic importance.

INSECTS

Among the incompletely determined insects were the following fruit flies:

Anastrepha sp., possibly *distincta*, at New Orleans, La., in inga pod in air mail from Costa Rica and in inga pod in air express from Guatemala.

Anastrepha sp., probably *fraterculus*, at Baltimore, Md., in grapefruit in stores from Trinidad; at Charleston, S. C., in grapefruit in stores from Ecuador; at Eagle Pass, Tex., in mango in baggage from Mexico; at New York, N. Y., in *Annona* spp. in air stores from Colombia and in cherimoya in air baggage from Colombia; and at San Ysidro, Calif., in mango in baggage from Mexico.

Anastrepha sp., possibly *ludens*, at Brownsville, Tex., in apple and pear in baggage from Mexico; at El Paso, Tex., in orange and pear in baggage from Mexico; at Laredo, Tex., in grapefruit in baggage from Mexico; at Miami, Fla., in soursop in air baggage from Nicaragua; and at San Antonio, Tex., in white sapote in air baggage from Mexico.

Anastrepha sp., possibly *mombinpraeoptans*, at Laredo, Tex., and at San Ysidro, Calif., in mango in baggage from Mexico. *Anastrepha* sp., very much like *mombinpraeoptans*, at New York, N. Y., in *Spondias* sp. in baggage from Ecuador.

Anastrepha sp., possibly *serpentina*, at San Antonio, Tex., in quince in air baggage from Mexico.

Anastrepha sp., possibly *striata*, at San Juan, P. R., in guava in air baggage from the Dominican Republic.

Anastrepha sp. at Baltimore, Md., in orange in stores from Peru; at Brownsville, Tex., in mango in air baggage from Nicaragua and in mango, orange, pear, pomegranate and sapote in baggage from Mexico; at Corpus Christi, Tex., in mango in stores from Ecuador; at Eagle Pass, Tex., and El Paso, Tex., in mango in baggage from Mexico; at Hidalgo, Tex., in apple, avocado, and mango in baggage from Mexico; at Houston, Tex., in mango in air baggage from Mexico and in orange in stores from Brazil; at Laredo, Tex., in mamey sapote in baggage from Mexico; at Miami, Fla., in mango in air baggage from Honduras, Nicaragua, and Panama; at Mobile, Ala., in grapefruit in stores from Argentina; in mango in air baggage from Panama; and in mango in quarters from Trinidad; at New York, N. Y., in *Annona* spp. in air baggage from Colombia and Venezuela; at Philadelphia, Pa., in orange in stores from Brazil; at Roma, Tex., in apple in baggage from Mexico; at San Antonio, Tex., in white sapote in air cargo from Mexico; and at San Juan, P. R., in sapodilla in air baggage from the Dominican Republic.

Dacus sp. at Honolulu, Hawaii in balsamapple in preflight inspection of baggage leaving Hawaii for the mainland; at Honolulu, Hawaii in *Nephelium lappaceum* in air baggage from Thailand.

Rhagoletis sp. at Galveston, Tex., in crab apple in quarters from Mexico; and at El Paso, Tex., in thornapple in baggage from Mexico.

Thirty-three interceptions, identified to family only, Tephritidae, were intercepted at the following ports: Baltimore, Md., in cucumber in stores from Liberia and in grapefruit in stores from Brazil; at Boston, Mass., in lemon in stores from Australia; in orange in stores from Argentina; a pupa with parsley in air stores from France (?); and in squash in stores from Indonesia; at Brownsville, Tex., in apple and Rosaceae fruit in baggage from Mexico; at Honolulu, Hawaii in apple in air stores from Australia and Japan; in cactus fruit in air baggage from Guam; in *Durio zibethinus* in air baggage from the Philippines (?); in mangosteen in air stores from Malaya; and in santol in air baggage from the Philippines; at Miami, Fla., in *Pyrus* sp. in air baggage from Panama; at New York, N. Y., in *Cynara* sp. (wild artichoke) in cargo from Italy; in globe artichoke in stores from Italy; in orange in air baggage from Turkey; in plum and radish in air baggage from France; at Nogales, Ariz., with cactus plants in cargo from Mexico; at Philadelphia, Pa., in flower head of bachelors-button in air quarters from an unknown origin; in grapefruit in stores from Australia; and in turnip in stores from French West Africa; pupae at San Antonio, Tex., with leaves of *Chamaedorea oblongata* and *Chamaedorea* sp. in air cargo from Mexico; and in orange in air stores from England; at San Diego, Calif., in tomato in stores from Hawaii; at Seattle, Wash., in mango in air baggage from the Philippines; and at Washington, D. C., in miyama cherry in mail from Japan and pupae with *Rosa* sp. in mail from Iran.

Other incompletely determined insects worthy of mention were:

A bruchid, *Acanthoscelides* sp., apparently new to the National Museum collection, at Washington, D. C., with *Calopogonium mucunoides* in mail from Costa Rica.

Aceria sp. (Eriophyidae), possibly a new species, at Washington, D. C., on *Agropyron* sp. in mail from Iran.

Arphanus sp. (Lygaeidae), a new species, at Nogales, Ariz., on an orchid plant in cargo from Mexico.

A coccid, *Aspidiotus* sp., not recognized as a described form, at San Pedro, Calif., on an orchid leaf in air cargo from Ecuador.

Baris sp. (Curculionidae) at Houston, Tex., in turnip in stores from France.

Blastodacna sp. (Blastodacnidae) at New York, N. Y., in apple in air stores from England.

An undescribed bruchid, apparently representing a new genus and a new species, at Washington, D. C., in seeds of *Prosopis* sp. in mail from Argentina.

Bruchidius sp., near *cicatricosis* (Fahr.) (Bruchidae) and new to the National Museum collection, at Washington, D. C., in crotalaria seed pod in mail from Rhodesia.

Bruchidius sp., near *jocosus* (Schönh.) (Bruchidae), new to the National Museum collection, at New York, N. Y., in white lupine seed in mail from Greece.

Bruchidius sp., near *orchesioides* (Heyd.) (Bruchidae), at Washington, D. C., in *Lotus* sp. pod in mail from Rhodesia.

Bruchidius sp. (Bruchidae), new to the National Museum collection, at Washington, D. C., in seed of *Alysicarpus rugosus* in mail from Rhodesia and Tanganyika; in seed pod of *Astragalus* sp., and seed of sainfoin in mail from Iran; and with *Tephrosia* sp. seed pod in mail from Rhodesia.

A curculionid, *Cleonus* sp. at Philadelphia, Pa., in beet in stores from Egypt; and at New York, N. Y., with horseradish in cargo from Germany.

A phycitid, *Cryptoblabes* sp., at Honolulu, Hawaii on Brazilian peppertree berries in mail leaving Hawaii for the mainland.

A curculionid, determined to family only, at New Orleans, La., in pigeonpea pod in air baggage from Panama.

Cyrtozemia sp., evidently *dispar* Pasc. (Curculionidae), at Washington, D. C., with *Solanum xanthocarpum* in mail from India.

"*Eulia*" sp. (Tortricidae) at New York, N. Y., with grapes and peaches in cargo from Chile.

Gnorimoschema sp., near or equals *atriplicella* (F. R.) (Gelechiidae), at Boston, Mass., in tomato in stores from French West Africa.

A curculionid, *Gonipterus* sp., evidently *scutellatus* Gyll., at New York, N. Y., with grapes in cargo from the Union of South Africa.

Gymnandrosoma sp. (Olethreutidae) at Baltimore, Md., in an orange in quarters from Ecuador; at Galveston, Tex., in grapefruit in stores from Mexico; and at Houston, Tex., in an orange in stores from Mexico.

Hepialus sp. (Hepialidae) at Laredo, Tex., in a pseudobulb of *Cattleya* sp. in cargo from Mexico; and at Hoboken, N. J., in pseudobulb of *Dendrobium* sp., in mail from India.

Heterarthrus sp. (Tenthredinidae) at Washington, D. C., in *Rhododendron albrechtii* leaf in mail from Japan.

Hoplothrips sp. (Phlaeothripidae), probably one of the old European species, at Philadelphia, Pa., in celery in stores from Italy.

Hyperodes sp., probably *hirtella* (Dtz.) (Curculionidae), at Miami, Fla., with an orchid plant in air mail from the Canal Zone.

Hyperodes sp., at Charleston, S. C., in carrot in stores from Argentina; at Honolulu, Hawaii with orchid plants in mail from the Canal Zone; at Miami, Fla., with a leaf of *Trichopilia suavis* in air mail from the Canal Zone; at Philadelphia, Pa., in carrot in stores from Argentina; at San Pedro, Calif., with orchid plants in cargo and mail from the Canal Zone; and at Seattle, Wash., with orchid plants in mail from the Canal Zone.

A scolytid, *Ips* sp., at Mobile, Ala., in pine bark crating in air cargo from North Africa.

An ant, *Iridomyrmex* sp., probably a new species for the National Museum collection, at Nogales, Ariz., on an orchid plant in cargo from Mexico.

Lepidosaphes sp., very close to *noxia* McKenzie (Coccidae), but probably distinct, at Hoboken, N. J., on a leaf of *Vanilla* sp., in air cargo from British East Africa.

Leucaspis sp. (Coccidae) at Chicago, Ill., with arborvitae plants in mail from New Zealand.

A pyraustid, *Leucinodes* sp., not represented in the National Museum collection, at Washington, D. C., with *Solanum* sp., in mail from the Union of South Africa.

Lixus sp. (Curculionidae) at Baltimore, Md., in beet in stores from Italy; and at Philadelphia, Pa., in beet in stores from Egypt.

Longitarsus sp., probably *ochroleucus* Mshl. (Chrysomelidae) at Boston, Mass., with chrysanthemum in air baggage from England.

A lygaeid, new genus and new species, at New York, N. Y., with forest litter, containing mostly sphagnum moss, in air stores from Colombia.

Margarodini (Coccidae), genus uncertain, but a very interesting collection, at Washington, D. C., on an undetermined grass in mail from Iran.

A curculionid, *Mecinus* sp., at Hoboken, N. J., on an aleppo pine cone in air mail from Greece.

Oxythrips sp. (Thripidae) at New York, N. Y., on a pine tree in air baggage from Sweden.

Pectinophora sp., *platyedra* complex, (Gelechiidae), at Chicago, Ill., with *Plagianthus betulinus* seeds in mail from New Zealand.
